WANHINGTON. A REPENTANT WOMAN.

Some months ago John Barnard, an elderly elerk in the Bureau of Printing and Engraving, eloped with Blanche Burr, a young and pretty elerk whose parents reside in Washington Barnard left a large number of unpaid bills, borrowed money of all his friends and deserted a wife and four children to run away with Blanche. Nothing was known of the pair until a few days ago, when Blanche's father received a telegram from her dated St. Joseph, Mo., in which there was a pitiful appeal for money to pay her fare home. Letters received later show that Barnard was kind to her only a very short time. As they travelled from city to city, after the novelty of the situation wore off he after the novelty of the situation wore off he began to treat her with great brutality, which she ensured as long as possible and then left him. He followed her, and by threats of representations that she was his wife, which she, of course, could not deby, compelled her to live with him again. The brutal treatment continued, and she again left him at Omaha and went to St. Joseph. She says he is there and threatens to kill her if she attempts to go to Washington. Before the elopement Blanche was a modest, accomplished and much respect ed young lady, belonging to good society. The elerks in the bureau where she worked have raised a considerable sum of money to bring Blanche back. Barnard will not dare to re-A SUDGE'S SALARY.

The jury in the case of Hallet Kilbourne vs. John G. Thomson for \$350,000 for false imprisonment, returned a vordict of \$60,000 for plaintiff. A motion for a new trial was made by the defense. AN AMENDMENT.

The President has so amended the civil service rule No 8 that it now distinctly prohibits the appointing power alike in every department and in every postoffice and customs office from making any discrimination in selections for appointment by reason of any political or religious opinion or affiliation.

WILL INTEREST JEFF.

Argument has been commenced in the supreme court suit brought by heirs of the late Sars i Ann Dorsey of Louisiana for the purpose of setting aside the will by which Mrs. Dorsey left her property to Jefferson Davis. It is maintained that the testatrix was subject to undue influence.

WAR UPON LOTTERIES.

The district commissioners have addressed a letter to the postmaster-general, calling his at-tention to the difficulty of preventing the sale of lottery tickets in Washington, because of the laxity of the law, and asking that he urge upon congress the enactment of a law that will accomplish the object sought. They also say that the publication by newspapers of lottery advertisements tends to tempt the people into papers be excluded from the mails. They state that department clerks, as a class, are large buyers, and hope that some department regulation may prevent them from indulging in the pernicious practice.

NEWS NOTES

O'Donovan Rossa's gang of blood-thirsty devils were in session in New York the morning following the recent explosions in London Speeches expressing the sentiments of the gang were made. Rossa but mouthed the sentiments of them all when he said: The explosions yesterday in the underground railway, London, were the work of the Fenian brotherhood, of whose movements he is ap-prised. London would be in ashes, he said before long, unless England gave up Ireland. New developments might be expected at any moment, for it was now the purpose of the brotherhood to reduce England to submission

A SCOUNDREL CAGED.

Edward B. Connell, a brakeman on the Lake Shore railway, is in jail in Cleveland, Ohio, to await trial in the United States Court on a charge of sending obscene matter through the mails. He confesses that he sent incredibly lewd letters to divers ladies of eminent respectability living in Cleveland and in neighboring towns. Some of these letters were given to the postal authorities. With much difficulty the detectives traced their authorship to him. He was arrested in Toledo, examined before Commissioner White and committed in default of bail. He claims he was not in his right mind when he sent the letters, which contained unnaturally foul propositions, and represented that he was the retained sensualist of various women of high social rank. Before going to prison he wrote abject apologies to the ladies he thus grossly offended. He is middle-aged and has a wife and children in Loraine.

"THE WAY OF THE TRANSGRESSOR IS HARD."

Nathan S. Haines, the city Market Master of Dayton Ohio, who two months ago deserted his wife and ran away with a frail, but pretty woman, named Clara Fredricks and \$15,000 of the city's money, was brought back to Dayton from Montreal, Canada, where Detective Kirby feand bim. He and Miss Fredricks had spent all the money traveling in Europe, where Haines broke down with remorse and took to a sick bed. When brought kome he was in a serious condition, unconscious and unable to rest. He was put in jail, where he grew worse and worse, and shortly after died in jail in presence of his wife and aged mother. The physician who attended him attributes his death to acute mania, brought on by remorse and trouble. His death was terrible, the great strain on his mind actually burning and grow ing into his very vitals, and thus consuming his life. Miss Clara Fredricks the woman who was with him and helped spend the city's mon ey, is also at home, but not under arrest.

BLACKS VS. WHITES.

In a conflict between a crowd of whites and colored at Danville, Va., Walter Holland, son of C. G. Holland, was shot in the head and, it is supposed, mortally wounded. Thomas Seward was shot through the body. Five negroes were killed and it is supposed many were wounded. The beginning of the conflict was the beating by one of the citizens of a Negro who abused another Negro for apologizing for apparent rudeness and spoke roughly about the citizen. Some of both colors interfered

and a pistol was knocked out of the hands of the white men and exploded.

WICKED WINDS.

Springfield, Mo., was visited by a destructive tornado the other afternoon. The storm struck the woolen mills, destroying a portion of the buildings and doing great damage to machinery, then passing a little north of east demolished a number of residences at the corner of Booneville street. The storm followed a line between the city proper and lowed a line between the city proper and springfield for three blocks, leveling residences in both towns, then tending a little northward the tornado passed to Bridgetown, a suburb of North Springfield. The total loss is estimated at between \$150,000 and \$250,000. Seven lives are reported lost.

MISSING MARY FOUND. Miss Mary Churchill, the missing St. Louis girl, has been discovered working in the laundry of the insane asylum at Indianapolis, Ind. She accompanied her father home, but request

ed the superintendent of the asylum to keep the place for her as she would shortly return.

A party of 358 Mormons arrived in New York the other day on the Guion steamship Wisconsin. With them were twenty returning Mormon missionaries who have been laboring abroad during the last two years. This is the fifth party which has landed there this year, making the total Mormon immigrathis year, making the total Mormon immigra-tion since last January 2,600. Of this party 120 are Scandinavians, while the others came from England, Ireland and Wales. The ma-jority are males. There are about 100 children in the party. A number of the men are me-chanics, while the others are farm hands. All are well provided with money and baggage.

CRUSHED TO DEATH.

The entire roof, inside walls, iron and stone columns of the new south wing of the capitol at Madison, Wis, fell in the other afternoon, burying a large number of workmen in the ruins. The cause of the terrible accident is somewhat uncertain, but the most plausible theory is that the heavy iron pillars supporting the roof of the second story balcony sunk into the plank on which they rested, thus pulling the sound wall outward which in turn caused the roof of the entire wing to cave in. These columns were made of large pieces of boiler iron rolled into circular form, stove pipe fashion, the jointures not being bolted together. About 25 men were buried beneath the wall, four of whom were killed, and the others wounded, many dangerously. It is the opinion of the contractor that the loss will fall on the commonwealth, as the plans were approved by the state architect, and the blame can be ascribed to no one. The loss cannot be estimated at present. The additions were to be completed March 1, 1884. Two hundred thousand dollars were appropriated by the legislature to meet the necessary expense. The wing was designed for the use of the historical society. THE REASON FOR IT.

Gov. Rusk of Wisconsin has ordered a rigid inquiry into the cause of the collapse of the capitol building. An important witness is a mechanic named Bohn who avers he saw defects in the brick pier supporting the iron column of the shird floor on the southeast corner, and the cracks were so plainly visible the day before the accident that Foreman Jones, now dead, screwed up the iron pillar supporting the root girders with jacks and caused the brick pier to be rebuilt. On the following morning, however, Bohn says Jones took away the jacks early, not wishing that the public in general should know of the trouble. Bohn was at work on the third floor when the accident occurred and saw this pillar give way. Masons say the mortar was green and was squeezed out by taking away the jacks so early; causing the pier to settle, hence the fall. RELEASED ON BAIL.

THE NOVEMBER CONTEST.

First Returns From the Field of Battle -- Hopeful Democrats ---Butlerism a Thing of the Past. NEW YORK.

First returns from the election of November 6, come in slowly, and particularly from the rural districts. In New York the Democrats claim the entire state ticket with the single exception of the secretary of state. The World claims the entire ticket, but the claim is probably premature. The officers chosen in the Empire State are Secretary of State, Controller, Treasurer, Attorney-General, Engineer and Surveyor, and both branches of the state legislature. A proposition to vote upon the abolishment of the contract labor system from the state prison was also voted upon. Re-publicans claim both branches of the legislature, and the election of the secretary of state by at least 12,000 majority.

IN MASSACHUBETTS.

The election in Massachusetts was the most exciting ever held in the old Bay state, and the vote this year is the largest ever cast. First returns indicate that Butler polled from 155,-000 to 156,000 votes, while Robinson looms up with 160,000 to 162,000, and the largest vote ever cast in any previous year was 282,000. The Republican party claim the election of the entire ticket, and Butler's organ concedes his defeat by at least twelve thousand. It is probable the Republicans have a majority in the House, but the Senate is doubtful. Later returns will probably change the complexion of the legislature, but there seems to be no doubt at present but that Butlerism has received a crushing defeat. Robinson, the Republican candidate, and his friends are jubilent. publican candidate, and his friends are jubilant over the outcome of the election.

the election caused the greatest excitement since 1869, when the Conservative party was organized Half the Senate and entire House of Delegates were elected. This Legislature reapportions the state for Congressional representation, and elects most of the heads of the state departments. The new Senators vote for a successor to United States Senator Mahone The race issue was never before so strongly marked and considering this the election was very quiet. election in Dakota resulted in the probable de-

feat of the constitution? The returns are so very meager, however, as to be very unreliable

The Democratic majority in New York is placed at 10,000. Carr (Rep.) for secretary of state, has a majority of 16,000. The Legislature is Republican. The State Senate stands 19 Republicens to 13 Democrats, the Assembly 72 Republicans to 56 Democrats. The Tribune estimates Carr's plurality at over 16,000, and says the other Republican candidates on the state ticket apparently lack only from 4,000 to 2000 of election. It says the Senate stands 19 Republicans to 13 Democrats, and the House 74 Republicans to 54 Democrats.
Additional returns give the Republicans 139
members of the legislature, to 92 Democrats, and one Independent with nine districts to hear from. Robinson's total vote thus far is 159,855, Butler's 150,013, with four towns to hear from The total vote for Lieutenant Governor gives ames 12,000 to 14,000 plurality. Gen. Butler has refused to be interviewed and will make no statements concerning his defeat, which he accepts complacently, although he acknowledges it was unexpected. In Dakota the aspect is a little changed. Six of the fortyeight Southern Dakota counties have made full, and twelve partial, returns. The majority for the constitution is 2.640. The overthrow of Mahoneism'in Virginia causes great rejoicing, not only in that state, but in South Carolina, jubillee meetings have been held to express their gratification. The returns from the other, states are not materially changed by later re-

CRIME. MURDER IN TOLEDO.

A voung man named Joseph Commenzing, employed in the clothing house of C R. Mab-ley & Co.. in Toledo, was shot and killed in the city suburbs by an unknown party. The affair is involved in mystery. Peter Wernert, 17 years of age, is under arrest charged with the murder. Wernert proves to be the person who was seen to leave the spot after the pistol shot was heard. He claims that Commenzing borrowed a pistol of him and shot himself. Wernert has been held to wait the result of

Mrs. Chas. Dunlap, living east of Circleville, Ohio, went to that city a few days ago and col-lected \$236 wages due her as a domestic, earned in several years. Returning home at dusk in a spring wagon, alone, two strangers, one carrying a valise, asked for a ride, which was refused, but she consented to carry their valise. Both men got in, one on each side, one taking charge of the reits, which the woman reluctantly gave up. After proceeding a short distance, these men choked Mrs. Dunlap almost insensible, took the money tied in a handkerchief and escaped.

A TERRIBLE TRAGEDY. A fearful tragedy was enacted at the farm house of H. Clay McGee, ten miles south of Kansas City, Mo. His children, returning home from school the other afternoon, found he lifeless bodies of their father, mother and older sister lying upon the floor. McGee had evidently killed his wife, shooting her in the breast with a shotgun, shot his daughter in the back and then completed the horror by oing to an upper room and swallowing a dose of morphine. The house being isolated the neighbors were not aroused, and the bodies consequently lay until dis-covered by the children late in the day. The immediate cause for the insane deed is not known. McGee is described as a man of violent temper, amounting to almost frenzy at times. He was a prosperous farmer, having come into the vicinity several years ago from Kentucky, where it is said he once killed a man. There were six children, some of them married. Mary the murdered daughter was 20 years of age. Another daughter, the wife of Mr. Sands Hopkins, a member of an old family there, was accidently shot and killed by her husband some months ago. McGee was 45 or 50 years of age. McGee has for some time borne an unsavory reputation among his neighbors on account of harsh treatment of his family, and this tragedy is supposed to have been the result of domestic discord of long

IT HAPPENED IN CONNECTICUT.

Danbury, Conn., and vicinity, is in a state of excitement over the death of Fanny Linn, daughter of Rev. J. L. Linn, pastor of the first Congregation church at New Fairfield. She lived with her parents, was about 25 years of age, preposessing and accomplished. A few weeks ago she consulted Dr. W. F. Lacy, and informed him of her trouble and sought relief. He advised her it would be unprofessional and criminal. Later she consulted Dr. W. F. Lacy; Jr., who prescribed, but to no purpose. Tuesday she sought the dector, in company with a lady friend, and was directed to Gilbert Cooper's hotel, at Mili Plain, where she was driven. Soon after reaching the hotel she took a room, to which Dr. Lacy repaired, and within fifteen minutes she was a corpse. The coroner took Dr. George L. Porter who made the autopsy in the Rose Ciark Ambler case, and found malpractice had been resorted to. Dr. Lacy was arrested. Miss Linn declined to give the page of her between State Attorney France of her between State On State name of her betrayer. CANADIAN MILLERS PRIGHTENED.

Toronto millers are using their utmost efforts to induce the Canadian government to abolish the duty on wheat. They state that owing to the frost damaging the wheat in Manitoba and some parts of Ontario, as well as to the short crops this year, they will have to import wheat from the United states in less than six months. The Canadian crep is estimated at 10,000,000 to 15,000,000 bushels less than last year.

There is an old gentleman, 74, years of age, whose home is in Cleveland, but tho, nevertheless, spends nearly all of is time in the far west trapping, hunting and trading with the Indians. He began his wild life many years ago, and has now become so attached to it that he cannot give it up. He is personally acquainted with nearly every tribe of Indians-west of the Mississippi, and is beloved by them that when he leaves them for a short trip to see his family, them for a short trip to see his family, they express a great deal of regret and beg him to return. In an interview with a reporter the old gentleman stated that his extensive friendship with the different tribes was due to the fact of his always, treating them. his always treating them squarely and living strictly up to whatever treaty he had made with them. "Any man," said he, "who does as he agrees, and shows himself to be no coward, will

There he stood alone, behind his little barricade of human bodies, with white face and set teeth, firing his revolver with his left hand and swinging his saber with his right. The last thing I saw him do was to smash out the brains of a big Sioux with the butt of his revolver. The Iudians intended to take him prisoner, had to kill him. Lorne's Logic.

A special cable to the Toronto Globe says: The Contemporary Review for November contains an article by the Mar quis of Lorne, late Governor-General of the Dominion, entitled "Canadian Home Rule." It was written in compliance with a request to furnish notes suggestive of steps that might be taken to meet the demand for home rule for Ireland, or provide information having a bearing upon the future of Australia The Marquis discusses the chief features of the federal government of Canada, indicates the individual rights reserved to the different provinces and dwells specially upon the danger which must arise should-one member of the confederation become strong enough to op-pose the will of the central govern-

Strike at the Bottle.

A nervous and disease-stricken old gentleman was sitting in his room

on an easy-chair, his physician being at his side. Said the old gentleman, "Now, doctor, you have been treating me for a long time, and haven't done me much good. I'm tired of all this. I

want you to strike at the root of all my disorders." Said the doctor, "Do you mean exactly what you say?"

"To be sure I do," said the venerable invalid. "Well, here goes!" said the doctor;—and with one whack of his cane
he broke to pieces the brandy-bottle which stood on the mantel.

The old gentleman was angry and excited, but he had a good answer ready for the doctor. "Doctor, if it hadn't been for your doctrine, I never would have got into the habit of drinking."

Treating Consumption, Asthma; Bronchitis, Nasal Catarrh, Sore Throat, Loss of Voice, and other Maladies of the Nose, Throat and Lungs.

DR. WOLFE treats the above named diseas es by Medicated Inhalations. When thus administered, remedies are brought "face to face" in contact with the disease; whereas, if they are swallowed they mix with the contents of the stormach and never reach the organs of restreation.

piration. DR. WOLFE has, by the judicious employment of Medicated Inhalations, assisted thousands to regain their health, many of whom had been pronounced incurable, and given up to die by their family physician and friends.

DR. WOLFE has prepared a list of questions for sick people to answer by mail. They are in character the same he would ask were he by the bedside of the invalid. By writing answers to these questions any one can send an accurate statement of his disease and receive and use inhaling remedies at home, in any part of the United States or Canada, without incurring the expense and discomfort of making a visit to Cincinnati. Any one sending his name and post-office address with a three-cent postage stamp, will receive a copy of the "Circular of Questions" by return mail.

DR. WOLFE has published a medical book called "Common Sense, Cause and Cure of Consumption, Asthma, etc.," a copy of which he will send to any body who orders it by mail, and incloses time cents in postage stamps with his name and postoffice address. The book of great value to any one afflicted with disease of the Nose, Throat, or Lungs.

DR. WOLFE has also published another book of 64 pages entitled "Light about the House we Live in," which every healthy person as well as sick ought to read. The book has a special interest to persons who have weak lungs, or any symptoms of Consumption, Asth-ma, Bronchitis, or Catarrh. * FLORIDA LETTER.

ALTAMONTE, Fla., Nov. 5,'83. and the soft Florida sunshine, and with a little imagination to cover the distance, my eyes at last rest on Michigan. It is a long way up there, perhaps farther than human eyes ever saw before, but mine carry me there now, and what do I see? Unless different from this season of the year generally, I think I see you pretty close to your fires, or else exercising yourselves considerably to keep warm. If I am mistaken there (being a little near-sighted), it must be raining—not hard, perhaps, but that light, misty, famous Michigan rain that we who live there, know so well. You look out upon the street, and ask, "when will it stop? when will the sun shine once more?" In answer you hear nothing but the endless noise of the water as it drops, down on the buildings, the streets, the umbrellas, and on all unprotected humanity. MR E. E CONKLIN, of the Knickerbocker Ice Company, has expressed to a reporter of the Albany Evening Journal the opinion that not less than 800,-000 tons of last winter's ice harvest remain in the storehouses along the Hudson. The companies are buying up all the old ice they can find in expectation of an open winter. They make this prophecy boldly, for was not the wind in the South when the sun crossed the line? And isn't that an infallible sign that south winds will prevail during the next six months.

ABOUT 250 Norwegians left Chicago for New York a few da, s ago, there to take one of the Scandinavian line of steamers for Norwegian ports. About 200 of the excursionists came from Wis consin, Dakota and Michigan, and about fifty are from Chicago. They all have return tickets limited to one year. Their object in visiting the old eountry is to spend the holidays with their relatives and friends, and if possible induce them to come out to this country, About 600 will leave on the 22d of this month, half of that number being already booked for passage,

THE London Times thinks that Amer ican counsel will not be allowed to ap pear in the trial of O'Donnell as advoeates or in the examination of witnesses American lawyers may be of counsel and may aid O'Donnell's British lawyers with their advice; but foreign counsel have never been allowed to appear as advocates in the British courts, and the Times says that no good reason has been shown why an exception to the rute should be made in this case. It there is any sound reason for making such an exception, it would be well for those who ask for it to state such reason and show what benefit to O Donnell to justice, or to anybody it will be to have American lawyers appear before the court and jury.

LAST Saturday afternoon, while the City Register of Providence, R. I., was filling out certificates of vaccination for school children, a brawny young Irishman entered and asked for a certificate. The official examined his arm to see if the virus had done its work, made out the usual document, bade the Irishman good-day, and went on with his work. About fifteen minutes later he was surprised by the re-entrance of the same young man, who asked: "Was it a smallpox certificate ye gave me, I dunno?" "It was," replied the register. "Well, then. ye can take it back and make out a bit of a marriage license, for it's meself that's been coorting a fine young lass for siven months, and sure we want to sittle lovely wife, the Prince of Wales and

THE chain-gang is likely, it seems come into the Georgia courts. A negro was sentenced to pay a fine of \$10 or serve six months upon the public works. As the law permits, he hired himself out to a man who paid the fine. The man, however, tired of his bargain, and state convicts These persons put felons' stripes upon the negro, his offence being only a misdemeanor. He brings suit for damages, making this one of the grounds of complaint, but as the principal ones a denial of the right to transfer and a charge of false imprisonment. Probably the destruction of the chain-gang system can only be had through an aroused public sentiment acting upon the legislature, but an exposure of some of its iniquitous and outrageous features in court, would help toward its downfall, and it is to be hoped this suit will not be hushed up before

A Russian Jew, Solomon Schisgal by name, and only nineteen years old, the son of a watchmaker in Berditschen, has invented a watch which goes by electricity, and which is declared by Herr Chwolson, professor of physics at the university of St. Petersburg, to be an instrument of wonderful simplicity and value. In an article in 'The Nowosti, describing the invention, which he believes will revolutionize the manufacture of watches, Professor Chwolson says: "The watches are without any springs and consist solely of two wheels. Besides being true, they have the advantage of the second hand moving in single momentary leaps, as is usually the case only in very costly watches, and which is of the utmost utility for astronomical observations. These watches can also set in motion a certain number of watches of the same construc-The invention has convinced scientists

A WRITER in the Denver Inter-Ocean makes several strong points in support of his assertion that the United States Government is to blame as much as the Mormons for the existence and protection of polygamy in Utah since 1850. There was no provision against polygamy in the organic act of Utah which was passed by Congress and signed by President Fillmore in 1850. The President immediately afterward appointed Brigham Young as Governor and several notorious polygamists as other Territorial officers, and the United States Senate confirmed the appointments. When an a t making polygamy a crime was passed in 1862, President Lincoln appoint Mormon

three wives as District torney to enforce it. The writer severely criticizes the class of men sent to the territory to fill the government offices and charges a large proportion with being unprincipled and corrupt. It seems quite plain that no matter how many laws Congress may enact for the suppression of polygamy, nothing will be accomplished until men of honor and dignity are appointed to enforce such

THE good people of Copenhagen, who are fond of their King and "the children," have had a feast of royalty this year. The summer-palace of Fredensborg has seldom before housed so many distinguished guests. All of "the children" were there last month, the married daughters with their husbands and little ones. At that time the one roof sheltered, besides it regular occupants, the Czar of Russia and his the Princess Alexandra with their flock of children, the King of Greece, the Datchess of Cumberland and her claimant husband, and the Danish Crown Prince and his family. King Christian and Queen Louise dearly love these family gatherings, at which all formality is discarded, and the people, to whom the palace domain and gardens in them without obtruding their loyalty unnecessarily. From the Saginaw Herald we learn how one minister spent his summer vacation, and the good results that followed: Two years ago Rev. Mr. Shanafelt went to Manistique to spend his summer vacation hunting and fishing in that vicinity. He made many friends and was asked to preach, which he did in the village school house, and the result was the bringing together a considerable number of old church members. These he gathered to-gether and urged them to organize a church, and with the aid and advice of the Home Mission association, a minister was sent there and has been handsomely supported. In addition they have the past summer erected a \$4,000 church edifice, now complete, and a council has been called to receive the new church into the Baptist association, and at the same time dedicate the new edifice

A society item from the Hudson Post Iwo young people on the east side were talking about trade, when the gentleman asked the young lady what her business was. She said she had none. He replied that he thought she was in the powder business, as she appeared to carry a full line. "Well" replied she "as you seem to be shot in the neck, perhaps we had better form a co-partnership." The thought was a happy one, and the ar rangements were made on the spot; and the probabilities are that Elder Shier will be called on shortly to draw up the partnership papers and send a copy to the county clerk, after which, there being both powder and shot in the family, the public may look out for war.

Victoria Vieder, who was to have been tried at the present term of the Dodge County, Wis. ircuit Court for the murder of her husband in the town of Westford last May, pleaded guilty and was sentenced to twenty-five years imprisonment in the State Prison, two days of each year to be in solitary confinement. The husband died quite suddenly, and shortly afterward Mrs. Vieder left for parts unknown. Suspicion of foul play having been aroused, the body was exhumed and a large quantity of poison found in the stomach. No trace of his widow could be found until some time in september, when a letter from her was received by the priest of the Catholic Church she used to attend, written from Michigan, and requesting a certificate of her husband's death. The latter was placed in the hands of the Dodge County authorities, and the Sheriff proceeded to Michigan and arrested Mrs. Vieder. The family are Poles. The woman is only 22 years of age.

Next afternoon Dan and Dobbin went round getting rid of those turkeys But giving is a very spreading sort of thing. When Dan got to Mrs. Paxton's, he had almost forgotten his old broken sled, and he and Ike laid their plans for double riding on the Rainbow. And the spreading did not stop there. That was the gayest Thanksgiving the Rileys had ever known. The story of the six turkeys was told, amid shouts of happy laughter, and, when it had quieted down, John's wife said:

"Sister Caroline, while we come home to eat mother's turkeys, I think we might kill our own for somebody that hasn't any." And they made the bargain between them.

When Grandpa Riley was covering the bedroom fire for the night, Grandma shook her head at him from the pillows, and said, in the tone of one who quells an enemy:

"You needn't say a word, old man, I mean to kill six turkeys every Thanksgiving as long as I live!"

The Old-Fashioned Thanksgiving.

Mending Broken Limbs.

The Dairy.

In an English paper it is reported that a valuable shortfiern cow has been killed because of having one of her legs broken. Now, such an accident as this is only difficult to remedy when the fracture is high up in the thigh, in the thick, fleshy part. Otherwise a broken leg may be repaired as easily as the leg of a chair. That we mend by applying glue and a bandage to keep it in p >sition while the glue is hardening. In the case of an animal, nature supplies the glue in the immediate growth of new bony tissue, which unites the broken surfaces, very quickly, and all we want is the bandage to keep the bone in position until the cartilage or soft bone hardens. And to make these bandages is a very simple matter. Years ago the writer began to operate, first with a hen, whose broken leg was set and bound with strips of common brown wrapping paper, steeped in water. A few turns of this packed closely to the leg, over one turn of stiff, dry paper, which was put in first, was covered with a few more, saturated with common laundry starch. The fowl was put in a coop for a few days and was then turned out, and, as the doctors say, made a good recovery. The next operation was on a yearling ram, whose leg was broken in the manner so frequent, viz., in some bars let down only at one end. Brown paper steeped in boiled starch mended the ram's feg perfectly. And so with a yearling heifer, which soon got up on her three sound legs, and in a few days was Mr. Spurgeon says that the reasons able to put the injured one on the ground, and in a few months was well. Making Butter in Winter.

Housewives on the farms are beginning to learn that the butter they make during grass. time and keep until winter cannot compete with the butter fresh from the churn of one who knows her business. Formerly that was the only good butter in the market during the winter months, for grass butter was thought to be preeminently the best, and because no one knew how to make good butter in winter, but little milk was obtained, the facilities for keeping it were not good, and thus winter butter was hard, nearly white, and every way very inferior. Now, however, farmers wives know how to make good butter in winter, and the advantages of nanufacturing the main quantity then instead of selecting that time for the cows "to rest" are many. Besides the high price, there is the fact that more butter A farmer living near Minto, threshed can be made from the same cows in winter than in summer. The matter of time, also, is a very important consideration, the winter months being less hurried on the farm than any other part of the year.

The Penalties of Excess.

Some surprise has been expressed that a boatman noted for his muscular strength and hardihood, should have died recently of consumption. In this particular case it is probable that habitual imprudent exposure helped the disease, but apart from that there are no reasons why consumption should not kill a very muscular person, while in many instances such persons are from their habits peculiarly liable to pulmonary disease. We recall a case of the "strong man" of a western gymnastic club; a man who was in the habit of putting up a 200-pound dumb-bell, and who had worsted Jem Mace in an amidelicate flavor, which is a great im in less than a year he died of consumpprovement on the cranberries alone. tion. Naturally they have been tempted to make long distances and better time. And in a number of cases they have broken down suddenly, just when they thought they were deriving the most benefit from the exercise.

It is asserted by alienists that insanity is on the increase, and they account for this by saying that people generally overdo everything. Nervousness and nervous diseases are continually increasing, and from similar causes. In fact, the greatest hindrance to human longevity to-day is the tendency toward excess in everything. It is not only in business that over-work is common. It is quite possible to hurt even the strongest constitution by excessive indulgence in mere pleasure. A short time ago what purported to be an account of the daily life of a young gir! in "society" was published, and it was by no means wholly caricature. High-pressure living and acting and thinking cannot be kept up indefinitely. Nature always resents over drafts upon her account current, and sooner or later she returns the medium of a collapse or a stroke of paralysis. The strong, too, are more that we smoke too much. Some of the Bread Pudding. - Butter several doctors contend, indeed, that tobacco is them boiling water. The safe middle path is no longer popular. All must rush forward at the top of their speed. And the consequence is that our insane asylumns and our cemeteries are becoming fuller and fuller, while thousands of homes are either broken up. altogether or made wretched by the abuse of health and the obstinate violation of natural law

Of course nothing can be done in such a case but to point out the obvious truth that the penalties of excess are always enacted by Nature, and that she never relents or forgives. If life and the pleasures it affords are thought really worth retaining, those who de-sire, as Rip Van Winkle says, to "live long and prosper," must exercise mod-eration, even in the absorbing occupation of money-gathering.
