To Our Patrons.

With this issue the HERALD enters upon its Nineteenth year, and is, as it always has been, in a flourishing condition. Our merchants appreciate the value of an old paper for advertising their business, as will be seen by a glance over its columns.
We hope they will never forsake their old love, and always honor the man who was its founder, and has stood firmly by them for the past Eighteen years.

The merchants, mechanics and all business men of this vicinity, know how to appreciate a live local paper, with a good healthy circulation.
We wish to thank our many readers for past favors, and hope for a continuation of the same in the future.

We hope to see the Twenty-first anniversary of the HERALD, when we will give our patrons and friends a grand old picnic at Cavanaugh Lake.

Card of Thanks.

The Pastor and Church Committee of St. Mary's parish wishes to extend hearty thanks to all who in any way assisted in giving Bishop Foley such a magnificent reception. Especially would the Committee gratefully acknowledge the many courtesies received from those not members of the church. To particularize would take up too much space, and the Committee hopes that this card of thanks will be accepted in lieu of personal mention.
CHURCH COMMITTEE.

EDITOR HERALD:—Believing a principal aim of your paper to be the encouragement of good among its readers, I wish to say through its columns that the Chautauqua Literary and Scientific Circle is still living in this place, and is not, as is sometimes supposed, exclusive in its character or limited in its membership.
On the contrary we most cordially invite any and all who care for self-improvement, mental, moral, physical and spiritual, to join our local circle.

On Friday evening of this week a meeting will be held at the residence of Heman Woods, which will be preparatory to organizing for the next year's work, and to arrange for books, etc.
Come one, come all! Let at least one literary society flourish in our midst. Nothing is more beautiful than a well rounded character, and to secure which, all our faculties, both mental and physical, must be exercised; else one will consume the other. We believe nothing is better calculated to guide us in this development than the Chautauqua course of reading.

For the year beginning October, 1889, and closing June, 1890, the leading subjects are Roman History, Latin Literature (in English) Human Nature, Political Economy, Art, Philosophy, Physics, Religious Literature, with many subjects of the day.

Card of Thanks.

The undersigned wish to cordially thank the kind neighbors and friends for their kind assistance and sympathy in the sad hours of their affliction, through sudden death of their dear son Gustave. Also thanks to the choir that furnished music. In bloom of life he was taken from us. To bloom in heaven for ever more.

THE Farmers' Friend! SPAULDING'S PATENT CORN BINDER.

Year by year, as the value of corn and corn fodder becomes more and more appreciated, farmers are keeping their eyes open for machinery by means of which they can handle corn cheaply and preserve the fodder economically. All farmers understand that corn should be cut before frost, and when it is put in shocks it should be well tied. They also know that a shock that falls down and lies on the ground through the fall rains is nearly worthless so far as the fodder is concerned. They have also found that corn cut in large shocks has a larger proportion of nice fodder. In these days, when much corn is threshed and husked by machinery, it has been found that something must be had to tie the shocks so they will stand—even 6 months or more. Numerous devices have been tried—two sticks, the ring and rope, &c.; but none are satisfactory. Finally, Mr. Spaulding, aided by suggestions from others, and by experimenting with different designs, finally brought out the binder we now offer to the public. Thirty-five of these little machines were built by hand and distributed among the farmers in Michigan and the adjoining states. One was sent to Kansas, one to Illinois, and so on; but a number of them arrived at their destination too late for use last fall. In every instance where used the people were loud in their praise of the machine. Its great success induced a number of persons to buy the patent, purchase a plant and put in machinery especially for making the machine. The company is now turning out large numbers every day. Anybody can use them with ease, and there is no limit to the size of the shock it will tie except the length of the rope. We guarantee that any shock that is reasonably well set up, and where suitable material, like tarred twine, is used for tying, when tied with this machine, will stand at least 6 months or a year without falling down. Especially do we call the attention of corn raisers who shock their corn to this machine, and invite them to investigate its merits.
