### David Thomas.

David Thomas died at his residence in  
this village Tuesday, July 18, 1893, of  
Bright's disease from which he had suffered  
for many years.

He was born in Glasgow, Scotland, Nov-  
17, 1813. He came over to Troy, New  
York, in 1834 and there made the acquaint-  
ance of Janett Hart, an excellent Scotch  
girl who became his wife in 1835. They  
went back to Scotland and lived four years  
losing two sons while there. They then  
came back to Troy and lived there until  
they removed in 1842 to the farm four  
miles north-west of Chelsea where they  
resided until they moved to Chelsea in  
1866, where Mrs. Thomas died in 1880, one  
week earlier in July than Mr. Thomas did  
last week. They lost two boys while on  
the farm and four girls survive them. By  
industry frugality and the strictest integrity  
they amassed a competence for themselves  
and now leave it to their children together  
with a far better legacy in their excellent  
example and precept. Mr. Thomas was a  
man of strong convictions and purposed  
always to be right on every question. He  
was ever the friend of labor and its rights.  
He hated chicanery, deceit and hypocrisy,  
and admired courage, justice and truth.  
He thought for himself and jumped at no  
hasty conclusions. As husband, father,  
citizen and friend he was among the best.  
Evil doers recognized in him an opponent  
while justice and honesty found in him a  
friend.

Rev. Whitcomb gave an excellent and  
helpful talk at the funeral on Thursday  
and a goodly number of sorrowing relatives  
and neighbors followed the remains to  
their resting place in the Vermont  
Cemetery.

### Wool.

The New York wool Reporter says:  
"The feeling that wool values are abnor-  
mally low, and that it is not a bad time for  
the manufacturer, who has the ability to  
take advantage of these values is slowly  
but surely gaining ground. No one can  
say that wool is not going to be lower, but  
it is safe to assume that it cannot get much  
lower, and that the manufacturer who takes  
wool on to-day's basis of values cannot miss  
the bull's eye—certainly not far enough off  
to discredit his judgment much."

This seems a logical deduction from this  
fact, that wool has remained stationary  
for a few weeks, indicating that extra pres-  
sure must be exerted in order to put prices  
below present level. During this period  
the market has been adversely affected by  
a scarcity of buyers, and by a hammering  
process of those who tried to buy, and yet  
it has stood this ordeal without showing  
any disposition to go lower; with all this  
pounding it has remained at one point—  
the level it reached two weeks or so ago.  
Is it not fair to assume then that the lowest  
level has been reached?

"Then, there is another factor; growers  
are holding for firmer prices, and this  
means that dealers do not find it so easy to  
replace the wool they have sold. A good  
point isn't it? Another factor: Wool man-  
ufacturers are nearing a time when they  
must have wool. This is evident in the  
increased inquiry for sample lots and in the  
improved condition of the goods market.  
And it is well to bear in mind that any  
improvement in demand for wool means  
firmer prices."

### The Lake Route to the World's Fair via Picturesque Mackinaw.

Avoid the heat and dust by traveling on  
the Floating Palaces of the Detroit &  
Cleveland Steam Navigation Company.  
Two new steel passenger steamers have  
just been built for this Upper Lake route,  
costing \$300,000 each, and are guaranteed  
to be the grandest, largest, safest and fast-  
est steamers on the Lakes; speed 20 miles  
per hour, running time between Cleveland  
Toledo and Chicago less than 50 hours.  
Four trips per week between Toledo,  
Detroit, Alpena, Mackinaw, Petoskey and  
Chicago. Daily trips between Detroit and  
Cleveland; during July and August double  
daily service will be maintained, giving a  
daylight ride across Lake Erie. Daily  
service between Cleveland and Put-In-Bay.  
First-class stateroom accommodations and  
menu, and exceedingly low Round Trip  
Rates. The palatial equipments, the lux-  
ury of the appointments makes traveling  
on these steamers thoroughly enjoyable.

### Mrs. Irving Storms.

Died, July 22, 1893, Mrs. Irving Storms,  
aged 55 years, 4 months and 8 days.

Mrs. Storms, whose maiden name was  
Mary A. Boynton, was born in Sylvan,  
Washtenaw county, Mich, March 19, 1838  
and was married to Mr. Irving Storms  
March 9, 1859.

She was converted while a student at  
Leoni seminary, under the preaching and  
presidency of Rev. John McIlldowney.  
Since then she has been a member of the  
M. E. church and a firm believer in  
Christianity. Her life has been character-  
ized by faith and sterling righteousness,  
together with a complete devotion to the  
welfare and interest of her family. Her  
mission, as she conceived it, was to send  
others into the world prepared to do work  
for God and men, which she could not do  
personally.

She leaves three children, Rev. A. B.  
Storms, pastor of the Woodward Ave.,  
Methodist church, Detroit; Mrs. Frank  
Ward, of Lima, and Miss Nettie Storms,  
who with the husband and many friends  
mourn her loss.

### Of Interest to Potato Growers

From the Kansas station comes a bulletin  
giving results of experiments in the potato  
field that are of general interest. When  
the season is warm enough and rather long  
the second growth of potatoes often appears  
in the fall from the few tubers that have  
been left in the ground after harvesting.  
In colder climates these potatoes often  
sprout up the next spring long before the  
regularly planted ones have been put in  
the ground. The freezing of the winter  
does not seem to affect their vitality, and  
when they have been allowed to grow they  
often produce better crops than the newly  
planted seed.

In the bulletin mentioned it says that  
the second crop of potatoes found in the  
fall in warm climates makes better seed  
for the next spring than the regular seed  
purchased or saved. They start earlier  
and yield a good crop some time ahead of  
the regular crop. They keep in the ground  
until spring without sprouting, and they  
are firm in texture and not shriveled.  
Where this second crop can be obtained  
the bulletin recommends the potatoes as  
seed in preference to others. In a trial of  
two years at the station these second crop  
potatoes used as seed gave an average gain  
of 48 1/2 per cent, and they were found to  
resist drought better, as well as to produce  
a finer and better potato.

### Still Doing Business at the Old Stand.

I would say that I am selling as cheap  
as ever, but for the next ninety days I will  
give special bargains in everything in my  
line. If you are in need of a heavy or  
light double harness, bring your cash and  
see what a bargain you can secure. I have  
just received a splendid lot of whips and  
fly nets. I have some of those all whale-  
bone whips—bone from handle to tip.  
Call and see them.

C. STEINBACH.

### We Are Wonderfully Made.

In a human body there are some 2,000  
000 perspiration glands, communicating  
with the surface by ducts, having a total  
length of some ten miles; while that of the  
arteries, veins and capillaries must be very  
great. The blood contains millions of  
millions of corpuscles, each a structure in  
itself. The rods in the retina, which are  
supposed to be the ultimate recipients of  
light, are estimated at 30,000,000, and  
Meinert has calculated that the gray matter  
of the brain is built of at least 600,000,000  
cells.

### Excursions.

### A Temperance Question.

There is a Tacoma temperance debating  
society that is apparently not afraid to  
tackle any subject, since the members  
recently chose "Resolved, That the cause  
of temperance is not advanced by persons  
joining our society for the sole purpose of  
becoming acquainted with the opposite  
sex."

### THOUSANDS THROWN OUT.

An Army of Idle Men Through the Closing Down of Many Big Mills and Factories.

OMAHA, Neb., July 22.—The first band of miners from Colorado hunting for work and who were given a free ride to this city on a freight train arrived during the morning. They are scattering for the harvest-fields and iron mines of the north and for Chicago.

MILTON MILLS, N. H., July 22.—The agent of the Waumbuck company has issued orders for closing the mills here for six months, as soon as the goods now in process of manufacture are finished. The reason assigned for this action is a lack of orders, except at ruinous prices. This is the first time in the history of this company that work has been ordered to cease on account of the condition of markets, and the result of the present action will be a serious blow to many employees who are dependent upon their earnings in these mills for support.

PORTLAND, Me., July 22.—At a directors' meeting Thursday it was decided to shut down the mills of the Westbrook Manufacturing company, makers of ginghams, from July 20 to September 4. The monthly pay-roll is \$20,000. There are three reasons that unite to cause the shutting down. The goods now being manufactured cannot be sold until October, and no money can be realized on them until next spring. It is not deemed advisable to pile up goods. The mill has been in operation thirty years without a shut-down, and some repairs are necessary.

NEW YORK, July 22.—The effect of the proposed closing of the large Amoskeag cotton plant in Manchester, N. H., during the month of August has been generally overestimated, in the opinion of many of the leading cotton merchants of this city. It is regarded as probable that many other mills in New England, such as the Manchester mills, the Pembroke, Webster, and China mills and the York Manufacturing company of Saco will shut down, but nevertheless the situation is not considered an alarming one by the New York merchants.

PLATTSBURG, N. Y., July 22.—The Chateaugay Ore & Iron company, whose mines and iron foundries are located at Lyon Mountain, closed down Thursday, as also did the Crown Point Iron company mines and iron makers at Crown Point. The cause given is dullness in the iron trade. About 1,000 men are thrown out of employment. The principal stockholders of both companies are New Yorkers.

NORWALK, Conn., July 22.—Norwalk manufacturers are experiencing the coldest season they have ever known. Hutchinson, Cole & Co., shirt manufacturers, have been shut down three weeks. Roth & Goldsmith, corset manufacturers employing nearly 500 operatives, one of the largest concerns of the kind in this country, are idle. Several hat shops employing hundreds of men and women are doing practically nothing, and the Norwalk Lock company has laid off 100 men indefinitely because of dullness in trade. Business men say that although they are selling some goods collections are deplorably poor.

WAUKESHA, Wis., July 22.—Superintendent McNaughton has caused to be bulletined at the Wisconsin Central locomotive repair shops an order closing down all departments for the current month. At least 200 men are thrown out of employment, only those necessary to do temporary repairing being retained.

WAUKEGAN, Ill., July 22.—Two more new factories have been located at South Waukegan. One is the Chicago Double-Header Safety Match company, which will manufacture an improved match without phosphorous that cannot be injured by water. Work on its building will begin within thirty days. The main structure will be 60 by 150 feet of brick. E. D. Nix, of Oklahoma, is president of the company. D. S. McKay is treasurer and manager. The second factory will be the H. W. Johns asbestos paint factory, which will erect brick buildings and employ 250 men at the start. The Lanyon zinc works and Morrow Brothers' works are being enlarged.

MILWAUKEE, July 22.—The Bay View rolling mills of the Illinois Steel company, which were recently started up at nearly their full capacity, are gradually being closed again, and at the present time not more than half the plant is in operation. Manager Hinton said to-day that the shutting down of the mills was owing to the exceedingly dull condition of everything in these times.

MATTOON, Ill., July 22.—The Peoria, Decatur & Evansville railroad has closed its machine shops at this place, throwing about 200 men out of employment. It is stated by the officials that inability on the part of the company to borrow money was the cause.

### BLOWN TO FRAGMENTS.

Gus Olsen Killed by an Explosion of Dynamite at Minneapolis.

MINNEAPOLIS, Minn., July 22.—By an explosion of dynamite in a shanty on Washington street northeast, near Fourth avenue, at 9 a. m., one man lost his life and much damage was done in the way of broken glass and falling plaster. The man killed was Gus Olsen. He had charge of firing cartridges on the sewer work and just before the accident entered the shanty. A companion states that the whole structure went off almost instantly after Olsen entered. His body was blown into fragments.

## Doubt Changed to Faith

"My little girl Kitty had a skin disease which the doctors called Eczema, causing her great agony with its intense itching and burning. Seven or eight physicians gave us medicines but to no good. At the earnest advice of a neighbor we tried HOOD'S SARSAPARILLA with the result of a perfect cure. Her skin is now as fair and clear as any child's in town." WILLIAM FAIR HAVEN, Vt. DR. KILMER'S SWAMP-ROOT

### CURED ME.

Dr. Kilmer & Co., Binghamton, N. Y. Gentlemen:—"I desire to tell you just how was, so that the public may know of your wonderful Swamp-Root. Two years ago last October I had spells of vomiting; I could not keep anything in my stomach; the Doctor said I had consumption of the stomach and bowels; continued to run-down in weight; I was reduced to 60 lbs. I would vomit blood, and at one time as much as three pints; we had two of the best Physicians and they said my case was hopeless. "Oh, my sufferings were terrible." A neighbor told us of your Swamp-Root, and my husband got a bottle; I took it to please him. I used six bottles of Swamp-Root and I am now nearly as well as ever. I weigh 108 lbs., do my own work and take care of my baby. Every one says, I was raised from the dead, and many will not believe that I am still living until they come and see me, and then they can't believe their own eyes, I am looking so well." There were more births returned from the township of Freedom last year than from the whole city of Ypsilanti, viz: 37 from Freedom, and 36 from Ypsilanti. From the 2d district of Ypsilanti there were only two births returned and they were twins, or there would probably have been but one.—Ann Arbor Courier.

Some newspaper men started the report that a Brookfield, N. J., girl kneads bread with her gloves on. An exchange answers: "We also need bread with our shoes on, and with our pants on, and with our clothes on. We need it badly, too, and if our delinquents do not soon pay up we will need it without any pants at all.

According to the figures compiled by Carroll D. Wright, superintendent of the United States department of labor, there are now in this country 5,860 building associations with 1,655,456 shareholders and with net assets of \$896,928,405. In the list of states encouraging such associations Pennsylvania stands first and Ohio is second.

The bachelor editor of an exchange gets off the following: This is the season of the year when the summer girl flourishes. She is a bundle of loveliness and sanctity too sweet to breathe upon, and only fit to gaze at from a distance. Put her in the kitchen with a lot of dishes to wash, and she would not be attractive enough for a mosquito to bite.

A western paper tells of a fellow who, every time he gets on a spree, insists on paying a year's subscription to his town paper. He has already paid for his paper to January 1, 1927. An effort will be made at the next press convention to ascertain what brand of whiskey the fellow is using, in order that it may be more generally placed on the market.

A meeting of the women citizens of Chelsea will be held Thursday, Aug. 8, at 2 p. m. in the Maccabee Hall for the purpose of considering the new law in regard to "Municipal Suffrage" for women. The meeting will be addressed by Mrs. A. W. Bassett, of Ypsilanti, a lady of ability and practical experience in Municipal matters. All women are invited to be present.

April, 1861, Thos. Young was appointed postmaster at Pinckney. He took his position the same month and held it without a break until his death in 1870, when his wife, Mrs. Sarah Young, was appointed and held the position, even through change of administration, until the present time. It will be seen that the post-office has been in one family for 32 years, Mrs. Young holding it for 17 years.

On account of a shortage in the crop, hay brings \$30 to \$50 a ton in Europe. That's good news to the American farmer, in view of the big yield this year.

Don't sit down and wonder why so and so is prosperous and you are not. You can be. Advertise. Get people to come to your store. In short, make money by advertising. Others do. The HERALD is the proper medium to advertise in. Its news columns are brim full of the latest local happenings, and its advertising columns are filled with live, legitimate "ads." It never carries dead and worthless advertisements. Follow the majority, advertise in the HERALD and be prosperous.

More ill health, sickness and death results from bad water supply and bad drainage, than from all other causes combined. Disease germs abound in a thousand fold greater proportion in the water we drink, than in the air we breathe, and are far more dangerous taken into the system with the water, than with the air. There is much doubt whether disease germs are primarily produced in the atmosphere at all, but these germs are doubtless taken up in the atmosphere from the water, and thus conveyed into the human system in the air we breathe.

A girl over at Brighton tried to ride a bicycle the other day. After she got out in the country a couple of miles her dress caught in the gearing of the frisky machine. The girl couldn't do a thing. It took all her strength to manage to get off the machine. After awhile a young man came along. He couldn't free the girl without tearing the dress into threads and this she didn't want. The young man picked up wheel, girl and all and carried them to the side of the road and sent to town for a wrench. When it arrived the machine was taken apart, and she went home.

Committees of St. Mary's parish are very busily engaged in making arrangements for their first annual picnic at North Lake, on Tuesday, Aug. 15, 1893. Mr. Louis Burg, of Liverpool, Ohio, the famous comic singer, who is so well known to Chelsea people as a fine artist, has promised to come. Negotiations are now pending for some good speakers, and there is a good probability that Col. John Atkinson, Rev. Dr. Rielly, of Detroit, Hon. T. E. Barkworth, of Jackson, and Hon. C. R. Whitman, of Ann Arbor, will be present and address the crowd. Singing will be an important feature of the picnic. Further particulars will be given later.

Ice cream is one of the lovely and luscious things of this life that fill this world with sweet little oases for woman-kind. It is as necessary to her existence as love or tea or fear of a mouse. She has to be ice creamed at proper intervals in the summer season, and if some one does not do it for her she must ice cream herself. What is the summer for, anyhow, if it isn't to gladden woman's heart with soda water and ice cream? She looks and longs for it when April begins to fade as she does for a chip hat or a china silk dress. She would die if she didn't have her ice cream, and she could die eating it. Oh, the congealed joy, there is in a plate of the frozen pudding!

The farmers, of all men, should take pains to encourage his boys if he wishes them to adopt the business of farming as they grow to manhood. He, better than one engaged in other business, can do this. What is the loss of a small piece of land rented to the boy if it does not produce quite so much as if the better divided skill of the father were used to direct its cultivation? What is lost in money is more than made up by the value of the experience gained. Let there be competition between an acre worked by father and another worked by the son, and the boy who can excel his father in growing a crop will in so doing acquire more love of farming than he can get in any other way.

The revelations of the census on the birth-rate are beginning to startle people, as they might have done long ago. They show that in 1880 the birth-rate throughout the country was 90.95 in the thousand while in 1890 it had declined to 86.68 per thousand. The rate and its fluctuations vary in the various States. Leaving Utah out of the calculation, because its peculiar institution has given it a high birth rate, we find that the highest birth-rate at present is in the old slave States—the Carolinas, Georgia, Alabama, Mississippi, Texas, Arkansas, and Tennessee—in which the rate ranges from 80 to nearly 84, a decrease of 3 to 4 from 1880; and the lowest in the three Northern New England States, and in California and Nevada, where it is below 29, a decline of 2 to 3 per cent. from 1880. In the group of Northern Central States—Pennsylvania, New Jersey, Ohio, Indiana, Illinois, Wisconsin—the rate ranges from 24 to 27, a decline of 3 to 4 per cent. from 1880. New York shows a low rate, 23.28, and Connecticut and Massachusetts 21.26 and 21.51, respectively. It is not easy to explain these figures on any generally admitted theory.

It weighs 110 pounds, is 11 feet long, 3 feet 3 inches wide and 3 feet 9 inches in height. To build it required the service of 12 men, working 18 hours a day, 13 months. The work was done by the Mexicans, who are the most adept in the filigree art.

Her household is turned into a hospital, and she has less than a dozen dollars in her possession.

PROF. BELL thinks the time occupied by inventors in working out the problem of aerial navigation by the use of inflated gas-bags and methods of steering them is wasted. He thinks a feasible means of propelling and directing an air-ship would be by a kind of trolley system where the rod would hang down from the car to the stretched wire, instead of extending upward. He recommends this idea to inventors.

## TRAGEDY IN KANSAS.

Banker Little Meets Lawyer Johnson on the Street in Kansas City, Kan., and Shoots Him Dead—Not Much Is Known Regarding the Cause.

KANSAS CITY, Kan., July 20.—Col. Benjamin F. Johnson, one of the leading attorneys at this place, was shot and instantly killed at 9 o'clock Wednesday evening by "Judge" A. W. Little, one of the most prominent citizens of the town. Great excitement prevails and threats of lynching are indulged in.

Little is cashier of the First national bank of Kansas City, Kan., ex-president of the Armourdale bank, vice president of the McNeal-Little Banking company of Guthrie, O. T., and director of the First national bank, Medicine Lodge Kan. He is a southerner by birth, a tall, handsome Tennesseean of the fiery brigadier type. He has long been reputed to be one of the wealthiest men in town, his fortune being estimated at perhaps \$200,000.

The cause of the tragedy is not known definitely. Johnson's friends say it was due to a financial difficulty between the two men, and Little's friends say there was a woman in the case, the facts of which fully justify the shooting. Little and Johnson were interested in a new coal company which was recently organized at Huntsville, Mo. Its affairs became tangled up, and it is said that Johnson was responsible for Little losing considerable money in the venture and that Little took his revenge in the shooting.

Little, in company with United States Commissioner Hanks, was walking down Minnesota avenue, the principal street of the town. When they approached Crinoley's drug store at No. 630, Mr. Little was seen to walk in advance of Mr. Hanks. Mr. Johnson was sitting on a bench in front of the drug store with a number of friends.

Mr. Little hastened up to him and with an oath exclaimed: "You shan't bound me any more." Then he deliberately drew a revolver from a pocket and pointing it at Johnson fired. The bullet struck Johnson in the left side and caused instant death. Little ferociously jumped upon the prostrate man and beat him repeatedly over the head with the butt of his weapon. Then he coolly arose, and, explaining his last action, said to the crowd which had gathered: "I was afraid I had not killed the scoundrel." He then gave himself up to the police and is now in jail.

Johnson leaves a young wife and baby. He was prominent in society of Kansas City, Kan., and was a prominent knight of pythias. The murder has caused much excitement and there is some talk of lynching. It is not believed, however, that violence will be attempted. Nevertheless the jail in Kansas City, Kan., in which Little is confined, is being strongly guarded.

## CHICAGO'S NEW DIRECTORY.

It Contains 512,000 Names—An Estimated Population of 1,537,200.

CHICAGO, July 20.—The Chicago city directory for 1893 has just been issued. It is a larger book than the directory for last year, but resembles it in other respects. There are 1,680 pages of names in the new directory to 1,546 pages in the old. Each page contains the average of 305 names in three columns. Calculated at this rate there are about 512,000 names in the new directory, against 474,530 in the issue of 1892. The directory is the largest published in the United States and is twice the size of the directory published ten years ago and three times as large as the one published twenty years ago. The population of Chicago is roughly estimated at 1,537,200. Of this number the Johnson and kindred families lead. There are over 4,700 families of Johnson, Johnston or Johnstone. The Smiths fall back into the second place, with about 4,030 families. There are nearly 2,200 Browns. In the new directory there are altogether 2,240 pages, more than 200 more than the directory for 1892.

## MORMONS MAY VOTE.

The Right of Suffrage Finally Restored to Ex-Polygamists.

SALT LAKE, Utah, July 20.—The long mooted question, will the polygamous Mormons be permitted to vote, was settled by the Utah commission in the affirmative Tuesday. On June 19, through the secretary of the interior, the commission asked for an official opinion from the attorney general of the United States as to the effect which President Harrison's amnesty proclamation would have upon the right of persons heretofore disfranchised to register and vote, and received a reply to the effect that the attorney general, having no authority to advise the commissioners in the exercise of their duties, declined to render an opinion on the question presented. The commission, therefore, on Tuesday adopted a resolution restoring the right of suffrage to those who have not violated the law since November 1, 1890.

## Handsome Relief Fund Realized.

LONDON, July 20.—The lord mayor's fund for the relief of families who lost members in the Victoria disaster has been closed to contributors, a total of £50,000 having been reached. In his letter of thanks to the donors the lord mayor says that the fund probably will relieve all sufferers besides suffering for a trust fund to be used in case of a similar disaster in the future.

## CRASH AT MILWAUKEE.

Collapse of the Commercial Bank with Assets of \$1,700,000 and Liabilities of \$1,500,000.

MILWAUKEE, Wis., July 22.—The Commercial bank has made a voluntary assignment. The assignee named in the papers filed is A. B. Geilfuss, the cashier of the bank, and his bond is placed at \$1,700,000. The entire fund of Milwaukee county, amounting to \$310,624, was deposited in the Commercial bank. Another big depositor was the newly-organized Milwaukee Electric Railway company, to the extent of \$200,000. The last statement of the bank showed demand deposits amounting to \$557,748 and time deposits \$528,919. The bank had a capital of \$350,000.

The liabilities of the bank are estimated at about \$1,500,000 and the assets at about \$1,700,000.

The assignment is due in a great measure to the bank's inability to collect on outstanding paper, of which it held \$419,000 worth, due from prominent Milwaukee firms, but principally, it is said, from the Schleisinger syndicate. This money, although the notes are from sixty to ninety days overdue, the bank was unable to collect. It is not believed that this failure will have any effect on any other banks in the city, and there are no runs being made.

The failure of the Sharpville and Douglas furnaces at Sharpville, Pa., was a bad blow for the bank. It holds \$130,000 in storage and warrants, which were made worthless for the time being at least by a sheriff's attachment on the pigiron. It is said that if the bank can get this pigiron, it will be able to straighten out its affairs in a short time.

The news of the failure caused a sensation in the courthouse, as it is in this bank that the county funds were deposited. The county has some \$300,000 to its credit there, and the county treasurer was unable to pay county orders, not having any cash on hand. The county is secured by bondsmen, who signed for the bank, but it may be that these bondsmen will prove insolvent at the rate things are moving at present.

Henry M. Benjamin, one of the largest wood and coal dealers in this city, confessed judgment for \$78,304 in favor of his wife, Matilda Benjamin. The total liabilities amount to about \$243,000. It is claimed that if the Commercial bank could have sustained itself the present condition of Benjamin's affairs would not have been made necessary.

## AN ILLINOIS TRAGEDY.

Richard Shoemaker Kills George and Richard Lukens, Wounds Their Father and Commits Suicide—Cause of His Awful Deed.

METROPOLIS, Ill., July 22.—Three men lie dead in this city and three homes are made desolate by the act of one of the three dead men. Friday evening about 6:30 o'clock Richard Shoemaker, after repeatedly passing the home of Richard Lukens, Jr., halted at the gate and, drawing two revolvers from his pockets, opened fire on the Lukens brothers—George and Richard—who were in the yard. First saying to George: "Take back what you have said about me," he sent a ball crashing into his brain. Richard, seeing his brother fall, turned and ran toward his house, but before he reached shelter the spiteful crash of the revolver rang out and the shot penetrated the young man's head, bringing him to the earth with his babe in his arms. The father of the dying boys coming up received a shot in the thigh. Shoemaker then turned and sent a bullet into Richard's heart and another into the quivering body. He then turned and walked away, but, escape being impossible, after walking a couple of blocks he sat down and shot himself in the abdomen, producing instant death.

The trouble grew out of an estate of Mrs. Richard Lukens, Jr., Shoemaker being her stepfather and guardian. Suit in court and inability to pay Mrs. Lukens the money due her—several thousand dollars—made him morose and bitter against the Lukens boys, two peaceable, inoffensive young carpenters and builders. Recently a piano in Mrs. Lukens' possession was sold by Shoemaker and on its removal some warm words and threats were exchanged.

Shoemaker had been preparing himself all day. He showed a bag of cartridges during the evening and asked if they would kill a man. Both the Lukens boys were carpenters and contractors, inoffensive young men and without another enemy than the man who foully murdered them. Had Shoemaker not killed himself he would have been mobbed within the hour.

## KILLED BY OUTLAWS.

Virginia Desperadoes Prove Too Strong for the Militia.

PIKEVILLE, Ky., July 22.—Information has been received at this city of a bloody fight in Wise county, Va., last Wednesday. For several months past the Virginia authorities have wanted the Flemmons boys very badly. The boys, four in number, are accused of participating in a triple murder some months ago. Doc Taylor, one of the gang, was captured and hanged for the crime, but the Flemmons boys have so far evaded arrest. Two weeks or more ago the governor of Virginia sent a company of sixty soldiers to assist the sheriff of Wise county in arresting the outlaws. On Wednesday the militia overtook the outlaws and a battle occurred. Four soldiers were killed and six mortally wounded.

## WILL AID THE BANKS.

Comptroller Eckels Will Do All in His Power to Help Embarrassed But Reputable Banks to Resume—The Flurry in Denver About Over.

WASHINGTON, July 21.—Comptroller Eckels has sent a dispatch to Bank Examiner Adams at Denver in which he said, in effect, that he would give every possible aid to the banks of that city, and would grant to them sufficient time to enable them to not only collect such amounts as are speedily collectable, but to get together such amounts of money as will enable them to open upon a small basis. The comptroller also said:

"It seems to me that such citizens as have, by a foolish course of conduct in withdrawing deposits from banks which so long enjoyed their complete confidence, brought about this condition, ought, in view of the damage they have done their city, as quickly as possible to repair it by standing ready to deposit with them."

Referring to his action the comptroller said the failures in Denver, like a number of other national bank failures, were caused by no fault of the bank officials, but through a foolish and uncalled-for lack of confidence on the part of depositors. He continued:

"It is my intention where a bank has been properly conducted and whose assets under ordinary circumstances would have permitted it to remain solvent, to give the institution every opportunity to resume business. All the Denver banks that failed were well conducted, and every opportunity will be given them to reopen. The people who have caused the Denver disaster by foolish runs should do all they can to help the banks resume."

"What is true regarding Denver applies with equal force to banks in other portions of the west where suspension has not resulted from reckless investments or bad management on the part of officers. Wherever the citizens of a place have precipitated trouble by instituting a run upon long-established and well-conducted institutions it is not just that they should take hold and assist these banks by redepositing with them, thus placing them in a position to resume their business on a sound financial basis. Wherever possible and advisable the most trusted employees of suspended banking institutions are to be retained by the bank examiners in the interests of the creditors and stockholders, so that every possible means of realizing on the assets of the institution may be accomplished. Instructions to the examiners, however, are to the effect that only in cases of reputable, long-established banks are these conditions to be imposed, and no wild-cat institutions or methods will be sanctioned by this office."

DENVER, Col., July 21.—There will be no more bank failures in Denver. The panic wore itself out Wednesday with the failure of the People's, German and State national banks. This morning when the First, the Colorado, Denver, City and American nationals opened their doors there was hardly a dozen depositors in all of them at the paying teller's window. In the First and the Colorado nationals a long string of depositors reaching nearly to the street were lined up in front of the receiving teller's windows, and the money was going back into the bank vaults almost as rapidly as it was withdrawn during the past three days. The German, State and People's nationals could pay \$1 for \$1 if they could realize on securities.

Bank Examiner Adams has received a dispatch from Comptroller Eckels which has gone far toward restoring confidence.

The officers of the several closed banks all notify the public that they will be able to pay every cent due to customers. But in some cases it will take time to realize on securities. It is learned that heavy withdrawals have been made from several of the banks during the last few months, which would indicate that some of the far-seeing ones anticipated the trouble. It is noticeable that very few of the merchants or business men of the city withdrew their deposits, the runs being made principally by the working people and poorer classes of customers.

There may be a few commercial failures in the city within the next few days as a result of the suspension of banks, but it is believed that in no instance, whether a banking or commercial house, will the failure be complete. A resumption of business will surely follow shortly. It is stated that the McNamara dry goods house, which failed Monday for \$260,000, have settled with their principal creditors and will resume business Monday.

The Flanders dry goods house, occupying premises of five store fronts and five stories high on Sixteenth street, was attached by H. F. Bradley, of Boulder, Col., for \$24,000. There is no definite statement of the condition of the firm yet available. Competent judges place the assets at \$200,000—with liabilities at \$125,000. The failure was caused by the suspension of the People's national bank, to which \$25,000 was due.

The Union bank of Greeley has closed, with liabilities of \$100,000 and assets of \$90,000. The Greeley national bank also suspended, but has made no statement. The failures are attributed to the Denver troubles. The Bank of Loveland, at Loveland, Col., has closed its doors, having been caught by the general depression. President Benson, of the bank, assures depositors they will be paid in full.

Word has reached here that the First national banks at Canon City and Grand Junction, in this state, failed to open their doors. There are as yet no particulars, but probably the failures were caused by the suspension of Denver banks.

The banking house of J. B. Wheeler & Co. at Colorado City and Manitou, whose branch at Aspen closed Wednesday, failed to open their doors Thursday. All depositors were paid in full, and the hotels are cashing all checks on the bank.

## LED BY WOMEN.

A Mob of Striking Miners and Their Wives Attack Non-Unionists at Weir City, Kan.—A Fight in Which Four Persons, One a Woman, Are Wounded.

KANSAS CITY, Mo., July 21.—Four striking miners were wounded in an attack on the new men brought in by the operators at Weir City, Kan., Thursday afternoon. They are Henry John Herring and a boy, A. French—Indian woman who was cheering the men on was also struck by a stray bullet. Adj. Gen. Artz has ordered two companies of militia from Topeka and Wichita to the scene. The operators are making every effort to resist the men, who, aided by their women, are organizing to keep out the 1,000 negroes on their way to Weir City from Alabama. The difficulty originated in this way:

Just before noon a band of 500 strikers, headed by 100 women who had been marching to the various strip pits, reached Clements' pit and sent in a committee to persuade the miners working there to quit. This they refused to do and when the committee reported the entire body of marchers moved on the works to force the men out. The strip men were ready for them, and when they passed the trespass line they were fired upon and a general battle followed, in which Winchester rifles, pistols and clubs were used. Over 100 shots were fired but nobody was killed. One man was wounded in the forehead, another in the leg, a boy in the foot and one of the women got a bullet through her arm. None of the wounds are fatal and it is believed that none of them are dangerous. A number on both sides were badly beaten up with clubs and clubbed guns. The wounded were quickly removed by their friends and their names have not been learned.

As a result of the battle the men in the strip were routed by the strikers and were forced to flee for their lives, pursued by the howling mob, which would have lynched them had they been caught. The owner of the strip, Clements, his son and a man named Big Dick Reed are said to be the ones who did the shooting, and they have given themselves up and were run out of the county for safe keeping. The excitement was intense after the shooting and it was feared that matters would become worse, but a prominent striker, George R. Fulton, made the crowd a speech, in which he advised them to keep cool and counseled peace. It is rumored that a large number of firearms have been received here. The excitement continues at a high pitch and further bloodshed now seems inevitable.

The fight was one of the fiercest in the annals of mob attacks. The crowd of 500 that surged through the main street of Weir City was half made up of women and children. Inasmuch as nearly all the women are of foreign extraction they presented a strange appearance. One-third were French, and they shouted cries of encouragement in that language. The German women of the party each carried a small black flag, and at the head of the entire mob were two American flags that had been made in one of the miner's cabins. The women led. Some of them had their children with them and the little ones carried flags. The men were armed with guns and every woman had a stout stick. The rioters pushed forward to the granite pits, where the French women called upon the non-union men to get out. They refused, whereupon the women pushed down upon them and with their sticks beat the miners right and left. Several of them were severely hurt before they could get out of the way. When the women had any opportunity they grasped the men by the hair and almost scalped them.

## ALMOST WIPED OUT.

Great Damage Done by Fire to the Village of Ewen, Mich.

ISHPEMING, Mich., July 21.—The village of Ewen, 85 miles west of Ishpeming, on the main line of the Duluth, South Shore & Atlantic railway, was almost wiped out by fire Thursday afternoon. The fire started at 1:30 p. m. and no one seems to know its origin. The town is only four years old, being built on land thrown open to settlement in 1889. It was the largest town in Ontonagon county and had a population of 2,000. The business blocks were of wood and the fire speedily grew beyond the control of the local fire department. The railroad depot, containing the only telegraph office, was one of the first buildings to be burned, and all communication was cut off from 2:15 p. m. till late at night, when a temporary wire was patched up. Every business house but two was burned and a number of residences were destroyed. The loss is variously estimated at from \$150,000 to \$250,000. The insurance is light and in most cases there is none, as rates were considered too high. The plant of the Ontonagon River Lumber company was saved with great difficulty. The town has waterworks, but the hose could not be used. Several persons were injured and it is reported that one woman is missing.

## Railroad Man Murders His Wife.

INDEPENDENCE, Ia., July 21.—Martin May, section boss on the Great Western road, shot and killed his wife about 2 o'clock Thursday afternoon. May lives at Aurora, a small village 16 miles north of here. He was arrested. Family trouble is supposed to be the cause.

OWES OVER A MILLION.

Charles W. DePauw, One of Indiana's Wealthiest Residents, Forced to Assign Two More Milwaukee Banks Fail—Southwestern Institutions Suspended.

INDIANAPOLIS, Ind., July 24.—Charles W. DePauw, one of the greatest capitalists in Indiana, with heavy eastern and western interests, assigned at New Albany, Ind., Saturday afternoon. Mr. DePauw's individual assignment is a sweeping one, and the man who was worth \$1,000,000 three months ago is now practically penniless. The debts for which Mr. DePauw became liable for the New Albany rail mills and the Premier steel works amount to about \$800,000. Of these over \$500,000 worth are indorsements for the Premier steel works and the remainder for the New Albany rail mill. The value of these two plants and stocks on hands in ordinary times might be placed at \$2,000,000, the Premier works being worth \$1,500,000 and the other mill \$500,000.

The New Albany rail mill also filed an assignment. The failure was not a surprise, as it has been expected in New Albany for some time—indeed, ever since the collapse of the Premier steel works at Indianapolis. It is estimated that the assets of the rail mill will aggregate \$400,000, while the liabilities are not more than \$350,000. The assignment was brought about by the tight money market and the embarrassed condition of Mr. DePauw growing out of the Indianapolis failure. Mr. DePauw is a son of the late W. C. DePauw, who was at the time of his death the wealthiest man in this part of the country.

The Union Trust company of Indianapolis, recently organized, was made assignee of the New Albany Rail Mill company and of Charles DePauw individually.

MILWAUKEE, July 24.—Two more banks have failed and there are extensive runs on all the leading banks of the city, especially the German-American and Merchants' Exchange. The Milwaukee national bank did not open its doors and the South Side savings bank suspended on Saturday. The Milwaukee national, of which C. J. Bradley is president, had a capital of \$250,000 and was considered one of the soundest institutions in the city. Its failure has created much surprise. Its liabilities and assets are about equal, viz.: \$1,100,000.

There was considerable of a run on the South Side savings bank during the day in June, at which time a large number of savings depositors gave notice of the proposed withdrawal of their money at the end of thirty days. It is thought that this, together with the tying up of a large amount of money in land speculations—good investments but not now available—was the cause of the suspension. The liabilities are \$1,153,955.

The news of the trouble in these two institutions, together with the failure of the Commercial bank and H. M. Benjamin Friday, started runs on a number of the other banks. Crowds soon gathered in front of the German-American, Merchants' Exchange and Second Ward banks, but by noon the excitement had in a measure subsided and a general feeling of confidence in the security of the three places of deposit prevailed.

DENVER, Col., July 24.—On petition of the General Electric company Judge Hallett in the United States court has appointed E. B. Shattuck, of Pueblo, receiver for the Pueblo City Railway company and the International Trust company. The liabilities of the company are placed at \$700,000.

LOUISVILLE, Ky., July 24.—The Kentucky national bank of this city has closed its doors. The capital stock is \$1,000,000 paid up. The bank is also a government depository, and its last statement showed \$190,000 to the credit of the government. The loans and discounts outstanding amounted to \$1,719,966.50 and the surplus was \$108,500.

**GEN. VANDEVER DEAD.**

He Had Represented Both Iowa and California in Congress.

VENTURA, Cal., July 24.—Gen. William Vandever died at his residence in this city of heart disease Sunday afternoon, aged 76. He was elected to congress from Iowa in 1858 and reelected in 1860. He resigned his seat and took charge of the Ninth Iowa volunteers; was promoted to brigadier general in 1862 and afterward brevetted major-general. He commanded divisions in the Thirteenth, Fourteenth and Sixteenth army corps. He was an efficient soldier until the close of the war. He served several years as inspector of Indian affairs under President Grant. He came to California in 1884. He represented the Sixth congressional district in the Fiftyeth and Fifty-first congresses. He had filled many offices of trust.

**WIPED OUT THE FAMILY.**

A Texarkana Editor Murders His Wife and Three Children and Commits Suicide.

TEXARKANA, Ark., July 24.—Allen Jones, formerly editor of an afternoon paper here, murdered his wife and three children, aged 1, 3 and 6 years, and then completed his bloody work by taking his own life. Jones crushed the skulls of his wife and children as they slept. After hiding the bloody ax and removing his clothing he tied one end of a rope to a rafter, the other to his neck and swung off into space. The cause of the tragedy is a mystery, as Jones' domestic relations were pleasant.

IN THE LATEST STYLE.

Hanging and Burning Seems to Be the Popular Method with Southern Lynchers for Disposing of Murderers and Ravishers—Such Was the Fate Meted Out to Lee Walker by a Tennessee Mob.

MEMPHIS, Tenn., July 24.—Lee Walker, the negro who assaulted Miss Mollie McCadden and four colored girls last week, was lynched by a mob a few minutes after midnight Saturday night. The attack on the jail was begun at 10 o'clock and the mob hammered the great steel doors two hours before an entrance was effected. At 12:15 o'clock the door to Walker's cell was smashed with a battering ram and, with a yell, the crowd seized the negro and dragged him to a telegraph pole 100 yards north of the jail, where he was strung up.

Walker was more dead than alive when launched into space. The door of his cell had scarcely been forced open when the mob commenced hammering him with guns and clubs. His arms were broken, his jaw crushed and his body mutilated. When the telegraph pole was reached the rope was thrown over a cross-arm and the body jerked 10 feet in the air by willing hands. The mob was composed of several thousand men. Scores of negroes participated in the lynching, the blacks being more enraged than the whites because Walker had assaulted four negro girls. No masks were worn.

The mob was not content with hanging and mutilating the body of the negro. Scarcely had the pulse ceased to beat when some one yelled: "Burn the wretch!" and instantly the cry was echoed from a thousand throats. A huge bonfire was built in the street and the body cut down and dumped into the flames. The ghastly sight caused many to groan and protest, but the leaders of the mob were determined to cremate the body and could not be persuaded to desist. They seemed to have lost their reason and acted like madmen.

Walker made a full confession and related his revolting story to the prosecuting attorney with the utmost coolness. He did not realize the enormity of his crime and when asked what he supposed his fate would be replied that he would probably be fined \$400 and sent to the penitentiary for four or five years.

**MR. CLEVELAND'S POLICY.**

Absolute and Unqualified Repeal of the Sherman Law and Reform of the Tariff.

NEW YORK, July 24.—The World announces, on what it declares to be authority, the immediate policy of President Cleveland and his administration in regard to the approaching special session of congress. Briefly it is as follows:

1. Silver reform by the absolute and unqualified repeal of the Sherman law.
2. Tariff reform to be prosecuted in accordance with the pledges of the party as soon as, but not before, the finances of the country are upon a stable basis.

The World's article continues:

"Mr. Cleveland is annoyed and exasperated at the unexpected interference with his tariff reform plans, but he is not discouraged. He proposes to meet the 'silver' question in the same open, straightforward manner that has characterized his handling of tariff matters. President Cleveland's advice to the coming special session of congress will be for the repeal of the Sherman silver law. He believes that any complication of this issue with amendments, substitutes or similar propositions will be detrimental to the purposes of the repealing act, which is not so much for the purpose of working any instant change in the financial system of the country as for the restoration of business confidence throughout the land. From the information at his command Mr. Cleveland has no doubt that his policy will be adopted by the house of representatives after discussion and consideration. It is in the senate that the trouble will come. What will follow repeal is a matter that will not be injected into the present fight if the administration has its way. That further financial legislation will be needed the president considers probable, but what its nature shall be is a matter for future determination. The first thing to be done is to clear the ground. When that is done the question of construction can be considered upon an intelligent basis."

**CONCEDES BUT HALF.**

Siam's Answer to France Unsatisfactory—War Almost Certain.

PARIS, July 24.—France has technical ly declared war against Siam. The latter's reply received to the French ultimatum was not satisfactory; that is to say, it did not accept every condition imposed unreservedly. Therefore French Minister Pavie has withdrawn on board the Forfait, and the blockade of Siam has begun. It is a question of a day or two whether there will be war. Much depends on the attitude of England. Its interference has already precipitated the action of the French government. If it continues to back up Siam the consequences will be of the gravest character for itself, for France and for Europe. France will give notice to the powers before bombarding Bangkok, which is the next step that may be expected.

In Siam's reply it is shown that the demands of France are deemed to be too heavy but half of the indemnity asked and half of the territory sought are granted.

**THOUSANDS ARE IDLE.**

Hundreds of Unemployed Miners and Railroad Men Arrive at St. Paul Daily.

ST. PAUL, Minn., July 24.—It is estimated that 3,000 to 4,000 idle men are here and hundreds more are arriving daily. Many are from railroads and mining regions. Many are well educated persons. The few Michigan mines still running intend lowering wages greatly. The men say they will then quit. This will add from 5,000 to 6,000 more unemployed to the 4,000 in Michigan who have already quit.

**Sustain the Sinking System.**

This common sense injunction is too often unheeded. Business anxieties, overwork, exposure must and do cause mental and physical exhaustion, which lessens vigor and tells injuriously upon the system. It is, besides, a preventive of malarial and rheumatic ailments.

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 50c and \$1 bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

Livingston Herald: "A local physician says that he believes decomposed fruit to be responsible for a very large portion of the sickness in the hot season. The food elements which in healthy fruit are very helpful and nourishing become most injurious when partially decayed. Children are particularly apt to indulge in this kind of fruit without proper discretion and many of the ills of the little ones are directly traceable to this source of evil."

Manchester Enterprise: "Frank Lerg, who resided about three miles south of the village, fell and broke his neck Tuesday evening about 7:30. He was riding in a buggy with his son Joe, having been at work in the field, and was leading a cow. The animal shied and pulled him backwards out of the buggy, the fall breaking his neck. He was 76 years of age and was formerly a resident of Bridgewater. The funeral was held from St. Francis church in Freedom."

Ann Arbor Register: "K. D. Perry, of Lodi, has some tall corn on his farm, ten acres of it, and if any man has taller corn let him stand up immediately and proclaim it and not wait for a six weeks growth to be added on before saying any thing. Mr. Perry's cousin, Mr. L. S. Palmerton of Fowlerville came driving across the country and saw nothing equal to said cornfield. Therefore he went out and cut a fair average stalk off just below the aerial root and brought it in to the Register office. There were ten whole feet of length all there; and two prosperous looking ears of corn adorned the lower waist region with pendulous promises of prospective plenty."

The State Republican says: The comet can now be seen in the early morning hours between 1:30 and 2:30 o'clock the aerial body of fire will be directly beneath the Polar star, due north. It will be very low down, and with the aid of an ordinary pair of opera glasses, anyone may secure a good view of it. The comet was discovered by an amateur in Salt Lake City last Saturday night. It is beautiful in appearance and brilliant beyond imagination. It seems to travel rapidly in a circle, never moving a great distance away from the Polar star. It is the size of a star of second magnitude. It has two long tails, which resemble streaks of fire. It is about ten minutes in the diameter, fifty degrees, due north, and right ascension eight hours and thirty minutes. A better view of the comet may be had in the west than in the south or east. At the most favorable times only two degrees of the tail can be seen in New York while in the West the comet is visible to the naked eye. A simple method of locating the comet is to let the eye follow an imaginary line drawn through the handle and lower corner star of the big dipper.

#### Too Much For Him.

A tramp struck one of our business men for a small loan the other day, and b. m. sized him up as an experimenter.

"I've got a job for you," he said persuasively.

"What to do?"

"Nothing."

"Git pay for it?"

"Certainly."

"Is there much of it to do?"

"Twenty-four hours a day."

The tramp began to study up the proposition.

"Do I get a rest on Sunday?" he asked after a moment's thought.

"It's seven days in the week," explained the b. m.

"Guess I don't want it," and his trampship moved off.

#### The Finger Nails.

There is a common belief that the finger nails are poisonous, which idea is natural enough considering the fact that scratches made by them are generally quite irritable and much inclined to unusual inflammation. The reasoning is erroneous, however, for, as is known, the nails themselves do not have any poisonous properties. The trouble excited by them is due to the foreign deposits under them. In other words, if one keeps his finger nails clean, scratches caused by them will be no more irritable than those produced by any like instrument that is considered innocent.
