The Catholics of St. Mary's parish, Chelsea, will be pained to hear that Bishop Borgess, who for 18 years ably presided over the diocese of Detroit, is lying dangerously ill at 'Kalamazoo, where he was stricken with paralysis. Indeed at this writing he may be dead. Bishop Borgess was a man of great administrative ability, and the diocese attained an enviable degree of prosperity while he had charge of it. The sympathy of all people and all denominations will go out to him, and the diocese of Detroit in their great sorrow.

During that time he was shot at thirty-three times, wounded four times, had his cabin set on fire twice, his wife was driven to suicide and his boy ran away, and at last the man grew weary and hanged himself.

When the average man or woman comes to be fitted with the first pair of glasses some curious discoveries are made. Seven out of ten have stronger sight in one eye than the other. In two cases out of five one eye is out of line. Nearly one-half the people are color blind to some extent, and only one pair of eyes out of every fifteen are sound in

An English photographer claims to have obtained a photograph in which the natural colors were reproduced when the exposure was made by accident, just at the moment when there came a blinding flash of lightning. He says that a friend of his once got a colored plate under similar circumstances, and believes that electricity has to do with photographing colors.

THE annual report of the Boston "Home for Aged and Indigent Cats" shows that during the last year the institution took in two hundred and sixtyone sick, debilitated, superannuated or homeless cats. Of the total number of cats received one hundred and seventyone were sent in for treatment by their owners, while ninety were simply pulled in for being without visible means of support. Of deaths there were thirty-five, the largest proportion being due to la grippe.

ONE of the managers of a big Eastern knitting-mill has made a calculation that the shoe-strings of a working-girl will come untied on the average three times per diem, and that a girl will lose about fifty seconds every time she stoops to retie them. This entails a loss of 300 seconds every day for each girl. There are about 400 girls employed in this factory, and therefore the gentleman finds that 43,800,000 seconds are wasted a year, which time, at the average rate of wages, is worth \$943.171/4., Orders have accordingly been issued that girls must wear only button shoes or gaiters or be discharged

It seems that the truly-cultured Boston woman never carries any thing home when shopping. Says one of them: Once I had a piece of tape sent home, and once I had a tape-needle sent to my house." "It doesn't so much matter from the dry-goods store," said her friend. "They are sending, any way; but, as true as you live, I saw a woman in a market order one ounce of pepper, and they had to get out a wagon to send it to the next street to her. If it was in the morning it wouldn't so much matter; but to order home in the afternoon one ounce of pepper-I can't forget it! She had her muff, too!"

A BIG STRIKE.

a Tremendous Labor Upheaval Predicted at Chicago—All Tradesmen to Strike May 1—At Least 100,000 Working-Men, It is Anticipated, Will Demand the Eight-Hour Day.

CHICAGO, April 25. - The untiring devoted during the next two weeks to an endeavor to restrain the strike fever which seems to have seized the workingmen of the city. The purpos and plan of the American Federation of Labor, which heretofore has controlled the eight-hour-day movement, has been to fight the battle with and for one trade at a time.

The carpenters, as best organized as well as the poorest paid of the craftsmen, were selected as the first trade to be relieved. When they had won, the miners were next, and then the tailors. To the support of each of these trades in turn the whole energies of the federation were pledged. Since March 1 an assessment of ten cents per week for strike purposes has been collected from the 630,000 working members of the federation. This means a fund constantly being replenished at the rate of \$63,000 a week. No combination of employers in any line of trade in any city of the country could successfully fight a well-organized strike backed by almost inexhaustible capital.

But the plans of Mr. Gompers and his associates seem too weak to resist the desire of other tradesmen to join actively and aggressively in the movement. Trade after trade has organized and declared that it, too, must have the eight-hour day. The monster demonstration which has been arranged for May 1 as an expression of sentiment only may turn into the beginning of a strike which the ablest of the labor leaders will be powerless to direct, much less control. The officers of the federation can success fully govern and discipline 7,000 cool, well-organized carpenters, but they would be swept away by an unorganized mob of 70,000 enthusiastic, if not hotheaded, men, who think they see victory within easy reach.

And this is what the leaders fear. The original plan of the May day parade was that all except the carpenters should return to work May 2. Today no one can predict what any trade will do. The chances are that most of them will declare themselves on strike for the eight-hour day. This would mean utter stoppage of half or even a greater proportion of the city. And at present the local leaders see no means to avert such a disaster. Certainly many thousand strikers will be added to the carpenters. The stock-yards and packing-house employes, the stair-builders, mill carpenters, gas-fitters, iron molders, and harness-makers have already announced their intention of striking But besides these the tailors, shoe-makers, plasterers, lathers, cornice-makers. metal-workers, and many other lines of labor seem determined to join the ranks.

Already there are between 10,000 and 12,000 men idle, owing to strikes among the various crafts, and adding to thi number 15,000 men who have no work to do gives a total of nearly 25,000 men already out of employment.

That a great crisis in labor circles i fast approaching was forcibly indicated by an interview with George Detwiler, editor of the Knights of Labor, the or gan of the various labor organizations in this city. Mr. Detwiler's position and familiarity with the trades and labor unions of Chicago give to his opinion a more than ordinary weight. Said

"Strikes are contagious, and the prospect for a general strike about May 1, and one of gigantic he great strike of 1886, in which 51,000 mer were out. The strike that year was more a uprising of an unorganized mob than any thing The men are thoroughly organized and well dis dplined. The general nature of the demands t be made will be the establishment of the eight hour day. The question of wages will play but lit-tle part, in fact the men are nearly, if not all, will ing that a proportionate reduction of wages b come about.

"What is the total number of men you believe will go out about May 1?"

"The figures can safely be put at 100,000 ssibly a few more. In addition to the strikers already out the stock-yards' en limost positive that the sash, door and blind workers, the coopers, hod-carriers, plasterers and lathers will make a demand for eight hour about the first of next month. The bricking ers have nearly all quit work. I may say that every organized union of the building trades will strike, unless, of course, their demands are acceded to.

The probabilities are strongly in favor of an extensive strike at the Stock Yards among the packing-house employes May 1. Between 14,000 and 15,000 men are empleyed in the various packing establishments, and it is generally understood that at least half that number are ready to go out May 1 on a demand for the eight-hour day. Many of the others are anxious to re-The system in vogue at the yards requiring that a deposit of two weeks' wages tasteful and many of them are making a demand that the deposit money be returned to them. THE SOUTHERN FLOODS.

the Damage in the Water-Swept Sec. tions Will Probably Exceed \$27,000,000 saving the Refugees.

BAYOU SAHA, La. April 25.-The re-Mef steamer Dacotah reached the Bayou Sara landing Wednesday evening. She had made a trip to Pointe Coupee and has come back to Bayou Sara. Her arrival was a godsend to the people whose dives are in jeopardy, for she has not only already saved a large amount of property but a number of lives.

The indications now are that the losses from the high water of 1890 will exceed those of 1882, when the damage was estimated at \$27,000,000. The damage to the cotton depends upon the duration of the flood. If the water does not go down in time to plant it will entail a loss of \$8,000,000 or \$10,-000,000. The sugar-cane is immediately damaged whenever overflowed, and the loss in such cases will be nearly 90 per cent. The outlook for the coming week is very bad indeed. The real condition of things in the

overflowed districts is just coming to light. No pen is equal to the task of picturing the devastation of the country or the desolation of the peo-ple. The entire front of Pointe Coupee is under water. Most of the levees have gone. The water back of the levees is so deep now that hundreds of lives are in jeopardy. The small stretches of levee still standing are crowded with men, women and children, side by side with horses, mules and cows. In an old raised gin house 500 negroes were found huddled together. The condition of the unfortunate blacks was pitiable.

The crevasse at Allendale will overflow thirty of the finest plantations on the river. It will reach the Teche country several days in advance of the Morganza water, and Colonel Rivers says when this water joins with the Morganza it will flood the entire Atchafalaya, Lafourche and Teche countries. The damage is incalculable. The distress in the overflowed district can

The Texas & Pacific boat E. B. Wheelock succeed in saving 200 people from the back country around Morganza. Ruin and desolation meet the eye on every side in Pointe Coupee parish. The destruction is complete. Not a plantation is left above water, not a levee unbroken, while hundreds of families are homeless. Thousands of cattle have been drowned, and from reports received from the interior it is quite probable human life has been sac-rificed to the flood.

Standing on the deck of the relief steamer Dacotah as she passed down the full extent of the disaster-could be seen. Grouped together on little knolls between broken levees, through which the water rushed with ungovernable fury, were scores of people, both white and black, some with babies in their arms. Many of them had nothing left in the world except the clothes they wore on rose rapidly, and at 10 o'clock Sunday their backs. Whenever the Dacotah discovered a scene like this the stage morning passed the highest waterwas swung out and the stricken ones taken aboard. THE CLAYTON MURDER.

The Governor of Arkansas Has Information that the Bullet Which Killed John M. Clayton Was Intended for His Brother Powell.

Sr. Louis, April 25.-Referring to the announcement made from Washington that Governor Eagle, of Arkansas, has positive information concerning the identity of the assassin of John M. Clayton, of that State, a dispatch says that he will not make it public until it is submitted to the Congressional investigating committee, which is to sit there the last of this week. It is stated on reliable authority, however, that this evidence will show that the crime was committed by a man who mistook John M. Clayton for ex-Governor Powell Clayton, and believed he was avenging the death of a relative who was killed while Powell Clayton was Governor.

The Morgan City authorities are placing weights on the bridge and chaining other property to prevent its washing away. The flood will entail a heavy loss to people living in the neighboring bayou and swamps, as they will be compelled to leave their homes and preperty to the mercy of the waves. NEW ORLEANS, April 28 .- Perhaps the best idea of the situation in the parish of Point Coupee is given by Captain Dan Kingman, of the United States Engineer Corps, who has just returned from several days' work with his reliefboat in the overflowed section. The crevasse, says Captain Kingman, at Morganza levee is 1;227 feet wide, and the flow of water through the break is about 150,000 cubic feet per second. The depth of the water where the break occurred is not less than twenty-six

WASHINGTON, April 28. - Secretary Proctor has telegraphed to the Governors of Louisiana, Mississippi, Tennessee and Arkansas asking to be informed as to the extent of the destitution in the overflowed country and the points to which rations should be sent: also to designate persons to act in conjunction with the officers to be assigned to duty in the distribution of stores. He says he is prepared to afford immediate relief. Telegrams have also been sent to the Quartermasters and subsistence department at New Orleans instructing the officers in charge to take measures for the issue of provisions whenever needed. BALTIMORE, Md., April 28. - The heaviest hail-storm on record at this station passed over Baltimore from northwest to southeast between 3:45 and 4 p. m. Sunday. Many thousands of windows in the city were broken, the damage being confined mainly to the western exposure. Many runaways are reported. Some horses and carriages were abandoned in the streets, their owners leaving them to seek shelter. It is probable that a number of people were injured, as the stenes were very large, some measuring more than two inches in diameter and weighing more than four ounces each.

Yorkville, a village a few miles southwest of Cotton Plant, was almost entirely blown away, and the disaster is very great Houses, barns, fences and structures of all kinds were taken up by the wind and carried some distance. This sentimental tribute was, no doubt, worthily bestowed by the poet, but it is a presaic fact that large numbers of our fair country -women are deficient in personal charms, because they do not try and conquer the disorders peculiar to their sex, and from which so many of them suffer martyrdom. As it is the ambition of every woman to look her best, let the afflicted ones use Dr. Pierce's Favorite Prescription, and thus recover their health, without which there can be no beauty.
