The Memory of Our Soldier's Sacrifice Must and Asleep in The Tents of Green Shall Be Preserved.

Stories of The Days of War Retold for Standard Readers.

The Standard in this issue has been to some pains to present features calculated to further and keep alive the sentiment of the coming Memorial Day. The Grand Army on that day will allow nothing to detract from their efforts to honor their fallen comrades and it is hoped that all loyal citizens will join with them in this spirit. Let us honor the living as well as the memory of the dead.

At the town hall Saturday let all gather to listen to Rev. William Considine who will deliver the address and as much as possible make it a day in which we shall take account of the quality and worth of our patriotism.

The special articles of a reminiscent order that are printed this week are all the true experiences of those who lived through the terrors of the Great War. Let them be read that all may realize something of the spirit of sacrifice of that time

AMERICA'S GREATEST CLASSIC.

Lincoln's Speech Delivered at Gettysburg November 19, 1863.

Fourscore and seven years ago our fathers brought forth upon this continent a new nation, conceived in liberty, and dedicated to the proposition that all men are created equal. Now we are engaged in a great civil war, testing whether that nation so conceived and so dedicated can long endure. We are met on a great battle-field of that war. We have come to dedicate a portion of that field as a final resting-place for those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this. But in a larger sense we cannot dedicate, we cannot consecrate, we cannot hallow this ground. The brave men, living and dead, who struggled here, have consecrated it far above our power to add or detract. The world will little note, nor long remember, what we say here, but it can never forget what they did here. It is for us, the living, rather to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us, that from these honored dead 'we take increased devotion to that cause for which they gave the last full measure of devotion; that we here highly resolve that these dead shall not have died in vain; that this nation, under God, shall have a new birth of freedom, and that government of the people, by the people and for the people, shall not perish form the earth.

An effort was made to print letters of greeting to the local post G. A. R., from some of our honored and respected men of the state, but unfortunately the effort was not timed as it should have been, and those requested to send short letters. Loveland, Wm. did not have requisite time to comply. However, Gen. Alger and Gov. Bliss sa- Lown, Chas. lute their Chelsea comrades through The Standard and Congressman Charles E. Long, Daniel Townsend offers the following tribute:

The Grandest Army.

The Grand Army of the Republic was truely the grandest army that ever marshalled, marched and fought. It preserved the Union, purified the constitution, defined and established the powers of the republic. It came forth from the nation's homes, performed its Divine duty and returned home again, there to complete the demonstration of the fact that a republic's safety lies most securely in the control of her people who can fight for principle, if need be, and then solve in peace the problems of democracy."

The Civil War soldier was a patriot. No anarchist ever wore the blue. The soldier cared for the nation when in danger. The nation should now honor, defend and care for him in every hour of his need.

Life's morning having faded to a memory and the shadows of night now coming on apace, may the members of the Grand Army when "taps" are sounded, wran the drapery of their couch about them and lie down to pleasant dreams, and thus to sleep until He who brought them through the perils of war shall sound the Reveille to wake them to the glorious honors and awards which await their noble service. CHAS. E. TOWNSEND.

'A writer in the Westminster Review makes a comparison of the physique of the British public school boy of to-day with his predecessor, taking Marlborough and Rugby as examples. The Marlborough measurements were taken from 1874 to 1901, and those of Rugby from 1879 to 1901. The advantage is shown to be with the modern boy.

Renewed and earnest attention is being directed in England toward a short transatlantic route. One of the best natural harbors in the British Isles is that of Galway, on the west coast of Ireland. Almost straight across the Atlantic is St. Johns, Newfoundland. The distance between these two outposts is but 1816 miles; from Liverpool to New York it is 3116 miles, and from Southampton 3095 miles.

Year by year the number of American writers who can live by the pen is increasing. Last year our authors produced 5210 new books as against 2623 from abroad. The tables have been turned, and England is now importing American books, whereas a decade ago the current flowed almost solely in the other direction. It can not yet be said that American fiction averages as well in quality as British fiction, but that is was brought home by a local resident only a matter of time.

The practice of fishing for market with gillnets has been carried on to a greater scale than ever this spring, and during the present closed season for black bass, they have been peddled about town, and while not exposed in open market, the initiated could buy them from their concealment in the refrigerator. Pickerel and panfish, upon which there is no closed season, have fallen by bushels into the hands of netters and sold in the open markets.

Options On Land. For some time past a stranger has been tramping through the country about Central Lake, following up the small water courses and gathering mineral specimens which he seemed to regard with special favor. Incidentally he obtained options on quite a number of pieces of wild land. Now it has turned out that he is an oil prospector and considers the signs right for finding petroleum. A test well will soon be put down on some of the land on which he secured options, and the residents thereabouts are anxiously awaiting the outcome.

Justice at Last.

The upper peninsula finally furnishes a case where the right man was drowned in one of those rock-the-boat accidents. He was a woodsman, and companions, in rocking the boat in which they were crossing the Tahquamenon river. Contrary to all precedent, when the boat upset the others all saved themselves, while the boatrocker was drowned.

Gold Brick Paving.

South Haven's first piece of pavement is now being laid, and as a sort of celebration of the importance of ceremony by the mayor in the presence of the city officials and citizens. The gold brick, it is said, is one which on his return from a trip to New York last summer.

The cattle were valued at about \$350.

Rare Money.

Fred Lortie, of Galesburg, has in his possession two coins that it would be difficult to duplicate. They are silver dollars of the years 1798 and 1799, and are in a remarkably good state of preservation. Another curiosity is a sample of the original continental currency, calling for "two and two-thirds dollars in gold or silver coin," and

Peculiar Accident.

Jane Connelly, the 13-year-old daughter of a farmer living near Cedar Springs, met with a peculiar accident while she was lying on a sofa. Arthur Hall of Berlin township, Ionia county, got a birdseye view of his farm the other day, and while it made a beautiful picture, clad in springtime verdure, he is not anxious for another look taken in the same manner. He tried to drive a bull out of the barnyard, and the bull resented his interference by throwing him 100 feet into the air. Sorrow of Bike Friends. A Flint woman, who lives on corner, has been much annoyed by bicyclists "cutting corners" right across her lawn, much to the detriment of the lawn's appearance. She didn't go to the police, however, for relief; she knew a better way than that. She bought a couple of papers of tacks and scattered them along the path, and when the next wheelman came along there was something doing. After a lot of tires had been punctured some of the bicyclists complained to the police, but all the satisfaction they got was that they had no business on the lawn, and if they weren't willing to take chances on anything the owner might put on it they would better keep off private property.

Increase Vine Area. Grape setting for 1903 is practically finished at Lawton, twice as many vines having been set as in any previous year. Actual sa'es have been made to the extent of 2,537,000 vines, or enough to set nearly 6,000 acres. all of which will be added to the already large acreage of grapes in that immediate vicinity. This practically new and rapidly growing industry is giving employment to hundreds of people. There is no apparent danger of overloading the market, as the grape juice factory is shipping not only to all parts of this country, but also has a ready market in England

Build Wood Walks.

It is expected that a number of miles of cement walk will be laid in Pontlac again this season, the city having determined to pay 50 per cent of the cost of cement walks and having determined that all new walks must be of cement. During the past two years the city has laid many miles of this kind of walk on the basis that it is cheaper to build good walks than to pay damages resulting from injuries on defective walks.

Lightning Strikes Man.

Lars Anderson, a laborer who was employed on the Mausaukee-Dunbar branch of the Chicago, Milwaukee & St. Paul road, near Athelstane, a little place not far from Mausaukee, was struck by lightning. Not only was Anderson struck by the bolt of lightning, but six other section men of the St. Paul road, who were with him, also received severe injuries.

Evidently that proposed amendment pending before the legislature requiring candidates for physicians' certificates to be well grounded in the ordinary educational branches is needed.

Bass are Plentiful.

The opening of the bass fishing season was characterized in Oakland county by a rush of fishermen to all the good fishing lakes of the county. Fishermen report that bass are more plentiful than usual this season and the closed season up to the present time makes bass fishing great sport.

Flint's Bond Issue.

Flint is having trouble disposing of its recent bond issue of \$82,000, the best offer received being \$400 under the par value. This could not be accepted, as the city charter provides that bonds must not be sold at less than par.

MICHIGAN LEGISLATURE.

Congressman Smith, of Grand Rapids, has written Representative Colby on the matter of the primary election bill. "Permit me to say that I am unhesitatingly and unqualifiedly in favor of this proposition, the effect of which I think will be wholesome, and is certainly in line with public sentiment expressed in many states of the union, and in addition the national house of representatives have twice passed a bill having the same general object in view. As I said to you in my former letter regarding the primary election law I believe that the public service will be improved when nominations are made directly by the people, and I sincerely hope that the legislature may see its way clear to give force and effect to the sentiment widespread throughout our state regarding this matter."

Some of the members of the house are beginning to realize that it might be well to shut off the establishment of new institutions, as it means the raising of taxes not only for the buildings and sites, but means additional annual expense for maintenance, and when once established the boards of such institutions are always lobbying and scheming for more buildings, additional land, etc. It is being pointed out that while Michigan's population is increasing the number of inmates in her public institutions is growing much faster, and taxes are piling up out of proportion to the increase in population.

The primary election bill seems to be gaining headway. On Thursday some of its opponents expressed slightly altered views. Amendments are now being prepared at the instance of the opposition which propose that candidates for county offices, members of the legislature, and candidates for governor shall be nominated by direct vote of the people, and by the time the conference committees get together again next week it is quite likely that some arrangement with the house will have been arrived at.

Following is said to cover the es sential points of the new libel law which may be introduced at this session. The bill provides for the collection of damages by offended parties for carelessness in or lack of reasonable investigation before the publication of untrue statements whether such statements are libelous or not; provides for the collection of damages by parties who suffer mental anguish from statements in the public press, whether true or not.

The following appropriation bills. aggregating the sum of \$443,000, are before the senate committee on finance and appropriation, and will probably not be passed this session: Governor's mansion at Larsing, \$50,000; White Cloud hospital and sanitarium, for consumptives, \$95.000; additions to the state capitol building, \$253,000; psycopathic ward at the University of Michigan hospital, \$12,000; monuments at

The bill providing that retail deal ers proposing to sell stocks of goods in bulk, which was vetoed by Gov Bliss, was introduced by Senator Brown, of Lapeer, who fought Gov. Bliss's plan to secure the establishment of a separate institution for epileptics, and intimations are heard that the governor took revenge. Senttor Brown is trying to line up enough members of both houses to

pass the bill over the governor's veto. Gov. Bliss has signed the bill to pro vide indeterminate sentences for crim inals. The original bill was introduced by Vaughan, but the house substituted the measure that finally passed both bouses. The governor also signed the bill providing for the junket to Georgia to dedicate the monument at Anderson-

The house has passed the Ferry bill to provide that upon petition of 500 or more qualified electors of Detroit all propositions for new franchises, or extensions of old ones, in Detroit streets, alleys and public places, shall be submitted to the people.

After many weeks of talk the bill appropriating \$250,000 for a soldiers' monument on the capitol grounds at Lansing was put through the senate Tuesday, but there was considerable opposition.

The fire warden bill came up in the house Tuesday afternoon and was agreed to. It allows the land commissioner to appoint a chief warden at \$800 a year, and all supervisors, mayors of cities and presidents of villages are made deputies at \$2 a day.

Ex-Senator Earle's good roads bill has been reported out by the house ways and means committee. It originally provided for a yearly appropriation of \$10,000 for the good roads commission, but this was reduced to \$5,-000 a year.

The appropriation for a Michigan exhibit at the St. Louis fair which the senate passed at \$125,000, was cut by the house to \$50,000, which may result in a compromise of \$60,000 or perhaps \$75,000. The bouse adjourned to Monday

NEWS OF THE WORLD

Brief Chronicle of Matters of Importance

********************************* The singular state of mind of the tewnspeople of Kishineff, Bessarabia, while they were massacring the Jews

is described in a letter from a nondressed the occupants good naturedly saying: 'Poor brethren, we must kill you. It is so ordered.'

"The state of terror of the Jews at Kishineff continues. A fresh massacre is expected there and the Jews of Odessa and all large towns of Bessarabia are living in hourly dread of death. The whole province seems to be in a state of fanatical fury against the Jews. The excitement is intensified through proclamations distributed in the streets and the tone of the bitterly anti-Semitic newspapers. The Russians say:

'It is the czar's will that the Jews be everywhere robbed. Orders have been given that we start again at Pentecost.'

"Unless the St. Petersburg government develops a more energetic policy the events at Kishineff will undoubtedly be repeated in other towns."

The Deadly Automobile.

In view of the number of accidents some fatal, in the first stage of the Paris-Madrid auto race from Versailles to Bordeaux, Premier Combes has forbidden the continuance of the contest on French territory. The second stage of the race, which was to have been continued Tuesday, included a run over French territory from Bordeaux to the Spanish frontier. Premier Combe's action will probably lead to the race being abandoned. Dispatches arriving from points along the course give an appalling list of fatalities and accidents. The most terrible occurred near Bonneyal, 19 miles from Chartres. where machine No. 243, driven by M. Porter, was overturned at a railroad crossing and took fire. The chauffeur was caught underneath the automobile and burned to death, while two soldiers and a child were killed.

Oppressed Jews Coming.

To Chicago alone it is said 6,000 persons from Kishineff and other stricken towns in Bessarabia will come, that number of tickets having been sent from here by friends and relatives of the Jews there. Although the public relief funds raised in this city have been remarkably large, having reached about \$9,000 on the west side and \$10. 000 at the Lakeside club, inquiry among Russian Jews in the Ghetto has shown that perhaps even more money than they have contributed to the public funds has been sent privately in the form of tickets to this country and postal remittances. A careful estimate of the amount that has been expended himself through the head at Baltima Chickamauga and Chattanooga, \$30,- privately has been made by several He had money in every pocket and a leaders among the Jewish people in the Ghetto, and it is believed to amount

Either Postmaster-General Payne or First Assistant Postmaster-General Wynne must leave the postoffice department within the next few months because of the conditions arising from the investigation into the postal service. This statement was made by a former member of the postoffice committee of the house of representatives, whose interest in the affairs of the department makes him an exceptionally reliable source of information in such a matter. This gentleman says that both Mr. Payne and Mr. Wynne fully realize the situation and that they expect a crisis shortly after President Roosevelt's return to Washington, two weeks hence, or possibly closely following the end of the investigation.

Every sunny day you could see him in his wheel chair or limping painfully along, Tod and Tucker trying to help on one side, and Marthy and Emmy on the other. It troubled them not a little that grandfather, who was the bravest of the brave and the truest gentleman on the whole earth, should wear clothes that were shiny and frayed and had been worn for many, many years. ALASKA A GREAT COUNTRY.

People of the Rest of the United States

Do Not Understand Its Extent. The present collector of customs at Sitka, Alaska, Lieut. D. H. Jarvis, formerly in the revenue cutter service, has recently been in Washington conferring with treasury officials. He says: "The only trouble with Alaska is that the people of the United States do not know what a country it is. A campaign of education in the United States would add to the population of Alaska by many thousands and would soon make it one of the great countries of the world. The possibilities of the territory are beyond comprehension. Leaving out mining-for every body knows that Alaska is rich in gold and silver—the future of the territory will be a brilliant one of commerce, cattle-raising and agriculture and fishing. There is the greatest ignorance about Alaska. Why, some of the rich islands of the territory are larger than several of the small states of the United States. There is a coast

"The grass in spring and summer grows temptingly green and cattle and sheep grow fat and contented. As to vegetables, there is hardly a place in Alaska where they will not attain splendid growth. Of course the interior of Alaska, far back from the coast, is cold and the summer short, but there are hundreds and thousands of the most fertile valley in the interior where vegetables : ill grow easily. Sitka is no further north than Glasgow, Edinburgh or Copenhagen, and its climate is more temperate than any of them."

at once appropriated, opening on the | few buscults and some pieces of sugar. Story of Depravity That is Sent Us from Russia.

A story from Russia that may soon be expected to make its exaggerated appearance in the American "yellows" concerns a young woman of good family who was hynotized by her husband with the idea of having her commit suicide so that he might receive the money for which her life was insured. At the time of her marriage, about a year ago, Mme. Wasilevsky was a lively young woman, buoyant with health and spirits, and she and her husband, supposed to be a wealthy private gentleman living on an inherited income, went for a year's travel. At the end of that time the young bride returned so changed in appearance and health from causes so obscure that the physicians decided to try to discover the trouble. The patient resisted for a time, but finally yielded to the doctors' influence and told her story. From this it appeared that her husband had insured her life the day after their wedding, and had a clause inserted in the policy providing that in the case of her suicide he would receive the insurance money.

Wasilevsky then proceeded to hypnotize his wife, and while she was in the trances to influence her gradually to commit suicide. The scheme had to be carried out slowly, as the policy did not come into force until a year after it was signed.

Ranching in Michigan.

The Alpena Ranch Co., incorporated with \$20,000 capital by a number of men at Cass City, filed articles of incorporation with the secretary of state to-day. The company proposes to purchase lands from the state, ditch, fence and reclaim unproductive tracts, buy and sell lands and raise stock and farm products. The company was brought into existence by reason of the prospect that northern Michigan lands will become valuable for farming, the bargain sales of the state being an additional inducement.

CLARA HEMENS.

One of Chelsen's Popular Teachers Diss with the desolation wrought in other After a Torrible Sickness.

Miss Clara Belle Hemans, whose fight for life was watched by so many symthe sacrifice of those days may not be pathizing friends, died Friday, May 22nd. For days hope lingered that she would vercome her terrible malady, but the chances at all times were very meager and the end came not unexpectedly.

Miss Hemens at the time when she was forced to leave her work was about completing her fifth year as a teacher in the Chalsea schools; and having remained here so long and with satisfaction to all she was therefore much respected and loved.

She was born in Jackson, November 18, 1868. Unfortunate domestic surroundings, the worst being the effectual loss of her mother through insanity, early forced upon her the trying realities of

She early began teaching, her first school being the Schenk school west of enlisted under excitement, some went

As a teacher she rose to a high rank and Mr. Gifford, supertendent of our schools, speaks of her abilities in the highest terms.

Her sickness was of a very unusual order and is described as a cerebral abscess in the report of her death to the state. Aside from any technical medical description it may be said that abscesses formed between the outer and inner bones of the skull where the two layers of bone are more widely separated above the eyes. One abscess made itself apparent and was relieved, but the other did not and came finally to result in blood poisoning. It is said to be an unusual case in medical annals.

The fureral was held Monday from the Congregational church, Rev. C. S. Jones officiating. After the services the body was placed aboard the 2:30 west bound express and taken to South Lyon, the home of her uncle, Sylvanus Heman, for interment.

mmmm KHDARE'S RISE FROM THE SLUMS

The February number of "Success" contains the true life story of Owen Kildare, written by himself. Eight years ago he could not read and write. To-day he is the author of a number of short stories and magazine articles which have been published in leading periodicals. His forthcoming book, "My Mamie-Rose," will be published by Lothrop & Company of Boston. For lack of space we are unable to publish the first half of Mr. Kildare's blographical sketch, which describes his childhood, but give the last half, which describes his redemption from the slums of New York.

At the age of seven I stepped from my childhood into the street, where by right I belonged, and began the journey which, through many years in the valley, led me to the most glorious heights.

Most of the years of my life were idly spent in and around the Fourth Ward, where there are plenty of opportunities, but I never felt the stirring impulse of ambition until man's estate was reached.

One day, "Skinny" McCarthy, by ways which would not bear close scrutiny, had secured some money, and the "gang" most genially, helped him to spend it at the bar. When the feast had run its course, we trailed back to our kegs at the curb. I was first, McCarthy following me. I was resuming my seat, when a stifled cry attracted my attention. Turning, I and, as usual, I prepared to laugh at the gay spectacle. Before my facial muscles had time to shape themselves into a grin, the girl looked at McCarway which said, as plainly as words: "And you are men!"

I could almost believe that I felt the physical sensation of something snapping within me, but I did not stop to explain it to myself. Instead, 1 rushed toward them, hit my fellowbrute under the ear, and cleared a passage for the young lady.

With the closing of the crowd behind us,-poor McCarthy, in his stunned condition, furnishing quite an interesting sight to the silly gapers,the reign of the brute in me was ended and the man born.

As this was my first attempt at playing the chivalric knight, I found it impossible to fit myself to my new role. Somehow impelled, I walked beside the young lady, acknowledging her expressions of gratitude with deep-toned grunts. To explain mat- me. ters, she told me she was a teacher every day on her way to and from home. In exchange for her confidence I should have introduced myself, but, alas! a big, hulking oaf knows naught of politeness.

But the bonny little lass was a marvel of tact and diplomacy. She put me on the witness stand and crossexamined me, firing leading questions at me until I was really ashamed at having told her so much about myself. When we arrived at her door. the wise counselor began to sum up, closing with an eloquent appeal to my manhood.

I was not permitted to depart until I had promised to forego some of my habits. I tried to sneeringly laugh at this, but the laugh was rather forced. Instead of returning to the "hangout," I went to City Hall Square and walked and walked,-and began to think. Could it be possible that all my life had been wasted? Did my notoriety, my reputation, amount to nothing? Could I be justly proud of myself? Had I ever done anything of benefit to others, or had I been always selfish and greedy in satisfying my material desires? Did I really have a soul?

That was my mental state for the night and the following day, and, as one cannot do much reflecting in a saloon, I kept away from there. I really do not know what prompted me to it, but I found myself in the neighborhood of the school as the classes were being dismissed. As I saw the little tots clinging to her skirts from very love of her, I seemed to hear a message whispered to me, and-I nailed my sailing flag to the mast of purity.

She saw me, and, when she heard of my determination to act thenceforth as her bodyguard, she chided at first, but then laughed and told me I was very kind. I wish you could realize my feelings when she, the first to do so, told me that. Surely the dangers along the journey to her home were trifling and few, but no proud queen in days of sword and lance had more devoted cavaller to fight, die, or live for her. That seemed to be my sole duty. This new feeling of vague happiness had benumbed me, and, though I was then leading a more decent life, it was still aimless and without purpose. However, God does not send angels into the world without

We had arrived at her door on a beautiful afternoon, and I was on the point of taking leave, when she handed me a card and asked me a question concerning it. My fairy palace of bliss crumbled to pieces. I could not cipher or decipher my own name. What else could I do but slink away to hide myself, my ignorance, my taken a step, a little hand grasped my arm, and, then and there, took up its faithful guidance of me, and every

fiber of my big, ungainly frame thrilled at this waking of a better life. and then we understood. Then the sweet professor, besides her class at school, saddled herself with this unwieldly, husky kindergurten. Never was the alphabet more quickly mastered, and "cat, cat," and "rat, rat," were spelled by me in a surprisingly short time. Who would not have learned quickly with such a

teacher?

One thing which I can never emphasize sufficiently is the sacrifices that little woman underwent for me from the beginning to the very end. She was the main support of her mother and a young invalid brother. Besides these two, she bad only one other relative, an elder brother, in a far western city. They were refined people, and you can imagine what it meant to them to have a big, uncouth fellow intrude into their home circle, shall never forget the horror-stricken countenance of her mother at my first appearance for my private lesson. It needed no interpreter to read the question of her eyes: "For goodness' sake, where did this come from, and what is it?" But I found a dear little ally in my teacher's brother, whose willing horse I was for many a ride; wild and hazardous, from kitchen to parlor. That first peep into real home life fairly upset me. Since then I have seen many more luxurious places, but none where my heart felt so much at home. Every detail of it taste of the modest decorations,-and set my jaws and said, "I, too, will for myself, but-" Ah, but it was too

To dream of things will never bring them to you, and, as people who had known me had always given me credit for stubborn determination in wicked pursuits, I resolved to apply this say McCarthy in collision with a girl, determination to a better end. I looked for work,-good, honest, hard work. My experience surprised me. Only a few months had passed since my transformation, but it had been thy, at the others, and at me, in a noted by men whom I had thought indifferent to my fate. I can say, with the utmost conviction, that, if a man determines without compromise to do right, he will find friends, all willing to help him along, among those he had expected to prove nothing more

early to dream too far!

than mere acquaintances. I went to work at one of the steamboat piers as a baggageman,-sometimes referred to as a "baggagesmasher,"-at eight dollars a week, a smaller amount than I had often "earned" in one night in the dive. On my first pay day, those eight dollars were recounted by me innumerable. times; not because I was dissatisfied with the smallness of the amount, but because I felt good, really good, at having at length earned a week's wages by honest toil. Every one of those bills had its own meaning for

Of course, my teacher knew of my in one of the near-by schools, and employment, and, with my first pay, Then I learned to weep tears of anbought a little gift for her. It also gave me a pretext for explaining to her my future plans.

Much of her time had been taken up with me, and I owed all of my new life to her endeavor. It would have been an imposition for me to trouble her any longer, especially when I had steady employment and could attend evening schools and study at home in spare hours. I wanted to thank her. and not be quite so conspicuous where, because of social differences, I did not belong.

I said something about coming from the gutter. She would not listen to it. As to coming from the gutter, why, many a coin is dropped there and remains there until some one picks it up and, by a little polishing, makes it | peated later,-and the expense, with as good as it ever was.

So we went on, elaborating the educational course by hearing lectures here and there, and by reading standard works by the best authors. For the summer months we arranged a series of excursions. On one outing she would be the supreme director and dictator; I, on the next. Candor compels me to confess that my excursions always led us dangerously near to Coney Island, if not quite to it; yet people can enjoy themselves even there, for it is the same old ocean, and the same sea air there as elsewhere, and it only lies with the visitor how to spend a holiday.

On her days, I was always kept in the dark as to our destination until we reached it. It invariably proved to be some quiet country place, and, after depositing the luncheon in a shady spot, the "professor" would trip from flower to flower, from tree to tree, and deliver little sermons on birds, flowers, and minerals. It was the most efficient way to teach me the difference between a pine tree and a rosebush. There never were other days like them, and, surely, there

never will be again. We had then known one another for a long time. I had become capable of reasoning, and I had grave cause for doing so. Was it all for the best? Love is no respector of persons. It comes to all, rich and poor alike. Will it, then, surprise you to know that constant companlonship with my mentor had awakened in me thoughts very foreign to grammar and arithmetic? I loved her; I knew it, but I also felt that that love was destined to be buried unsatisfied.

That is what my reason told me, but in my heart there echoed a stirring hymn of fondest hope. It would not let me rest, and I became a pestering nulsance to my teacher, Many times daily I would ask her the questions, "Why do you undergo this ceaseless labor?—why do you set yourself this gigantic task of trying to make of me a man?"

As in all other matters, in my lovemaking I was rough and uncouth, and an answer to my question was long

Naturally, this gave me an in creased impetus to earn more money, and I put enough zeal into my work to receive several increases in salary. Nevertheless, I often thought it so out of proportion to desire that I doubted if my little lady would consent to marry a chap who was nothing more than a "baggage-smasher." My wise standby thought differently, and

called my attention to the fact that a "baggage-smasner" need not always remain one, and that most presidents and heads of noted companies and corporations had begun, as I had, at the bottom of the ladder. I felt better on hearing that, and, in my greediness, imposed on her still further. In spite of my years, it was not until then that I knew what it is to love and to be loved, and, for the first time in my life, I was supremely happy.

Success without thrift is barely possible. My salary was more than ample for my needs, and I had quite a sum in a savings bank. With the aggressiveness of a capitalist, I began to urge matters, and, with the consent of her mother (then my dearest friend), the date of our wedding was set for February.

In January, we were out on one of our usual rambles. It was one of those mild winter evenings which make our climate so uneven. A showwas noticed by me,-the neatness, the | er fell, and we were caught in it. We were only a short distance from her home, and she wanted to reach it behave a home, and, perhaps, not only fore the shower should become a downpour. In vain I tried to put my coat over her, the plucky girl only laughing and hurrying the faster. The exposure to the rain easily brought on what was at first considered "just a trifling cold," but the beginning of the end had come.

For weeks she painfully lingered on her bed, and I marveled with awe at the heroic spirit of my little girl. In all her conscious moments she spoke to me with the wisdom of another world, and gave me then her legacy of purest, godliest love. The afternoon sun was low one day when she asked me to lift her to the window. I took into my arms my sweet burden, and we looked in silence on the street beneath us. It was a humble neighborhood, devoid of all picturesqueness. All we saw in the last sheen of the sun's departing rays was a little girl playing with a kitten, but we watched, my beloved one with smiling interest, until she grew tired and returned to her couch. Sitting by her side, still confident, I was lulled by the quiet and the memory of her happy smile, and fell asleep.

Suddenly I was awakened. Her hand was not in mine. Her mother knelt beside the bed. I understood. and all that I had learned was forgotten in an instant. The animal, so long subdued, arose in me with fury. guish, but I laughed at Providence and scorned divinest solace, until my brain went whirling into madness. With the morning sun came saner. holier thoughts, and from her sacred features a message came to me. I knelt and prayed, "Thy will be done."

Soon after the funeral the mother and the little brother went West to the elder son to make their future home with him. I was ill for some time, but found my position still open for me after regaining my health. I was not quite so strong as I had been, but did not wish to neglect my work, and, overtasking myself, an accident permanently incapacitated me for that kind of employment. I had to submit to an operation,-to be rethe long, enforced spell of idleness. soon exhausted the remainder of my

I had no fear that I would revert to my tormer ways of wickedness. I had learned to understand life, felt mind and soul within me, and I wanted to go on, not back; and, besides, there was the legacy of her who had taught me all this.

Some, who will approve of my determination to go on, might disapprove of the method employed. But, I had to go to work, and to accept the first chance offered to me, becoming a dish-washer in a downtown lunch room at three dollars a week. It was unsavory work, but it was work, and left me time the evenings and on Sundays to read books so well beloved by me, and then my only companions.

I began then to write, and have been writing ever since for newspapers and magazines. Brilliancy, elegance of diction and a choice vocabulary will not be found in my stories, but the truth is there, and that is something.

In that direction now lies my ambition: I want to be a writer with a purpose. I want to tell the plain truth about men and things as I know them and see them every day in the homes in the tenements, in these abodes of friendless, hopeless men, many of whom were once as "good," as respectable, as any of my readers. I want to dedicate my pen, no matter how ungifted, to their service, that others may know, as I know, where fellow beings begin to rail against their God and men, because they deem themselves forgotten. I want to show that, often, it is their hearts which hunger most, and not their stomachs, and ask you to believe that they, as well as others, can feel hunger and cold, and can also love

I know there is work in that field for me, and it is my ambition to besome successful in it and worthy of it; as a proof that one of God's sweetest daughters has not lived and died

"Yes, madame." "Poor Jacobus! Till I be key-cold lead. I shall never forget my first sight of him in that dreadful place-" and then she described her overwhelming emotions when she perceived he was alike apathetic to his pauper condition, and to her love and presence. There never came a moment during the whole visit when it was possible to speak of Hyde. Madame seemed' to have quite forgotten her liking for the handsome youth, it had been swallowed up in her adoring affection for her restored husband.

One morning, however, the longlooked-for topic was introduced. "I had a visit from Madame Van Heemskirk yesterday afternoon," she said. "and the dear old Senator came with her to see Capt. Jacobus. "I have been thoughtiess, selfish-He knew nothing whatever of Lord Hyde's offer until I had been subjected to such insult and wrong as drove me to the grave's mouth. Only the mercy of God and my father's skill, brought me back to life."

"Yes, I think your father to be wonderfully skilful. Doctor Moran is a fine physician; Jacobus says so." Cornella remained silent. If madame did not feel interest sufficient in her affairs to ask for the particulars of one so nearly fatal to her, she determined not to force the subject on her. Then Jacobus rang his bell and madame flew to his room to see whether his want had received proper attention. Cornelia sat still a few moments, her heart swelling, her eyes filling with the sense of that injustice, harder to bear than any other form of wrong. CHAPTER XII.

A Heart That Waits.

Late summer on the Norfolk Broads! And where on earth can the lover of boats find a more charming resort? Close to the Manor of Hyde, the country home of Earl Hyde in Norfolk, there was one of these delightful Broads-flat as a billiard table, and hidden by the tall reeds which bordered it. But Annie Hyde lying at the open window of her room in the Manor House could see its silvery waters, and the black-sailed wherry floating on them, and the young man sitting at

As he spoke these words Mary Damer entered, and she laid her hand on his shoulder and said, "My dear Doctor Roslyn, after death what then? we are not all good-what then?"

He looked at her wistfully and answered, "I will give you one thought, Mary, to ponder-the blessedness of heaven, is it not an eternity older than the misery of hell? Let your soul fearlessly follow where this fact leads it; for there is no limit to God's mercy."

Then he rose and went away, and Mary sat down in his place, and Annie gradually came back to the material plane of everyday life and duty. Indeed Mary brought this element in a very decided form with her; for she had a letter in her hand from an old lover, and she was much excited by particulars with Annie.

"It is from Capt. Seabright, who is now in Pondicherry," she explained. with fruit trees and vegetables. The 'He loves me, Annie. "There is Mr. Van Arlens to consider. You have promised to marry him, Mary. It is not hard to find the

right way on this road, I think." "Of course, I would scorn to do a dishonorable or unhandsome thing. But is it not very strange Willie Seabright should write to me at this time? How contradictory life is! I had also a letter from Mr. Van Ariens by the same mail, and I shall answer them both this evening." Then she laughed a little, and added, "I must take care and not make the mistake an American girl made, under much the same circumstances."

"What was 'it?" inquired Annie languidly.

"She misdirected her letters and thus sent 'No' to the man whom of all others, she wished to marry."

As Mary spoke a soft brightness seemed to pervade Annie's brain cells, and she could hardly restrain the exclamation of sudden enlightenment that rose to her lips. "Mary," she said, "what a strange

"So am I. She is a great beauty. Her name is Cornelia Moran; and her father is a famous physician in New York."

"And this beauty had two lovers?" "Yes; an Englishman of noble birth; and an American. They both loved her, ad she loved the Englishman. They must have both asked her hand on the same day, and she must have answered both letters in the same hour; and the letter she intended for the man she loved, went to the man she did not love. Presumably, the man she loved got the refusal she intended for the other, for he never sought her society again; and Mr. Van Ariens told me she nearly died in consequence."

"And what became of the two lovers, Mary?"

The Larder Beetle.

J. P. Aberli, a Kentucky reader of the Farmers' Review forwards a little beetle and says: "Here is a bug that a neighbor brought me, asking what could be done to destroy same. It gets through cotton sacks and eats holes in hams, with the result that small skippers appear. What can be done to exterminate them?"

We forwarded the insect to the Kentucky Experiment Station and received the following reply:

To the Farmers' Review:-The in-

about one-fourth inch long, black, with a gray area at the bases of the front wings. It is well known everywhere as the Larder Beetle (Dermestes lardarius), and feeds upon dead animal matter of various sorts. It is at times very destructive to preserved skins, and attacks hams as noted by your correspondent. The young is not a "skipper," however, but a rather hairy worm that can creep, but never leaps. These worms commonly live on the outside of preserved meat, but penetrate it when ready to become pupae. The adult beetles enter dwellings in the spring, and then place their eggs on anything that will afford food to their young. They may be kept out by the use of screens, such as are used for flies and mosquitoes. But once on meat they should be removed by trimming away the infested parts, and then putting the meat where the adults cannot get to it. Under some circumstances it is possible to rid objects of the insects by fumigating with bisulphide of carbon. This is especially good for intested skins, and may be used without danger of injuring dried meats.-H. Carman, Entomologist.

Energy in Fighting Insects.

Spraying is not something that can wait on everything else, or, in fact anything else, says Prof. F. M. Webster. When the time comes, it must could he have found out the mistake? be done promptly or good results can-Do you think the girl herself found it | not be secured with the most effective insecticides. It seems, sometimes, as though there was a human aversion Mary. "She would have written to to spraying or, indeed, fighting insects at all, at the proper time, and that it took a lot of stamina to pull one's self together and put forth the effort at the right time and in the right manner.' I do not know whether frequently so minute, or whether it is because we have insects always with us, and familiarity breeds contempt. Certain it is that the contempt and neglect are common everywhere among our people, and I do not know that they are worse in one state " an in another.

Plant Pears in Sod.

From Farmers' Review: We have found by experience that pears should always be planted in stiff sod and not even be muched with straw. Coal ashes may be put around them but never spade around them, as not spading will cause them to grow slower, but not blight like those of quicker growth. We planted about '75 pear trees some eight or ten years ago. Those which we planted in cultivated land are nearly all dead, while those planted in stiff sod have given more fruit than all the rest. They blight but little, grow very slowly and do not seem to need cutting the tops back. I think it is also a benefit never to trim them, except to cut out dead branches; but those set in stiff sod have scarcely any dead branches: -Mrs. L. C. Axtell.

Keeping Dirt Out of Milk. The greatest of efforts should be

put forth to keep dirt out of milk, in the milking; for after it is once in, removal in toto is absolutely impossible. In our sanitary milk dairies covered mille pails are being quite largely used. In a test at the Storrs Station it was found that milk drawn into such a pail was cleaner without being strained than milk drawn into an open pall and afterwards strained. In one test the amount of dirt in the milk where a covered pail was used was 37 per the latter milk was strained less than half of the dirt was removed, it being estimated that 53 per cent remained. This was 16 per cent more than the total dirt in the other milk. When the latter was strained the amount would be still further reduced. When milk is drawn into an open pail a very large number of acid ferments get in from the air. The strainer removes few of these. In a test at the station mentioned above only 17 per cent of these acid ferment bacteria could be removed by the strainer. But acid ferments are not harmful and their exclusion is of not much moment. What we do need to keep out of the milk is the whole array of disease producing germs, which so often thrive in the alth of the stables. We would advise the use of the partly covered pail in all milking, as thereby the exclusion of much undesirable matter from the milk is certain.

One method of soil impoverishment is milk shipping with no provision for keeping up the land. This is a kind of dairying that does not keep up the fertility of

Catarrh Causes Female Diseases.

America is the land of nervous women

The great majority of nervous women are

so because they are suffering from some

form of female disease. By far the great-est number of female troubles are caused

directly by catarrh. These women despair

of recovery. Female trouble is so common, so prevalent, that they accept it as almost

inevitable. The greatest obstacle in the way of recovery is that they do not under-

The Boys from Ingham County Outclasse by the Local Team. Demonstrated that Team Work Not Individual Excellence

Last Saturday the baseball team of the Stockbridge high school came to Chelsea to meet the Junior Stars, pretty confident because of their previous five victories that they would lift another scalp. They hankered mightily for the top hair of the Stars because of, their growing reputation throughout the state. But their desire was not to be fulfilled and they were sent back cross county empty handed, except that they earned for themselves the reputation of being a attended Bentley's Show at Unadilla sportsman like lot of young fellows who did the best they could and died game. In the beginning the situation seemed

to spell Stockbridge but the steadiness of the Stars prevented any scoring though it looked very much as if it must happen. After the first inning the visitors appeared quite an easy proposition until the fifth luning when they scored five runs because of some errors and effective hitting. On the part of the Stars they usually

kept the ball rolling in some direction and when once the runner reached first his base running ability usually soon placed him on third from whence he was scored by a hit or an error. In the field the locals easily out point-

d the visitors. Anything hit to the in field was as good as out if anywhere within reach. Raftrey at third put up a noticable game which was only mared Doctor DuBoise and wife were recent- by dropping a fly when he slipped on The game was interesting at many

stages and pretty well enjoyed by those present. The score by lunings. Junior Stars 1 2 2 0 2 1 2 4 *-1 0 0 0 0 5 0 0 0 1 - 6

THE WASTES OF THE BODY. Every seven days the blood, muscles and bones of a man of average size loses two pounds of wornout tissue. This waste cannot be replenished and the health and strength kept up without perfect digestion. When the stomach and digestive organs fail to perform their functions, the strength lets down, health lves way, and disease sets up, Kodol Dyspepsia Cure enables the stomach and gestive organs to digest and assimilate all of the wholesome food that may be eaten into the kind of blood that rebuilds the tissues and protects the health and strength of the mind and body. Kodol cures indigestion, dyspepsia and all stomach troubles. It is an ideal spring tonic.

Hearts

one hundred advised ticket agents are authorized to can remember when it was simple indige tion. It is a scientific fact that all cases of heart disease, not organic, are not only traceable to, but are the direct result of indgestion. All food taken into the stomach which fails of perfect digestion ferments and swells the stomach, puffing it up against the heart. This interferes with the action of the heart, and in the course of time the delicate but vital organ becomes diseased.

Mr. D. Kauble, of Nevada, O., says: I had street trouble and was in a bad state as I had heart trouble with it. I took Kodol Dyspepsia Cure for about its months and it curad me.

Kodol Digests What You Est and relieves the stomach of all nervol strain and the heart of all pressure. Bottles only. \$1.00 Size holding 2% times the this size, which sells for 50c.
