Wedding Bells.

One of the prettiest weddings of the season was that of Mr. Anthony Neckel and Miss Margaret Keusch, both well-known, and highly esteemed young people of Chelsea.

The beautiful ceremony was performed in St. Mary's church, by the Rev. W. P. Considine, in the presence of a large congregation, on Tuesday, June 11, 1895, at 9 a. m.

The altars and church were beautifully decorated. The day was an ideal June day, and the singing by the choir was excellent.

As the bridal party entered the church De Koven's charming ballad, "O Promise Me," was sung in fine style by the ladies of the choir.

The bride, arrayed in a beautiful gown of cream colored silk, and carrying a bunch of Marguerites, entered the church on the arm of her cousin, Mr. George Staffan. The attendants were Messrs. George Staffan, Edward McKone, Anthony Agley, Gustave Ruppe, and the Misses, Anna Neckel, Ida Keusch, Varina Beissel and Katharine Staffan.

A nuptial high mass with the bestowal of the beautiful benediction of the church was celebrated.

At the conclusion of the ceremony the bridal party repaired to the residence of the bride's parents, Mr. and Mrs. Phillip Keusch, where an elegant wedding breakfast was served.

In the evening a large reception was held at the residence of Mr. Keusch. The grounds were illuminated, and the house was fragrant with the aroma of choice flowers. The wedding presents were numerous and beautiful. Mr. and Mrs. Neckel have the hearty good wishes of many friends for a happy wedded career.

Badly Hurt.

Geo. Webster, our well-known merchant tailor and member of the K. O. T. M. band, who was quite badly injured by an unmanageable horse at Jackson, Tuesday forenoon, was brought home on a stretcher Tuesday evening, and at present writing is resting quite easy.

We clip the following account of the accident from The Jackson Daily Citizen, of June 11.: "J. George Webster, trombone player in the Chelsea K. O. T. M. band, lies suffering at room 11, Hotel Ruhl, as a result of injuries received this morning.

The Maccabees from Chelsea had alighted from their special train and had formed in line on E. Main street preparatory to marching to Maccabee hall. The band of which Mr. Webster is a member, was stationed at the head of the column, and had just begun a quickstep, when a horse attached to a canopy top phaeton, in which were two women, became unmanageable and dashed through the band from the rear. The musicians did not hear the approaching steed until he was right on them, rearing and jumping about.

The members of the organization managed to escape injury except two, Mr. Webster and a companion. The former was knocked down and run over by the horse. He was picked up and carried into the Hotel Ruhl where he was attended by Dr. W. B. Watts and a physician from Chelsea who chanced to be among the excursionists. The doctors found no bones broken, but the man's back and legs were severely bruised.

Dr. Watts stated Mr. Webster, though quite painfully hurt, was not seriously injured.

Another musician was knocked down by the horse, but escaped injury. It was stated the horse causing the accident belonged and was driven by a lady named Monagan."

Notice.

After June 13, the American Woman's Canning Process and Preservative, may be had by those holding certificates, of Beissel & Staffan, distributing agents for Chelsea. J. D. ROCKWELL & Co.

Dolls.

She sports a witching gown
With a ruffle up and down
On the skirt.
She is gentle, she is shy.
But there's mischief in her eye;
She's a flirt.

She displays a tiny glove
And a dainty little shoe
Of a shoe.
And she wears her hat a-till
Over bangs that never wilt
In the dew.

'Tis rumored chocolate creams
Are the fabric of her dreams—
But enough!
I know beyond a doubt
That she carries them about
In her muff.

With her dimples and her curls
She exasperates the girls
Past belief;
They hint that she's a cat,
And delightful things like that,
In their grief.

It is shocking, I declare!

Nervous Prostration

Is due to impure and impoverished blood. The true way to cure, is to purify the blood. Read this:

"My wife was troubled with palpitation of the heart, numbness, dizziness and general nervous prostration. Our home physicians failed to give her relief. Then she decided to try Hood's Sarsaparilla. After taking a half dozen bottles, we saw a decided improvement. She has now taken eighteen bottles and feels the best she has been for years. She looks so much better that people wonder at her improvement." O. G. HARRIS, Cedar Creek, Indiana.

Paper stockings are the latest invention of the day, but Jerry Simpson has a scheme to beat them hollow for cheapness and durability.

Minnie Steinbach, Misses Emma and Elizabeth Cowan, Miss Mary Bell and Miss Dorothy Sturgeon of Ann Arbor, spent Sunday in Lima and Chelsea.

Wednesday morning, while at work in the crating department at the Glazier stove factory, Geo. Wackenhut had the misfortune to break the little finger of his right hand.

Died, at her home near North Lake, Monday, July 10, 1895, Mrs. A. Johnson, aged 26 years. The funeral was held from the Congregational church Wednesday forenoon.

Died, at her home on South Main street, Friday, June 7, 1895, Mrs. C. E. Chandler, aged about 52 years. The funeral took place from the house Monday, Rev. Wm. H. Walker officiating.

Died, at his home on West Middle street Sunday June 9, 1895, Mr. Joseph Beach, aged about 64 years. The funeral was held Tuesday afternoon from the house, Rev. C. L. Adams officiating.

The ladies of St. Mary's parish will hold their first ice-cream social at the Town Hall next Saturday, evening June 15. Cream and refreshments will be served from six to eleven, and we can assure all of a good time.

The pulpit of the Congregational church will be filled next Sunday by Rev. Bastian Smits, of Ypsilanti, on exchange with the pastor, Rev. Mr. Walker, who is in Olivet this week, attending the meeting of the State Congregational Association.

The social given by the ladies of St. Paul's parish at the pleasant home of Mr. and Mrs. Geo. Wackenhut, last Tuesday evening, was a very pleasant affair, and afforded many the opportunity of a hand shake and a few words with their former pastor, Rev. C. Haag, who was present.

Childrens day exercises formed the prominent feature of last Sunday's services at several of the churches in Chelsea, and attracted far more than the usual degree of interest which attaches to this important event in the lives of the little folks, from the fact that the programs were more elaborate and better calculated to please than were those of previous years.

Philip Keusch has a hand saw that money cannot buy. Twenty-nine years ago Mr. Keusch helped to build the brick house which B. Hawly recently vacated on Railroad street, and while at work there lost his saw, but supposed someone had taken it. Last week when the Glazier Stove Company had the building demolished to make room for their factory, the workmen found the saw in the cornish and returned it to Mr. Keusch.

Mrs. C. E. Chandler.

The funeral of Mrs. C. E. Chandler occurred last Monday at her late residence. Mrs. Chandler died last Sunday morning at four o'clock, after an illness of some weeks. Her home had been in Chelsea for the last seventeen years, and she had many friends who unite with her bereaved family in their grief at her loss.

She was born in Alstead, N. H., Oct. 30, 1842, and was married in her sixteenth year to the husband who survives her. Her maiden name was Elwell. She leaves two daughters, Mrs. Timothy Drislane and Mrs. Frank Storms, of this place, and her parents still live in New-Hampshire. She lost a son in infancy, and a daughter, Gertrude, nearly three years ago.

Mrs. Chandler was brought up in the Universalist church, and was active in church work in her earlier years. Though she never united with any church, her character was marked by rare Christian graces, and the depth and reality of her Christian faith were evident to all who knew her.

Miss Mollie Monks.

A death which brought sadness, not only to the immediate family, but to many friends, and was more than ordinarily pathetic, was that of Miss Mollie Monks, of Pinckney, which took place at 2 p. m. on Friday, June 7, 1895.

Miss Monks had been ill for some time, but with her high hopes and ambition, and so much to live for, she steadily fought the coming of the Messenger of God. But it was of no avail. She was a devout member of the Catholic church, and quietly prepared by a worthy reception of the last sacraments for her meeting with God. She was perfectly conscious to the last, and though she endured agonizing pain, she departed to the better land full of faith and hope and charity.

Miss Monks was a pupil in music of Professor Kempf, of Ann Arbor, for many years. Under his able direction she became a most accomplished pianist. Her heart and soul were in music, and being a true artist, devoted to her art, she was destined to make a more than ordinary name in her profession. She had recently been appointed organist of St. Mary's church, Pinckney, but was able to play but a few times, when death put his hand upon her. She had an exquisite perception in the interpretation of music, and was strikingly original.

Her funeral was held from St. Mary's church, Pinckney, on Monday, June 10, 1895, at 10 o'clock, and was largely attended. The high mass of Requiem was sung by her pastor, the Rev. William P. Considine, who preached an admirable sermon, that touched all present. Beautiful floral offerings evidenced the esteem in which she was held.

The sacred remains were tenderly laid away in St. Mary's cemetery. Her grief stricken parents and sister have the tenderest and deepest sympathy of the entire community.

Let us pray that she, who loved music so well on earth, may be now a member of the eternal choir in the kingdom of Heaven.

The sweet and exquisite words of the poet come to mind on a death like this.

'Tis not forever we say farewell.
Child of our heart so pure, so fair!
We will kiss the lips we have loved so well,
And play with the rings of the soft brown hair;
For I know when my soul in the silence waits
The wonderful kingdom of God to see,
Down like a star through the beautiful gates
My dear blessed Mollie will come to me.

La Grippe.

During the prevalence of the Grippe the past seasons it was a noticeable fact that those who depended upon Dr. King's New Discovery, not only had a speedy recovery, but escaped all of the troublesome after effects of the malady. This remedy seems to have a peculiar power in effecting rapid cures not only in cases of La Grippe, but in all Diseases of Throat, Chest and Lungs, and has cured cases of Asthma and Hay Fever of long standing. Try it and be convinced. It won't disappoint. Free Trial Bottles at F. P. Glazier & Co's Drug Store.

Hay Fever and Summer Colds are promptly prevented or cured by Dr. Humphreys' Specific "77". For sale by all druggists.

The question often comes up, how fast is a bicycle going? If the rider revolves his pedals once in a second you may be sure that he is riding faster than eight miles an hour. If his bicycle is geared at 60, one revolution a second will carry him 10 1/2 miles an hour; if at 63, his speed is half a mile faster; at 65 it is 12 1/2 miles; at 72 it is almost 18 1/2. One revolution a second is, therefore, faster than the rider of a 60 gear can legally travel. It will be advisable for riders to test these figures for themselves and then they they will no longer be under a false impression as to whether spectators know or do not know how fast they are riding.

Mr. Peter Pergau of Unadilla died suddenly from heart failure Saturday June 8, 1895, at ten a. m. Mr. Pergau recently came to Unadilla from Detroit, having exchanged city property for the farm on which he died. He was a sober, industrious man. His sudden death was a very sad one, for he leaves a widow and seven children to mourn his loss. He was a member of St. Mary's church, Chelsea. The remains were taken to Detroit for burial.

The candle power of a light may be approximately calculated by comparing the shadow cast by a rod in the light of a standard candle, with the shadow cast by the light to be tested. By moving the latter toward or away from the rod, a point will be reached at which the shadow cast by both lights will be of the same intensity. The intensities of the two lights are directly proportional to the squares of their distance from the shadows; for example, suppose the light to be tested is three times the distance of the candle its illuminating power is nine times as great.

The value of trees for windbreaks and shelter is great. It has been estimated that if one fourth of the fields devoted to cultivation were planted with trees properly distributed, the other three-fourths would produce as much as the whole, besides the timber and fuel would be clear gain. Trees planted near marshes render them no longer noxious to people living near them. Where the proportion of one-fourth of the land in timber, and the other three-fourths in cultivation, is not maintained, it is only a question of time when the effect will be noticed. The effect upon the climate is of a local character, and this local modification is of great importance.

School Entertainment.

Have you heard about the entertainment that is to be given by the school children Friday evening, June 21st. They have been drilled by Mrs. McKone, who has done such splendid work here in our school in developing the musical talent of the pupils. The first half of the program is to be a miscellaneous one, furnished by the pupils from the 1st to 7th grades. Their songs are bright and pretty and will be rendered in such good style that they will be found very interesting. Little Leora Hancock, who astonishes one with her bird-like whistling and graceful dancing, will be here. Another attractive feature of the evening will be a solo rendered by Ella Gordon, soprano of the Orpheus Quartet, who will also take the part of the Fairy Queen in the "Lalla" Cantata. This cantata will be one of the prettiest operettas ever given here. The Gypsies in their wild and picturesque dance is well worth the price of admission. Be sure and do not miss this treat.

June Crop Report.

The average condition of wheat in the southern counties, June 1, was 66, central 83, northern 87, and State 78. The condition has been reported lower in the southern counties and the State June 1, only once in ten years, viz., in 1888, when the figures for the southern section were 62 and for the State 63.

About 83 per cent of the wheat crop of the State is raised in the southern counties. The average condition, June 1, in this section for ten years has been as follows: 1886, 84; 1887, 79; 1888, 62; 1889, 87; 1890, 76; 1891, 96; 1892, 91; 1893, 77. 1894, 92, 1895, 56.

The average condition for the State has been as follows: 1886, 87; 1887, 82; 1888, 63; 1889, 89, 1890, 79, 1891, 89, 1892, 92; 1893, 79; 1894, 92; 1895, 73.

Wheat only six inches to foot high in head; it is thin on the ground, and throughout the southern counties is being damaged by insects. Correspondents in this section very generally report damage by "Hessian fly," "insects," "midge," etc.

The number of bushels of wheat reported marketed in May is 376,948, as compared with 118,747 reported marketed in May, 1894, and the amount marketed in the ten months, August-May is 10,047,489 bushels, as compared with 13,481,945 bushels in the same months last year.

The acreage planted to corn slightly exceeds, and the acreage sowed to oats fully equals the acreage in average years.

Meadows and pastures are in poor condition. The figures for the southern counties are: 67: central, 76; northern, 85; and State, 71. The certain deficiency in the hay crop will be largely supplied by corn which has been planted for fodder. Clover sowed this year appears to have made some growth, but its general condition is not promising.

Our regular correspondents estimates apples at 47 per cent, and peaches at 68 per cent of an average crop. These low estimates are confirmed by a large number of reports from fruit-specialists. In many localities, however, peaches promise a full crop.

In the southern counties the wages per month of farm hands average \$15.60 with board, and \$21.70 without board, in the central counties, 14.66 with board, and \$23.31 without board; and in the northern counties \$16.04 with board, and \$25.58 without board. The averages for the State are \$15.45 with board, and \$23.31 without board.

Compared with one year ago the wages are lower in each section, but the decline in the southern counties of wages without board is only 29 cents per month.

The farm statistics of 863 townships, collected and returned by supervisors, indicate that the number of sheep now on hand in the State is 16 per cent less than sheared in 1894. There is a loss of 17 per cent in the southern counties, of 13 per cent in the central counties, and of 1 per cent in the northern counties.

Speech Restored.

For five years I suffered with pain and discharge of the throat, hacking cough, frontal headache, weak eyes, etc., at times; could not talk above a whisper; lost weight continually, and not able to be at work. I was treated by the best physicians in the country, but received no relief. After giving up all hope I was recommended to use a bottle of Mayers' Magnetic Catarrh Cure. After using it for four weeks my speech returned. All symptoms of catarrh have disappeared and "I feel like a different person."

Dawn.

The earth awakes with a passionate thrill
From the lay thrall of her winter dreams,
The hawthorn bloom on the opposite hill
Where the shadows slant to the curving streams.

Orioles, swallows and bluebirds throng—
Each heavenly voice that soars and sings,
With a rapturous rush of exulting song,
And a tremulous flutter of glancing wings.

So much more than we know is meant,
So much more than we ask is given,
That our hearts are filled with a sweet content
And our pulses stilled with the peace of Heaven.

The reader of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly on the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

the most delightful country in America, next Summer, to spend your vacation. There is no place in the world like Colorado, with its perfect climate, dry, pure and cool, its snow-capped mountains, its streams full of trout and its glorious scenery, both grand and pastoral. Colorado probably has no equal as a health resort. For the man or woman who has been in the whirl of a busy life, and who needs and longs for a change of air and scene, Colorado is the place. Pure air, pure water and the best of hotel accommodations are the three essentials that will be found there in perfection. On July 5th to 12th, 1895, the meeting of the NATIONAL EDUCATIONAL ASSOCIATION will be held in

DENVER

and the BURLINGTON ROUTE, which is the best line from Chicago and St. Louis to that point, has arranged to sell Excursion Tickets for the occasion, at very low rates. These tickets will be good for return until September 1, and will be sold to anyone applying for them, not merely to members of the Association, so that this opportunity to take a trip to the mountains, at a very low cost, will be open to everyone. Naturally, during this time, low excursion rates will be made from Denver to all of the famous Colorado resorts, such as Estes Park, Colorado Springs, Manitou, The Garden of the Gods, Glenwood Springs, etc. If you would like a circular giving the details of the excursion, rates, routes, train service, write to P. S. EUSTIS, Gen'l Passenger Agent, C. & Q. R. R., Chicago, Ill., but, anyway, make up your mind to go to Colorado

Dying Out.
 Now that chimneys are no longer cleaned by the old method, the organization of chimney sweeps is fast running down. The order of chimney sweeps is a very old one, having been formed over two centuries ago, and nearly one hundred years ago, in the United States, New York was headquarters, and the sweep either had credentials from the society in London or served an apprenticeship in New York. The cry, which is so made that few can tell its meaning, is, "Sweep, sweep. O! I'm a chimney sweep! I'm a New York sweep, O!" If any one made this cry who was not a member of the organization, he was summarily dealt with. The chimney sweeps at one time cleared on an average from \$5 to \$8 a day, and when they were not going their rounds, might be taken for prosperous business men. Changes were made in the construction of flues which materially reduced their income, and the days of the chimney sweep are very nearly over. What work there is, is done by roofers, who hire non-professionals.

Yes, they are passing away! Take a walk through any of the cemeteries throughout the country and you will almost believe that the fools are slowly but surely passing away. You pass the last resting place of a man who blew into an empty gun; the tombstone of him who lighted the fire with kerosene; the grass carpeted mound which covers the remains of the man who took the mule by the tail. The tall monument of the man who didn't know it was loaded overshadows that of the man who jumped from the cars to save a ten rods walk. Side by side lie the ethereal creature who kept her corset laced to the last hole, and the intelligent idiot who rode a bicycle nine miles in ten minutes. Here reposes a doctor who took a dose of his own medicine and the old fool who married a young wife. Right over yonder in the northwest corner the breeze sigh through the weeping willows that bend over the lowly grave of the man who told his mother-in-law she lied. Down there in the potters' field, with his feet sticking out to the cold blasts of winter and the blistering rays of summer sun is stretched the remains of the misguided regulator who tried to lick the editor, while the broken bones of the man who would not pay for his paper are piled up in the corner of the fence. Over by the gate reposes the boy who went swimming on Sunday, and the old woman who kept baking powder side by side with strychnine in the cupboard. The old fool killer gathers them in one by one; and bye and bye we will have quite a decent sort of a world in which to live—Ex.

Worlds Fair Test No. 2.
 This test extended from May 31st to Aug. 28th, both inclusive. The number of cows entered in the test was 75, comprising 25 Jerseys, 25 Guernseys and 25 Short Horns. One of the Short-Horn cows, which had not calved at the beginning of the test, died in calving, and, by the rules according to which these tests were conducted, no provision having been made to substitute another animal, the Short-Horns competed with 24 cows through the entire period of the test.
 This, as well as all other tests conducted at the World's Fair, was under the control of Chief Buchanan of the Agricultural Department, and of the Testing Committee. An analysis of the milk was made daily under the immediate supervision of Prof. E. H. Farrington, of the University of Illinois. The feed was all weighed and the milking was done in the presence of a representative of the Testing Committee. The cream was separated from the milk by cream separators, and the butter was made under the direction and supervision of Prof. S. M. Babcock, of the Wisconsin Experiment Station, a member of the Testing Committee, or, in his absence, under Prof. I. P. Roberts, of Cornell University, another member of the Testing Committee.
 Prof. M. A. Scovell, Chairman of the Testing Committee, had immediate supervision of the records, and also of the books, in which were entered daily the feed given the cows, the quantity of milk and analysis of same, the butter made each day, and all other data relating to the cows and their products that were necessary for an accurate ledger account of the work of each cow in all the herds. These books were kept by accountants furnished by the World's Columbian Exposition, and generally from four to five in number.
 All the butter was upon the basis of 80 per cent oil. The skimmed milk and butter-milk were analyzed each day, as also the butter. An oil test of the milk of each cow and of the mixed milk was made daily, as a check upon the churn, but the churn governed. The basis of decision for merit and awards was in this and all other tests the "net profit" yielded by the cows and herds.
 The same precautions were taken in this as in the other tests to insure accuracy in weighing the milk, and the analysis of the same, in retaining the milk intact under seal when sent from the barn to the dairy, and until taken out in the presence of Prof. Babcock or Roberts, it being retained under their control until churned. The butter was scored by three experts appointed by Chief Buchanan upon the following scale of points: Flavor, 55; grain 25; solidity, 10; color, 10. The prices of butter fixed by Chief Buchanan, based on the average price at the time for a gilt-edge article of butter in the markets of the East and West, were as follows: That scoring from 75 to 80 points 25 cents per pound, 80 to 85 points, 30 cents; 85 to 90 points, 35 cents; 90 to 95 points, 40 cents; and 95 to 100 points, 45 cents.
 This was by far the most important test of all, as it demonstrated the staying qualities of the cows and breeds. No snap verdict could be procured, as may be sometimes achieved in tests of from a week to a month. The cows had to pass through the vicissitudes of climate, and their environment tended to decrease their product.
 The Jerseys, true to the characteristic of the breed, maintained a remarkable steady flow of milk, and achieved a most signal victory in this as in the preceding test for cheese.
 In the 90 days of the test 25 Jerseys gave 79488.8 lbs. of milk and 4274.01 lbs. of butter, of the value of \$1747.37.
 The milk of the Jersey herd exceeded that of the Guernseys by 21707.1 lbs., and that of the Short-Horns by 7225.6 lbs. The quantity of butter of the Jerseys exceeded that of the Guernseys by 913.57 lbs and the Short-Horns by 1838.14 lbs. The solids not fat of the Jerseys exceeded that of the Guernseys by 963.61 lbs., and the Short-Horns by 714.22 lbs. The value of the butter of the Jerseys was \$391.91 in excess of that of the Guernseys, and \$375.60 more than that of the Short-Horns. After deducting the cost of feed given each breed, and leaving out the increase in live weight, the net profit of the Jerseys was \$307.85 over the Guernseys, and \$504.17 over the Short-Horns. By the rules the increase in live weight between the beginning and the ending of the test was valued at 4 1/2 cents per pound, and was credited to the cows and the breeds at that rate. After adding the value of such increase the net profit of the Jerseys is \$326.17 over the Guernseys and \$418.69 over the Short-Horns—or \$3.62 net profit per day per herd, or \$9.14 48-100 per day per cow, over the Guernseys, and \$4.60 per day per herd, and \$9.19 1-6 per day per cow over the Short-Horns (on the basis of 24 cows for the latter.)

The net profit for the 90 days per cow was as follows: Jerseys, \$52.95; Guernseys, \$39.91; Short-Horns (24 cows) \$27.92. The milk required to make one pound of butter was: Jerseys, 17.2 lbs; Guernseys, 18.4 lbs.; Short-Horns, 22.9 lbs. The cost of feed per pound of butter was as follows: Jerseys, 13 75 100 cents; Guernseys, 14 41 100 cents; Short-Horns, 17 86-100 cents. The highest average net profit per day of any Short-Horn cow is 58 cents, which is exceeded by twelve Jerseys; the highest Guernsey is 64 cents, which is exceeded by eight Jerseys. Or, putting it in another way, taking the table given below of the average net profit per cow per day leaving out fractions of cents, it will be seen that there are eight Jerseys of 65 cents net profit per day, or over, and no Guernseys or Short-Horn; twenty-one Jerseys which make a net profit of over 50 cents per day, with six Guernseys and six Short-Horns; and that, with the exception of one Jersey that was sick the greater part of the test, every Jersey cow shows a daily net profit of 43 cents or over while there are but twelve Guernseys and eleven Short-Horns making that profit, the Jerseys thus having more than the Guernseys and Short-Horns combined.
 Inasmuch as all the butter was scored and the value fixed upon the butter was regulated by the scale of points, the price allowed per pound shows the quality of the butter, because that breed which has the highest price for butter scored the highest points; and the records again prove that the Jerseys lead in this respect also, their butter being at a higher average price per pound than that of the other breeds.
 The award to the best breed based upon the greatest net profit, was declared in favor of the Jerseys.
