THE new explosive, ecrasite, is the invention of two Austrian engineers named Siersch and Kubin. Its power in relation to dynamite is declared to be as 100 to 70, and it can be carried from place to place with perfect safety. A bombshell loaded with it explodes with such terrible results that experiments against palisades representing 100, 250 and 500 men, at ranges of 300, 750 and 1,200 meters, recorded marks on every division of the palisade standing for a soldier.

For Use of Children and Young People,

And it is a good idea both in regard to saving up money that might otherwise be spent foolishly and even harmfully, and to inculcate habits of prudence, self-denial and thrift, that will have an important influence over young people in after life: "As the twig is bent the tree is inclined." It is surprising, even to old people, how rapidly money accumulates by these little droppings of only a nickel. Let all your young people interest themselves in a Nickel Stamp Book furnished "with a starter" of one nickel stamp free of charge by The Chelsea Savings Bank.

Most of the stores in Chelsea, Stockbridge, and other near by Watches, Clocks, Chains, Charms, Spectiplaces, are agents, and furnish the Books and Stamps also.
