THE THREE GREENS.

Shortly after the Crimean war an individual whose right arm was encased in splints and hung in a sling, cased in splints and hung in a sling, entered a magnificent jewelry shop, the proprietor of which was a Mr. James Green. The stranger had that in his appearance which is generally styled distingue, his carriage and garb revealed the military veteran, and his manners the finished gentleman. At the door halted an elegant cabriolet, and the good taste of its owner was apparent by the plain but neat livery of the groom and the choice trappings of the blooded horses.

The stranger stated that he was delighted goldsmith. "Give me your hand and and again."

The stranger stated that he was destrous of procuring a complete silver table-service, rich, solid and elegant, ut with little ornamentation. Could Mr. Green prepare such a one for him?
The goldsmith answered, of course, in
the affirmative, and showed several the affirmative, and showed several patterns to his visitor, who then described very minutely the style in which he wished the articles to be made, and asked what time they could be got ready. At the same time he insisted on inctuality, saying he would use the set at a reception he would soon give at his new residence in Leicester

requested Mr. Green to add as many more pieces to the set as would fix the price at that sum. Mr. Green thanked he gentleman for this mark of confience, and inquired of him to whose recommendation he owed his patron-

"No one has recommended you to me," replied the stranger. The jeweler looked up in surprise. The stranger, who had hitherto worn an air of dignity almost amounting to

asperity, now became more friendly, and centinued: "I am a soldier. I have served for years in India, and more recently in the Crimea. At Balaklava I received a severe wound in my right arm and hand, which will perhaps disable the member for life. My patronage you owe to your parents, grandparents, and, in fact, to the whole line of your

"The jeweler was amazed and bewildered. His parents and other ancestors had long been dead, and could not have referred the soldier to him.

in consequence of this unfortunate wound"—here a sudden twinge in his arm made him start painfully-"I was compelled to leave the service I resolved to settle down in London. While riding out the other day my attention as attracted by the appearance of money, though, it is true, never with as much as this time. Fifteen hundred by the name on your sign, for dred pounds may have proved too melancholy. A woman behind her manner. was attracted by the appearance of ur splendidly-furnished shop, but mine is precisely the same. To this simple circumstance you owe the present visit from Col. James Green of the

renadier Guards."

"May I now inform you," said the eweler, with some hesitation, "of the onditions which must generally be plied with previous to making

"No," said the colonel sharply. " have my own way of doing business. You and I do not know each other; and although my order is not an unamonly large one, still it amounts te a sum with which you cannot credit astranger. I will therefore pay you 2100 cash down for a surety, the remaining £1,400 when I call for the

Mr. Green accepted the offer with profuse thanks.

"You need not thank me," the officer interrupted. "As I remarked, I always have a way of my own, from which I never like to deviate. Now do me the favor to take my portmon naie from my coat pocket; my unfortunate Balaklava wound"—the colonel again winced with pain—"has lamed my right arm and hand completely." Mr. Green expressed his sympathy the warmest terms, carefully pulled the portmonnaie from the veteran' coat pocket, opened it at the latter's ire, and from four or five £100 notes took one, which the colonel requested him to keep. Mr. Green wrote off a receipt and placed it in the pocketbook, which he very carefully restored to its place. He then assisted the onel to enter the carriage, and the om—Col. Green could not drive on account of his injured arm—rapidly drove off in the direction of Leicester uare. The jeweler, though much verjoyed, was a cautious business lan, and notwithstanding the considerable deposit, proceeded to make his

better be imagined than described."

"Now to business," said the colonel.

"Be so kind as to take out mypocketbook and count off your £1,500, for I
do not wish to tarry a moment before
showing your chef d'œuvre to my wife."

The jeweler hastened to comply. He took from the officer's breast coatnot be pocket a card-case, a set of ivory tablets and a silk purse through whose lets a silk purse through whose lets a silk pu lets and a silk purse, through whose his employers do not watch him he

set at a reception of the residence in Leicester square. Green promised to have it done in three weeks, and then the two parties discussed the terms.

The jeweler very carefully made all his calculations and demanded £1,200.

The jeweler very carefully made all his pockets. The search was futile.

"Strange! Incomprehensible! Could I have been robbed?" muttered the colonel, audibly, perplexed and probable in the confident hope of a hatter life."

The pastor of a popular church one Sabbath evening at the Sunday school

my wife?"

With these words the officer stepped to the jeweler's desk, on which lay Black Hills to seek his fortune, and Black Hills to seek his fortune, and some writing paper printed with the name of the firm. Taking a sheet he placed it before the jeweler, saying: "This will do; my wife knows that I am here." He then dictated and the am here." He then dictated and the large that "Black Hills to seek his fortune, and wrote back to his father that he had done well. "I will be at home on Wednesday evening. Meet me at dark, just out of town, and bring a blanket or a whole pair of trousers with you. "My dear wife: Have the goodness I have a hat."

"My dear wife: Have the goodness to send me £1,500 through the bearer. You know where the money is kept. I am in immediate need of it; therefore do not detain the messenger, who is a trustworthy person. Your affectionate husband, JAMES GREEN."

The groom took the letter, bowed and quickly drove off.

The groom took the letter, bowed and quickly drove off.

Take a lat.

Doctor X. is as bad a hunter as he is a physician, but this does not prevent him regularly as the hunting season comes round from spending a fortnight in the fields with his dog and gun. "And that's the only period of the year when he doesn't kill anything," said one of his colleagues, kindly.

On a small scale previously unknown in that country, and has since been extensively culti-vated there, as something quite superi-or to most of the other varieties. JACK MARLAND.

How he Solved a very Tough but Interest ing Problem.

Jack Marland was a happy fellow—
at least any one who saw him seated
in his comfortable chambers in the
Temple in a vast easy chair, and enveloped with clouds of smoke proceeding from his favorite meerschaum, as
the bell of St. Paul's rang ten, would
have said so. Jack was a clever fellow
too; he sang well, he danced well; the
partridges on the first of September
knew him well; the Cheshire hounds
were not acquainted with him; the Isis
and the Thames were intimate with
him (for Jack pulled a good oar); a
dab at fencing, a fair single-stick player, in his element in the pistol gallery;
and, to crown all, he had just made a
not unsuccessful debut as a speaker in not unsuccessful debut as a speaker in the courts of Westminister. Jack truly ought to have been happy, from a thousand reasons: he was a favorite meshes glittered some five or six sovereigns—but no pocketbook. Upon can accomplish the task.—Rockland with his acquaintances and prefessional brethren; by the fair sex, his witty al brethren; by the fair sex, his witty conversation and handsome and gentlemanly person and demeanor were duly appreciated; in short, he was universally liked. Papas and mamas opened their doors to him (for he had a nice little fortune at his command); daughters and sons were glad when he .entered the doors so thrown open, for not a "Twenty minutes to five."

"Good; it is time enough. You must make yourself serviceable to me once more, my dear Mr. Green, and act as my secretary. You know I cannot use my right hand. Will you have the goodness to write a few lines for little six-year old boy.

Sabbath evening at the Sunday school from the time Jack came to the time your beautiful song to-night, I had hard work to keep my feet still; what do you suppose is the trouble with them?" "Chilblains, sir!" cried out a little six-year old boy. spite of his accomplishments, his cleverness, and his handsome face and figure, he, Jack, was a coward, and that, if ever his courage should be put to the proof, he should be lamentably wanting. That was Jack's ombronoir; this was the thought which embittered Jack's existence; and at the time we introduced Jack to the notice of our readers, he was in his aforesaid easy

A third time he raised his arm, and feeling the child. It was such a longly place to the child. It was such a longly place time, monsieur! take time take time take time take time take time take ti ing ashamed of himself, fired. It was and yet it was so comfortable too; bu lieved, for Jack, the instant after the pistol had been fired, turned to the right and to the left, and made a low bow to the two friends, to show that he was not wounded, and then said, home, and how she missed the baby, antered the shop, his elegant cabriolist and blooded horse remaining before the door in care of the groom.

The officer stepped into the counting may again for the officer stepped into the said, and then said, and then said, and kept seeing the new grave out here with the twilight as she went about her with the said, and then said, and the remain the twilight as she went about her with the said, and the remain the twiling in a car next to the locomotive on an Indiana rail to the said, and the remain the twilight as she went about her with the porture of the provided in the said that t

Indian Eloquence.

In the Olive Branch, published at Danville, Ky., in the year 1829, is found the verbatim speech of an Indian chief named Speckled Snake. It is a most remarkable oration, full of pathos and not inferior in eloquent sarcasm to the opening of Mr. Fox's celebrated retort upon Mr. Pitt. It is a gem worthy of preservation, in the interest of schoolboy oratory, if nothing else.

ing else.

At a council of the chiefs, headmen and warriors of the Creek Nation, convened by anthority the talk of the President was communicated by the agent. After a profound silence of many minutes' duration, Speckled Snake, a warrior whose head was whitened with frosts of more than a hundred winters, and who supported him-self on the shoulders of two young men, arose and spoke as follows:

Brothers: We have heard of the talk of our Great Father; it is very kind-he says he loves his red chil-

Brothers! I have listened to many talks from the Great Father. When he first came over the wide waters he was but a little man and wore a red coat. Our chiefs met him on the banks of the river Savanna and smoked with him the pipe of peace. He was then very little. His legs were cramped by sitting long in his big boat, and he begged a little land to light his fire on. He said he came over the wide waters to teach the Indian new things and to make them happy, He said he loved his red brothers—he was very kind. The Muscogees gave the white man land and kindled him a fire, that he might warm himself; and when his enemies, the pale faces of the South, made war on him, their young men drew the tomahawk, and protected his head from the scalping knife. But when the white man had warmed himself before the Indian's fire and filled himself with their hominy, he became very large. With a step he bestrode the mountains, and his feet covered the plains and the valleys. His hands grasped the Eastern and Western sea, and his head rested on the moon. Then he became our Great Father. He loved his red children, and he said: "Get a little further, lest I tread on thee." With one foot he pushed the red man over the Oconee, and with the other he trampled down the graves of his fathers and the forests where he had so long hunted his deer. But our Great Father still loved his red children, and he soon made them another talk. He says: "Get a little further, you are too near me." But there were some bad men among the Muscogees then as there are now. They lingered around the graves of their ancestors till they were crushed beneath the heavy tread of our Great Father. Their teeth pierced his feet and made him angry. Yet he continued to love his red children, and when he found them too slow in moving, he sent his great guns be-

fore him to sweep his path. Brothers! I have listened to a great many talks from our Great Father,

that where we are now, our white brothers have always claimed the land. small, and stood before the great chief at the council on Yainacraw Bluff, he

can spare, and I will pay you for it.' Brothers! When our Great Father made us a talk on a former occasion, and said, "Get a little further. Go beyond the Oconee, the Ocmulgee, there is a pleasant country," he also said, It shall be yours forever.

I have listened to his present talk. He says the land where we now live is not ours. Go beyond the Mississippi -there is game, and you may remain while the grass grows and the water

Brothers! Will not our Great Father come there also? He loves his red children. He speaks with a straight

Brothers! Our Great Father says our bad men have made his heart bleed for the murder of one of his white children. Yet where are the red children which he loves, once as numerous as the leaves of the forests? How many have been crushed by his own

Brothers! Our Great Father says we must go beyond the Mississippi. We shall there be under his care and experience his kindness. We have felt Brothers! I have done.

A VALUABLE ENGINE.-The smokeconsuming engine invented by Mr. are, is said to be a complete success. The peculiarity of the invention consists in a series of four arches of varying heights, built of fire-bricks and rising from the sides of the furnace to the bottom of the boiler. Between the third and fourth arches is a large open heat-chamber. The coal is rethree arches, until the oxygen and coal gases combine and pass under the arches all aflame into the heat-chamber, where they produce an intense

WOOL PROSPECTS AND PRICES .-The United States Economist contains the following:

The principal markets on our Atlantic coast are quiet for obvious causes. Dealers, in their mad efforts to depress values, have been endeavoring to frighten our farmers into the belief that the markets were overstocked with wool, and that there was no demand for woolens worthy of consideration. But now hard the principal markets on our Atlantic coast are quiet for obvious "Never mistake perspiration for inspiration," said an old minister in his charge to a young pastor, just being ordained.

Before marriage a girl frequently calls her intended "her treasure," but when he becomes her husband she looks upon him as "her treasurer."

Never mistake perspiration for the study and treatment of old maladies. His practice is new school, (Eclectic,) and attention is invited to the success of this School of Medicine, in its hygienic and delicate nature, incident to either sex carefully treated. Two afternoons of each week will be devoted to examination and cure of patients able to visit at office, viz: Tuesday and Saturday.

MICHIGAN.

The recent tornado in Central Michigan did uch damage. Two little girls of Harry Toole, sayria, Barry Co., were killed and the family J. A. Birchard, consisting of five persons are all severely injured. A large number of roons whose names are not obtainable are to wounded. Over 50 head of horses and catwere killed at Lansing.

ion. James M. Turner was driving in his ggy, and his horse was struck by lightning instantly killed. Mr. Turner was not very

Michigan. Of this number 426 are in the liter ary department, and the others are as follows Doctors, 399 (of whom 59 are homeopathic) lawyers, 277; druggists, 70; dentists, 70.

On Saturday night the safe in the postoffice at Ypsilanti was blown open and \$1,200 worth of stamps, change, etc., stolen.

The Kalamazoo Telegraph of the 1st says:
Last evening the engine of a freight train on
the G. & L. coming south, was the scene of a
queer episode. A fireman named Bert Connors queer episode. A fireman named Bert Connors suddenly stripped off his coat and threw it into the fire box; then his vest went after his coat; then he threw his watch, worth about \$40,into the same fiery receptacle; then his hat; then his loaded revolver, which made a lively racket; then he took out a small Bible, and putting 50 cents into that, threw both into the fire. By this time the first paroxysm had so far subsided that the engineer was able to subdue him; the engine was stopped and he was taken back into the caboose, watched and controlled till the train arrived here, when he was taken to jail for safe keeping. His friends at Fort Wayne were at once telegraphed to. The unfortunate man is about 28 years of age and has been married but a few months.

The Michigan car works at Detroit build 500

The Michigan car works at Detroit build 500 ears per month for railroads in various parts of the country, from Massachusetts to Dakota. In the foundry 300 wheels per day are cast, and 75 tons of iron are melted daily for castings for locomotives and cars and for miscellaneous repairs. The total business of the company reaches \$4,000,000 or \$5,000,000 expensely. rs. The total business of the company ches \$4,000,000 or \$5,000,000 annually.

The Fenton Union Fair was a success. A man named Anderson fell down stairs in the post-office block, at East Saginaw and sus-tained injuries from which he died. Jerome E. Nichols of Battle Creek, accused of

various forgeries has skipped his bail and left

near Bellevue, was made entirely deaf by the recent terrible storm in that vicinity. The little one was blown some distance and fell among the timbers of a falling barn, but was uninjured otherwise than in the loss of its hearing. One farmer named George Van Auken hearing. One farmer named George Van Auken of Assyria township had a nice farm, a good yield from his crops, nice buildings, his house well furnished, and everything comfortable. All he now has is the bare land. He could not find a piece of his house large enough for cordwood; pieces of his house, furniture, melodeon, etc., have been picked up over four miles away. He had an insurance on his house, but could not get a dollar. All his crops were blown away, his stock killed, his clothing and winter's supply of provisions and fuel were destroyed, and everything he has left in the world of his possessions is a tattered suit of rags. His wife and children had been badly injured by the house blowing away. This was the story he told and it is only a fair sample of a large number of families who are now dependent for a living on the charity of their neighbors. her of families who are now dependent living on the charity of their neighbors.

Doremus Aiken, convicted of manslaughter in the killing of policeman Lyon, at Adrian in April last, has been sentenced to eight years imprisonment at hard labor. Henry Austin, a tramp burglar, who fired five shots at the Hudson village marshal before submitting to arrest, has been sent to Jackson for 10 years.

James Van Fleet of Convis, Calhoun county, when driving home Wednesday night from town, was accosted by a stranger who asked for a ride. Mr. Van Fleet gave him the ride and on the way hired the man to work for him. The man helped him put out his horses and then disappeared. A short time afterward Mr. Van Fleet on looking for his pocketbook found it gone together with \$20.

The census shows that in Detroit, the total number of protective industries and establishments is \$20. The total capital employed durin the year is \$13,424,473; total wages paid, \$5,154,744; total gross products, \$26,461,572; total numbe hands employed, 17,200.

Heavy Grades.

A party of men were talking about down that it is not necessary to use steam for two hundred miles."

"How about stopping at the tions?" asked one of the party. whizzes on." "That was a very light grade com-

pared to the one I went over once," said a man whose word is a long ways "How steep was it?"

New Canadian Enterprise.

The lumbering interests of Canad stand next in importance to her agri-culture, and any movement to develop the great timber resources of the Dominion must be regarded as of the greatest importance. The announcement, therefore, that a joint stock company, with a capital of \$1,000,000 has been erganized for this purpose will be a welcome piece of intelligence to every one having the interests of the greatest at heart. The fact that the country at heart. The fact that the money is subscribed by Scottish capi-talists is an additional cause for satisfaction.

The company which has just sprung into life is called the "British Canadian Lumbering and Timbering Com-pany (Limited)." The timber limits and lands in fee simple over which the operations of the Company will extend are situated on the River Ottawa and the north shore of the Georgian Bay, in the Muskoka and Parry Sound districts, and in the State of Michigan and Wisconsin. These lands formerly belonged to the well-known firm of Cook Bros. and to Mr. Allan Grant, doors which had been carefully shut and have been transferred by them to were opened. On Friday afternoon a and have been transferred by them to the new Company, in consideration of neighbor was called in to see mattras which they hold about half the capital ses, tables, chairs, etc., thrown about stock, and will take a leading part in the management of the Company's affairs. Indeed it is mainly owing to and placed the loaf upon the table. She the exertions of Mr. H. H. Cook that turned her back for an instant, but the Company has been formed, and Mr. W. H. Lockhart Gordon, of this city, having gone to Scotland for that purpose. Fortunately these gentlemen secured the co-operation of Mr. W. J. Menzies, Writer to the Signet, Edin- afterwards burned, was set on fire, but burgh, Scotland, Managing Director of the Scottish American Investment Company, to whose influence among in another stall and it was also the monied men in Scotland is due in quenched. On Saturday morning the was 'Cancer.' I remember a joke of

ists in this new Lumber Company. The directors are: W. J. Menzies, W. S., Edinburgh; James Haldane, C. A., Edburgh; Alexander Mitchell, timber Lieutenant-Governor of Ontario; Herman H. Cook, and Jas. Scott, merchant, Toronto. The head office of the Company will be in Edinburgh. In Canala the principal office will be in Toronto, but there will be offices also at Quebec and at Midland. The Bank of Scotand will be the Company's bankers.

The affairs of the Company will be under excellent management, as the Messrs. Cook will give their undivided attention to them. They have already commenced operations by sending a large number of men up the Ottawa The Company have arranged to cut between 500,000 and 600,000 feet of timber on the Ottawa, and 5,000,000 at Midland, and they will employ during the winter somewhere in the neighborhood of 400 men. For wages and supplies they calculate to spend annually between \$200,000 and \$300,000.-To-

ronto Globe. Elasticity of Metals. shown by their resistance to extension ered by the lace. Now remove the Bleak House, he took the lead in a 11,000 or 12,000 feet lower than their The elasticity of metals is very well into the glass wherever it is not covtract to their original length. Thus, if beautiful figure raised upon the glass. wires of of different metals be suspend
In this way beautiful figures of all Douglas Jerrold, Cruikshank, Mark ed by one end, they will be stretched kinds are cut in glass, and at a small lemon, Lewes, and others going in various degrees, and, if the weights expense. The workmen can hold their the kingdom as a company of strolling actors to raise money for the impovermoved. Investigations conducted in this manner have proved that all metals are possessed of elasticity to some extent. Iron and steel, for instance, If they put on steel thimbles to protect will return to their original length the nails it will do little good, for the extent. Iron and steel, for instance, while lead, on the other hand, only exist they wrap a piece of soft cotton hibits this property within very narrow limits. There is yet another form in which elasticity may manifest itself in cords and wires. If we fix firmly one end of a wire or cord and twist not affect substances that are soft and the other end round as we would turn a screw, the wire or cord on being released will untwist itself again. This is called "the elasticity of torsion." Now, if we firmly fix a wire or cord at both ends and draw it by the middle of its length to one side, we can easily see that we stretch it or make it onger, so that when we release it again it returns to its original length by virtue of its elasticity contracting it; and, further, when we release such a cord, wire, or a bent bow, none of them returns at once to its original position or form, but vibrates from one side to the other of that position for ury this is not so. One of the largest some time before coming to rest, much in the manner of a pendulum swinging position of loss is nothing more than After dinner he took them out and backwards and forwards. Now, as musical stringed instruments depend

Gen. Cass as a Landlord.

their efficiency, we see that the same

Guy kept the National Hotel in Washington, and among his guests was General Cass, then Senator from Michigan. Guy dressed like Cass; and, though not as portly, his face, including the wart, was strangely similar. One day a Western friend of the house came in after a long ride, dusty and tired, and, walking up to the office, encountered General Cass, who was quietly standing there. Mistaking him for here I am! The last time I hung my hat up in your shanty, one of your clerks sent me to the fourth story; but, now that I have got hold of you, I insist upon a lower room!" The General, a dignified personage, taken aback by this startling salute, coolly replied: "You have committed a mistake, sir! I am General Cass of Michigan;" and angrily turned away. The Western man was shocked at the unconscious heavy railroad grades, when one man outrage he had committed; but before he had recovered from his mortification. outrage he had committed; but before tion, General Cass, who had passe around the office, confronted him again when, a second time mistaking him for Guy, he faced him and said: "Here you "Oh, they just stop the train, and when they get ready to start again they turn loose the brakes and she whizers on" are at last! I have just made a devil of a mistake! I met old Cass, and I took him for you; and I'm afraid the Michigander have a specific and a she whizers on " gander has gone off mad!" What General Cass would have said may well be imagined, if the real Guy had not approached and rescued the innocent off-nder from the twice-assailed and twice-angered statesman.

per, one on each side, exactly cointure is held in proper position before lamp, and the lamp is rapidly move used to flicker, the curious ef oduced of long-continued winking It is not claimed that a person lo more beautiful when he is winking but it cannot be denied that it gives one a very interesting appearance.

Queer Manifestations.

A Montreal correspondent says:—A highly sensational story comes from Hudson, P. Q., a village on the Ottawa River, a few miles above Oka Village. It appears that a fire broke out in the hotel stables, which are owned by Mr. John Park, proprietor of the Hud-son Hotel. They were burned to the greund, while the inhabitants, who turned out en masse, had much diffi culty in saving the remaining build ings. For two weeks previous to the burning devilish manifestations were carried on in broad daylight. By some unseen agency beds were tossed about in the spare rooms, and windows an on the floor. A woman was cutting bread in the hotel kitchen the same day found the loaf gone when she returned to take it up. After a search the missing loaf was found hidden in a clothes-basket in an adjoining room Later in the day a stall in the stable the fire was quenched. This had hardly been done when a fire was discovered priest was sent for and sprinkled some holy water upon the place. The clergy Mr. Menzies is at present in Canada man had not departed five minutes in the interests of the Scettish capital- when bottles danced about the floor and the bedroom furniture commenced to move about the rooms. The stable was burned on the same evening by inburgh; James Balfour, W. S., Edin- fire started in the hay-loft. This story has much the same flavor as that of broker, Glasgow; George J. Cook, Quethe Esther Cox mystery at Amherst, bec; Donald Alexander Macdonald, ex. N. S., which created so much interest N. S., which created so much interest a little more than a year ago. The Sand-Blast.

Among the wonderful and useful in ventions of the times is the common sand-blast, Suppose you desire a piece of marble for a gravestone. You cover the stone with a sheet of wax no thicker than a water then you cut in the wax the name, date, &c., leaving the Hunt?" marble exposed. Now pass it under the blast, and the wax will not be inured at all, but the sand will cut the etters deep into the stone. Or, if you desire raised letters, a flower or other Remove the wax, and you have the raised letters. Take a piece of French it with fine lace, and pass it under the 'Skimpole,' you know." blast, and not a thread of the lace will be injured, but the sand will cut deep even when it is rapidly cutting away ished author." the hardest glass, iron, or stone; but they must look out for finger-nails, for they will be whittled off right hastily if they wrap a piece of soft cotton around them they are safe. You will at once see the philosophy of it. The sand whittles away and destroys any hard substance—even glass—but does yielding, like wax, cotton, or fine lace, or even the human hand.

groves, and, from all that he can learn, fact, te cause any change in his plans not forget the donors!' for the winter's work. The shipment of oranges begins about the 15th of November and continues into March. One firm has already begun with the shipment of three or four thousand boxes of fruit. A grower in Putnam five per cent at the most.

CITIZENSHIP.—The total population of the city of New York under the census of 1875 was 1,041,886, and the population as shown by the census of 1880 is a little over 1,230,000. Mr. Guy, he slapped him on the shoulder and exclaimed: "Well, old fellow,"

Boese estimates that the number entitled to vote at the coming Presidential election will be 245,000, of which about 98,000 will be native born and about 146,000 naturalized citizens, and that the number of adult aliens will be between 50,000 and 60,000. These facts show that there are a very large number of persons residing in the great metropolis who do not avail themselves of the elective franchise and also a surprisingly large number of foreigners who do not desire to enjoy the privileges of American citizen-

DIAMONDS.—The rule adopted by English jewellers for estimating the value of diamonds, viz., multiply the square of the weights in carats by two, and the product is the value in pound sterling, can only hold good in the case of those that are of small size, or do not weigh more than twenty carats. For, by this rule, the diamond belong-

Recollections of Famous Authors

"I believe you were a London pub I was in the thick of the trade. I was the confidential clerk of Chapman & 'Hall, when they became Dickens's publishers, and afterward I set up for

"Did you see much of Dickens?" "Not very much. He seldom came to the office except to draw his money, and he usually overdrew. He inclined to dress rather 'loud,' and it was natur-al enough that his head was turned for

a time by his extraordinary success. It was something more than forty years ago; it was in 1836-37 and 38 that he was a frequent visitor at Chapman & Hall's." "I was a member of the celebrated Museum Club," he continued after a short pause; "it was the precursor of the now still more famous Savage Club. composed almost wholly of authors and publishers. Inside of the Museum Club was another-the Zodiac Clubof which there were always fourteen members, one for each of ten signs of the zodiac, and two each for the other two-Pisces and Gemini. I belonge to this, also, and Douglas Jerrold, Leigh

Hunt, George Henry Lewes, Francis Mahony ("Father Prout"), Landseer Macready, John Leech, and others, were members, "Each member was named after some sign in the zodiac and there was a fine of one penny for addressing a man by any but his zodiacal name; Douglas Jerrold, I remember, was 'Scorpio;' Moriarity, an Irish writer, was 'Taurus,' and Dr. Erasmus Wilson, a sort of later Kit North, and author Leigh Hunt's at dinner one day. Lewes was carving a young pig, I think—and he said to Father Prout: 'What part will you have?' 'My favorite part-you know what it is.' said Father Prout. Lewes was nonpiussed for a moment, but Hunt exclaimed: 'Give him the Pope's eye-he's always trying to get the Pope's eye!' You know the Pope's eye is the delicate little gland in the pig's thigh. Father Prout's relation to the Catholic Church gave point to Hunt's suggestion, which was greeted with great laughter. Father Prout was a character. He bothered poor of this kind of ware, as are also vases or ornamental articles, many of which finest songs and translating it into are painted and glazed. These articles Greek, and then publishing them, side are all very durable, and are able to by side, and charging Moore with lagiarism."
"What sort of man was Leigh

"Cheerful -- always cheerful and hope-

ful, though he had a hard time of it. About 1810 he was fined £500 and imprisoned for two years for speaking of amining the collections of mollusca George, the Prince Regent, as a 'fat made during the expeditions of the emblem, cut out the letters, flower, &c.. Adonis of fifty,' and there are not in wax, and stick them upon the stone; then pass the stone under the blast, indiction more serenely. He obtained in the North Atlantic, and, by comparing the facts thus disclosed with others the pension of £200 from the Crown from George's niece, Queen Victoria, interesting conclusions. Some of the when he was a member of the Zodiac plate-glass, say two feet by six, cover Club. He was the original of Dickens's. 9000 and 10,000 feet; but the very same

> at unking of him," I suggested. "O, no," said Mr. Addey, "Dickens

certainly would not wish to harm or offend Leigh Hunt, but the latter's happy-go-lucky disposition undoubt-edly suggested the extravagant shiftlessness and sunny gabble of Skimpole, notwithstanding. "What sort of looking man was Jerrold?"

"He was a little man, about five feet high, long hair, prominent cheek bones, a keen eye, and his form a little bent, and he looked up at you with a comical and about \$225,000 to West India wag of his head. I knew him very fruits. Ten years ago two or three FLORIDA'S ORANGE GROVES.—The late severe storm in which the Vera Cruz went down was supposed at the time to have done considerable damage to the orange groves of Florida. Considering the force and extent of that sidering the force and extent of that sidering the force and extent of that hurricane it was stated that nearly the had treated him rather shabbily, gave whole of the orange district would be him a couple of suckling pigs, which whole of the orange district would be so devastated as not to furnish the usual supply of fruit. Happily for the lovers of that juicy and aromatic luxury this is not so. One of the largest growers in Florida states that the supposition of loss is nothing more than a couple of suckling pigs, which he took out to his suburban cottage, and put in a pen. He named them—one Bradbury and the other Evans. A couple of months after that, his publishers came ou and dined with him a couple of suckling pigs, which he took out to his suburban cottage, and put in a pen. He named them—one Bradbury and the other Evans. A couple of months after that, his publishers came ou and dined with him a couple of suckling pigs, which he took out to his suburban cottage, and put in a pen. He named them—one Bradbury and the other Evans. A couple of months after that, his publishers came ou and dined with him a couple of suckling pigs, which he took out to his suburban cottage, and put in a pen. He named them—one Bradbury and the other Evans. A couple of months after that, his publishers came ou and dined with him a couple of suckling pigs, which he took out to his suburban cottage, and put in a pen. He named them—one Bradbury and the other Evans. A couple of months after that, his publishers came ou and dined with him a couple of suckling pigs, which he took out to his suburban cottage, and put in a pen. He named them—one Bradbury and the other Evans. A couple of months after that, his publishers came out and dined with him a couple of suckling pigs, which he took out to his suburban cottage, and put in a pen. He named them—one Bradbury and the other Evans. A couple of months after the other him are now about 150 care. supposition; that the weight of the showed them his pigs, and said: 'I have storm was further south than the named them after you, gentlemen They are growing wonderfully, and he judges that the damage done was comparatively light, not enough, in the greatest hogs in Europe, and I do

"Jerrold's conversation sparkled with epigrams, and I never knew a man t laugh so heartily at his own jokes. I you heard Douglas Jerrold roaring with delight and holding his sides, you immediately inferred that he had said county states that the estimated loss in consequence of the storm will be but and very contagious. Like all literary men, he was never half paid. He told me that for his great comedy of 'Black-eyed Susan' which still holds possession of the stage, he received just what Milton did for Paradise Lost—\$25 and the publisher made \$15,000 from i the first year. For the Caudle Lec tures' and other things in Punch, h was better paid."

"Do you remember any other good stories of Jerrold?" I asked. "One thing happened in my presence," he said, "which seemed to me very funny at the time, but has appeared a little rude ever since. At the club he was introduced by Albert Smith, I believe, to W. L. Leitch, editor of The Queen. 'Leech, Leech,' said Jerrold, 'any relation to John Leech?' 'No relation levels at the other.' lation, explained the other; 'our names are spelled quite differently.' 'O, yes,' said Jerrold, with a naughty twinkle. 'I remember; you are the gentleman who has the Scotch peculiarity to his name.' Leitch's introducer was horrified, but I don't think they got any satisfaction.—Indianapolic Journal.

A CLEVER SMUGGLER,-An officer of the Octroi department, Paris, whilst sauntering beneath the arcades of the Rue de Rivoli, encountered amongs ing to the emperor of Brazil, which is still uncut and weighs 1680 carats, would be worth the enormous sum of quently entered by the barrier at would be worth the enormous sum of 5,644,800 pounds sterling, or more than \$28,000,000, and we dare say his majesty would be glad to take a million of dity. Although nearly sixty elementary substances are known to chemists, only a comparatively small number of these take part in the fermation of man and animals, and it is only this small number of constituents which are absolutely essential elements of our food.

These elements are carbon, hydrogen, nitrogen, oxygen, phosphorus sulphur, chlorine, sodium, potassium, calcium, magnesium, iron and fluorin.

Large quantities of pottery are manufactured in Brazil from the hard, silicious bark of the caraipe tree. In the process, the ashes of the bark are powdered and mixed with the purest clay that can be obtained from the beds of the rivers—this kind being preferred, as it takes up a larger quantity of the ash and thus produces a stronger kind of ware. Though the proportions of ash and clay are varied at the will of the maker, and according to quality of the bark, a superior kind of pottery is produced by a mixture of equal parts of fine clay and ashes. All sorts of vessels, of small or large size, for household or other purposes, are made stand almost any amount of heat. One secret of the strength of the material is that the cells of the separate layers are silicated to a greater or less degree, the silex forming in the cells when the bark is young or immature. Mr. J. Gwyn Jeffreys has been ex-

elsewhere developed, has come to some species had been discovered in a fossil "But Dickens could hardly have state at a height of more than 2000 feet in Sicily and Calabria. These mollus-"for the very year before he wrote can fossils then had lived at one time series of unprecedented entertainments position when found, or, in other words, had been sent up from ocean In this way beautiful figures of all kinds are cut in glass, and at a small expense. The workmen can hold their hands under the blast without harm nean. His observations of the posttertiary deposits generally in Europe, Asia and North America forced him to question the permanence, or even the antiquity (speaking geologically), of existing ocean basins.

> THE FRUIT TRADE.—Chicago has become a great fruit market within a few years. The Inter-Ocean says: "The volume of business is represented by a money value of about \$6,000,000 annually. This includes from \$240,000 to \$300,000 credited to California fruits, fruits. Ten years ago two or three car loads of California fruits made up the supply for the season. Members of a Chicago firm resident in that State saw the probabilities of the trade, and perfected arrangements that made this city the supply depot for a large part of the country. The receipts of the one firm are now about 150 carand the trade in California specialties in almost the same proportion.'

It was on account of his being turned out to grass that he was called Nipa-cud-nezzar.
