An exchange says a ten-cent silver piece has no great value, but that it helps to ward the formation of a very important portion of the world's cash has been plainly proved by the introduction of the small tubular savings banks, so-called, which receive no coin other than a ten-cent silver piece, and which cannot be opened until \$5 worth of ten-cent pieces have been placed therein. It is said that within the past six months over 100,000 of these pocket savings banks have been distributed among the people of this country, and that in consequence over \$250,000 in recent pieces have been practically withdrawn from circulation. Thus there has become a very decided scarcity of ten-cent pieces, the situation being so serious that it is receiving the most earnest consideration of leading financiers.

On Tuesday morning, May 26, 1891, a very pretty wedding was solemnized at St. Mary's church, the contracting parties being Mr. Thomas Stanfield and Miss Anna Harker, both respected residents of Lyndon. This world of ours, among its many millions of inhabitants, contains not a few who are never wanted anywhere. Among those who are thus unwelcome are the class known as "peculiar," those who are overstocked with disagreeable idiosyncracies, and whose peculiarities always stick out in front like the long horns of a Texas steer—ready to hook and hurt—the angular and misshapen members of the race, the queer specimens who insist upon afflicting their fellows by continually thrusting themselves into places where they are not wanted.

"FOR WHAT HE DID AND ALL HE DARED REMEMBER HIM TO-DAY"

Remember us also, if you please, in your more commonplace thoughts, after the memorial occasion of 1891 is over.

"The Land of the Free."

The land we love so well. The flag that always sends a thrill of joy through every true, loyal heart whenever unfurled to "the breeze that loves it well."

We also try to do well by the living, by selling all goods at fair, square, living rates.

If you need to borrow money, upon good approved security, the Chelsea Savings Bank will be glad to supply it for you.

The Chelsea Savings Bank has recently had built for it one of the strongest cases made, being the new patterns of the Mosler Bank Safe Companies, Round Screw Door, Laminated Chrome Steel, Burglar and Dynamite Proof Safe, with no keyhole, spindle or other connection through the door or walls, nor any access to the lock from the outside, the door being secured in and held secure by a Double Chronometer Time Lock from inside. It is considered the strongest and best security ever devised against efforts of burglars. The safe is protected by a large new fireproof vault made necessary to store the upwards of twenty years' accumulation of books and papers of its business, and the whole premises are further protected by an Electric alarm System, which gives instant warning of trespassers at night.
