You see, he was too thin.

Freddy Glenn, of North Lake, is fast recovering from a severe attack of Scarlet fever.

G. A. Kirkland, of Isco, spent a few days of last week with his sister, Mrs. J. C. Taylor.

Nearly all those whose subscription expired during Jan. have promptly renewed, and it is hoped that others will follow suit as their subscription expires.

The longer we run a newspaper and write about people and events the more we realize how impossible it is to scratch every man on the spot where he fishes the most.

The number of students now attending the University at Ann Arbor, is as follows: Literary, 1,007; law, 579; medical, 895; dental, 138; pharmacy, 91; homeopathic, 77; total 2,480.

The Millerites are holding revival meetings in Lamotte and the excitement waxes so high that it is said the ghost of the departed members of the sect come around at night and help boom things.

We clip the following from the Jackson Star: "J. L. Newkirk, a gentleman who recently started a newspaper at Munnich, has graduated into theology and has become a minister. A newspaper office affords the necessary training for the pulpit."

Senator Blackburn, of Kentucky says: "A dude is simply the creation of peculiar conditions of society, and he may be long to any locality and be differently misguided. For instance, I know places in Kentucky where a man who would put on a \$10 suit of dress clothes and a white shirt would be regarded as a howling dude."

Every year the pope chooses from among the Roman Catholic ladies of royal families one upon whom to bestow the golden rose. This year the empress of Austria will be the recipient. The golden rose sometimes takes the form of a rosebud, and sometimes a single flower with leaves, but it is always of the precious metal.—A. A. Democrat.

A good deal of discussion is going on in the state papers relative to the Canfield murder trial and the speedy justice that was meted out to the scoundrel. That a murder was committed was clearly proven and when questioned the prisoner pleaded guilty to having committed the deed.

Nothing more was necessary and he received the sentence to which he is undoubtedly justly entitled, no matter what may be hereafter proven as to accomplices or motives.

Now labor on the farm means just the same as labor in the shop. In either case it is a direct expense. The man who performs it must be paid for it and the man who hires it must do the paying. But in the case of the farmer the same man is often the employer and the employed. He works for himself and must look to him self for his pay. If he works faithfully and directs his work wisely he may secure large returns. If he idles away his time, or misdirects his work, he will receive but little. The labor is equivalent to money and it is as unwise to waste, or poorly invest the one as it is the other.

Whoever wrote the following got the whole truth down in a nutshell: "If you have a little farm or business, or study employment and are out of debt, do not fret and work yourself and wife into the grave for the sake of making money. You have but one life to live, and that is very brief at least. Take a little comfort and pleasure as you go along day by day, and try to do a little good to others. A morbid, insatiable desire to possess the earth and to grab everything in sight, is at the foundation of more misery than almost any one thing. Wealth alone will never keep your memory green after you are gone."

Noties.

Public notice is hereby given that I have placed all the trust property upon the farm occupied by Charles Fish in the township of Sharon, in the hands of my agent Lizzie Fish, and no person except my said agent and myself have any authority to sell or dispose of any of the Stock, Sheep, Hay, Grain or other property on said farm.

Do not smash your fingers by using a shoe-hammer and flat-iron to crack nuts.

Call on your hardware merchant and get the LITTLE GIANT NUT CRACKER. It cracks anything from a black walnut to a hazelnut. It is a gem of beauty and an engine of great power; with it a child can crack the hardest nut. Its construction is simple. It is easily worked, and does its work perfectly. Will never get out of order, nor bruise your fingers. If you do not want to crack a hard nut more than once a year, it will pay to have the LITTLE GIANT to do it with. It is put up in two styles, japanned at 50 cents, and nickel plated at 75 cents. Is sufficiently strong in all its parts, and is warranted, if well used.

Reply to Old Soldier.

In reply to article in last issue of the HERALD by Old Soldier, in ambush, would say for his special information, that the class of soldiers he appears to despise so much, namely, the heroes that fought at the so-called "first battle of Bull Run," and the one that did guard duty on the St. Clair river, are required to file their applications under the same general rule and regulations as the old "Vet," that claim all the glory for themselves, are required to do.

If sore old "Vet" is having hard luck in proving up his claim to the satisfaction of the government, or in getting a satisfactory rating, it is perhaps his own fault. It certainly is not the fault of that class of soldiers by him so begrudgingly referred to.

Oh! for love and honor stand, Heart to heart, and hand to hand Round the saviors of this land; Perish hatred, perish clan, Strike together while you can, Like the strong arm of one man.

A Witty Answer Brought Success.

A young newspaper man who last spring found himself in Whitman county, Washington, 500 miles from his base of supplies and "broke," hired out to a farmer. He was set to plowing with a pair of horses, but both men and beasts being new to the business, the furrows looked as though they were the result of an earthquake rather than of design, so crooked and zigzag were they. At the close of the day the farmer rather testily criticised the job. The newspaper man felt that his doom was sealed, but mustered courage to reply: "I know the rows are rather crooked, but the sun was exceedingly hot to-day, and it warped them." The answer turned away the farmer's wrath, and, instead of being discharged, the newcomer was given a much easier and pleasanter job, and is now the farmer's son-in-law.

The World's Population.

Here are some interesting facts about the people who compose the population of the world.

There are 3,004 languages in the world, and its inhabitants profess more than 1,000 religions.

The number of men is about equal to the number of women. The average of life is about 33 years. One quarter die previous to the age of 17. To every 1,000 persons only one reaches 100 years of life. To every 100 only six reach the age of 65, and not more than one in 500 lives to 80 years of age.

The number of marriages is in proportion of 75 to every 1,000 individuals. Marriages are more frequent after equinoxes—that is, during the months of June and December.

Those born in the spring are generally of a more robust constitution than others. Births are more frequent by night than by day; also deaths.

There are on the earth 1,000,000,000 inhabitants; of these 93,033,033 die every year, 91,824 every day, 3,730 every hour and 60 every minute or 1 every second.

The married are longer lived than the single, and above all those who observe a sober and industrious conduct. Tall men live longer than short ones. Women have more chances of life in their favor previous to 50 years of age than men have, but fewer afterward.

The number of men capable of bearing arms is calculated at one-fourth of the population.
