Women are getting independent, and no
longer pin their faith exclusively on in-
terpretations of men. Women are work-
ing out problems for themselves. They
no longer consider it a sin to read, and
discuss, and think for themselves. Their
minds have grown strong enough to grasp
a new idea without growing hysterical
and becoming insane or committing sui-
cide.

It will pay you for the trouble it costs
to file your home paper. No volume in
your library will afford more pleasure,
more profit, more lasting benefit. It holds
dates of local events which you cannot

front of the building painted another
color.

The Fish Commissioners of Michigan,
at the coming State Fair, will make a
complete exhibit of their work, from the in-
cubation of the egg to fish fit to grace the
table of an epicure. This industry is of
the first importance to the farmer, who,
by an actual study of the process, will be
incited to aid in the work, which in a few
years will make our lakes and rivers
abound with sport that will call thousands
of visitors from other States to make their
homes in Michigan for a portion of the
year.

No family ought to be without onions
the whole year round. Plant old onions
in the fall, and they will come up at least
three weeks earlier than by spring planting.
Give children of all ages a few of them
raw, as soon as they are fit to be eaten;
do not miss treating them with a mess of
raw onions three or four times a week.
When they get too large and strong to be
eaten raw, then boil or roast them. Dur-
ing unhealthy seasons, when diphtheria
and like contagious diseases prevail, onions
ought to be eaten in the spring of the year
at least once a week. Onions are invigor-
ating and prophylactic beyond description.
Children do not die of diphtheria or scar-
latina, angina, etc., where onions are
freely eaten.

A Buffalo man lately challenged the
wide, wide world to produce a person
who would dare contest with him for pic-
nicking championship; a Montana man
not long ago, single handed and alone,
consumed three dozen consecutive boiled
eggs; last year or the year before last,
the South brought to the front a man who
could eat a quail a day for as many days
as the supply of quail held out; a natu-
ralized citizen of German descent at a
recent picnic drank 102 glasses of beer,
and it wasn't a very good day for drink-
ing beer, either—and yet here is William
Blalick, in Harper's inquiring "Is Ameri-
can Stamina Declining?"

It is said that the elephant is being killed off so fast that twelve more years will see the last one wiped out.

Captain Frank M. Duffy, the composer of the "Mocking Bird," is living at Guthrie, Ky., where he is a well-known newspaper man.

Twenty-four lives are said to have been lost by the recent flood in West Virginia, which swept away the most of the village of Norrisville and several adjacent farm-houses. Such casualties are so sadly current this year that they fall to occasion surprise any more.

The manufacture of postage stamps, which for twenty-eight years has been carried on at New York, is to be transferred to Philadelphia, Charles F. Steel, of that city, having put in the lowest bid. The business is a large one. Two hundred hands will be employed and the annual output will be about 140,000,000 sheets.

Mrs. Cyrus W. Field is said to guard as the chief among her treasures a small silver box presented to her husband by the municipality of New York, and containing the given of the city. This was given to Mr. Field after the successful laying of the Atlantic cable, and was the last time that the honor was bestowed.

At a meeting in Chicago recently of the executive committee of the Knights of Labor a charter was issued to the first assembly of the order ever organized in Australia. The local district is composed of five local assemblies, with a total membership of over five hundred, all of whom have joined the order within the past year.

J. H. Putnam, of Toga, Pa., has been at work ever since the flood in the Conemaugh valley drying out about one thousand two hundred legal papers. He hung them up to dry on lines, just as a washerwoman would. The writing is as good as ever on most of them, and in some very old and almost faded manuscripts the ink has been brought out again by the water.

The most valuable book in the world is said to be the Hebrew Bible at the Vatican in Rome. In 1512 Pope Julius, then in great financial straits, refused to sell it to a syndicate of rich Venetian Jews for its weight in gold. The Bible weighs more than 325 pounds and is never carried by less than three men. The price refused by Pope Julius was therefore about \$125,000, and that, too, when gold was worth at least three times what it is now worth.

Mrs. Etelea Gerster still cherishes the hope, in which she is encouraged by experts, that she will recover the full use of her voice, and she works and practices as methodically as in the starring days when she used to star in the United States. Her famous baby has grown into a chubby little girl, who has already shown signs of possessing a voice worth training. The whole family are living a quiet, happy life in a villa near Bologna.

Owing to declining health Queen Victoria is making arrangements by which the Prince of Wales will relieve her of much labor on state documents. The Prince, in case he assumes these new responsibilities, wishes, it is said, to take the title of Prince Regent and to have the use of Buckingham Palace and Windsor Castle, the Queen retiring to the palaces at Osborne and Balmoral. In the event of this arrangement being carried out Prince Albert Victor will obtain the Marlborough house.

We are not yet through with centennials in this country. One hundred years ago, in August, the first petroleum well was sunk in Pennsylvania, and it is proposed to celebrate the occurrence by a rousing demonstration in the oil regions of the State, New York and Ohio. There is poetic and ethical symmetry in the fact that about the same time when America started out to illustrate liberty enlightening the world it also furnished the globe with the greatest illuminator it ever possessed.

For the fiscal year ended May 1, 1899, there were sold in Illinois 2,002,858 barrels of malt liquors. New York sold 1,399,282, Pennsylvania 2,364,924 and Ohio 2,113,722. In Iowa the sales were but 112,000. The grand total was 23,000,000 barrels, nearly a third of a barrel for each inhabitant of the United States. In sales by cities Chicago was outdone only by New York and St. Louis; the figures being 4,333,759, 1,496,527 and 1,490,850. The increase in Chicago over the previous year was 124,081 barrels, much larger than in any other place.

Secretary Rusk receives some queer requests, but his latest has set him thinking. A Wyoming Territory farmer writes that he is thankful for the packages of seeds which were forwarded to him, and then quaintly adds that it is pretty hard work to build up a new country without wives. He says the prevailing sentiment of the Territory is in favor of women who would like to marry honest settlers, and concludes with the remark that good homes await the lone some spinners of the East, and equal political privileges with the men.

Statistics show that in the State of Maine women are engaged in over fifty different employments, ranging from cotton and other manufactures to the professions. By far the greatest number are employed in manufacturing, there being about seven thousand thus employed. The average weekly salary is eight dollars, and one maker of portraits in Grayton gets sixteen dollars. One woman is proprietor of an orchard; there are a dozen regularly employed physicians in practice, and several ministers all Universalists.

INTERESTING NEWS COMPILATION.

FROM WASHINGTON.
It was decided by Acting Secretary Batcher on the 1st inst. that Chinese servants on the United States steamship Alert, now en route for San Francisco from Honolulu, are laborers within the meaning of the Chinese Exclusion act and they will not be allowed to land in the United States.

THE EAST.
In New York the storm on the 30th ult. did great damage in the city of New York. In South Orange several buildings, including the post-office, were carried away. In Orange valley the water was up to the second-story windows and much damage was done to the numerous hat factories there. Bloomfield and Montclair also reported great destruction of property. In Plainfield the loss was very great, two or three square miles of thickly settled territory being submerged.

E. A. H. Batcher, one of the largest boat and steamship firms in Boston, failed on the 30th ult. for \$1,398,000.
The statement was made on the 30th ult. that the Standard Oil Company had bought all the white-lead companies in the United States. The estimated sum paid being \$60,000,000.

During a rain-storm and high wind at Concord, N. H., on the 30th ult. the arsenal and five houses were unroofed and several others destroyed. An elm tree one hundred and twenty-five years old was torn up by the roots and blown across Main street.

CYCLOPS on the 30th ult. at Ellis Corners, Ulster County, N. Y., destroyed a large amount of property and injured a number of persons.
On the 30th ult. Dr. W. B. Roberts, the originator of nitro-glycerine torpedoes for blasting in oil wells, died at Titusville, Pa. He left an estate valued at \$3,000,000.

In session at New York, N. Y., the first of the journeymen plumbers and steam-fitters' unions of the United States and Canada voted to leave the Knights of Labor and establish an independent organization. This will take thirty thousand members from the Knights of Labor.
The death of Senator K. H. Rollins, of New Hampshire, occurred at the Hotel House, Ltd. of Shool, on the 31st ult. He passed away without recovering consciousness from a paralytic stroke he suffered four days before. He was sixty-four years of age.

The failure of the Connecticut Rubber Company of Norwich, Conn., occurred on the 31st ult. for \$100,000.
Republicans of Massachusetts will hold their State convention in Boston on the 25th of September.

The relief commission met in Johnston, Pa., on the 31st ult., and a statement of the money in the hands of the Governor was rendered, showing that Governor Beaver had received a total of \$2,394,414.46, and that of this \$2,394,414.46 had been paid out, leaving in his hands \$1,554,017.86.

Francis L. Carey, known as a weather prophet, died in Boston on the 31st ult., aged seventy-two years.
In New York on the 31st ult. John L. Sullivan was arrested on a requisition from Governor Lowry, of Mississippi, for participating in the fight with Kilrain, and for failing to appear for trial.

At Plymouth, Mass., a National monument in honor of the martyred Father was dedicated on the 1st. The corner-stone of the monument was laid August 1, 1850. Completed, it has cost over \$300,000, collected from all parts of the country. It is of solid granite throughout.

At Watkins Glen, near Watkins, N. Y., a cloud-burst on the 1st nearly made a complete wreck of that famous locality. The town was flooded and bridges were carried away.

The death of Nathaniel Chase, better known as "Father Chase," was Millerite, occurred at his home in Andover, Mass., on the 2d, aged eighty-nine years.
Herman Peterson and his wife, an aged couple, penniless, ragged and hungry, arrived at New York from Pittsburgh, Pa., having walked the entire distance in the oil regions of the State, New York and Ohio. There is poetic and ethical symmetry in the fact that about the same time when America started out to illustrate liberty enlightening the world it also furnished the globe with the greatest illuminator it ever possessed.

WEST AND SOUTH.
Three Omaha (Neb.) breweries owned by Metz, King & Co., were sold on the 31st ult. to an English syndicate. The price paid for the three was said to be \$1,500,000.
Near Anderson, Ind., a stick of dynamite was fed into a threshing machine on the 31st ult. and the machine was blown to pieces and three men and four horses were killed.

On the morning of the 31st ult. one of the heaviest earthquake shocks it has known in many years visited San Francisco, but did no damage.
Fire on the 31st ult. destroyed the furnace and casting buildings at Kokomo, Ind., covering three acres of land, belonging to the Diamond plate-glass works.

On the 31st ult. died containing three young ladies—Miss Lizzie Farrell, Miss Annie McCabe and Miss Alice McGinnis—was swept over the falls in the Menominee river at Norway, Mich., and all were drowned.

In the vicinity of Peru, Ind., many horses were on the 31st ult. afflicted with glanders.

GREAT DESTRUCTION.

Floods inundate a Number of New Jersey Towns, Sweeping Away Much Valuable Property and Driving Families from Their Homes. Heavy Losses in Pennsylvania, Maryland and Virginia.

PLAINFIELD, N. J., Aug. 1.—The damage by the great storm of Tuesday night is much greater than was at first supposed. Nearly a dozen dams in this vicinity were washed away. The first dam to break was at Teller's, two miles north of here. The break occurred at 10 o'clock, and a rush of water carried away and absolutely obliterated two smaller dams below it at Seely's mill, causing a loss of \$30,000. The water rushed on down to Scotch Plains, completely inundating the village. Cellars were flooded and the bridges were swept away. The Baptist church here was badly damaged and the old cemetery surrounding it is badly washed out, in many places exposing the graves.

A. D. Shepard's place was completely flooded. The Derby fur mill here lost \$10,000 in stock and machinery. The great body of water divided, a part of it forcing its way for a mile across the fields until it reached Cedar brook, a little stream running through the eastern portion of Plainfield. The brook became a river, and a lake and a portion of Plainfield's choicest real estate was under water up to the second story of the houses.

The heaviest loser here is Job Mole, the mayor of the town, who owns more than a hundred of these handsome residence dwellings. His property is damaged to the extent of \$200,000. The Park Avenue Baptist church was washed out, with other local churches. The foundation at the rear was washed out, but the building is safe, though damaged. Many gallant rescues were made in this part of the town of people who, becoming frightened, attempted to leave their houses and were caught in the flood. James L. Leary, assistant fire chief, was swept down the stream while out in a boat assisting others, but was rescued by means of ropes thrown to him.

The breaking of the Tiers dam threatened to cut off a big swath through the business portion of the town, and a body of water which runs through that part of the place is bridged over with buildings on Somerset street. The space underneath was not sufficient to carry the water, and it backed up into the street. Martin's blacksmith-shop and other smaller buildings were lifted and thrown in a heap into the middle of the street. French's mill was undermined and stands suspended over a yawning gap. His large factory is tottering and may fall. Blinn's mill, a two-story building, was exposed at the bottom. His cotton gin factory is badly damaged and Ryerson's carriage repository was damaged \$10,000.

On Somerset street there is a gully thirty feet wide and twenty deep. The gas mains are broken and the sewers disconnected. The water is running in the street. The Washington valley let down at a number of places. The water to the dam at Watumpka falls. Little damage was done until the masonry, which was built supplementary to the natural falls, gave way, when a large mass of water thirty feet high fairly leaped against the falls. Masonry work was washed away and what was once a picturesque resort is absolutely gone. Coddington's ice-houses, barns and mills were swept away, involving a loss of \$30,000. Stony brook runs through a farming country west of the town, so that the subsequent damage was slight. Of the fifty-two large bridges in Union County thirty are said to be gone, involving a loss of the count of more than \$40,000. No lives were lost.

The dam at Van Brockle's mill pond at Milburn broke early Wednesday morning, and the escaping water drove hundreds of people from their homes. Household goods and other property were carried away. The people fled in terror. It is impossible to drive over the thoroughfare.

Parsons, N. J., Aug. 1.—The lower part of this city is partially submerged. Huge boulders have been washed down the street and front yards. Blocks of street curbing have been washed out and sidewalks undermined. The culvert near the county bridge has been washed away. Dykes are partially submerged. The Patterson mill is rising rapidly. The water in the cellars and wheel-pits. Operations will be suspended. The dam at Helicon is liable to burst at any moment.

NEWARK, N. J., Aug. 1.—Reports from all over Essex County indicate that the damage will be much greater than was thought. Flooded areas are feared more severely by the breaking of Frit's dam. Fifty families were driven from their homes, but no lives were lost. The water is subsiding and the people are returning to their homes. The dam broke Tuesday night and the water rushed down the river. The water in the cellars and wheel-pits. Operations will be suspended. The dam at Helicon is liable to burst at any moment.

HELD UP THEIR HANDS.

Masked Bandits Go Through a Sleeping Car on the Washburn Railway Near Kansas City, Securing but a Small Sum—The Bravery of the Conductor Prevents the Passengers in Other Coaches from Losing Their Valuables.

KANSAS CITY, Mo., Aug. 3.—"Hold up your hands!" Such was the command that astonished the passengers on the St. Paul sleeper attached to the rear of the Washburn Western express as it pulled out of Harlem at 8:30 o'clock Saturday evening. The command was spoken by one of two men who had entered the rear of the coach, their faces concealed behind blacked faces.

The passengers turned to ascertain the source of the command and looked into the threatening muzzles of two revolvers. Hands went up. The cautionary words that followed were not necessary, for the first one that offers resistance will be shot first by our man on the platform. There was no man on the platform. The passengers submitted as quietly as if there had been a legion.

Council Proceedings.

CHelsea, July 19, 1889.
Board met in council room July 19, 1889.
Meeting called to order by Pres. Hall at 8 o'clock.
Present: W. J. Knapp, President; Trustees, Schumacher, Stoddard, Holmes and Bacon.
Absent: Trustees, Crowell and Schenk.
Minutes of previous meeting read and approved.

The Finance Committee reported that the bill of Hummel & Penn to the amount of \$20.93 be allowed, and an order drawn on the Treasurer for the same.

The bill of M. M. Crimblett was referred to the Finance Committee.

The following communication was read by the Clerk:

To the Hon. President and Trustees of the Village of Chelsea: Gentlemen—You now have a fire department consisting of fifty men, two Babcock Fire Extinguishers, and a Hook and Ladder Truck, fairly organized and in working order. In order to make the same more complete and effective in the event of a fire, I would recommend that there be a tank placed in the engine house, with a capacity of ten barrels or more of water, which could be easily filled from the roof of the town hall and engine house. Also that a tank be mounted on wheels, the same to have a capacity of not less than four barrels, to be used in case of fire, to charge the engines in case we should use more than one charge at a fire. I would also recommend that the exit from the engine house be changed from the north end of the house to the west side, and that the doors be made to work on rollers, or slides, instead of swinging as they now do. I think this change would avoid confusion and at the same time allow any or all of the engines to be moved at once, and besides it would lessen the work of getting onto the street with the engines. I would also recommend that there be furnished the department as soon as possible, a suitable hall in which to hold its meetings, as I think it would create an interest on the part of the members, that would be beneficial to the department as well as to the Village. I would suggest that the Board at an early date as convenient, furnish the members with some kind of a uniform; nothing expensive is required, a flannel shirt and hat or cap, or even a cap would be a help to designate the members from the crowds that usually congregate at fires.

Chelsea, July 17th, 1889.

J. A. PALMER, Clerk.

The above was referred to a committee of three, Knapp, Bacon and Lighthall, being the committee.

Moved and carried that Marshall be instructed to notify George Mast to erect a suitable railing and walk on his lot south of Knapp & Hindelang's land.

Moved and carried that we adjourn.

FRED VOGEL, Clerk.

The Change from Boots to Shoes.

Considerable attention has been called to the calf skin situation. Of late years the demand has been falling off, as other kinds of leather have been taking its place. One of the principal causes of this has been the fact that long legged boots have been going out of favor, shoes taking their place to a great extent. This has had great effect on the consumption of leather, as on an average it requires about two and one-half to three times as much stock in the manufacture of boots as is required in the making of shoes. In this way the use of heavy calf skins has greatly declined. During the past few years the styles have run more toward "dongols" and "kangaroo" leather for fine shoes, and this has been a serious setback for fine light weight calf skin.—Ex.

Copper-Nickel Cents.

It is estimated by a mint official that there are still in existence somewhere in the country, tied up in old stockings or in the hands of curiosity collectors, over 100,000,000 of the old fashioned copper cents, about 120,000,000 of copper-nickel cents, nearly 5,000,000 of the present issue of brown pennies and 25,000,000 of nickel three cent pieces and about 200,000,000 of the nickel five cent pieces. The total value of these outstanding various coins is put in round numbers at \$52,950,000.—Ex.

Butter-Making Experience.

By Thomas Hastings, of Buffalo, N. Y., at the recent meeting of the New York State Agricultural Society, gave the following experience in butter-making.

He said you must begin with the cream—impossible to have decent butter unless you ventilate, feed good food and keep clean. The butter-making is indispensable. It costs him 1 1/2 per pound to make butter that sells for 25 cents on an average the first season. Take milk out of the herd the moment it is drawn, both to protect it from foul odors and to be able to cool it instantly and uniformly, which is necessary to avoid loss of cream. Ripen carefully, till it becomes a trifle acid or little bubbles begin to appear. Prefer fermentation rather than friction, and uses a barrel churn. When granules of butter appear, adds for each gallon of cream a gallon of water, and a good tablespoonful of salt, at 30 degrees; then revolves churn two or three times, allows to stand five minutes, and draws off say two-thirds of the liquid, then putting in another supply of water and so on, till buttermilk is all gone. Thinks white specks are probably sour milk, and repeated washings while in the granular form, carry them off. Sprinkles salt on the granules (ounce to pound), turns churn a few times, allows to stand half an hour, work as little as possible to get out air bubbles, and puts up in pound prints. Gets 4 1/2 per quart for milk in this way, which he thinks far better than selling it, as he keeps the skimmed milk and buttermilk. Last year from 15 thoroughbred Jersey cows he sold 4,650 pounds of butter, 100 gallons cream, 500 quarts milk, receiving \$1,742 against \$377 for keeping the cows—\$1,365 profit. Thinks trouble in getting butter to come is often due to an excess of carbonaceous food.—Ex.

A Laughing Plant.

Palgrave, in his work on Central and Eastern Arabia, mentions a plant whose seeds produce effects analogous to those of laughing gas. The plant is a native of Arabia. A dwarf variety is found at Kasum, and another variety at Oman, which attains a height of from three to four feet, with woody stems, wide-spreading branches, and light green foliage. The flowers are produced in clusters and are yellow in color. The seed pods contain two or three black seeds of the size and shape of a French bean. Their flavor is a little like that of opium; the taste is sweet and the odor from them produces a sickening sensation and is slightly offensive. These seeds when pulverized and taken in small doses, operate upon a person in a peculiar manner. He begins to laugh loudly, boisterously, and then sings, dances and cuts up all kinds of fantastic capers. The effect continues about an hour, and the patient is extremely comical. When the excitement ceases the exhausted individual falls into a deep sleep, which continues for an hour or more and when he awakens he is utterly unconscious that any such demonstrations have been made by him.—Ex.

Dr. Jacques' German Worm Cakes destroy worms and remove them from the system. Safe, pleasant and effective.

The Handsomest Lady in Chelsea.

Remarked to a friend the other day that she knew Kempf's Balsam for the Throat and Lungs was a superior remedy, as it stopped her cough instantly when other cough remedies had no effect whatever. So to prove this and convince you of its merit, any druggist will give you a sample bottle free. Large size 50c and \$1.

Uncle Sam's nerve and bone liniment will relieve sprains, bruises, neuralgia and rheumatism. Sold by all druggists.

Pileal Pileal Piles.

Dr. William's Indian Pile Ointment is the only sure cure for Blind, Bleeding or Itching Piles ever discovered. It never fails to cure old chronic cases of long standing.

Judge Coons, Mayesville, Ky., says: "I have found by experience that Dr. William's Indian Pile Ointment gives immediate and permanent relief."

We have hundreds of such testimonials. Do not suffer an instant longer. Sold by druggists at 50c and \$1 per box, or mailed on receipt of price, by the "INDIAN PILE OINTMENT CO., Cleveland, Ohio."
