LA FONTAINE, who lived two hundred and fifty years ago, has just had a monument erected to his memory in Paris.

AN armed desperado in Florida stepped into a negro church and compelled the deacons to take up a collection for his benefit.

OVER eight hundred patents have been granted by the United States patent office on electric storage batteries and their details.

IN the 6,000,000 letters that reached the dead-letter office last year there was money amounting to \$28,642 and checks and notes of the value of \$1,471,571.

CHIEF JUSTICE LUGAS, of the Virginia supreme court, is but four feet high, but he is so dignified that no facetious lawyer has ever dared to dub him a brief.

THE chair occupied by Garibaldi in the Italian legislative chamber in Rome is hung with a laurel wreath. Since the patriot's death no one has been allowed to use it.

AN automatic machine has been made which forms, fills, weighs and seals packages in those establishments where large quantities of goods are constantly put up.

ABOUT 8,000 stars are visible to the naked eye, being those up to the sixth magnitude. The latest calculations of the astronomers put the entire number of stars at 14,000,000.

JERRY COOK, a Norwich (Conn.) tailor, has a beard seven feet two inches long, though he is only five feet six inches tall. What does he do with it when the wind blows?

A MAN fishing at Jersey, Eng., was caught by the rising tide, and a boat had to be put out to rescue him. The next day the magistrate sentenced him to eight days' hard labor "for the trouble he had caused."

THE catacombs of Rome contain the remains of about 6,000,000 human beings, and those of Paris about 8,000,000. The latter were formerly stone quarries. Many of the victims of the revolution of 1793-94 are buried there.

A PROFESSOR of the Paris academy of sciences has been making experiments which have resulted in convincing him that the rabbit is of all living things the most capable of withstanding a very low temperature. Inclosed all night in a block of ice, a rabbit was found next day getting on very comfortably and evidently not aware of anything very peculiar in its circumstances.

AN experiment made at Montreal of completing a cable circuit to make a continuous line of eight thousand miles shows that electricity travels that distance in one and five hundredths seconds, whereas nerve force, which is calculated to travel only at the rate of a mile a minute, would have taken nearly a week to make the journey. These are the calculations made in defense of electrical execution.

THERE is nickel in the slot in Idaho to an astounding degree. Near Hope, in that state, a vein of the metal has been discovered which is seven feet wide and the ore assays very rich. Nickel is worth several cents per pound and has never been found before in large quantities in this country, and the fact that the navy department has adopted nickel steel for armor makes the discovery one of great importance.

WHAT an immense sum Queen Victoria might realize by the sale of her watches. The oldest watches in the world are in her possession. She has two beautiful little gold ones by Breguet that are supposed to be a hundred years old. They have silver dials and are of about the size of a two-shilling piece. One is a blind man's watch; the other is a repeater. Both go perfectly and are in constant use. Her majesty's favorite watch is a large plain gold one by Mudge.

THE apparent universal law that things never happen singly but in "waves" finds new support. A few days ago this old earth seemed to be submerged by a "crime wave." The sickening odor of blood could almost be smelled in the newspapers. Now we have a wave of railroad accidents, nearly all preventable and due to gross carelessness. What will be next? Perhaps the millennium, when people stop shooting each other and trains run no more into collision, but it's doubtful.

IN accordance with the decision of the universal postal convention at Vienna, the post office department will issue a double postal card for international use. It consists of two parts, one for the original message and the other for the reply. The cost of the card is four cents and it can be sent to any country in the postal union, now including the Australian colonies. Having adopted the double foreign card, we see no reason why the government should not adopt the improvement for the domestic service. This would be more convenient than the "inclosed stamp for reply."

A CURIOUS bit of local history is embodied in the name of one of the townships in New Castle county, Del. The name as now spelled is "Pender," and it is that of the township in which lies the "Welsh Not," settled about two hundred years ago by a Welsh colony, some of whose descendants still hold parts of the tract. In the midst of the Welsh Not stands Iron hill, the only considerable eminence in Delaware, and Pender is only a slight corruption of the Welsh Pen Cadr, which means the great hill or the hill fort. The early Welshmen named their township in its honor.

THE grip of an ant's jaw is retained even after the body has been bitten off and nothing but the head remains. This knowledge is possessed by a certain tribe of Indians in Brazil, who put the ants to a very peculiar use. When an Indian gets a gash out in his hand, instead of having his hand sewn together, as physicians do in this country, he procures five or six large black ants, and, holding their heads near the gash, they bring their jaws together in biting the flesh, and thus pull the two sides of the gash together. Then the Indian pinches off the bodies leaving the heads clinging to the flesh.

URGED TO WAIT.

Northwestern Farmers Again Advised to Hold Their Wheat for Higher Prices.

ST. PAUL, Minn., Sept. 14.—Alliance men of Minnesota, North Dakota and South Dakota have been conferring here for several days on the wheat situation and have issued 1,000,000 circular letters of advice and warning urging farmers to put their wheat in bins and wait for the price to go to \$1.50 or \$2. A comparison of notes showed that wheat was being poured into the elevators of Duluth and Minneapolis at the rate of from 600 to 2,000 cars a day, and that the price at Minneapolis had dropped in a fortnight from \$1 to 90¢ cents.

The letter states the new Wheat Growers' association and the alliance secretaries all over the country are unanimous that wheat is bound to sell as high as \$1.50, and possibly \$2 per bushel, and they are unanimous in this warning to the farmers not to sacrifice their wheat and give the speculators all the profit there is in it. The letter says that the crop is being greatly overestimated by the newspapers and grain dealers, and that the farmers are foolish enough to cooperate with the speculators to depress prices further. There is no question but prices will take a turn upward in a few days. The shortage in Europe now being figured with accuracy. About a week ago a congress of grain dealers from all parts of Europe met at Vienna, Austria, and computed figures about the crops in Europe. These figures are the highest which well-informed reputable men could furnish, for if in a famine year like this they should give for the crop of any one country lower figures than circumstances justified, the government of that country would certainly remonstrate. It is surely the policy of Europeans not to exaggerate their disaster.

It is entirely certain that Europeans will have to economize in bread to the extent of 65,000,000 bushels, and when the situation is aggravated by the partial failure of the potato crop, it is to be considered what prices they would pay for American wheat. The shortage in Europe being four times as large as the American surplus, there is no doubt that the price of wheat will reach the highest figure ever known before this year is up and will exceed it by far before the new crops come in.

"Wheat will soon be worth \$1.50, no matter how much farmers and speculators take together to keep prices down, and we would advise them to hold their wheat for \$1.50 and add for every month they keep it say five cents to the price. Hold your wheat. You cannot get left."

MANY BADLY HURT.

A Passenger Train Goes Over a High Embankment in Colorado—Twenty-Six Persons Injured, and Some May Die.

DENVER, Col., Sept. 14.—A passenger train No. 314, bound for Denver, on the (Graymont) division of the Union Pacific railway, was wrecked Sunday morning about 11 o'clock near Beaver Brook station and twenty-six passengers were injured, five of whom will probably die.

The train was late and running rapidly and when rounding a sharp curve the express car left the track and rolled down a 15-foot embankment. It was followed by the mail and two passenger coaches, one of which turned over twice before reaching the bottom.

The train was loaded with passengers, many of whom were knights of pythias who were returning from the knights of pythias state convention which was held at Aspen last week. When the news reached Golden, Col., a wrecking train was ordered out and was starting when Robert Pruin, an employee of the road, attempted to board the engine.

In doing so his revolver fell from his hip pocket, and a hammer striking a stone, the ball taking effect in the man's neck, making a wound which will probably fatally. Those seriously injured in the wreck were left at Golden in the hands of physicians, while those not badly hurt were brought to this city and taken to their homes or the hospitals.

It is not known exactly what caused the wreck, but as the track was a narrow gauge and the coaches very top heavy it is thought that the train was running too rapidly for safety.

A passenger train on the Colorado Central railroad was wrecked at noon Sunday. Fifteen passengers were injured, but it is thought none fatally.

It has been impossible to learn the particulars yet, as the telegraph office at that place has been closed.

CHILDREN CREMATED.

Locked in Their Mother, They Set the House on Fire.

WICHITA, Kan., Sept. 14.—Word has been received here of the burning to death of four children on a farm in the southern part of Barton county. Mrs. William Klein, the mother of the children, locked them in the house while she went on an errand, and presently some distance off, was attracted by smoke issuing from the house. He hastened home and found the building ablaze. By the time he had effected an entrance the interior was a mass of flames. He found one of the children, who died shortly after being rescued. The charred remains of the other three were found in the debris. The eldest child was only 7 years.

The World's Population.

LONDON, Sept. 14.—Prof. Baron von Juraschek has published a statistical volume of his geographical statistics of the world's population. This he computes to be 1,554,000,000. The average density is about twelve to the square kilometer. Europe contains 358,000,000 and America 124,000,000.

Paying Off Kansas Mortgages.

TOPEKA, Kan., Sept. 14.—Complete mortgage statistics collected in fifty-four counties in eastern and central Kansas show that the farm-mortgage indebtedness is being rapidly diminished. For the five months preceding September 1 36½ per cent. more mortgages were released than were recorded.

Bank Wrecker Sentenced.

CLEARFORK, Pa., Sept. 14.—Hamilton The Hontzdale bank wrecker, has been sentenced to pay a fine of \$5,000 and undergo an imprisonment of five years in the Western penitentiary.

PARIS, Sept. 14.—Dispatches received at the Chilean legation in this city state that a decree has been published at Santiago de Chili announcing that the coming elections for the presidency and for members of congress will proceed upon the plan of universal suffrage.

Losses by the San Salvador Earthquake.

SAN SALVADOR, via Galveston, Sept. 14.—The earthquake of September 8 has experienced all over the country. The material losses are estimated at \$500,000, although this seems a low figure.

MANY MEET DEATH.

The Last Victims of the San Salvador Earthquake Likely to Meet Up Into the Hundreds—Awful Loss of Life by Collisions and Hurricanes at Sea.

SAN SALVADOR, Sept. 13.—Details of the terrible earthquake shock, reports of which were cabled Wednesday, prove it to have been more disastrous than was at first supposed. In this city about forty people were killed and sixty more or less injured. Judging from the fearful results in San Salvador the number killed throughout the country will be somewhere in the hundreds. The shock began here by a slight tremor, which gradually augmented. The duration of the first shock was ten seconds. The earth was shaken in a most horrible manner for five seconds. Then it gradually died away, until at last no motion whatever could be felt. During the shock there was a frightful noise, which was plainly audible in all parts of the city. The air was filled with agonizing shrieks. Everywhere could be heard the cries of parents calling for their children and children screaming for their parents. The pandemonium was succeeded by a calm that was quite as dreadful as the shock had been, for it was accompanied by the darkness of night. No one knew what was to happen next. Earthquakes, by turn feeble and violent, continue at irregular intervals. Everybody expects the climax to come September 21, on account of the equinox. It is not unlikely this city will be made a total wreck.

The government has sent 800 men to deepen the outlet to Lake Ilopango, in order to diminish the amount of water in it and to reduce the violent shocks. Lake Ilopango is 8 miles east of this city and is 96 miles square. It occupies the area of the old sunken volcano. It is now filled with rainwater and is heavily charged with sulphuretted hydrogen and other gases. The workmen engaged in digging the outlet September 19 were carried away by a torrent of warm, ill-smelling water and were drowned.

The details of the ruin of towns in the axis of the earthquake are meager. Of 320 houses at Comacagua only eight remain standing. The loss of life there is great.

DISASTERS AT SEA.

ATHENS, Sept. 12.—A collision has taken place off Cape Colonna, the most southern point of Attica, between an Italian steamship, the Taormina, and a Greek steamship, the Thessalia. The Taormina sank soon after the accident, drowning her captain, seven of her crew and forty of her cabin passengers.

The second officer of the Taormina and a number of passengers who were standing on the bridge at the time the collision occurred were saved by the Thessalia.

The Taormina left Constantinople Wednesday morning and arrived Thursday night near the island of Gaidaros, when it sighted a vessel coming toward it. The Taormina repeatedly whistled, but no notice was taken of the signal. The Thessalia, which was going under full steam, struck the Taormina midships. The panic on the Italian vessel was frightful. Many of the hatches were open and the shock caused a number of people to be pushed down into the hold and killed outright. Five minutes after the ships struck the Thessalia disengaged itself from its signals of distress. Some of the latter's passengers leaped upon the deck of the Thessalia just after the vessels struck, and in this manner many were saved.

Brave Capt. Ferroni, of the Taormina, remained at his post on the bridge and sank with his ship. Capt. Ferroni declares that the captain of the Taormina must have seen that he (Prime) did what he could, but was unable to prevent the collision.

DUBLIN, Sept. 12.—A steam launch carrying non-union laborers from Dublin to Londonderry sank in Lough Foyle Friday after colliding with the steamer Albion. Fifteen persons were drowned, among them a child of Graeme Hunter, agent of the London grain federation, who was aboard the launch with his family.

LOST IN A HURRICANE.

HALIFAX, N. S., Sept. 12.—The two-masted fishing schooner Georgiana is being towed into Halifax by tugs. It was found 10 miles off Devil's Island, but bottom up, by the fishing schooner Coronet. The Georgiana was making Halifax harbor on the night of the hurricane with a crew of sixteen men and a cargo of 800 quintals of fish. Its storerooms were smashed and swept away. It was thrown upon its beam-end and finally turned bottom up and all its crew drowned. The lost consists of two members of a family named Boudrot, four members of the Le Blanc family, five named Porlingier, and he was born in Detroit, Mich., about forty years ago. After leaving school he worked in Hanna and Co.'s tobacco store three or four years as shipping clerk. He went to Chicago after the war and worked in the Briggs shoe store. He then took to the stage. At first he was employed in the stock company at McVicker's theater. Subsequently he spent a season in Toronto and another in Columbus, Ohio, at the same time. Then he graduated from the stock company, and played three seasons with Maggie Mitchell and three with Lawrence Barrett, always in the city roles. With this experience and the peculiarly funny play, "Samuel S. Jones," which he had constructed by himself and George H. Jessup, he felt justified in embarking upon the stage on his own account. When it was produced the comedy scored a phenomenal success and for several seasons made more money than any other attraction on the road.

KILLED THEM BOTH.

An Arkansas Man Slays His Wife and a Sewing Machine Agent.

LITTLE ROCK, Ark., Sept. 12.—S. F. Parker, a traveling agent, sold the wife of George Harris a sewing machine. When Harris learned of the trade he became enraged, and slipping off behind Parker, stabbed him instantly.

Harris then turned on his wife, cutting her fatally with the same knife. The murderer then tried to escape, and was overtaken by the sheriff's posse. He made desperate resistance. He was taken, however, and is now in jail.

Balmaceda's Paper Goes.

VALPARAISO, Sept. 12.—The junta has published a decree recognizing the paper issued by Balmaceda. There was no other reasonable plan to pursue. The amount is \$37,000,000, and it is almost the only money in circulation. The decree of the junta was issued after an extended conference with leading merchants and bankers. General satisfaction is expressed with the decree. It has relieved the financial institutions and the people of great anxiety. Immediately after the news became known the whole city assumed an animated appearance. The first result was the opening of all the banks.

A FATAL SHOT.

It Was Fired by M. B. Curtis, the Famous Comedian, and Ended the Life of a San Francisco Policeman Who Had Arrested the Actor for Disorderly Conduct.

SAN FRANCISCO, Sept. 12.—M. B. Curtis, the well-known actor, was lodged in jail here Thursday night charged with murder. The crime is most sensational and is enshrouded in mystery. The victim was Police Officer Grant, of the Southern Pacific station. At a late hour the officers in reserve at the station were sitting about the smoking room chatting quietly among themselves, when the report of a revolver was heard on the street near by. All had been so quiet without that the shot rang out with awful distinctness on the still night air. The idle policemen were active in a moment. A dozen of them jumped up, dashed through the swinging doors and ran in the direction from which the sound of the report had come.

About half a block from the station Officer Grant was found lying dead upon the pavement, weltering in his own gore, with a gaping bullet wound in his head, from which the life blood gushed in torrents, staining his uniform and forming a pool at his side. As the officers from the station dashed up they saw a man running away in the darkness. Four fleet-footed blue-coats immediately gave chase, while the others tenderly bore the remains of their dead comrade to the station, where medical aid was hastily summoned. It was ascertained, however, that death had been instantaneous.

The brave officer had fallen

Mission Festival.
The first mission festival of the
Lutheran Society held at the Baptist
church, Sunday, Sept. 13, 1891, was
largely attended. The day was a
perfect one, and at the usual hour
the people began to arrive, until the
church was filled with friends from
far and near.

The services in the forenoon were
conducted by Revs. Goffney, of
South Bend, Ind., and Greiner, of
Grand Rapids, Mich., which were
listened to very attentively. The
services in afternoon were conducted
by Revs. Neuman, of Ann Arbor,
Aldinger, of Francisco, and Schoettle
of Manchester.

The collection taken was for the
benefit of home and foreign mission-
ary work, and amounted to \$33.17.
The Lutheran Society hereby ex-
tend their thanks to those who took
part in the services, and especially
those who contributed toward the
good work, and trust that another
year we may meet again with in-
creased attendance.

A Fich Treat For Theatre Goers.
We copy the following from the
Maunster Democrat of Aug. 25, '91.
The rendition of that inspiring
play, "Ingomar, or the Greek
Slave," by the Labadie Combination
at the Opera House last night was
one of the very best exhibitions of
skillful acting we have had here in a
long time. The character of the
piece is such that it calls for art of a
high order, and the adaptability of
the cast to the work of presenting
it in the most attractive manner is
unquestioned. The rich mellow
voice and the graceful and impres-
sive self possession of Mr. Francis
Labadie, together with the queenly
ease and charming eloquence of
every act Miss Hattie Rowell, es-
pecially in the more affecting parts
of the play indicated at once to the
audience that the highest talent and
genius of the true actor stood be-
fore them. The support in the piece
was in keeping with the power and
ability shown in the leading parts.

Too many young people of to-day
depend on their fathers' money taking
them through this world, and their
mothers' prayers making everything all
right for the next.

A man was recently heavily fined for
sending false news to a newspaper. The
supreme court in its review of the case,
and decision sustaining the fine, points
out how the editor of a newspaper is
compelled to depend on the good faith of
its informant in cases where he could have
no personal knowledge to guide him.
The practical joker or malicious liar who
considers it rather a clever thing to take in
a newspaper in this way, will in the future
be in remembrance that it is a dangerous
game to play, even if the editor is neither
pugnacious nor a good shot.

The Oxford Globe has got the mean
man down "pat," and gives the following
pen picture of the "critter": "A man
may use a wart on the back of his neck
for a collar button, ride on the back coach
to save interest on his money until the
conductor gets around, stop his watch at
night to save wear and tear, leave his i
and t without a dot to save ink, pasture
his mother's grave to save cost, roll up
his trousers to kneel at prayer in church
to save the wear—but a man of this sort
is a gentleman and a scholar compared
with the fellow who can and won't take
his home paper, or who takes it a few
years and when asked to pay for it puts
it back in the office and has it marked
'refused.' Such a fellow will charge his
grandmother with the air that she breathes;
he will rob his mother's hen-roost and
steal sheep. He is too mean to love God
and the devil will even have no respect
for him. The same fellow will go to
church and sing louder than anyone—
'Jesus Loves Me,' and knows that he is
the biggest flop lip liar on earth."

one thousand eight hundred and ninety-one,
Present, J. Willard Dabbitt, Judge of Probate.

In the matter of the estate of Andrew
Greening, deceased.

On reading and filing the petition, duly ver-
ified, of Frank Greening, praying that
a certain instrument now on file in this court,
purporting to be the last will and testament of
said deceased, may be admitted to probate,
and that administration of said estate may be
granted to himself, with the annexed, or to
some other suitable person.

Thereupon it is ordered, that Friday, the 18th
day of September, next at ten o'clock in the
forenoon, be and is set for the hearing of said
petition, and that the devisees, legatees, and
heirs at law of said deceased, and all other per-
sons interested in said estate, are required to
be present at a session of said Court, then to be
held at the Probate Office, in the City of Ann
Arbor, and show cause, if any there be why the
prayer of the petitioner should not be granted.
And it is further ordered, that said petitioner
estate of the pendente lite, and the hearing
thereof, by causing a copy of this order, and
the petition, to be published in the Chelsea Herald
newspaper printed and circulated in said
County three successive weeks previous to
said day of hearing.

J. WILLARD DABBITT,
Judge of Probate.

MANY
Business firms try to draw custom by
advertising goods at cost or below cost. Any
intelligent person knows that business is not
done on that plan.
You can find at my store a full line of first quality goods, sold
as low as any one can, and give good weight and honest measure.
To lovers of a good cup of coffee would say try my ROTTERDAM
JAVA, at 35c per lb., or 3 lbs. for \$1. Golden Blend at 30c per lb.
I have coffees lower in price, down to 20c. Buy coffee of me once and
you are a steady customer.
