# Farmers' Friend!

SPAULDING'S PATENT

Year by year, as the value of corn and corn fodder becomes Year by year, as the value of corn and corn fodder becomes more and more appreciated, farmers are keeping their eyes open for machinery by means of which they can handle corn cheaply and preserve the fodder economically. All farmers understand that corn should be cut before frost, and when it is put in shocks it should be well tied. They also know that a shock that falls down and lies on the ground through the fall rains is nearly worthless so far as the fodder is concerned. They have also found that corn cut in large shocks has a larger proportion of piece fodder. In these in large shocks has a larger proportion of nice fodder. In these days, when much corn is threshed and husked by machinery, it has been found that something must be had to tie the shocks so they will stand—even 6 months or more. Numerous devices have been tried—two sticks, the ring and rope, &c.; but none are satisfactory. Finally, Mr. Spaulding, aided by suggestions from others, and by experimenting with different designs, finally brought out the binder we now offer to the public. Thirty-five of these little machines were built by hand and distributed among the farmers in Michigan and the adjoining states. One was sent to Kansas, one to Illinois, and so on; but a number of them arrived at their destination too late for use last fall. In every iustance where used the deople were loud in their praise of the machine. Its great success induced a number of persons to buy the patent, purchase a plant and put in machinery especially for making the machine. The company is Nickels and cash items..... now turning out large numbers every day. Anybody can use them with ease, and there is no limit to the size of the shock it will tie except the length of the rope. We guarantee that any shock that is reasonably well set up, and where suitable material, like tarred U. S. and National Bank Notes. 2,948.00 twine, is used for tying, when tied with this machine, will stand at least 6 months or a year without falling down. Especially do we call the attention of corn raisers who shock their corn to this ma-Kit won the 1st and St. John the 2nd chine, and invite them to investigate its merits.

he Corner-Stone of the Monument to iana Soldiers and Saltors Laid at Indianapolis - President Harrison As-

INDIANAPOLIS, Ind., Aug. 28 -- The corner of the Indiana soldiers and sailors ment was laid Thursday afternoon mpesing ceremonies in the presence President of the United States many men of prominence and thousands of vetersn soldiers and sailors. If the monument commissioners themselves had had the privilege of selecting the weather they wished they could not have done bet-ter than did nature. It was all that could

have been asked.

All day Wednesday and the early morning trains yesterday brought thousands of strangers to the city, and by noon there were not less than 40,000 on the streets. The city was aflame with color in honor of the occasion. With the scaffold of the monument in Circle park as the hub, the streets radiated in every direction like the spokes of a mighty wheel, and a glance up any of them revealed to the eye nothing save the red, white and

due, the buildings being almost hidden by the decorations. But the central point of interes; was the big scaffold of the monument itself, looming up in the center of the city to the distance of 104 feet. In every direction from the top ropes stretched away to neighboring buildings or trees, and each was strung with a glowing rosary of pennons of countless sizes and innumerable shapes, from garrison flags thirty feet long to tiny emblems of freedom hardly large enough to crowd three colors into. At the corners of the scaffold are 2,000-candle power electric lights, which will make the beauty of the scene as plain by night as day.

The exercises of the day began at 2 o'clock, when the parade formed and be-

gan its march through the principal streets.
It was made up of various posts of the Grand Army of the Republic throughout the State, and the State militia and local civil organizations. It is estimated that 8,000 men were in line. In the second division, commanded by General Dick Ruckle, immediately in the rear of Berlin, was accepted. The main central foundathe military, was the escort of President Harrison, 100 strong, all mounted, and in command of Colonel Oran Perry. Between the sections of the escort rode the President in a flag-draped carriage, Mayor Denny and Governor Hovey riding with him. The President will have their contract completed and the acknowledged the compliments of the monument ready for ornamentation. crowd by repeatedly lifting his hat Atnext carriage. Then came the monument commissioners, State officers, city officials, prominent citizens and speakers. The officers of the Woman's Relief Corps occupied a bandsomely draped carriage.

It was nearly 3 o'clock when the head of the procession reached the monument. All London on the 22d to imprisonment for life. | the streets surrounding it were packed with people anxious to catch a glimpse of the President and other prominent personages who appeared on the speakers' stand and to witness the ceremonies.

As the President was recognized on the stand he was greeted with a cheer, which he acknowledged with a slight bow. The crowd watched in silence the laying of the corner-stone by Charles M. Travis, Deputy Commander of the Indiana department, Grand Army of the Republic. The documents-Grand Army, Loyal Legion, Sons of Veterans and Woman's Relief rituals, reports and rosters, with photographs, newspapers, etc.-were consigned to their resting place, and then the stone was placed in position in accordance with the ritual of the Grand Army of the Republic. In performing the ritual rites Commander Travis was assisted by the officers of the department and by the presidents of the Sons of Veterans and the Woman's Relief Corps. When the stone had been placed in position. the national flag was raised and the "Star Spangled Banner" sung by Mrs. Zelda uin-Wallace. The ceremony ended with the firing of a salute.

The following articles were deposited in the corner-stone: Terrell's reports, Grand Army of the Republic reports, badges, ritual and roster; Women's Relief corps reports, badges, ritual and of · Veterans reports, ritual and roster; monumental reports and documents since January 1; photographs and plans for the monument, Loyal Legion reports, first me-morial service of the Grand Army of the Republic, reports of original Grand Army of the Republic, minutes of Legislature which passed Monument bill, and the city

Following this Governor Hovey, as presiding officer of the occasion, made a brief address, and he was followed by General M. D. Manson, of Crawfordsville, and General John Coburn, of Indianapolis. At the conclusion of the latter's address President Harrison was introduced to the assemblage, and after the applause which greeted him had ended he spoke as fol-

"MR. PRESIDENT AND FELLOW-CITIZENS: I did not expect to make any address on this occasion. But I beg you to remember that they were only soldiers of Indiana until the enlistment oath was taken; that from that hour until they came back to the generous State that had sent them forth they were soldiers of the Union. It seems to me that our spirits have been borne up to meet those of the dead and glorified, and that from this place we shall go to our homes more resolutely set in our purpose as citizens to conserve the peace and welfare of our neighborhoods, to hold up the dignity and honor of our free institutions, and to see that no harm shall come to our country, whether from internal dissensions or from the aggressions of a foreign foe." The monument will be built of light gray | Burke suggested that a tule be attached from which the interior will be reached by bronze doors. Above these doors large tablets will bear inscriptions commemo rative of the part borne in the war by the different counties, and above the tablets is the dedication: "To Indiana's Silent Victors, by a Grateful State." It is the design of Bruno Schmitz, of Berlin, the designer of the great Victor Emanuel monument in Italy, and the winner of forty out of fifty-eight similar competitions in which he has entered. Its cost will be about \$250,000.

A NEW CLEW.

Officials Think They Have Die sovered Facts Which May Lead to the Recovery of the Missing Clothes of the Late Dr. Cronin—The Case Approaching

CRICAGO, Aug. 21 — State's - Attorne Longenecker says he is ready to proceed with the Cronin trial next Monday, but in with the Cronin trial next Monday, but in-timates that the attorneys for the defense will endeavor to procure further delay, either by motion for separate trials for the prisoners or for a general continuance. Several persons feel that Mr. Longenecker has a few gaps in his case that will be hard to bridge. The identification of the body of Dr. Cronin and the fact of his death by violence are clear. But to trace him to the Carlson cottage and to prove that he was murdered there threaten to be ugly places in the case. How much evidence outside in the case. How much evidence outside of the suspicious circumstances familiar to the public-the State has remains to be

The police, it is said, have discovered that Iceman G'Sullivan's horses were driven rapidly about Lake View the night of the murder by three excited men. The horses were attached to an ice wagon, and after being driven until they were steaming with hard work were pulled up in front of a saloon at which the men guzzled large quantities of liquor. The importance of the discovery is somewhat conjectural. If the team and wagon can be identified as those that carried the body of Dr. Cronin to the catch-basin the new evidence is an important link between the broken end of the chain at the Conklin residence and the end picked up at the sewer

trap.

The State may have a stronger case than is generally believed, but it is very certain that the authorities have made desperate appeals to the prisoners for confessions. The lawyers of the defense deny that any one has confessed The authorities do not pretend to have confessions from the men to be tried for their lives, but couch their assertions concerning their avidence in mysterious terms. It ing their evidence in mysterious terms. It is the general belief, however, that they have no evidence with which to surprise the public on the trial of the case.

Besides the near approach of the trial interest in the case is again revived by an important discovery made within the last few days by the police. The discovery is another link in the chain which connects Martin Burke with the murder at the Carl-About two weeks ago a tinsmith on North

Clark street was taken to the jail, where he identified Martin Burke as the man for whom he did a job of tinning the Monday following the night of the murder. The tinsmith, whose name for obvious reasons is at present withheld, stated that on the Monday referred to Burke came into his shop carrying a tin box under his arms. Except the cover the box was securely soldered, and Burke's instructions were to fasten the cover "if it takes two pounds of solder." The box was twenty-four inches long.

eighteen wide and fourteen deep, and con tained something which entirely occupied the interior yet possessed but little weight Beneath the edges of the cover was considerable dirt, as if the box had been buried in the ground. The tinner attempted to raise the lid and remove the dirt so that the solder would take better hold. Burke grabbed hi arm and told him under no consideration to attempt to raise the lid or in any way try to see the contents. "Never mind the dirt," he exclaimed "if it doesn't hold put on solder till it

pumped out. He afterward abandone this scheme, substituting "more solder" instead. When the work was finished Burke engaged an expressman to carry it From the description of the box and its contents, as judged by the tinsmith from the feeling, the police are confident that it contained the clothes of Dr. Cronin. Every

effort has been made to find the express-

man who carried it away, but without suc-

cess. Descriptions of the box have been

sent to every city in the country, but as yet no trace of it has been found. About the time he put the cover on the last box a smaller one was brought to the tinsmith. From the description it is supposed that it contained the box of instruments carried by Dr. Cronin the night

THE TEAR-KERCHIEF. It is only a trifling thing to show
Just a kerchief, white as the driven snow,
Yet many a tender and loving thought
Is into its dainty stitchery wrought;
For the mother wove it from flax that grew
And smiled in the field with its blossom blue;
She spun the thread whereof it was made,
And watchel it carefully where 'twas laid,
That day's war a kisses and night's soft dew
Might bleach the web to its whitest hue;
And then it was lovingly laid away
For the daughter's hand on her bridal day,

Oh! few are the lears by the maiden shed On the day that her bridal vows are said. They may fall as she meets her father's kiss, Yet her heart is glad with her nuptial bliss, She may fondly cling to her mother's side, Yet her lover claims her, his happy bride. Yet her lover claims her, his happy bride.
She fears not to give up her fair young life
To the sacred duties and name of wife;
And there is no grief in the tears that flow
O'er the soft round cheek with its blushin

glow, And she smiles as she wipes them all away With the kerchief white on her bridal day,

Danking wife taketh the kerchief fair, The young wife taketh the kerchief fair, With scented rose-leaves and lavender spray, Scarce dried from her tears it is laid away. Scarce dried from her tears it is laid away.
There in its fragrant and perfumed nest,
For many long years may the kerchief rest.
They will bring in their train both joy and woe
As Time goes on in his ceaseless flow.
But Love still maketh each burden light, but Love still makes the dwells is ever bright, and the wife still smiles as she smil'd the day she laid her kerchief with smiles away.

But Time will pass and the years go on, And each day findeth some duty done, And the kerchief lies in its scented fold, But snow has sprinkled the hair of gold; For the fair young bride is a matron now, And wrinkles furrow the once smooth brow, And her step is no longer free and light, And the hair is a crown of silv'ry white, But her children arise and call her blest, And her husband's heart in her doth rest; And the kerchief lies as 'twas laid away Ry the maiden's hands on the bridal day.

But there comes a day when, in peaceful rest, Those hands lie crossed on a quiet breast, When the tender eyes are forever shut, And the loving lips are forever mute. Then, ere the face that they loved is hid From mortal sight 'neath the coffin-lid, The kerchief stained with the young bride's

so carefully guarded for many years, Is gently laid o'er the features pale; At Death's cold bridal, a bridal vail! And the kerchief, laid for so long away, Hides the calm, still face on the burial day, -Mary N. Robinson, in Good Housekeeping.

### A SINISTER SCHEME.

The Cruel Joke Uncle Toby Played Upon His Nephew.

An elderly gentleman, whose chief idiosyncrasies are a rooted aversion to death and a fervent hatred for his heir and successor, is not exactly a novel character either in real life or on the stage. But there is a material difference in his behavior in the two situations, for whereas on the stage he is almost invariably turned to repentance by the beaux yeux of the young lady whom his heir has married, or by the maddening prattle of her tiresome good two hours later than usual, and when at last he went to bed it was down upon him in a hungry horde, and with a firm determination to carry out the amount of post-obits which he had child, and dies in the odor of sanctity distributing indiscriminate blessings, in real life he more often than not carries his spite with him to the grave. and leaves his posterity good reason to execrate his memory in the share of an outrageously malicious will. Sir Toby Bunskin, of Bunskin Hall, Fallowland, and No. 250 Grosvenor Square, was not at all like the traditional old gentleman of the stage. His hatred for his heir, Captain Jack Bunskin, of the Fiftieth Lancers, was not exaggerated, and did not betray him into foolish excesses, but it was extremely sincere -all the more so, perhaps, because it was absolutely unreasonable-and if any mutual friend had ventured to hall and the avuncular bosom, he would promptly have been set down as a lunatic of the most pronounced type. It was in truth a very hopeless case, and Jack Bunskin had long ago reconciled himself to a precarious existence on his pay, his wits, and the money he could raise by mortgaging his reversion to certain family estates which Sir Toby had not the power to will away from him. Now, although Sir Toby hated Jack so heartily, it must not be imagined that he was sufficiently lost to the decencies of society as to ignore his existence, to insult him in public, or even to be pointedly rude to him in private. Jack difficulty, of course, being how to was always asked down to Bunskin Hall for the cover-shooting, he was expected to assist at the annual rentdinner of Sir Toby's tenants, and at certain fixed seasons he was formally invited to Grosvenor square. FRENCH SLEEPING-CARS

They Are Not Up to the Standard of Our Pullman or Wagner Coaches.

The charge for a bed in the sleepingcars from Basle to Calais, is about 19 francs, and from Basle to Paris, for some occult reason, 7 francs more. By one of those extraordinary arrangements that can exist only in countries where nobody trusts any body, and every body is suspected by every body has hired a bed at 9:15 is not allowed to turn into it until 11:30, the reason assigned being that at the French frontier the "small baggage" must be examined, and if people were allowed to "turn in" before the examination took place there is no saving what amount of tobacco and laces and the rest of it might not be secreted in or under the bed by the tourist or by the ervants of the sleeping-car company. When, however, the conventional cermonial of affirming that you have "nothing to declare" has been gone through and your dressing-bag has been defaced by hieroglyphics in white chalk, then the operation of bed-making in the wagon-lits commences. Any one who has watched it will be disposed to exclaim, with Macbeth: "Sleep no more." In a small and sometimes filthy den narrow cushions and hard pillows of hoar antiquity are prefunc-torily covered with a shabby rug and a sheet, and under a covering of a similar character the traveler who has paid more than £1 for this extraordinary indulgence is invited to betake himself to slumber. If he happens to have a traveling companion they can procure the luxury, such as it is, of privacy, though one of them, on the Dogberry principle, must needs sleep on the upper shelf, which is an experience several degrees more painful than lying on the lower one. If the number of passengers be not equal to the number of beds they will be able, by bribing the person in charge, to get

a four-bed compartment, and thus both will avoid the torture of being suspended from the ceiling. As a rule these vacant compartments are to be had by tipping the dirty official in charge of them and thus, perhaps, for 25 shillings aplece two people can secure the mitigation of misery we have described. One of the main inducements to many people to have re-course to a wagon-lit is the belief that at any rate in the morning they will be able to have "a good wash" and will thus emerge from the train the simulation of a civilized being instead of an unwashed, unkempt, unshaven savage. Morning throws a fuller light on this pleasing anticipation. As some of our correspondents point out, the "lavatory" arrangements in the sleeping cars between Basle and Calais and between Basle and Paris are abominable beyond description, and can not be turned to the slightest account by any one of the most ordinary fastidiousness. —London

A CONVICT IN A BARREL. His Agonized Cries Cause His Detection

Bis Agonized Cries Cause His Detection—
Serving a Life Sentence.

David R. Palmer, sent to Jackson prison for life for the murder of his wife, has been an exemplary prisoner and was given more than the usual liberties. The other morning he was filling a large cask with scraps when an idea struck him. He put a false head in the cask about midway of its length and then, placing citizen's clothes, a hammer and a chisel in the barrel, got in himself. Another head was fastened to the cask by Palmer's fellow-convicts and the cask was taken to the freight office. As it was being loaded on the car the freight handlers heard a wild appeal for pity, which they could not at first understand. Finally one of the men solved the mystery. He opened the cask and drew the prisoner out more dead than alive. Palmer was out more dead than alive. Palmer was turned over to the authorities. He declared that he would rather stay in prison for life than to undergo again such torture as he ex-perienced the three hours he spent in the

HE WAS INNOCENT.

But He Passed Fifteen Years in Prison Before the Discovery Was Made. In 1874 George W. Barnhart, a well-known and well-to-do citizen of Branch County was accused of a criminal assault and in due course of time was convicted and, owing to popular clamor, was sentenced to prison for life. His property was dissi-pated, his wife died, and his family had pated, his wife died, and his family had been scattered over the country. Barnhart has suffered his imprisonment uncomplainingly, and recently a movement was set on foot looking to his pardon. The more thoroughly the matter was investigated the more apparent it became that the man was unjustly convicted. Nearly every body in the county signed a petition for his release. The Board of Pardons made exhaustive research and they were convinced. haustive research and they were convinced that he was being unrighteously punished. The other day Governor Luce extended an unconditional pardon to Barnhart, who goes out into the world again without money, family or property.

Stabbed a Fellow Convict.

At the Jackson State prison the other night as the convicts were marching from work to their cells, Isaac Clark, sent from Wayne County eighteen years ago for life for murder, stabbed Enos H. Girard, a fellow convict, in the neck, cutting the carotid artery, also cutting a four-inch gash across the back of Girard's head. The wounded man was taken to the hospital, and, although weak from loss of blood, it was thought he would recover.
