If there is any doubt as to what study or studies should be followed with a view to self-culture, we can remove it by a simple rule in three words, namely: Study your business. Why is it that the rich man after he has amassed a certain sum always likes to pretend he is so poor and is eternally harping about his poverty? NEVADA city has had recently a sensation something akin to the "babes in the woods," only there was no wicked uncle in this case. He made his way to a ranch the next day.

MEXICO laid low a formidable bandit the other day in the person of Demetrio Jauregui, whose bent was in the state of Jalisco. His confederates numbered six, and it took a company of infantry to put them all under the sod. The robbers were about to sack. The struggle took place in the house, and after his followers had been downed in a desperate hand-to-hand fight the leader of all was cornered in the attic. Finishing a soldier he succumbed, though girt about with many weapons. In this struggle four soldiers were killed and eleven wounded.

The male remained by the ship until Montevideo was reached when he disappeared and not returning the same day was given up for lost. In about a week, however, he returned happy with a new mate and the two took up the old quarters and went back to England with the ship.

ITS WORK REVIEWED.

A Brief Summary of the Important Business Transacted by the Congress which Has Just Closed.

WASHINGTON, March 5.—The working or business feature was perhaps the most distinguishing characteristic of the Fifty-first congress. Three measures, any of which in intrinsic importance and popular interest would be sufficient for a nation's issue, stand forth prominently among all others. First, the McKinley tariff bill, which became a law; second, the silver bill, on which at the first session a compromise was offered, based on monthly purchases of 4,500,000 ounces of silver, which in turn was followed by a more radical measure that failed of passage; and third, the federal elections bill, which, after a protracted, bitter and intensely exciting preliminary struggle, failed in the senate to reach a decisive vote on its merits.

Even in its mortuary record the congress was remarkable, the call of death having summoned no fewer than twelve of its representatives and three of its senators.

The total appropriations for this congress will probably reach \$1,000,000,000. In the Fifty-first congress 14,033 bills were introduced in the house and 4,139 in the senate. In the Fifty-first congress 12,034 bills were introduced in the house and 4,060 in the senate. The bills that became laws during the congress just ended numbered 2,186, against 1,834 enacted in the previous congress. In the Fifty-first congress President Cleveland vetoed 161 bills and joint resolutions, while in the Fifty-first President Harrison vetoed eleven. The total appropriations for the last congress will probably reach \$1,000,000,000. During the session three senators and twelve representatives died.

Among the bills which have become laws are these: The copyright bill; the postal-subsidy bill; the Indian depredations claim bill; the timber and pre-emption law and repeal bill; the customs administrative bill; a general law for the use of the courts in the supreme court; the establishment of intermediate courts of appeal; the United States judges salaries bill.
