The Government still owns thirty-nine million acres of unsurveyed land in Nevada.

EDWARD PATSON WESTON, the pedestrian, is now a reporter in New York. He is said to be worth thirty thousand dollars.

STATISTICS show that of the blind, less than one-fifth are under ten years of age, proving that blindness is not so much a misfortune of childhood as of later years.

It is estimated that about one-twentieth of the silver coin is annually lost by abrasion, wear and casualties, an amount in excess of the annual addition by coinage.

In California the timble is used to protect the fingers from stains while eating grapes. At last the little emblem of woman's industry may become popular in society.

It is a singular fact that in the memorable battle of Gettysburg only one resident of the town was killed. The person was Jennie Wade, and a monument is to be erected to her memory.

At Hopkinsville, Ky., the other day a horse galloped through the street in a storm, and a lightning bolt struck his heels, tearing off both shoes, while flying through the air like blazing coals.

The corner-stone of the new library building for Mr. Moody's school at Northfield, Mass., was laid a few days ago. A Boston friend who could not be there sent a three thousand-dollar check to make up for his absence.

G. W. McCORMICK, a wealthy citizen of Thomaston, Ga., who is not a member of any church, surprised the several white pastors of the city churches the other day by presenting each of them with a house and lot.

ARCHBISHOP LYNCH of Toronto, has issued a notice that he will grant no more dispensations for mixed marriages when the woman is a non-Catholic. Experience of years has taught him that a Protestant mother can not raise her children Catholics.

The Persian setter which carried off the special prize at the recent New York dog show is from the Valley of Shiraz, and valued at ten thousand dollars. These dogs are remarkable for their fine silky hair, which is white as snow, and greatly excel the English setter in keenness of scent.

A POPULAR society fad in New York is to have books bound in colors to harmonize with the complexion or dress of the reader. One wealthy belle has had Shakespeare bound in brilliant red because it adds to the richness of her brunette complexion, while a blue-eyed damsel trends Tennyson from a becoming cover of blue and gold.

The will of an old lady who recently died in Vienna left all her property, valued at 30,000 florins, to her nineteen-year-old niece, on condition that the latter would never wear clothes of any other cut than those worn by her aunt. As for the present her aunt's clothes are in style, the niece accepted the conditions, trusting that fashion will not change so much during her life as to make her appear eccentric.

The legislative reporter of the New Haven Morning News, according to the singular Connecticut custom, was voted \$200 by the House. The proprietors of the News discharged him on his refusal to turn the money into the State Treasury, and then sent their own check for \$200 to the State Treasurer. The Treasurer has returned it, saying that he can not receive it without a special vote of the Legislature.

A WOMAN in New York who sews for tailors says it takes nearly 40,000 stitches to put the ordinary topcoat together. The body of the coat requires 4,780 stitches; the collar, 8,062; sewing the collar on, 1,763; the buttonholes, 2,520; the sleeves and lining, 980; the pockets, 924; the silk lining, and the braiding, 2,720. Tom Hood's "Song of the Shirt" could well be changed now to the "Song of the Coat."

DR. GEORGE H. ELLIOTT, of Denver, who recently closed a big cattle deal in New York, is a curious character. He went to New York in the garb of a cowboy and put up at the St. James Hotel. His polished manner was so much at variance with his attire that he attracted great attention, and he soon had a very large acquaintance about town. Instead of going to Wall street he lounged about the public places uptown and disposed of several hundred thousand dollars' worth of his stock to men whom he met by mere chance.

The men who take the law into their own hands when impatient over the delay of courts have two recent examples of haste which ought to teach them to investigate before appealing to lynch law. The man in Missouri who shot down in the court-room the fellow accused of a terrible crime against his sister has since learned that he murdered an innocent man, and the citizens of Perry County, Ind., who lynched John Davis, accused of an assault upon an innocent girl, are now aware that they killed an innocent brother of the man charged with the assault.

JACOB LEGGETT, a Georgia murderer, was to have been hanged a short time ago. He was on the scaffold, the death-warrant had been read, the condemned man had made his farewell address, and prayer had been offered, when Leggett's lawyer, named Clifton, produced a reprieve from the Governor. It now appears that the lawyer had been in possession of this document for several hours, but delayed its exhibition until the last moment in order, as he says, to test Leggett's sanity. For refined cruelty, this interesting psychological experiment would be hard to match.

LANDS IN SEVERALTY.

The Tribes Represented in Kansas Adopt a Memorial Opposing the Sale of the Indian Reservations.

St. Louis, June 10.—A special from Euflalia, June 10.—The Indian council, representing its sessions Wednesday morning, and is still at work, with delegates from eighteen tribes present, who expressed their satisfaction at the report of the committee and the President on the land in severalty.

The preamble enumerates the tribes that are to sign the memorial to wit: Cherokee, Creek, Choctaw, Chickasaw, Seminole, Sac and Fox, Osage and others. The memorial was unanimously adopted, after being interpreted into the Indian language.

With many misgivings they assume that the United States Government intends to give the Indians the benefit of civilization without depriving them of their land.

They do not wish to antagonize any policy of the Government but to make an earnest appeal in behalf of civilized and wild tribes of the Territory against the act providing for the allotment of lands in severalty to Indians.

In the near future inquit all of the Indians and tribes of the Territory in the allotment, to the assignment of the land to the Indians, and the Indian council, a majority of justice seem powerless to secure their rights.

They deplore any measure which will place the Indians in so unequal a contest. The Indians need a lawyer to defend them, and they need a lawyer to defend them, and they need a lawyer to defend them.

The law to which objection is urged enables the Indians to make a member of some Indian body by electing and taking to himself a quantity of land which is at present the common property of all.

The land in severalty law apportions to each individual only a part of that which is already his property, and leaves the balance for sale to others, who will be composed of a class having no sympathy for the Indians, who will rush into the new country for the sake of gain and civilization.

The tribes ask that the President stop the operations of the law until they shall be in condition to be benefited by it. They further request that the act be not enforced until they have the opportunity of testing the validity of their rights before the judiciary of the United States.

SUDDENLY FLOODED.

The Town of Nanticoke, Pa., Deluged by a Cloud Burst—Residents Forced to Take Refuge in the House-Tops—Damage to Property Estimated at \$100,000.

WILKES-BARE, Pa., June 10.—A water-clooud burst on the 10th at Nanticoke yesterday afternoon. The water came down from the heavens like a deluge. In about forty minutes the whole town was submerged with water from one to three feet deep.

The sewer on the main street was entirely inadequate to carry off the water, and it burst. The river of water then made its way through the cellars of the business houses and compelling the people on the top floors to flee for their lives.

The women and children were in the greatest haste in the drenching rain, which had not yet ceased to fall, they were carried across the street and up the hill on Prospect street to higher grounds.

The water filled into the boiler-houses of the Susquehanna Coal Company, quenching the fires and suspending all work in the mine. The boiler-houses near by were entirely surrounded by water before the occupants were aware of it.

When they realized their condition they got on the tops of houses and were rescued later by a number of men in boats. The water did not cease to do damage until it reached the Susquehanna river, a half mile distant, and when it began to pour into the big stream the pressure in the streets was somewhat relieved.

The loss to property will be over \$100,000. The people say that the water came down in great drops, but in heavy mass, lasted for one hour and forty-five minutes.

CREMATION FAVORED.

A Committee of the American Medical Association Thinks It the Truest Means of Preventing the Spread of Disease from Dead Bodies.

CHICAGO, June 10.—There was a large attendance at the meeting of the American Medical Association in Central Music Hall yesterday morning, a number of ladies being in the audience.

Time was consumed in listening to the report of the various committees and the discussion of the various papers that were read. Dr. Keller, of Arkansas, chairman of the Committee on Cremation, was not present, and his report was read by Dr. Morris, of Baltimore.

A practical character was given to the notice of the committee during the year. The committee recommended the use of chemical disinfectants and burial in temporary coffins, and said that cremation would come in proper time. A special agent of the committee was specially adapted to the rapid disintegration of the dead body. Continuing the report says:

"The old-fashioned triple coffin and the vault have been entirely discarded. Earth-to-earth burial is now a thing of the past, and is discouraged. As our cities increase, and our populations thicken, the evils of our present mode of burial will increase. In the future, we will find that cremation is the best, safest and most hygienic method of disposing of the dead body. The committee recommended the adoption of the following:

"Resolved, That it is the judgment of the American Medical Association that the burial of all persons dying of zymotic diseases should be placed by law under the control of the health authorities, and that in all such cases the authorities be brought to a rapid disintegration of the dead body."

Without discussion the resolutions were referred to the Committee on Health Boards for further action.

Bained Sport.

George and Mort and Jay and Jake started out for a northern lake. The day was fine as one could wish, and all bid fair for a jolly fish.

They stopped at Glenn's, put out their team, engaged their boats and put on steam. George and Mort composed one crew, and Jay and Jake took another row.

They pulled across on the northern shore, where the water was twenty feet or more. Then cast the anchor and piled their bait and settled down to watch and wait.

Soon Jake commenced to move about. "Sit down," said Jay, "or you'll tumble out. If we'd get in 'twould be a nice fix. Beside, 'twould give me the rheumatism."

Then Jake prepared to take a seat. When down went heads and up went feet. They kicked and splashed with all their might, and Jay cried "help" as he went from sight.

George and Mort were soon close by, and as Jay came up he began to cry. "Save me, save me! I can't swim a mite, save me first, boys, Jake's all right."

Jay may say that this is not truth, but we think it easy to furnish proof. He at first got mad as some folks will, but agreed to treat if they'd keep still.

EVERY CITIZEN

OF

Washtenaw County

IS INTERESTED IN THE PROPOSITION OF ITS

=BUCKEYE=

AGENTS!

Farmers have a Special interest aside from the general welfare.

It is a Proposition based upon Knowledge gained by Experience.

As some of our competitors are making like claims to ours for their machines, it is most desirable that the questions contained in the following propositions, be settled as soon as possible, and we gladly give this opportunity by offering this challenge to a

Field Contest.

We will present to the farmers of Washtenaw county, for their county poor farm, a Buckeye binder, provided any machine company, or their agents, shall demonstrate by field trial with the Buckeye binder, to the satisfaction of a committee of three supervisors, chosen from the supervisors of said county, not owning a binder of either of the kinds tried, that they have—

FIRST.—A LIGHTER DRAFT.

SECOND.—A BINDER WITH LESS WEIGHT ON THE HORSES' NECKS.

THIRD.—A BINDER WITH LESS SIDE DRAFT.

FOURTH.—A LIGHTER BINDER (AVOIDPOIS).

FIFTH.—A BINDER CONSTRUCTED OF BETTER MATERIAL.

SIXTH.—A BINDER MORE EASILY MANAGED, AND

SEVENTH.—A BINDER WHICH DOES BETTER WORK THAN THE BUCKEYE.

Provided further, that the company or agents competing will agree on failure to sustain the points in question to the satisfaction of the committee chosen, to furnish to said county the binder of the committee's choosing, and will furnish said committee with the means to procure the same.

THE TEST OF DRAFT TO BE MADE WITH A SELF-REGISTERING DYNAMOMETER.
