Here and There.

April showers are now in order.
LaGrippe is reported from every quar-
ter.

Miss Margaret Kearney, of Ann Arbor,
was the guest of friends over Sunday.

Mr. and Mrs. Harry Shaver had a mess
of new potatoes for dinner last Tuesday.
They were grown in Sylvan Township.
Next.

Mr. Patrick Timan, of Detroit, the
agent of the Michigan Catholic, was in
town last Monday and Tuesday, in the in-
terest of that paper.

Last week Tommy McNamara sold and
shipped his noted trotting stallion, "Rat-
tler," to John C. Steward, of Dansville,
Ill. Consideration \$500.

Chas. Canfield's house caught fire last
Thursday from a defective flue, but was
soon extinguished by the Chemical engines.
Damage covered by insurance.

E. B. Shocum, a farmer living near
Grass Lake, has an orchard of 300 peach
trees, and as soon as weather will permit,
he will set out 425 more. Fruit raising
pays.

Word was received here this week from
Chas. Winan, of South America, that they
are in the midst of a war, and the fort in
their city has been blockaded for five
weeks. Mr. and Mrs. Winans are both en-
joying good health.

A very sad accident happened to Percy
Brooks last Saturday. While out hunting
south of town his gun was discharged in
such a manner as to strike his left wrist.
He was brought to town and Drs. Palmer
& Wright amputated his arm just below
the elbow.

A. J. Blake, of Leslie, has a fiddle which
is more than 100 years old and comes from
a celebrated vintage. It has a pedigree as
long as that of a bred horse, and the doc-
trine on it does not sound much different
from that on a \$3 affair, but this one could
not be bought for \$2,000.

The young people of North Lake, will
give a literary entertainment consisting of
music and play, at the Grange hall on
Thursday evening April 10th. The pro-
ceeds of which to go to pay an indebtedness
on the Grange hall. Admission 15 cents.
Children under 10 years, free.

An Ann Arbor student makes the an-
nouncement that he has experimented and
found that it is no trick at all to fill a safe
with electricity and then drill it open. He
says that a strong current softens the iron
and soon a big battery will be the neces-
sary tool of every expert crackman.

One of the most interesting social events
of the season took place last Thursday,
April 2nd, 1891, at the residence of Mr.
and Mrs. Jacob Klein, in Lima, when Mr.
George Lendawer and Miss. Rose Klein
were united in the holy bonds of matrimony,
by the Rev. Leamster, of Freedom.
Our space will not allow us to give a com-
plete list of the numerous and costly pre-
sents. There were about 225 invited, and
the festivities closed at a late hour. We
extend our felicitations on the happy union,
and join in their hosts of friends in
wishing them a happy wedded life.

The Very Rev. W. S. Healy, C. S. S. P.,
will be the guest of Rev. Father Considine
at St. Mary's Rectory from Sat. day April
the 18th until Monday April 20th. On
Sunday April the 19th, he will preach at
High Mass on the Holy Ghost, of which he
is a distinguished member. Father Healy
has just come from the interior of Africa,
and from the regions traversed by Stanley
and other noted travellers, and, as he will
speak from a personal knowledge of his
subject, his discourse will be a most inter-
esting one. The public is cordially invit-
ed.

On Wednesday of last week the 25th,
March, was brought to a close in the
Healey district, No. 10, Township of
Lyndon, the most successful school term
that has been taught there for some time.
Although it was the first term for the
teacher, Mr. Wm. Stapish, who is so well
and favorably known to both pupils and
teachers, of Chelsea High school. He has
undoubtedly made his mark. We judge by
the remarkable progress of the scholars in
their studies, the satisfaction expressed by
their parents, and the general esteem in
which he is held by all those with whom
he has come in contact. We have not the
slightest fear of Willie's success in any-
thing he may undertake, if he brings the
same assiduity, punctuality and faithful-
ness, to bear as he has done in this his first
essay on the world's stage.

They have been one and two so many
times, have Caroline and Cath Krause, of
Ann Arbor, that the neighbors could never
tell with any degree of certainty whether
they were single or married. They would
quarrel, court and be divorced. Then
they would forgive, court and be married.
Their names were barely ever off the
court calendar. They were lawyer's
friends. They have been 23 years on this
see-saw, corduroy road of life. Judge
Kinne said in his opinion, the other day,
that they were old enough to know better,
a record of four marriages and three di-
vorces between the same two people was
contrary to the peace and dignity of the
business of getting married, and he there-
fore refused to balance the affair by grant-
ing the fourth divorce, on the identical
grounds the other three had been given.
He also regretted his inability to send them
to a reformatory for their natural lives.

Allen Stephens has moved his family to
Chelsea.

This is a splendid spring for making
maple sugar.

Read Glazier's change of "ad" on first
and last pages.

The Lima grange met at Leander East-
on's last Friday.

Henry R. en visited his parents in Plack-
ney over Sunday.

Gilbert was elected Supervisor even if
he did not want the office.

Mrs. Galkin attended the County S. S.
Convention at Ypsilanti Tuesday.

Fred Lutz, of Ann Arbor, will work the
Wm. Warner farm in Lima this summer.

For rent, about two acres of ground for
gardening purposes. Inquire at this office.

The D. I. Y. S. of Chelsea, will give
their first social hop at the town hall Fri-
day evening, April 17, 1891.

James L. Gilbert stood at the polls all
day and refused to work, yet he was elect-
ed Supervisor by a large majority.

The Michigan Central will lay a double
track between Dexter and Ypsilanti in the
near future. Eleven new bridges will be
built.

The Minnesota Legislature has before it
a bill to prevent women appearing before
the footlights in tights. That's right.
Why the tights.

The Woman's Relief Corps will give a
Maple Sugar social at the G. A. R. hall,
Friday evening, April 24th. Bill 10 cents.
All are invited.

Nearly \$19,000 of the necessary \$20,000
for the university gym has been raised,
and the students are so proud of their
work that they will try to make it \$30,000.

There is talk of building a new hotel at
Ann Arbor, and it is to be hoped that talk
will result in something, for if there is a
place in the state that needs a good hotel
that place is Ann Arbor.

With the advent of the base ball season
the spring business may be assumed to be
fairly open. As to the exclusive business
of base ball, it is problematical if "com-
petition is the life of trade."

A bureau stealer recently advertised a
scheme "How to make plenty of money
quickly and honestly." The 353 appli-
cants who sent fifty cents each received
this reply: "Get a situation in the mint."

"A man looketh in the glass and straight-
way forgetteth what manner of man he
was," the Scripture says. But a woman
don't allow herself time to forget before
she peeps again. Difference in build you
know.

Parson Arney, of Saranac, has so en-
thused the people by his "hoss" talk that
they will chip in and buy him a nice
track. Arney seems to be almost as much
of a success at revivals as he is as manager
of a horse race.

An English ship-builder has given care-
ful study to the plans of Noah's Ark, and
he declares that anything like ordinary sea
would have pounded in the upper works
in less than an hour. The waves were
doubtless quiet on this account. There
is nothing in print which speaks of any
waves.

"Try to sleep if you are cursed with
insomnia," says an exchange. Try your
grandfather. Sleep is just one of the few
things that don't come for trying. Try to
keep awake, and if you have the grit to
keep on trying it will bring the answer be-
fore you know it. Sleep is a female, you
know.

With all other nations looking to Amer-
ica for supplies, and with the emigration
to it of the industrial class, it is but nat-
ural that capital should follow where there
is such a demand for investment, and
where it is being led by those whose em-
ployment is its surest and safest means of
increase.

A Chicago woman boldly advertises in
the newspapers that she stands ready to
teach single ladies or classes "the art of
gibbing with fluency and grace. She may
get a few stray pupils, who want some
finishing touches, but "the art" is one
that womankind always possessed and al-
ways made frequent use of.

The meanest man has been discovered,
and lives in Georgia. He borrows his
country paper, and when through reading
it rents it to a near neighbor at a profit.
Then he at once proceeds to abuse the
editor, because "there's nothing in it."
There is no "home in glory" or "room
in Paradise" for that sort of a soul.

Some people always insist upon putting
on their rubbers or overcoats or getting
their hats in their hands while the last song
is being sung at church, evidently for the
purpose of making a rush for the door
soon as the benediction is over. How it
looks for some people to be dressing and
arranging their toilet when and where
others are trying to worship.

The special meetings which are being
held in the M. E. church this week, by
Evangelist Broadbridge, will be continued
also, next week. The business men have
kindly agreed to close up their houses and
shops, at a quarter to eight, local time, to
give those in their employ, as well as them-
selves the privilege of attending the meet-
ings. Let every father and mother, as
well as all who have any interest in the
welfare of their own, and other boys,
give these services their moral support.
Brother Broadbridge will speak next Sun-
day evening on "Sowing and reaping" in
wild oats.

The Chelsea Savings Bank has recently
had built for it one of the strongest
safes made, being the new patterns of
the Mosler Bank Safe companies, Round
Screw Door, Laminated Chrome Steel,
Burglar and Dynamite Proof Safe, with
no keyhole, spindle or other connection
through the door or walls, nor any access
to the lock from the outside, the door
being screwed in and held secure by
a Double Chronometer Time Lock
from inside. It is considered the strong-
est and best security ever devised against
efforts of burglars. The safe is protect-
ed by a large new fireproof vault made
necessary to store the upwards of twenty
years' accumulation of books and papers
of its business, and the whole premises
are further protected by an Electric
alarm System, which gives instant warn-
ing of trespassers at night.

THE African continent has been crossed sixteen times, twice before 1880, six times between that time and 1880, and eight times since 1880.

A new departure in cremation is reported. A patent has been taken out in France for an electric furnace for the rapid incineration of human remains.

INFANT mortality in England and Wales during the year 1890 was noticeably large. The deaths were registered over 130,000 children under 13 months of age.

An official survey shows that Rhode Island's nearest approach to a mountain is an eminence in Glocester, which rises 805 feet above sea level, and to which the name Durfee hill has been given.

THE round-top building between Canajoharie and Spraker's Basin, N. Y., recently destroyed by fire, was an old colonial structure, probably the oldest in the Mohawk valley, and is said to have been built in 1732.

HELEN P. CLARK, an Indian girl and a teacher in the Carlisle (Pa.) Indian school, has been appointed special allotment agent by the United States government and has gone to Montana to assume the duties of her office.

THE new queen of the Sandwich Islands is Lilia Kamakaeha Lilinokalani, a sister of the late king. She is 62 years old, was educated in a missionary school and is married to an American, Mr. John O. Dominis, who has held many important positions in Hawaii.

EVA BRANNON, a faith curist and incidentally a teacher of music in the Bethany home at Pittsburgh, is said to have finished a successful forty days' fast. Her fast differed from all others in that she attended to her regular duties as teacher and keeper of rooms in the home.

RABBI SOLOMON SCHINDLER, of Boston, has taken strong ground against the proposition to colonize Palestine with Hebrews. He says that the country cannot support more than three million people, and the Russian exiles alone, numbering five million, would largely overpopulate it.

THE people of St. Petersburg seem to get a good deal of fun out of the long, cold winters. At recent aristocratic balls ice statues of celebrities have been the fashionable decorations. Famous sculptors do not disdain to try their skill in this line, and the figures were most effective when placed among shrubs and plants and lighted up by many colored lamps.

In a Chinese smuggling case at Utica, N. Y., it was argued that Chinamen may come from Canada to this country in rowboats, such crafts not being "vessels" within the meaning of the statute. United States District Judge Cox held that "the law was broad enough to cover coming to this country by whatever means," but promised to give the question further consideration.

PRESIDENT DEWEY, of the New York Central railroad, gets a salary of \$75,000; President McCurdy, of the Mutual Life Insurance Company, \$60,000; President Hyde, of the Equitable, \$60,000; President Beers, of the New York Life, \$60,000; President Olcott, of the Central Trust Company, \$50,000; President Stewart, of the United States Trust Company, \$50,000; President King, of the Union Trust Company, \$50,000.

One of the electrical appliances which will presently come into general requisition as that now enjoyed by the electric motor is the electrical heater. It dispenses with all dirt in the house, and can be turned off and on just when it is wanted. A large percentage of the heat from a stove goes up the chimney and is wasted, but as the electrical heater is light and handy, and can be moved from place with ease, the full advantage of its heat can always be secured.

A SINGULAR incident is related of two Georgia brothers who were devotedly attached to each other and who had often expressed the desire that they might die together. At Gainesville, Ga., Walter Wood, in attempting to cross the Tombigbee river in a skiff, was drowned by his boat capsizing. On the same day and about the same time his brother, Julian Wood, who was working in a glass factory at Birmingham, Ala., was overcome by gas and died in a few minutes.

A BOSTON numismatist says that the finest coin collection in that city is that of Mr. Parmelee, a baker up in East Chester Park. He bakes nothing but beans—Boston baked beans—and all the money he makes he puts into old coins. His collection is worth between \$40,000 and \$50,000. He has a complete set of American river dollars—the only set in Boston. Next to Parmelee's collection, the finest one in Boston is that of Nathan Appleton, of Beacon street. There are hundreds of collectors there, and the aggregate value of their coins is probably greater than in any city in this country outside of New York.

It is currently asserted that the relative heights of men and women in England are undergoing a change. Observation extending over a series of years has shown, it is declared, that the women are apparently growing taller and the men shorter. The cause was long considered a mystery, but at a recent London dinner it was unanimously agreed that the men only were changing, the apparent elongation of women being the result of comparison. And it was further settled that tobacco did it. Englishmen are incessant smokers, and begin the practice at so early an age that their growth is much retarded.

THE Rothschilds are believed to have \$50,000,000 invested in American securities. Only the Rothschilds themselves know what they are worth, and they never tell family secrets. One of their mottoes is: "Gold never repeats what it sees," and another: "A man will not tell what he has not heard," but some idea of their riches can be had from the fact that since 1815 they have raised for Great Britain alone more than \$1,000,000,000; for Austria, \$250,000,000; for Prussia, \$200,000,000; for France, \$400,000,000; for Italy, nearly \$300,000,000; for Russia, \$125,000,000; for Brazil, \$70,000,000; for smaller states, \$300,000,000 more.

APRIL WIDE AWAKE

Is noted for its great variety of contributions from the frontispiece of white lilies to its amusing end-piece drawing by Bridgman. "The Mysterious Choir Boy" is a beautiful story full of the Easter spirit, by Henry Kirke White, Jr. The Jolly April First story, "Chollymies' Afflicted Holiday," is by the author of "Cops and Cops," "Honey Wing's Sea Voyage," the fanciful tale by E. Camberg, offers the too-curious boy a lesson in a pleasant shape: "A Lost Story," by Anne Leach; "The Story of My Bank Book," by Louise Trumbull Cogswell, "The Cock of Sebastopol," is an admirable short story. The young people in Margaret Sidney's serial, "Five Little Peppers Grown Up," constantly get into all sorts of interesting trouble. The hero of "Cab and Caboose," Kirk Munroe's serial, shows his "clear grit." "Marietta's Good Times" are unique. In the line of articles, there is "Eggs rolling at the White House" on Easter Monday, by Prof. Mason, with picture of Baby McKee; "Easter Day Beyond the Sea," by Amanda B. Harris; "A Black Prince," by Walter Hough, of the Smithsonian Institution; "Concerning Bats," by Grant Allen; Mrs. Clavin's outposts "Margaret-Patty Letters"; Miss Rimmer's "Figure Drawing for Children," and "Men and Things." "German Syrup"

The majority of well-read physicians now believe that Consumption is a germ disease. In other words, instead of being in the constitution itself it is caused by innumerable small creatures living in the lungs having no business there and eating them away as caterpillars do the leaves of trees.

A Germ Disease.

The phlegm that is coughed up those parts of the lungs which have been gnawed off and destroyed. These little bacilli, as the germs are called, are too small to be seen with the naked eye, but they are very much alive just the same, and enter the body in our food, in the air we breathe, and through the pores of the skin. Thence they get into the blood and finally arrive at the lungs where they fasten and increase with frightful rapidity. Then German Syrup comes in, loosens them, kills them, expels them, heals the places they leave, and so nourish and soothe that, in a short time consumptives become germ-proof and well.

MICHIGAN STATE NEWS

SIX CENTS FOR A HEART.

Mrs. Julia Goddard's Affections Assessed at a Very Low Figure. Mrs. Julia Goddard, aged 45, brought suit against Dr. Westcott, aged 74, of Grand Rapids, for breach of promise. She received a verdict of \$1,500 upon the first trial and he appealed. The second trial closed with a verdict of six cents and costs for plaintiff. The woman attended Westcott's funeral. Afterward the old man proposed and she consented to marry him if he first secured the consent of his 30-year-old daughter to the match. The daughter refused to consent. The old man considered the match off and married another woman who did not make any conditions.

B. Angell at their head, to canvass the state in the interest of missions. Greenville was selected as the place of the next meeting in March, 1893.

Reckless Work by Miners.

Reckless work by some miners at the South Buffalo mine in Negreague resulted in the death of Peter Doyle and Charles Petersen. A party was engaged in breaking an opening in the level where Doyle and Petersen were working from the one below. The upper level was nearly reached and a blast put in. The dynamite was fired directly under the feet of Petersen and Doyle, to whom no warning had been given. Doyle died within an hour and Petersen a short time after.

Health in Michigan.

Diphtheria was reported at fourteen places, scarlet fever at thirty-six, typhoid fever at seven and measles at fifty-two places.

Will Keep His Place.

The celebrated Nellie Griffin state public school case at Coldwater came to an end by the board of control refusing to accept Superintendent Kirkwood's resignation. While this report censures him mildly they believe the best interests of the school will be subserved by retaining him, finding that, while he committed one grave error, his thorough and practical work demonstrates his worth and fitness for the place.

Calls It a Huge Joke.
