### THEIR THIRD ANNIVERSARY.

The L. C. B. A. Fittingly Celebrated the Event With Speech, Music and Merriment.

The members of the L. C. B. A. and some of their friends had a very pleasant time Thursday evening when they celebrated the third anniversary of their organization. After the regular meeting had been held, at which three new members were initiated, the social time began. Each member was entitled to bring one friend with her so there was just a comfortable number present. Mrs. J. J. Raftery presided and made the address of welcome. Vocal numbers were rendered by the Misses Conway and Burg, Rev. William P. Consideine made a few felicitous remarks, and Mrs. Frank Carringer read a history of the organization.

Progressive pedro was the principal amusement, a series of ten games being played. Miss Amelia Miller carried off the first prize, winning every game; Mat Hankard took the second prize, and Miss Josephine Fallen was awarded the consolation prize. During the evening bountiful and toothsome refreshments were served and when it came time to go home everybody united in saying that it was a good celebration and a good time.

### OVER FOUR PATIENTS A DAY

Treated at the U. of M. Homeopathic Hospital During the Past Year.

The annual report of the University hospital, homeopathic, shows that 1,612 patients were treated there during the past year. This averages over four new patients a day. The report is an interesting one and reveals the following figures: Total number of clinical cases in hospital, 1,612; number of patients from Michigan, 1,525; number of patients from other states, 87; number of counties represented in Michigan, 77; number of other states represented, 12. Occupations by percentages: Farmers, 15; farm wives, 12; laborers and domestics, 20; mechanics, students and teachers, 15; all others, 38; number of physicians who have visited hospital during year, 231. The 1,612 cases here reported, represented all phases of acute and chronic diseases, both medical and surgical, admissible to a general hospital.

### Miss Wadsworth's Lecture.

Miss Mary A. Wadsworth's lecture on Shakespeare at the M. E. church Friday evening, under the auspices of the Bay View Reading Circle, was a very pleasing one. In spite of the wet weather between 200 and 300 people, mostly ladies, were present. In the course of her lecture Miss Wadsworth paralleled passages of Scripture and passages from Shakespeare as an evidence that Shakespeare was not an irreligious man as some would make out. She pronounced the idea that the plays and sonnets were not the work of Shakespeare, but of Lord Bacon, as being a most ridiculous one and raised quite a laugh by her statement that Shakespeare was worth forty Bacons. It was not until after the lecture, when several of those present were introduced to her, among them several persons named Bacon, that she caught on to why they should smile so. The musical program was well carried out and much enjoyed.

### Resolutions of Respect.

Whereas, a mysterious Providence has since our last meeting removed from our circle the companion of Henry Gorton, therefore;

Resolved, that we extend our heartfelt sympathy to the bereaved husband and sons, and while we bow in submission to the decree of the Divine Ruler we look forward with confident hope to a glad reunion on the celestial shore beyond death's dark rolling river.

Resolved, that a copy of these resolutions be forwarded to the bereaved family and also printed in the Chelsea Herald.

Adopted by the New Orleans Excursionists at their 17th annual reunion held at A. McCloy's, Munith, Mich., Nov. 20, 1901.

### Made Five Wills.

William Tisch, a wealthy farmer of Waterloo township, made five wills within as many months during the year prior to his death. The last of these bequeaths his property entire to his wife. William A. Tisch, Anna M. Fink and Minnie Hughes, children of the deceased, are now contesting the case. A family quarrel had preceded the death of the father, and it is claimed the mother had used her influence to get several of the children cut off in the will.

### OVER HALF A MILLION DOLLARS

Was the Amount Paid by Washtenaw in Taxes for State and County Purposes Last Year.

The official report of the state tax commission for 1900 shows that the total amount of taxes paid in Washtenaw county outside of the national taxes in 1900 was \$548,680.74. This is an average of \$11.49 for every man, woman and child in the county.

The rate of taxation was \$11.11 per \$1,000. Real estate paid 76 per cent of the tax and personal property 24 per cent. The schools cost Washtenaw county about \$2.58 per capita. There are only seven counties in the state that pay more school tax than Washtenaw county.

The tax was divided as follows: State tax \$61,598.61, county tax \$26,000, township tax \$101,180.44, village tax \$13,566.02, city tax \$160,088.22, liquor tax \$88,120, and school tax, including the one mill tax paid into the state treasury, \$123,181.85.

In 1899 the total amount of taxes paid in Washtenaw county outside of the national taxes was \$472,991.77, or an average of about \$10 for every man, woman and child in the county. The rate of taxation per \$1,000 of assessed valuation in 1899 was \$15.07. Real estate paid a little over 85 per cent of the tax and personal property a little over 14 1/2 per cent.

This tax was divided as follows: State tax \$104,516.26, county tax \$27,898.55, township tax \$96,620.75, village taxes \$10,925.93 and city tax \$197,944.28.

The proportion of the tax paid by personal property in 1900 is nearly 10 per cent more than in 1899. In other words the assessing officers increased the valuation of real estate from \$24,750,700 in 1899 to \$26,160,908 in 1900 and the valuation of personal property from \$4,251,573 in 1899 to \$3,261,620 in 1900. There were 13 persons in the county assessed for over \$30,000 of personal property each.

The real estate assessment in Washtenaw was increased \$1,410,208 in 1900 over the preceding year, and the personal property increase was \$4,010,047. Eleven townships showed an increase in real estate valuation and nine showed a decrease.

The personal valuation in 1900 of the various cities and towns and the increase over 1899 was as follows:

	Personal	Increase
Ann Arbor city,	\$3 364 451	\$1 789 678
Ypsilanti city,	1 458 007	847 557

Ypsilanti,	274 550	167 159
Total,	\$8 261 620	\$4 010 047

The increase in the valuation of real estate was as follows: Ann Arbor city \$1,065,995, Ypsilanti city \$117,325, Augusta \$61,033, Bridgewater \$105,000, Freedom \$200, Lima \$2,740, Lodi \$20,200, Manchester \$3,950, Saline \$4,650, Scio \$2,800, Sylvan \$17,250, York \$25,000, Ypsilanti \$38,645, or a total increase in 11 townships of \$281,468.

The townships showing decreases in real estate values were: Ann Arbor \$10,300, Dexter \$15,500, Lyndon \$3,050, Northfield \$1,520, Pittsfield \$900, Salem \$3,350, Sharon \$1,940, Superior \$4,370, Webster \$13,650.

## "WHAR DEW I CUM IN?"

(Being the Soliloquy of a Farmer on the Free Raw Sugar Question.)

Thar's a mighty lot er talkin' about farmers 'n thar rights,  
'N the wonderful prosperity thet beet growin' invites.  
Thar's er heap of foolish crowin' 'n the "beats" begin ter shout  
'N holler fer the Tariff ter keep free raw sugar out!  
But I notis that the beet-producin' farms are very few.  
An' the farmers through the country aint got much of it ter dew.  
The hull land aint a-raisin' beets, 'n aint goin' ter begin.  
Beet growin's right fer sum, I guess—but, whar dew I cum in?

The farmer gits four dollars now fer every ton o' beets—  
A hansum price, I must allow—but hidin' sum deceits.  
Beet sugar manyfacturers admit es they hev found  
Thet "granulated" costs 'em sumthin' like two cents a pound.  
In fact thet leaves a profit on which they'd greatly thrive—  
And—if it kin be sold fer three, why should we pay 'em FIVE?  
It seems ter me es thet's a game thet's mighty like a skin—  
But—if thar's any benefit—waal—whar dew I cum in?

When Uncle Sam's in want o' cash we're glad ter help him out,  
'N we'll stand all the taxes thet are needed, never doubt,  
But when his pocket-book's well lined an' nary cent he lacks,  
Et seems ter me his duty's ter repeal thet sugar tax.  
Them fellers wot is interested sez it's to protect  
The beet-producin' farmer thet the duty they collect,  
But I guess thet explanation es a little bit too thin—  
The sugar maker,—he's all right;—but—whar dew we cum in?

Take off raw sugar duty an' the price will quickly fall,  
To everybody's benefit, fer sugar's used by all.  
The poor will bless the Government thet placed it in thar reach—  
( 'N millions of our citizens free sugar now beseech)  
The dealer 'll be delighted—less expenditure fer him—  
More demand 'n bigger profits—which at present are but slim.  
An' the farmer 'll be as well paid as he ever yet has been—  
But he'll buy his sugar cheaper—thet's whar he an' 'I'll cum in.

Now, whar's the sense er reason of the sugar tax to-day,  
When our treasury's a-bulgin' an' we hev no debts ter pay?  
The duty on raw sugar's Fifty million every year—  
An' the people's got ter pay it—thet's a fact thet's very clear.  
Fifty million! Great Jerusha! Ter protect beet magnates, too,  
Why should they tax ALL the people—just ter help a scattered FEW?  
And the FEW? Beet-sugar MAKERS! Don't it really seem a sin  
Thus ter help an' fill thar coffers? Whar dew you an' I cum in?

The farmer growin' beets hev got a contract price fer years,—  
Free raw sugar wouldn't hurt him, an' of it he has no fears,  
But mebbe, like myself—he's also growing fruit so nice—  
Ter preserve it—at a profit—he needs sugar—at a price!  
The repealing of the duty, surely cuts the price in two—  
Thet'll make a mighty difference, neighbor, both ter me an' you!  
Let the sugar manyfactrer make such profits as he kin—  
Ter him it may seem right enuff—but whar dew I cum in?

An' I aint agoin' ter swaller all the argyments they shout  
Thet the farmers need protection—an must bar raw sugar out.  
Common sense is plainly showin' that the people in the land  
Want raw sugar free in future—an' its freedom will demand.  
'Tis a tax no longer needed—hateful to the public view,—  
Taxing millions of our people to enrich a favored few.  
They can't blind me any longer with the foolish yarns they spin,—  
While they're busy makin' money—whar dew you and I cum in?

I'm agoin' ter keep on hustlin', talkin', pleadin' with my friends,—  
Aint no sense in lettin' others gain thar selfish privet ends.  
I'm agoin' ter write termorrer to my Congressman 'nd say  
Thet he oughter do his best ter kill that tax without delay!  
Feller-farmers, do your utmost—whether you grow beets or not—  
To repeal the tax on sugar—you can but improve your lot!  
Cheaper sugar helps your pocket, greater blessings you can win—  
When we've three-cent granulated—that's whar you an' I cum in!

# OUR FIRST THANKSGIVINGS

The Proclamation Issued by General Washington Proclaiming a National Day of Praise.

PROCLAMATION  
By The  
PRESIDENT  
OF THE  
UNITED STATES OF AMERICA.  
A PROCLAMATION.

"Whereas, it is the duty of all Nations to acknowledge the Providence of Almighty God, to obey his Will, to be grateful for his Benefits, and humbly to implore his Protection and Favour: And whereas both Houses of Congress have, by their joint Committee, requested me "To recommend to the People of the United States a Day of public Thanksgiving and Prayer, to be observed by acknowledging with grateful Hearts the many Signal Favours of Almighty God, especially by affording them an opportunity peaceably to establish a Form of Government for their Safety and Happiness.

such as have shown kindness to us), and to bless them with good Government, Peace, and Concord; to promote the knowledge and practice of true Religion and Virtue, and the increase of Science among them and us;—and generally to grant unto all Mankind such a Degree of Temporal Prosperity as he alone knows to be best.

"Given unto my Hand, at the City of New York, the third day of October, in the year of our Lord One Thousand, Seven Hundred and eighty-nine.

"GEORGE WASHINGTON."

The above is the proclamation that gave us our first national Thanksgiving after the government was established. The first Continental Thanksgiving had been observed 12 years before, December 18, 1777, the winter following the autumn marked by Burgoyne's surrender. This may be

GOING TO THE FIRST THANKSGIVING SERVICE.

ple of these States, to the Service of that great and glorious Being, who is the beneficent Author of all the good that was, is, or that will be. That we may then all unite in rendering unto him our sincere and humble thanks for his kind Care and Protection of the People of this Country previous to their becoming a Nation;—for the signal and manifest Mercies and the favourable Interposition of his Providence in the Course and Conclusion of the late War;—for the great Degree of Tranquillity, Union, and Plenty, which we have since enjoyed;—for the peaceable and rational Manner in which we have been enabled to establish Constitutions and Government for our Safety and Happiness; and particularly the national one now late instituted; for the civil and religious liberty with which we are blessed, and the means we have of acquiring and diffusing useful knowledge; and, in general, for all the great and various mercies which have been pleased to confer upon us.

looked upon as the first national Thanksgiving day, and the one appointed by Washington as the first after the establishment of the government. In regard to the Continental celebration, Congress passed the following resolution: "That a committee of three be appointed to prepare a recommendation to the several states to set apart a day for thanksgiving for the signal success lately obtained over the enemies of these United States."

Of the very first Thanksgiving on our shores there is no formal proclamation extant, although we have valuable records which tell us how that day was kept. Long, long ago, about 280 years ago, Plymouth's ancient (book) of Lawes decreed that "it be in the Power of the Governor to command solemn days of humiliation by fasting and also for thanksgiving as occasion shall be offered." Gov. Bradford, in 1621, exercised this power by appointing a day for Thanksgiving, and this was the very first American Thanksgiving, the Harvest Festival of New England. It is interestingly described in a letter written

by Edward Winslow, dated December 11, 1621:

"You shall understand that, in this little time that a few of us have been here, we have built seven dwelling-houses and made for the use of the plantation and have made preparation for divers others.

"We set the last spring some 20 acres of Indian corn, and sowed some six acres of barley and peas; and according to the manner of the Indians we manured our ground with herrings, or rather shads, which we have in great abundance, and take with great ease at our doors. Our corn did prove well; and God be praised, we had a good increase of Indian corn, and our barley indifferent good, but our peas not worth the gathering, for we feared they were too late sown. They came up very late and blossomed; but the sun parched them in the blossom.

"Our harvest being gotten in, the governor sent four men on fowling, so that we might, after a special manner, rejoice together after we had gathered the fruit of our labors. They four in one day killed as much fowl as, with a little help besides, served the company almost a week. At which time, amongst other recreations, we exercised our arms, many of the Indians coming amongst us, and among the rest their greatest King, Massasoit, with some 90 men, whom for three days we entertained and feasted; and they went out and killed five deer, which they brought to the plantation, and bestowed on our governor and upon the captain and others. And although it be not always plentiful as it was at this time with us, yet by the goodness of God we are so far from want, that we often wish our partners of our plenty."

We believe that first Thanksgiving scene was one worthy the painter's brush, one worthy handing down to admiring posterity. That little band of white folk on the stern New England shore, together with the friendly savages partaking of the autumnal bounty. We should like to have looked upon the demure maidens and sober wives passing amongst them the smoling platters, heaped high with golden Indian corn and the flesh the hunters had brought in from the chase. Venison and fowl appeared to have been the chief dishes at that first Thanksgiving feast. It would not be out of the way, I trust, to suppose the fowl was wild turkey.

The old Plymouth laws further refer to Thanksgiving and its observance, thus: "It is enacted that none shall presume to attend servile works or labour or attend any sports on such days as shall be appointed by the Court by humiliation by fasting and prayer or for public Thanksgiving on penalty of five shillings."

A penalty of five shillings if one failed to observe Thanksgiving Day! Those old Puritans were about as intolerant as the masters they had fled, it would seem, in matters both secular and spiritual. But, come to think of it, all matters were to them, in the final analysis, of spiritual concern. If everybody was forced to be thankful, willy nilly, it was because the old Fathers thought every one ought to be thankful. And, to-day, though no fine is imposed if we neglect to keep the day, still we feel somewhat churlish if we do not lay down accustomed toil, betake ourselves to Divine service, and later to the feasting that for so many, many years has followed the religious rites.

What a contrast their Puritan Thanksgiving and ours of to-day. The Priscillas, with their demure faces looking out from the encircling hoods, walking sedately to meeting beside the erect, dignified John Aldens. No gay, roistering, chrysanthemum- and -streamer-bedecked girls and men jostling each other on the way to the football game. No, life was a very serious business then, and holidays were observed seriously, pleasures taken sadly.

For two centuries Thanksgiving Day was a peculiarity of the Eastern States. Now, that the great middle west and west are peopled by men and women of eastern extraction, and now when the south has outlived much of the old reluctance toward the adoption of anything with the Puritan mark on it, we find we have indeed a national Thanksgiving Day, a much and wide-loved holiday. In 1901, from Alaska to our wee possessions in the South Seas, from the Bay of Fundy to Manila, Thanksgiving bells will call American citizens to places of worship, and Thanksgiving dinner gongs will call them to feasts of good cheer. Men of divers races and divers colors will take part in our great Harvest Festival, whose first observance dates back almost 300 years.

months' receipts at St. Louis in 1901 were 2,903,045 and 2,019,632 head for 1900.

"Yes, sir, the newspapers of this country by their extended publication of sensational crimes and incidents are doing an incalculable amount of injury."

"That's right. The people shouldn't be permitted to read such details. The less they know about crime and criminals the better."

"I entirely agree with you. May I ask the nature of your business?"

"I'm a green goods man."

"And I am a dealer in gold bricks. Shake."—Cleveland Plain Dealer.

## MICHIGAN STATE NEWS.

### Executive Clemency.

Gov. Bliss has paroled Joel Smith, sentenced in Isabella county in 1898 to ten years at Jackson for criminal assault, and he also paroled John Roebuck, sent from Gratiot county, December, 1897, to Jackson, for seven years, for criminal assault. A pardon has been issued for Silas M. Smith, sent from Montgomery county, in March, 1898, to Marquette, for ten years for criminal assault. The prisoner is reported to be dying from consumption.

### Health in Michigan.

Reports to the state board of health from 65 observers in various portions of the state indicate that smallpox, measles, pneumonia and whooping cough increased and scarlet fever and typhoid fever decreased in area of prevalence. Consumption was reported at 186 places, measles at 18, typhoid fever at 50, scarlet fever at 84 and smallpox at 58 places.

### All May Be Blind.

At the McMillan copper mine near Rock Lake four miners, while attempting to throw out a quantity of dynamite in a blast tale, were frightfully injured by a premature explosion. It is believed all will be totally blind and two may die. The names of the men are Nicholson, Ferguson and two brothers named McLeod.

### Blown to Pieces.

At the Helen iron mine near Michipicoten James Ryan, a powder man, was literally blown to atoms by the explosion of 5,000 pounds of dynamite which he was drying by a fire. All that could be found of him was one finger and a piece of his spine. Houses were shattered and several persons received minor injuries.

### New Warden Selected.

Alonzo Vincent, of St. Joseph, has been elected warden of the Michigan state prison at Jackson, to fill the vacancy caused by the death of William Chamberlain, the late warden. Other candidates before the prison board were Deputy Warden Northrup, of Jackson, and former Warden U. P. Hatch, of Ionia.

### Guilty of Murder.

Joseph Detlaff was found guilty of murder in the first degree in the circuit court at Menominee and was sentenced to life imprisonment by Judge Stone. The jury was out only 40 minutes. The crime for which Detlaff was tried was the murder of his wife in Menominee in September.

### Seizes Many Nets.

Deputy Game Warden Brewster returned to St. Joseph from his hunt in the lake, having made the biggest seizure of nets and fish ever reported on the great lakes. He captured 18 miles of new trout nets said to belong to the A. Booth company, of Chicago, valued at \$10,000.

### Opera House Damaged.

Fire which broke out in the Whitney grand opera house in Detroit shortly before noon did \$10,000 damage before it was extinguished. The theater, which is owned by Stephen A. Baldwin, was controlled by E. D. Stair. The loss is covered by insurance.

### News Briefly Stated.

Henry Wiseman, who confessed in Jackson prison to the murder of Mrs. Ellen Huss, was held for trial at Pontiac, at the December term of the circuit court.

Mrs. Minnie Sweet, who pleaded guilty in the circuit court in Lansing to the charge of having two husbands, has been sentenced by Judge Wiest to 18 months' imprisonment in the Detroit house of correction.

George Beach, of Bay City, fell off a scow and was drowned in Maumee bay at Toledo, O.

Mary O'Brien, aged four, was burned to death in Escanaba while playing with a younger sister in a vacant lot. The child's clothing caught fire from a burning stump.

J. Morris, the 12-year-old son of Dwight Morris, of Fredonia, shot and instantly killed himself while out hunting.

David Carter, secretary and general manager of the Detroit and Cleveland Navigation company for 30 years, died at Detroit, aged 69 years. He leaves a widow and two children.

James Stokes, a well-known hunter residing at Carlsbad, shot and killed two black bears.

Miss Lillian Nederlander, of Detroit, a violinist, has been chosen as one of the great Joachim's five personal pupils.

Two thousand people saw young Mowatt, of Chicago, win over Kid Herrick, of Detroit, in a 15-round contest in Jackson. The fight lasted the limit and it proved to be the fiercest contest seen here in years.

Secretary Baker, of the state board of health, has arranged for a sanitary convention to be held at Caro, January 21 and 22.

## A REVIEW OF TRADE.

R. G. Dun Says We Have Great Cause for a National Thanksgiving This Year.

New York, Nov. 23.—R. G. Dun & Co.'s Weekly Review of Trade says: "Never before in the history of the United States was such a great reason for a day of national thanksgiving. This country has made unprecedented strides toward a position of international supremacy, not only in commerce, but also in finance. To a marked degree business enterprises have proved successful. An idle wheel in mills or factories is the exception, while labor is so well employed at high wages that consumptive demands sustain market values of all staple commodities. Transporting facilities have been unable to keep pace with the nation's requirements, many complaining of tardy deliveries, which alone act as a brake on commercial progress. By closing lake navigation, lower temperature will relieve the railway situation, thousands of cars being restored to inland traffic. This same factor of seasonable weather stimulates retail dealings, and prompt collections swell bank exchanges.

"Careful search discloses few unfavorable factors in the iron and steel situation. Probably the least satisfactory conditions are found at plate mills, which report an uneven distribution of orders. A few large concerns appear to secure the bulk of new business, but heavy orders for cars will largely expand the buying, while the new combination will put this class of mills on a stronger basis. In rails there is no apparent limit to the orders placed, though some mills are unable to guarantee delivery within a year. One Pittsburgh report places the year's output of structural material at 600,000 tons. After six months of more or less interruption all machine shops and kindred plants at San Francisco have fully resumed, and it is certain that the greatest force on record is now engaged in the various departments of iron and steel making.

"Strength is the rule in the markets for farm products. Favorable weather during the closing days of corn harvesting failed to bring any reaction from the highest price level in many years, and the market was equally oblivious to Atlantic exports for the week of only 450,424 bushels, as against 3,838,666 a year ago. After some weeks of gradual decline toward a normal position, pork products suddenly bounded upwards regardless of weakness in live hogs. Wheat holds at about three cents above last year's price, despite the marked difference in size of crops.

"Failures for the week numbered 218 in the United States, against 238 last year and 31 in Canada, against 29."

## THE W. C. T. U.

National Convention Adopts Strong Protest Against Sunday Opening in New York.

Fort Worth, Tex., Nov. 21.—Wednesday witnessed the closing session of the twenty-eighth national convention of the W. C. T. U. It has been memorable for the largest attendance ever accorded a national convention, for the largest amount of money raised and pledged to purposes of the union and for the greatest enthusiasm shown in the cause of temperance.

The session ended with the adoption of a sensational deliverance on the attitude of the victory of the reform forces in New York city in respect to the partial open saloon on Sunday.

The resolutions adopted voices a strong protest against Sunday opening, or any attempt to give the liquor traffic longer hours or greater privileges. It earnestly urges the law-abiding and moral citizens of New York state to stand for a strict enforcement of the Sunday closing law and the abolition of the Raines law hotel.

An official statement was made that the total membership of the W. C. T. U. is about 300,000; paid membership is 160,000; number of delegates at this convention, 293; largest local union is in Portland, Me., with 265 members.

### Death List Numbers 25.

Telluride, Col., Nov. 23.—The work of recovering the bodies of the victims of the disaster in the Smuggler-Union mine progressed slowly until at 11 o'clock Friday, 60 hours after the breaking out of the fire at the mouth of the Bullion tunnel, the last body was brought to the surface. It was that of John Nevala, and was found in one of the slopes of the seventh level. The death list now numbers 25, the brave engineer who sacrificed himself in an effort to rescue his comrades having died Friday afternoon.

### Ex-Ambassador Dead.

London, Nov. 23.—Count von Hatzfeldt-Wildenburg, who a few days ago retired from the post of German ambassador to Great Britain, died at the embassy Friday morning. Count von Hatzfeldt returned from a holiday six weeks ago and since that time had only been able to leave his house once or twice, and then in a bath chair. He suffered greatly from asthma, and on Saturday his malady developed into congestion of the lungs. From this attack Count von Hatzfeldt never rallied.

### Outlines Work of Congress.

Washington, Nov. 23.—Senator Allison, in outlining the work of the coming congress, declared tariff revision unlikely, believed a department of commerce and a Nicaragua canal bill assured, expects reciprocity with Cuba will be arranged, repeal of war taxes likely, and a heavy river and harbor bill certain.

### Want Tax Reduced.

Washington, Nov. 23.—Whisky distillers will urge congress to reduce the tax from \$1.10 to 70 cents a gallon, thus representing to them a saving of \$60,000,000. Brewers and stock brokers will also ask liberal reductions from war rates.

## OUR INTERNAL COMMERCE.

In Many Respects It is the Most Remarkable in the History of the Country.

The internal commerce of the United States during the first three quarters of the commercial year is in many respects the most remarkable in the history of the country's internal trade, while in some features there is a decline from the high tide of activity for the corresponding period of a year or two ago. The monthly summary of the treasury bureau of statistics reports that the trunk-line movement of flour from Chicago points during four weeks of September reached an average of 90,842 barrels. For the first time in the year one week's grain movement fell below 1,000,000 bushels. The provision trade shows the highest weekly average of the year, being 31,196 tons per week.

At the five chief live stock markets in the west the receipts for nine months ending September 30, were 5,236,356 cattle, 13,413,669 hogs, and 5,331,155 sheep, aggregating 23,981,180 head of these three kinds, compared with 22,239,971 head for the like period of 1900.

Chicago received 213,118 cars of the five kinds of stock, compared with 200,493 cars for the first nine months of 1900. Kansas City's arrivals of both cattle and hogs were larger than for the previous year to September 30. Omaha's packing industries consumed 2,681,431 head of cattle, hogs and sheep, against 2,590,662 head last year to September 30. The corresponding figures for St. Joseph are 2,029,406 head and 1,580,891. Nine

### THE CHELSEA HERALD

T. W. MINGAY, Editor and Proprietor.

PUBLISHED EVERY THURSDAY

for \$1.00 per year strictly in advance.  
Entered at the Post Office at Chelsea, Mich., as second class matter.

THURSDAY, NOVEMBER 28, 1901.

FRIENDS AND PATRONS OF THE CHELSEA HERALD WHO HAVE BUSINESS AT THE PROBATE OFFICE ARE REQUESTED TO HAVE JUDGE WATKINS SEND THEIR PROBATE AND OTHER LEGAL NOTICES FROM THAT OFFICE TO THE HERALD.

The United States Geological Survey reports that all Texas oil contains sulphur. We knew that many Texas politicians are sulphurous in their speech, but it is news to us that all her gushers are characterized by the same peculiarity.

It is expected that the news from Washington during the coming session of congress will be exceptionally stirring and interesting. As a consequence the press gallery list this year will be larger than at any time in the past; editors from all over the country have sent their best men to watch events. London has sent half a dozen representatives, in place of the one or two of former years, and Paris and Berlin will not be unrepresented.

M. G. Carlton, who for 14 years has owned and edited the Grass Lake News, has sold the plant and good will to E. E. Brown, of Ludington, and this week's issue will be the last under his management. Mr. Carlton has wielded a pen that was alternately bitten with venom or loaded with honey, but he has made a good local newspaper of the News and his successor will have to step "right up to the mark" to keep the News up to the notch that Mr. Carlton has pushed it to. The Herald wishes both gentlemen the best of success in the future.

Hon. Emory Townsend, of Saginaw, ex-senator of the 22d district, in an endeavor to interest some Ypsilanti business men in a project to establish a beet sugar factory there, gave some significant figures. He showed that the Bay City factory had cleaned up \$200,000 in profits, and farmers had realized \$50 to \$75 an acre on their beets. Such being the case, the fallacy of the state paying a bounty to beet sugar manufacturers is conclusively proved. They do not need to be protected any more than the iron and steel and other like "infant" industries do.

By Dec. 1 there will be on the rolls of the post office department 6,000 rural carriers. They are, however, resigning at the rate of 150 a month, on account of the smallness of their pay, \$500 a year, which is totally inadequate to keep up the expenses they have to meet. Their routes are 20 to 25 miles long and most of them have to keep two, and some even, three horses to do the work, also provide the wagons. The only thing the department furnishes is the mail sacks. The city mounted mail carriers get from \$800 to \$1,000 a year and an allowance for the keep of their horses. There should be no such disparity between the two classes of carriers. In some parts of the country the department has difficulty in finding competent men to take positions at the present small salary.

#### Asleep Amid Flames.

Breaking into a blazing home, some firemen lately dragged the sleeping inmates from death. Fancied security, and death near. It's that way when you neglect coughs and colds. Don't do it. Dr. King's New Discovery for consumption gives perfect protection against all throat, chest and lung troubles. Keep it near, and avoid suffering, death, and doctor's bills. A teaspoonful stops a late cough, persistent use the most stubborn. Harmless and nice tasting, it's guaranteed to satisfy by Glazier & Stimson. Price 50c and \$1. Trial bottles free.

#### ITEMS OF LOCAL INTEREST.

The road to the cemetery at Waterloo has been greatly improved.

The masons expect to finish the stone work on the Glazier memorial building by Jan. 1.

The carpenters are now laying the floors in the new office building of F. H. Sweetland & Co.

The board of regents have decided to erect a new \$100,000 engineering building at the U. of M. next spring.

Rev. A. Schoen will go to St. Joe next Sunday where he will preach at a dedication service of St. Peter's church.

Large quantities of poultry have been shipped from Chelsea this week, and the shippers have been rushed with orders.

The U. of M. football team has a champion score record this year. It now stands 451 to 0 with but one more game to play.

The eight years old son of Conrad Heselochwerdt fell off the bridge at the Glazier stove works to the street below Tuesday afternoon, and lighting on his head was unconscious for many hours.

The service at St. Paul's Lutheran church next Sunday will be at 2 o'clock in the afternoon instead of in the morning. Rev. J. B. Meister, of Rogers' Corners, will preach. Sunday school session at 1 o'clock.

Fred Hixson, who three weeks ago opened a dairy lunch counter in the store with H. L. Wood & Co., has closed up the business and taken the fixtures back to Ypsilanti. There was not trade enough for such a place in Chelsea.

The Black Top sheep belonging to Whitaker & Wacker, Wm. Laird & Son, M. J. Noyes, Homer Boyd, John Clark & Son and Otto Luick have been entered on the books of the Michigan Improved Black Top Sheep Association.

Washtenaw Times: Charles Steinbach, the harness dealer of Chelsea, says he thinks the running of the electric road between his village and Ann Arbor has increased the value of farm lands \$5 an acre along the line of the road.

An accident occurred on the electric line Wednesday evening of last week which came near being a fatal one. George J. Hirth, of Lima, was driving along the road when his horse became frightened at the Chelsea car, ran up the embankment on the track and into the car. The horse was instantly killed, but Mr. Hirth was not injured.

An inch of rainfall, the drops frozen as they form into delicate crystals, will make ten inches of snow.—December Ladies' Home Journal.

Lafayette Grange will meet with Mr. and Mrs. Geo. Boynton, of Sylvan, next Thursday, Dec. 5. The program will be an anniversary one as the grange has been in existence 24 years come Wednesday. It having been organized Dec. 4, 1887.

Bertrand Harris died at his home in Unadilla Tuesday aged 28 years. He had been ailing for three years with a disease that baffled medical skill. The funeral will be held this (Thursday) afternoon at 2 o'clock at the M. E. church, Unadilla.

Seneca Litchard, of Saline, who has been unconscious at the U. of M. hospital for 30 days past, has so far recovered from his coma that he is able to mutter a few words. The doctors are of the opinion now that he will recover as his reason is gradually returning to him.

An order has been issued by the post office department excluding from the privilege of second class mail rates all weekly, monthly and quarterly railroad guides, on the ground that such publications are neither news nor current literature, so must go as third class matter, which means double the rates they have been paying.

Only a little over a quarter of a mile remains to be completed of the Michigan Central double track between Dexter and Ann Arbor and within two weeks it is expected to be completed and the whole eastern division will have two tracks. The double tracks will do away with the congestion of traffic often experienced heretofore upon this continuous single track.

In compliance with the announcement made by Probate Judge Watkins when he assumed the office Jan. 1, 1901, that he would have a new probate register each year of his term, it is now stated that James E. McGregor, of Ypsilanti, will receive the appointment after Jan. 1 next, in place of Geo. R. Gunn. Watkins is professedly a one-term man, and it is further stated that McGregor has an itching to be probate judge when Watkins' term expires.

Glen V. Mills, the directory publisher, of Ann Arbor, was in Chelsea Friday doing some preliminary work looking to wards the publication of a Chelsea directory. It will contain all the features that have made his Ann Arbor and Ypsilanti directories so popular, such as a fine map of the village, house directory with the names of all residents of the village of mature age and the names of the married ladies, etc. Mr. Mills met with very good encouragement.

#### Luck in Thirteen.

By sending 13 miles Wm. Spirey, of Walton Furnace, Vt., got a box of Bucklen's Arnica Salve, that wholly cured a horrible fever sore on his leg. Nothing else could. Positively cures bruises, fells, ulcers, eruptions, boils, lurns, corns and piles. Only 25c. Guaranteed by Glazier & Stimson, druggists.

#### Electric Railway Notes.

Hawks & Angus shipped seven carloads of steel from here to Jackson Saturday.

The D., Y., A. A. & J. Co. has placed cattle guards at all the highway and farm crossings of their road in this vicinity.

A reverse curve and a diamond have been put in at the crossing of the Boland and Hawks-Angus lines on West Main street, Grass Lake.

Work on the Boland electric road is progressing finely between Parma and Jackson. Two large gangs are working. Sixteen cars of steel have been received at Parma.

The trolley wires on the D., Y., A. A. & J. have been strung as far west as Michigan Center. At Jackson the grading is completed and a few days more will see the country line and city line connected at that point.

At the Ann Arbor council meeting Monday night the Boland interests received the franchise changes desired, paying \$10,000 toward grade separation. Mayor Copeland is made trustee for the city and the Ann Arbor railroad is to have the grade separation work done by July 1 next.

That wool is still largely marketed in Chelsea is evidenced by the fact that 335,000 pounds have been bought here this year. H. S. Holmes is the largest buyer with 150,000 pounds, Leach & Wackenhut come next with 80,000 pounds, Judson & Downer 65,000 pounds, and O. C. Burkhardt 40,000 pounds.

Wm. J. Denman was driving his horse out of the yard on his way to work Tuesday morning, when it ran away with him. Opposite the railway depot on Jackson street he was thrown out of the buggy and falling on the rough frozen ground he received a bad scalp wound, extending from his right eye clear to the back of his head. It took 15 stitches to close up the wound, into which the dirt and gravel was badly ground. One of his thumbs was also dislocated. The accident will lay him off work for some time to come.

Orville Gorton is building a barn on the Gildart place in Waterloo.

George Gorman, of Lyndon, is attending the Grand Rapids veterinary college.

The football game between Chelsea and Ypsilanti at Snyder's field Saturday resulted in a victory for the home team by the score of 12 to 0.

Lima farmers complain that they are charged 10 cents fare each way to and from Chelsea, on the electric cars. They say the fare should be only 5 cents.

The "doughnut" three cent piece, so called because the coin is made with a hole in the center to distinguish it the more readily from a dime, will be put in circulation in a few weeks.

By the end of this season there will have been shipped from Chelsea between 60,000 and 70,000 bushels of onions, all grown in this vicinity. There are enough tears in such a crop to fill a dry well.

Ann Arbor had an assessed valuation of \$699.40 for every man, woman and child in the city in 1900. Detroit with a per capita valuation of \$355.33 is the only city in Michigan that is richer per capita than Ann Arbor.

No portrait of a man ever appears on Uncle Sam's coins and no portrait of a woman on his postage stamps, and this leads a discriminating exchange to remark that this is the reason why we lick the stamps and squeeze the coins.

The state has quite a large investment in the prison at Jackson. The appraisers have just got through their work of inventorying the property to be turned over to Alonzo Vincent, the new warden, and find it amounts to over \$948,000.

The weather in October was two degrees warmer than the average October weather, and there were four more days of clear sky than is usual in that month. The rainfall was .63 inches greater than the normal rainfall, which is 2.55 inches.

Mat. Hauser has enclosed his lots on Congdon and Garfield streets, which he bought from Ralph Thacher, with a substantial wire fence and has built a barn thereon 24x30 feet in size. He also purposes to build two moderate priced houses on the lots, one facing Garfield street and the other one Congdon street.

The December meeting of the Western Washtenaw Farmers' Club, which is the annual meeting, will be held at the home of Mr. and Mrs. Dennis Spaulding, in Sylvan, Thursday, Dec. 19. The hearing of the reports of delegates and the election of officers will be the features of the meeting. A large attendance is requested.

The Dexter Leader very pertinently and correctly says: "We are informed that our statement that the Boland Company had named one of their new cars 'Dexter' is an error; that the company has ten new cars all named for stations along the line, but that the towns of Dexter and Parma are skipped in the naming process. Well, we don't care anything about a little thing like that. If the company will only get a move on and build the road, they may call the cars anything they choose. It's transportation, not glory, that we want."

Lima farmers are enraged and justly so, at the influx of Ann Arbor hunters, who with guns and dogs invade their farms every Sunday morning. There will be trouble over this hunting business yet. No one has the right to go on a farmer's land to hunt without having first obtained permission any more than he would have to go into a person's house, yet every hunter seems to have the idea that it is his right and privilege to go out shooting whenever and wherever he sees fit. There is a state law which calls such action trespass and provides a penalty after trial and conviction, if complaint is made.

**A Startling Surprise.**  
Very few could believe in looking at A. T. Hoadley, a healthy, robust blacksmith, of Tilden, Ind., that for ten years he suffered such tortures from rheumatism as few could endure and live. But a wonderful change followed his taking Electric Bitters. "Two bottles wholly cured me," he writes, "and I have not felt a twinge in over a year." They regulate the kidneys, purify the blood and cure rheumatism, neuralgia, nervousness, improve digestion and give perfect health. Try them. Only 50 cents at Glazier & Stimson's drug store.

# Men of Millions and Women of Fashion in New York

A little side issue in the "re-Morganizing" of American finance is the combination of two small national banks in New York.

How the Big Banks of Gotham Grow.

This time it is the Citizens' which absorbs the Ninth national; the combined capital of the new organization is only a million and a half. But it will be a member of the great chain of Morgan banks, of which the First national stands at the head.

The First national less than a year ago declared a dividend of over 1,900 per cent.; it increased its capital stock to ten millions, its surplus to the same figure. It swallowed a \$3,000,000 bank; it made a close traffic alliance with the great Chase national; it has as a branch the up-town Astor bank; it now has the new bank half a mile up Broadway from Wall street to monopolize the custom of the dry goods district.

This combination of metropolitan banks has also the strongest kind of hold upon some out-of-town systems, notably in Rhode Island. It would be hard to overestimate its power and influence in the financial world. It is the only thing in the United States bigger than Standard Oil. The Standard Oil bank, the National City, has the same capital as the First national, but a smaller surplus, and a less remarkable system of branches and alliances.

## The Weeding Out of the Banks.

Seven years ago there were in New York 50 national banks, not one of which had a capital of more than \$5,000,000. By the 1st of January there will be but 42, of which three have each a capital of \$10,000,000. The business has increased as the number of banks has diminished. Those that have disappeared have in some cases been absorbed; in some simply driven to the wall by competition. It is cheaper to do business in 40 banks than in 50; though that may not console the men who might but for consolidation get handsomely paid work to do.

If a young man working on a salary tries to open an account in a downtown bank he is not wanted. That is one result of killing competition. Ten years ago a banker would carry a personal account that would average \$200, counting the expense of bookkeeping at eight dollars a year. Now a personal account is not wanted, even if the average deposit is \$500 or \$1,000. The smaller up-town banks take such deposits; the downtown banks refuse them, and in this way the division of labor is made complete. What the Wall street banker wants is to do business with commercial houses that wish to borrow money, discount notes, "hook" collateral, and in other ways raise the wind for increasing business. There is profit in these transactions. The general movement for bigger capitalization—of which the First national in raising its total from \$500,000 to \$10,000,000 gave the most startling example—presents no advantage except that it enables each bank under the law to loan more money. No national bank is permitted to lend more than one-tenth of its capital to one concern; there are lots of concerns in New York that might like to borrow one-tenth of \$10,000,000, and give excellent security, too.

## The Bird Upon My Lady's Hat.

Last year I had occasion to see many wholesale milliners and millinery notion venders. They were melancholy.

They had all laid in quantities of "whole birds" for hat trimming and could not sell them. I began to think that women were getting too tender-hearted to wear birds upon their hats, and that the extermination of whole species of feathered warblers by pot-hunters might be checked for a time.

The Very Latest in Millinery.

It was too early to celebrate. The milliners are feeling better now. It's a fad to have a whole bird upon the hat of My Lady this year. He must seem to have just settled himself there, and the more lifelike his attitude the better. "Wings" can be made out of chicken feathers dyed the right color, but a bird cannot be counterfeited; and that is bad news for bird lovers in the south.

Yet the fancy may not last. It is hardly the top of the fashion even now. Fashionable millinery must have two qualities, manner and cost. There are few birds that cost as much as fine ostrich plumes; and it is practically impossible for the milliner to make out of a bird a picture hat that looks well to eyes accustomed for 20 generations, in person and by inheritance, to plumes as the proper decoration. All the traditions, all the famous pictures of bygone beauties, all the descriptions of fair women writ by poets, have made plumes familiar; never stuffed birds.

The fad will go out as suddenly as it came. But it had a reason in the great stock of unsold birds stowed away in the feather lofts of London, Paris and New York. Rather than lose money, the world's milliners can get together and force a style. They cannot make it last, and they are too wise to try.

I have yet to hear of a real leader of fashion in the most exclusive sense who is helping the wholesalers get rid of their dead birds. But the scheme is working for all that.

## New York an Ancient City.

Occasionally we are reminded that New York is an old city among world capitals.

It is a century older than St. Petersburg; it was a place of importance when Berlin was a village; it is older than any of the South American capitals; it was a big city when Tokyo was a group of scattered villages.

Three days each week I eat my lunches in a building which has stood almost unchanged since 1678, and which has remained in one family for nearly 140 years; the old rooms, the big fireplaces, the four-foot-long shingles, covered now with tar roofing, are just as they were. From the rear windows I look out upon a tiny part of the battleground of Golden Hill, fought when the house was already nearly a century old, at the beginning of the revolution. Directly across William street is the site of the house, now replaced by an office building, where Washington Irving was born. Three minutes' walk away is Trinity church, where worship has been held for over 200 years. Nearer yet is the old John Street church, cradle of Methodism in the north. I attended its centennial services many years ago.

Three or four blocks south is Frances's tavern, where Washington bade farewell to his officers after the revolution. It is still an eating-house. When I came to the city, the ballroom where the ceremony took place was in exactly its ancient condition. It is now disfigured by the garish fittings of a modern dining-room, but there are so many pictures of it that the antiquarians could easily restore it if it is bought for a museum of antiquities, as suggested. The room seems tiny to have won such remembrance. Before the alterations it was, I should think, about 35 feet by 20.

## The Last Stand for Liberty.

At James Gordon Bennett's expense a memorial is being erected at the site of Fort Washington, the last stand made by the continental army upon Manhattan Island before abandoning it to the British for seven years. It is the highest point on the island, and with a disciplined army could have stood off the invaders for a time, but Washington feared to risk raw troops there. Bennett's father lived within a short distance of the old fort, and I suppose the present Bennett played about the ruin and holds it in kindly remembrance.

Before abandoning the position, Washington had "headquarters," of

Great Playground for a Boy.

course. The building in which he slept still stands, one of the stateliest old houses in the country—that of Mme. Jumel, Hamilton's Grange, where he planted 13 trees in honor of the 13 original states, has been cut up for building lots, but part of the old house stands, and a portion of the trees are preserved. When I first saw them all the 13 were alive, but of different degrees of thriftiness. Hamilton had planted them too close, and the stronger had crowded the weaker ones. It was easy to pick out "Little Rhody" in one wizened specimen trying to grow at an uncomfortable angle at one corner of the group.

There is a bold point just below Fort Washington, thrust far out into the Hudson, which here runs so straight that from the waterside one can see Croton Point 30 miles up river. There was upon this point in Washington's day a low earthwork, traces of which can still be seen, and this is sometimes pointed out to passengers upon river steamboats as the true Fort Washington; but that is just another of those what-d'ye-call-em.

OWEN LANGDON.

## ANTS FELL IN SHOWERS.

Singular Phenomenon That Was Lately Witnessed in the City of Brussels.

From time to time we hear of showers of blood, of pollen, of caterpillars, and now M. A. de Longree, a member of the Astronomical Society of France, tells of a shower of ants which fell recently at Brussels.

M. de Longree resides in that city, and therefore he had ample opportunity for observing this curious phenomenon. It was four o'clock in the afternoon, he says, when the ants began to fall, and the weather was very warm, the sun being brilliant and the sky clear.

A great cloud of small black-winged ants, interspersed among which were some gigantic black ants, measuring from five to seven millimeters in length, spread quickly over the city and its suburbs, and in a few minutes the gigantic ants were swarming over the pavements and the small ones were falling on the garments of pedestrians, and even entering their mouths and noses.

For two hours the insects remained in the city, causing everyone to wonder how they came there. It is supposed that they were brought thither in a storm, which started in a neighboring district, the assumption being that the tempestuous wind tore up entire nests of ants from the ground and carried them along in its course. The only objection to this theory is that there was no sign of a storm in Brussels when the insects appeared. Naturalists, however, insist that in no other way can this singular phenomenon be explained.

## METAL EGGS FOR DRINKS.

Ovoid Capsules of Copper Containing Ice for Cooling Too-Warm Beverages.

One of the oddest of recent inventions is a refrigerating egg, as it might be called. It is an ovoid capsule of nickel-plated copper, about the size and shape of a hen's egg, hollow and nearly filled with water. For use it is frozen so that its contents become ice, says the Philadelphia Post.

If you have a glass of milk that is not cold enough, you do not like to put ice into it, because dilution with water spoils the beverage. But, if you have one of these eggs handy, you may drop it into the glass, and in a few moments the liquid is reduced to the desired temperature. In the same way you may cool your cup of coffee, if it is too hot, and the idea is equally applicable to any other drink.

Many people nowadays are disinclined to use ice in their drinking water, because it may contain germs. All danger is avoided by dropping one of these metal eggs into one's tumbler.

The refrigerating egg is a little less than full of water, so as to allow for the slight expansion of the liquid in freezing; otherwise, of course, the capsule would burst. After being filled the capsule is sealed so perfectly that no one can tell where the opening was, and thus it is absolutely water tight. Such an egg of metal, it is said, can hardly be broken, and ought to last forever.

## Had Ran Off.

# A Wise Turkey

NOW this turkey lived in a wildwood glen,  
He was fat, and smooth, and sleek;  
He had ne'er borne love for the haunts of men,  
But he loved the little creek;  
Yes, he loved the creek  
And its water's play,  
And the forest's leafy shade,  
He was king of the chase,  
And lord of the place,  
Where the speckled eggs were laid.

IN the turkey tongue of his elder kin,  
He had heard of the day of thanks,  
And he hurried away as it wandered in,  
To the creek's secluded banks,  
And there on the banks  
Of the little creek,  
He thought with his thinking brain:  
"I'm a gobbler now,  
And one I trow,  
Forever I will remain!"

SO he squat him down on a slippery log  
That passed through the waters slow,  
And he said, while his wattles were all agog,  
"It's a risky thing, but all the same, you bet  
your life I go."  
And he made a sail,  
A tail-spread sail,  
That carried him on and on,  
To the land of the leaf,  
And the turkey's weal,  
Where other good turks had gone.

AND all of the turks that stayed behind,  
In the leafy wildwood glen,  
Were caught by the men who were much inclined  
To render thanks, and then  
Their heads were cut off, their bodies filled,  
Yes, with sage were their bodies filled,  
And they helped give thanks  
While the bells did peal,  
But one gobbler was safe in the land of the leaf,  
For he'd left the little creek's banks.

# God Guard Columbia

A New National Hymn Suitable for Popular and General Worship on Such Occasions as Thanksgiving.

By REV. HENRY C. MCCOOK, D.D., AND GEORGE BALCH NEVIN.

Soprano.  
Alto.  
Tenor.  
Bass.  
Organ.

1. Al-might-y Lord of All, The na-tion rise and fall At Thy com-mand. Thy hand-  
2. From Thee the sa-cred fire first kindled by our sires, Their fer-vent pray-ers, Faith and  
3. We bless Thee for the hand that led the ba-bron band Who made us free; For  
4. Stand and Star, Keep Thou their children's way; God guard Colum-bia, O God, our Pa-ther-land!  
5. ter-ni-ty, Vir-tue and in-dus-try, Love of the Truth and True Free-dom and  
6. val-iant men Whose life our free-dom won, O God of Wash-ing-ton, We ben-edict  
7. What time the clouds of woe Hung o'er us dark and low, Thou, Lord, wast near; Still be our Staff and Stay; Hear Thou Thy People pray: God Guard Columbia, Our Country dear!

Hold in Thy Mighty Hand  
Our troops by sea and land,  
In fort and field!  
Give them to do and dare;  
In days of danger spare,  
And guard them by Thy care  
O God, our Shield!

Lord God of land and wave,  
The sovereign People save!  
On Thee they wait!  
Do Thou perpetuate  
Thy glory in the State!  
Save our Chief Magistrate!  
God save the State!

The authors of the above hymn have no desire to replace our beloved "America" in the hearts of the American people. Nor could they do so if they wished, for it has a place in our history almost as sacred to us as that occupied by "Old Glory" itself. But they do believe, and with reason, that the time has come when there is room for another national hymn; that a time has come when with our broadened boundaries, our expanding commerce, our enlarged sphere in the affairs of the world, there should be another national

hymn, perhaps of secondary importance, that should give recognition to the American army and navy, to the chief magistrate of the nation, to the heroic services of those who purchased our liberty, and the times of national calamity which have sometimes befallen us. They believe that like "America," such a hymn should contain the elements of popular and general worship, suited to the needs of great public gatherings at times of national thanksgiving and rejoicing, and these conditions we believe "God Guard Columbia" meets.

# HITCHCOCK REPORTS.

## Secretary of Interior Tells of Work of His Department.

### Income of Indian Tribes Shows a Falling Off—Educational Question—Dangers to Forestry Are Pointed Out.

Washington, Nov. 25.—The annual report of Secretary Hitchcock, of the interior department, has been made public. In endorsing the conclusions submitted by Commissioner of Indian Affairs Jones regarding the present Indian educational system, the secretary says: "The management of the Indian service in the field and in the schools, while satisfactory under existing conditions, is not deemed to be the best for the welfare of the Indians, and different methods will hereafter be adopted. This policy contemplates requiring the working by Indian allottees to do so of a fair portion of lands allotted them and the contributing by their industry to their own support of all not entirely disqualified by actual disability, physical or otherwise; the discontinuance of the issue of rations to those able to support themselves, and the extension to the latter of every possible aid for their well-being and encouragement; the inauguration of industrial training in all schools where not now established, so that such Indians of both sexes may be taught the trades or industries adapted to their circumstances."

### Income Decreased.

The income of the various Indian tribes from all sources during the year aggregated \$5,338,880, a falling off of \$260,952, mostly due to the expiration of treaty obligations.

In the future full leasing privileges will be confined to those whose disability or inability actually disqualifies them from working any part of their allotments and in a lesser degree to those whose disability prevents their working more than a small part of their allotments, those conditions to be clearly shown; all other allottees to be required to work at least 40 acres of their allotment.

### Enrollment of Tribes.

The Dawes commission to the five civilized tribes in Indian Territory reports that the rolls of membership of only one nation, the Seminoles, so far have been approved, and their lands have not yet been entirely allotted. The time cannot be fixed with certainty when the enrollment of the four remaining tribes will be finished. There is a vast amount of labor yet to be performed by the commission in investigating the claims of applicants for enrollment and equalizing the value of the lands already classified, and Secretary Hitchcock recommends that the commission be increased by four members. He also favors a modification of the law requiring distribution of lands on the basis of equalized valuation and that a definite period be fixed for the completion of all work pertaining to the allotment of lands among the Indians in the territory.

### Danger to the Forests.

The report says that the act of June 3, 1887, known as the timber and stone act, if not repealed or radically amended will result ultimately in the complete destruction of the timber on the unappropriated and unreserved public lands. The time has arrived, according to the secretary, when reservoirs must be built and managed as a part of a national system of forest and water conservation. They cannot be successful if maintained, however, without a thorough system of forest protection. The introduction of practical forestry on the forest reserves has now begun. The general policy as announced in an outline memorandum to the commissioner of the land office is that additional forest reserves, with boundaries drawn to liberate the smallest amount of scrip, should be created during this winter; the good will of residents in or near the reserves should be gained, forest fires guarded against and the resources of the reserves should be made available for the conservative use of the people. Systematic investigation designed to make them accessible and useful should be undertaken and each forest reserve and part thereof should be dealt with on its own merits.

### The Arid Lands.

On the question of reclamation of the arid region the secretary says: "The investigations which have been carried on demonstrate that there is no one question now before the people of the United States of greater importance than the conservation of the water supply and the reclamation of the arid lands of the west and their settlement by men who will actually build homes and create communities." It is recommended that construction at once be begun as follows: The San Carlos storage reservoir in Arizona, reclaiming 100,000 acres or more of public land, at an estimated cost of \$1,040,000; reservoirs in the Sierra Nevada in California for reclaiming desert lands in Nevada; the diversion of St. Mary river into the headwaters of Milk river in Montana. An appropriation of \$250,000 is asked to carry on the hydrographic work of the geological survey.

### Land Grant Railroads.

The secretary says the net earnings of the bond-aided and land-grant railroads amount to over \$13,000,000 and the increase in gross earnings to \$37,000,000. The increase in expenses for the year was over \$24,000,000. The debt of the Central Pacific road to the United States now stands at \$58,812,715.

## St. Jacobs Oil for Chest-Colds, Bronchitis, Croup and Pleurisy.

An outward application for bronchial difficulties is many times far more effective than syrups, cough mixtures, cod liver oil, &c., simply because it penetrates through to the direct cause, which is, as a rule, an accumulation of matter or growth tightly adhering to the bronchial tubes.

St. Jacobs Oil, possessing as it does those wonderful penetrating powers, enables it to loosen these adhesions and to induce free expectation. Cases have been known where expectations have been examined after St. Jacobs Oil has been applied, and the exact formation was clearly shown, where the adhesions had been removed or pulled off the bronchial tubes. All irritation of the delicate mucous membrane of the bronchae is quickly removed by the healing and soothing properties of St. Jacobs Oil. In cases of croup and whooping cough in children St. Jacobs Oil will be found superior to any other remedy.

St. Jacobs Oil is for sale throughout the world. It is clean to use—not at all greasy or oily, as its name might imply. For rheumatism, gout, sciatica, neuralgia, cramp, pleurisy, lumbago, sore throat, bronchitis, soreness, stiffness, bruises, toothache, headache, backache, feetache, pains in the chest, pains in the back, pains in the shoulders, pains in the limbs, and all bodily aches and pains it has no equal. It acts like magic. Safe, sure, and never failing.

## Best for the Bowels.

No matter what ails you, headache to a cancer, you will never get well until your bowels are put right. Cascarets help nature, cure you without a gripe or pain, produce easy, natural movements, cost you just 10 cents to start getting your health back. Cascarets Candy Cathartic, the genuine, put up in metal boxes, every tablet has C. C. C. stamped on it. Beware of imitations.

## Persons contemplating a journey East or West should be careful that the rates paid for their transportation do not exceed those charged by the Nickel Plate Road.

This company always offers lowest rates and the service is efficient. Careful attention is given to the wants of all first and second class passengers by uniformed colored attendants. The dining car service of the Nickel Plate Road is above criticism and enables the traveler to obtain meals at from thirty-five (35) cents to \$1.00 but no higher.

The Pullman service is the usual high grade standard. Semi-weekly transcontinental tourist cars ply between Atlantic and Pacific coasts. Confer with nearest agent of the Nickel Plate Road.

There has been placed upon the market  
several cheap reprints of an obsolete edition  
of "Webster's Dictionary." They are being  
offered under various names at a low price.

By  
dealers, agents, etc., and in a few instances  
as a premium for subscriptions to papers.  
Announcements of these comparative
