glad to supply it for you.
The Chelsea Savings Bank has recently
had built for it one of the strongest
safes made, being the new patterns of
the Mosler Bank Safe Companies, Round
Screw Door, Laminated Chrome Steel,
Burglar and Dynamite Proof Safe, with
no keyhole, spindle or other connection
through the door or walls, nor any
access to the lock from the outside, the
door being screwed in and held secure
by a Double Chronometer Time Lock
from inside. It is considered the strong-
est and best security ever devised against
efforts of burglars. The safe is protected
by a large new fireproof vault made
necessary to store the upwards of twenty
years' accumulation of books and papers
of its business, and the whole premises
are further protected by an Electric
alarm system, which gives instant warn-
ing of trespassers at night.

Gov. NORTHERY has signed the bill making Labor-day the first Monday in September of each year—a legal holiday in Georgia.

The largest salary of any diplomatist is that of M. Waddington, French minister at London, which is \$60,000 a year. The British minister to France has \$50,000 a year.

The latest Tascott story has one commendable feature. It kills Tascott early in the play. According to the narrator, he was strangled to death by his pals immediately after the murder of Snell.

One result of the recent disorders of French pilgrims at the Pantheon at Rome is the issuing of an order by the French government forbidding bishops to leave their dioceses without leave of the government.

In the museum of the dead letter office at Washington, D. C., there is a piece of parchment upon which is penned a copy of the Lord's Prayer written in fifty-four different languages.

JAMES DREDGE and Sir Henry Wood, of the royal commission to represent Great Britain at the world's fair, have prepared a report eulogizing the prospects and arrangements for the fair and urging active participation by the people of Great Britain.

SENATOR BARNAFF has estimated that no fewer than thirty-two million peasants in Russia are now destitute, and must be supported for the next ten months. Think of the entire population of England starving! That is what it amounts to, only the victims are in Russia.

When the Chinese compositor sets type he places them in a wooden frame twenty-two by fifteen inches. This frame has twenty-nine grooves, each for a line of type, and the type rests in clay to the depth of a quarter of an inch. The types are of wood, perfectly square, and the compositor handles them with pincers.

Half seconds are close figures in trotting a mile, and the muscles that make such a change are wonderfully trained, and move like clock-work when the regulator is changed a little to faster time. Snail, the phenomenal California mare, lowered her record of 2:10 1/2 to 2:10, but she is yet short of 2:08 1/2, the record of Mand S.

The republic of Costa Rica, one of the most progressive of the southern countries, is soon to have a complete system of telephonic communication. The government made a contract a short time ago for the establishment of telephone service between all the towns of the republic and for its maintenance for a period of ten years.

JOSEPH TAPER, of Pittsburgh, Pa., got foolishly discouraged because he fancied that he was cumbering the earth for too long a span of years, and imagining that nature was forgetting to call in his checks he gave her a gentle reminder by trying to hang himself. And yet Joseph is only a giddy youth of 107 mosquito-haunted summers and corrugated winters.

By the law of France the fund of \$300,000 on deposit in Parnell's name in the Bank of France will be inherited by Parnell's widow and by his brother, John Howard Parnell, of Atlanta. The latter says he will not touch a penny of it, and every nationalist who contributed to the fund will admit that he is a gentleman of wisdom and discretion.

DWIGHT L. MOODY expects to leave this country next month for the winter, although he has not decided yet whether it will be to go to Scotland and England or to India. In the latter country Dr. Pentecost would be glad to have his help. In either case Mr. Moody will throw himself vigorously into evangelistic work. He has urgent invitations from a number of places in the Old World to come and labor.

A CHINESEMAN out at Victoria married "a Mexican woman." But he soon wanted a divorce. In his plea he complained that she has "too much talk with neighbors, too much drink, too much brandy, too much fight, too much snore, too much box, too much dream, too much say 'killum husband' and too much no good." But the court held the Chinese man to his contract, possibly with the idea of making a notable example to others.

DR. S. E. SYLVESTER and other well-known physicians of Portland, Me., have been experimenting with chloride of gold and manganese as a cure for consumption. Solomon Cheney, a well-known resident of that city, who had been given up by his physicians as having an incurable case of pulmonary tuberculosis, has been cured by the new treatment for six weeks, and the physicians concur in the announcement that Mr. Cheney has since been steadily improving in health and strength and that he is in a fair way to beat his business again within a very short time.

The recent advocacy by some of the use of atmospheric air as fuel is pronounced one of the most remarkable results of modern experiments with one of the essential elements of the universe. As is well understood, air is mixed with coal gas and with hydrocarbon vapors, and the compound, when burned, generates a much greater heat than if the air was absent. The new fuel, however, is the air itself, which in a powerful blast is directed upon an incandescent substance—say coal made white hot, pure carbon, or any other materials that can be made to glow.

SHIP-OWNERS are said to be much concerned about the report of Gen. O. M. Poe, of the United States engineers, that the waters of the great lakes are becoming lower every year. The following figures for five years show the gradual fall: June, 1889, Lake Huron was 583.12 feet above the sea level; June, 1891, it was 582.89; June, 1893, 581.79; June, 1895, 581.04; June, 1896, 581.01; June, 1897, 580.40. The month of June is taken because the water is then at its highest. In February the minimum depth is reached, and the ship-owners expect to see many exposed places in that month next year.

The minister of agriculture has asked the governor general of Canada to issue a proclamation prohibiting the immigration of Russian Jews to the dominion.

LATER.

THE 125th anniversary of American Methodism was celebrated with appropriate services in the old John Street Methodist Episcopal church in New York, the first church of that denomination established in this country.

KATE COLE, a girl of 18 years, dropped dead in the street at Pottsville, Pa., from tight lacing.

A REIGN of terror existed all along the Mexican border of the Rio Grande, and the inhabitants from over there were flocking into Texas in droves.

NEAR Glasgow, Ky., the boiler at John Quigley's sawmill exploded and six persons were fatally hurt.

THREE children of John Cummings, a farmer living near Penetanguishene, Ont., set fire to their home and perished in the flames.

A SECRETARY BLAINE has returned to Washington after an absence of more than five months. He was in good health.

At Topeka, Kan., an incendiary fire destroyed the livery barn of J. E. Cronce, and ten horses perished in the flames.

The schooner Franklin was wrecked off Gunney Point, Mass., and Capt. Kelly, his two sons and three men were drowned.

Eighty cars loaded with 1,000 bales of cotton were burned at Bird's Point, Mo., causing a loss of \$100,000.

At Lamoux, France, the floods undermined several buildings, which subsequently collapsed, and twenty inmates were killed and nine other persons were buried in the debris.

The town of Mieringen, Switzerland, containing 3,000 inhabitants, was completely destroyed by fire.

MARTIN, of Detroit, won the six-day bicycle race in Madison square garden, New York, making 1,466 miles and breaking all records. Six of the four teamsters were in at the finish.

LUCY JEWETT and Sarah Praeter, of Paris, Ill., blew out the gas in a hotel at Terre Haute, Ind., and were asphyxiated.

The planning mill of J. Williams & Co., a row of tenement houses and a barn containing a dozen horses were totally destroyed by fire at Bowling Green, Ky.

"AUNT" BALDY, the oldest woman in Terre Haute, Ind., celebrated her 102d birthday.

FIRE along the Wolf river and its tributaries in southern Wisconsin destroyed over 50,000 tons of hay, and farmers would have to sell their cattle to prevent them from starving.

MICHIGAN STATE NEWS.

Will He Tried for Murder.

Sixteen years ago, August 23, Edward Molitor, politician and business man, was shot dead in his store at Rogers City as he sat at his desk. Although the names of the murderers were well known no direct evidence was obtained until the present summer, when one of the conspirators confessed, and his confession was followed by several others. The evidence is direct and the disclosures startling. The prisoners number a dozen of the most prominent men in the country and five of them are said to have confessed to the crime with which they are charged.

Health in Michigan.

Reports to the state board of health by sixty-two observers in different parts of the state for the week ended October 17 indicated that inflammation of the brain, puerperal fever, membranous croup, whooping cough, rheumatism and typhoid fever increased, and inflammation of the kidneys, scarlet fever and diphtheria decreased in area of prevalence. Diphtheria was reported at thirty-four places, scarlet fever at thirty-five, typhoid fever at forty and measles at four places.

Money for the Potawatomies.

Simon Pokagon, chief of the remnants of the Potawatomi tribe of Indians which are domiciled in southwestern Michigan, will soon receive \$250,000 from Washington for distribution among 250 members of the tribe. These Indians successfully resisted removal to Kansas in 1833, but claimed the annuity promised in that event. They received a small sum in 1866, since which time the present claim has been prosecuted.

Pierced with a Silver.

A hardwood silver 7 inches long, not more than a hair's width in diameter at its widest point and weighing less than one ounce, flew from a buzz saw and pierced S. Lessard, of Big Rapids. The silver passed through a blue jacket, the bands of overalls and heavy trousers and two shirts, and deep enough into the unfortunate man to make his recovery doubtful.

Over a Century Old.

Mrs. Almie Demund, of Woodland, Barry county, is dead at the age of 103 years. She was born near Seneca Falls, N. Y., in 1787, and had lived at Woodland since 1828. She retained her faculties to the end. She was the mother of thirteen children, and had fifty-two grandchildren, forty great-grandchildren and six great-great-grandchildren.

Burned to Death.

Mrs. James Whitley left her home in Port Huron to do some work and her 6-year-old daughter, Nellie, tried to start a fire by use of kerosene. Terrible screams shortly after attracted the neighbors to the sight of the child enveloped in flames rushing around the corner of the house. Assistance arrived too late, and the child died in a short time.

Young Women's Association.

At the seventh annual state convention in Jackson of the Young Women's Christian association the following officers were elected:

President, Mrs. L. H. Field, Jackson; first vice president, Mrs. J. H. Jackson, Bay City; second vice president, Miss Berdine Lansing; third vice president, Miss E. Smith, Belding; secretaries, Misses Strong, Ypsilanti, and Hunting, Flint.

Found Two Bodies.

The bodies of two Fin miners entombed by the fall of ground in the Republic iron mine at Marquette two weeks ago have been recovered. They were found buried under a thousand tons of rock and earth and crushed all beyond recognition. Their names are Stephen Herliet and John Kiltieria.

The trial of Alexander Neveau at Bay City, for the murder of his 16-year-old wife September 15, ended in a verdict of murder in the first degree and he was sentenced to the Jackson state prison for life.

AN INSULT TO OUR FLAG.

The Valparaiso Outrage is so Regarded by the President—Chill Must Immediately and Ample Redress or Suffer the Consequences.

WASHINGTON, Oct. 26.—Further persistent inquiry of officers of the government in regard to the Valparaiso incident of October 16 shows conclusively that the administration does not regard it as a simple street row for which the Chilean government cannot be held accountable, but as an insult to the honor and flag of the United States, calling for the most vigorous diplomatic treatment.

The official report of the occurrence made by Capt. Schley, of the Baltimore, after a careful investigation of all the surrounding circumstances, shows clearly not only that the assault upon the American sailors was cowardly and unprovoked, but that it was inspired purely by hatred for the uniform they wore and the country it represented; or, in other words, that it was not an attack on them as individuals, but as representatives of the United States.

The authorities at Washington are indignant at the apparent indifference displayed by the Chilean government, and Minister Egan has been instructed to take prompt and vigorous measures to secure proper reparation. He has been fully advised of the position of the government in the matter, and has been instructed to acquit the Chilean government therewith in the hope that the matter may be amicably adjusted without detriment to the honor of either country. It is understood that the president insists upon a proper redress for the supposed insult to our national honor, and that unless it is given within a reasonable time Minister Egan will be recalled and all diplomatic relations with Chile suspended.

The president said Saturday night to a visitor that Chili's continued hostility to us had culminated in the murder of one of our sailors and the wounding of a dozen or more and the arrest and incarceration in jail of thirty-five others. He said the time had come when we must teach the Chilean people that our patience in dealing with them is exhausted. He said that after the fall of Balboa the United States was the first country to recognize the new provisional government. So far from appreciating this act of international courtesy, the junta has yet failed to recognize its accredited representative here, Senator Pedro Montt. Senator Montt has not presented himself at the state department or in any other manner indicated a desire to reestablish diplomatic intercourse between his country and the United States.

VALPARAISO, Chili, Oct. 26.—Judge Foster, the son of Julio Foster, who is at present in Washington, is conducting the inquiry into the assault committed upon the sailors from the steamer Baltimore in Valparaiso streets by the mob of Chilean man-of-war men and roughs. A reporter tried to get from him the results of his investigation up to date. He said he was debarred by law from making public any details of his inquiry until he had completed it. He says the depositions signed by American sailors contain no complaints against the police, who are suspected of abetting some of the Baltimore's men. He declares he is unable to ascertain clearly or definitely how the riot began. All he has so far been able to learn is that two of the American sailors were in a saloon, when high words passed between them and some Chileans who were also in the place. One of the Chileans was knocked down. The row then became general and the police interfered. They did all in their power to stop the fighting, but it soon spread, and the numerous assaults upon American sailors in different parts of the city followed. Judge Foster says that he is extremely desirous to get at the bottom of the unfortunate affair, and especially to discover who shot Boatwain Mate Regan.

HE GETS A DOLLAR.

Ignatius Donnelly Gains a Barren Victory in His Great Libel Suit.

MINNEAPOLIS, Minn., Oct. 26.—The jury in the libel suit of Ignatius Donnelly against the Pioneer Press for \$100,000 damages Saturday night brought in a verdict giving Mr. Donnelly one dollar and allowing him five dollars for counsel fees. The trial has been probably the most famous in legal annals in the northwest, and owing to the prominence of the plaintiff and the matters involved attracted the greatest interest.

Ignatius Donnelly, the famous author and former member of congress, a leader in the Farmers' Alliance and prominently mentioned for the presidential nomination of that party, sued the Pioneer-Press for \$100,000 damages on account of the republication on February 16, 1891, of a letter from Col. W. S. King, formerly postmaster of the house of representatives and a man of national reputation, which letter had been first published in the Pioneer Press eleven years previously. It was on account of the allegations of bribery brought in that letter that Mr. Donnelly brought the suit, for the greatest amount ever asked in one suit by an individual against a newspaper.

The jury was out three hours, and one stage stood eleven to one in favor of the Pioneer Press. The case lasted five days, and was closely contested all points. Mr. Donnelly is said to have been urged to bring the suit by his all-time friends, who insisted he must clear himself of the charges made.

MILITARY AFFAIRS.

The horses of the German cavalry regiments are to be entirely shod with rubber, recent experiments as to their durability, etc., having proved entirely satisfactory.

The government of Nicaragua has decided that the maximum number of troops in active service during time of peace shall be 1,000 men, and in time of international troubles 5,000.

GEN. ALEXANDER S. WARD, president of the College of the City of New York, has received from the war department a medal of honor for "distinguished personal gallantry at the battle of Gettysburg."

AUSTRIA has an army 300,000 strong. But a correspondent says that the Austrian soldiers are very poorly dressed in comparison with the English and German soldiery, and they are also not so good specimens of manhood as the queen's and the Kaiser's troops.

The food allowed to sailors in the American navy is better than that furnished in any other navy in the world. They have every vegetable that can be canned except asparagus, besides all kinds of canned meats. In fact, they have fresh meats, and the mess fund provides fresh fruits.

MILLIONS IN WANT.

Russians to the Number of 20,000,000 Without Food—The Starving People at the Mercy of Cold-Blooded Speculators—Women Sell Their Hair for a Meal.

LONDON, Oct. 26.—Winter began in Russia on Thursday with the first sharp frost. Living men cannot remember any other year in which this simple announcement meant what it does now. There are literally millions of human beings, at the furthest within a six days' journey of London, to whom this frost comes as a sentence of death by starvation. Although the censors have forbidden the Russian papers to discuss the famine, the Novosti venture the declaration that 20,000,000 creatures are already without food.

Statistics prove conclusively that in many places speculators get extortionate prices. Corn merchants and village koolaks, or usurers, are charged with responsibility for the extortion. A Samara paper declares that Jews are angels compared with the koolaks, who are in the habit of reducing those in their power to the lowest stage of poverty. Incidents showing the terrible distress of the people continue to be recorded. A poor woman of Ratchinov, on returning home from a neighboring village, whither she had gone to try to purchase food, found all her children dead, and a post-mortem examination being made their stomachs were found filled with rags and earth. Many villages are completely deserted in the district of Perm. One half of the population of Rousan has died of hunger or disease. An odious traffic is carried on in women's hair, the best heads realizing a crown apiece. In some cases the price of a single meal is eagerly accepted.

The bicyclist is a wandering advocate of

better city pavements and better country

roads. Already he has made his influence

felt for good in many communities. As

the number of bicycles multiplies through-

out the country and the man in the knee-

breeches becomes aware of his influence,

the wheel will be recognized as a power

ful engine of reform. For many years the

people of this nation have contented them-

selves with wretched highways, the farmers

because they feared heavy taxation for im-

provements, and other classes of citizens

because they sympathized with the farm-

ers. It is beginning to be understood, how-

ever, that the farmer's fears are not well

founded; in fact, that they sustain enor-

mous losses as the direct result of bad

roads. It is the province of the alert bi-

cyclist in the short trousers and long stock-

ings, who is brought in contact constantly

with the horrible highways, to teach true

economy in this matter and to throw his

influence on the side of his teaching.

The new dress reform movement prom-
