then risked one eye around the edge of out. then risked one eye around the edge of a cloud for a look at the pitchers' battle between Rogers of the Stars and Krapp of the Detroit Banners going on at K. of P. park. The pitching was good, but there were other features that discouraged Old Sol and he covered his face. But he kept coming out for it is one of those games that keeps all the onlookers that he was a great pick up but the fielder failed to hold the hall Rogers struck out. Raftrey got a life. on fielders choice but Cook was put out at second and G. BeGole flew to pitcher. Diedrich was out Cook to BeGole. Tott got a scratch hit and stole second and scored on a passed ball. McGuiness made a fine catch of Reichel's high fly, Rutz gained first on Raftrey's error but

they have played this year.

The Banners are good, but the player that made them easy winners was their pitcher. In all 38 Star batsmen faced him and not one secured a safe hit and nine struck out. But if he was one of the best "kid" pitchers seen here this year then that judgement gives a line on Rogers that makes him look good. He was close after Krapp in his good pitching. Rogers struck out 13 Banners and allowed only eight hits, only two of them coming in the same inning.

The game by innings was played as

BROOKS-HUGHES.

Pretty Wedding Wednesday Evening a Which Two Popular Young People Were Made One.

The marriage of Mabel Brooks to Ton Hughes occured Wednesday evening at 7:30 o'clock, at the home of the bride's parents, Mr. and Mrs. Frank Brooks.

The wedding was delightfully inform al but nevertheless a very pretty one The groom and bride elect received their friends at the door until the hour appointed for the ceremony when followed by their father and mother and immediate relatives they took their place at the bridal altar and were married by Rev. C. S. Jones.

The bride wore white mull and looked very pretty. After the ceremony the congratulations of the fifty and mor ats present were received, following ich a fine luncheon was served.

which a line luncheon was served. There was a fine array of presents ranging from the practical and always useful to the dainty and ornamental.

The happy pair left on the evening eastern train for Niagara Falls and other points east. They were followed to the train by many of their friends and some even went with them to Ann Arbor to further testify with rice their enthuslasm for the newly made wedded pair.

A Card of Thanks,

We humbly beg to thank our friend lighbors, the Sunday school and school he so graciously tendered their power alleviate the affliction befallen to our the loss of a cult heather.

SPEED EXCEEDED A MILE A MINUTE.

Formal Opening of the Jackson and Battle Creek Road Occured Yesterday---Special

Train Went Over the Road." The Jackson and Battle Creek Tracton company commenced running their

cars over the entire length of its completed line today. Yesterday, by the special invitation

of the management of the road, the officials and prominent citizens of Jackson, Albion, Marshall and newspaper representatives from all along the line, both prospective and completed, were taken over the line to Battle Creek feasted at the celebrated Post Tavern and returned. The special train consisting of the

cars "Albion" and "Battle Creek" left Jackson at 11:05. On board with their guests were Mr. Boland, hospitable and enthusiastic, Mr. Wilson, attorney for the road, and Mr. Foot, the superintendeut, while his son was at the control lever. The two specially prominent guests were Mr. Bird S. Coler, ex Controller of New York City and who came near being governor of New York state, and Mr. Halls, president of the Hanover National Bank, New York. These gentlemen have lately become interested in fiscal management of the enterprise.

The run to Battle Creek was made in one hour and thirty minutes and the re-turn in about the same time. Along a considerable distance the speed of a mile a minute was reached, yet the speed was not noticable except from the sensation of a quick swerve at the curves. The cars ride like Pullman's. The writer has been over most of the electric lines of New England and around New York and nowhere is the excellence of equipment and road bed and swiftness of running time excelled. In this line electric road building has reached top notch.

In parting with Mr. Boland and thanking han for his hospitality his last words were, "I have my eye on Chelsea next."

The writer of the famous poem, "Little Things," beginning, "Little drops of water, little grains of sand," Mrs. Julia A. Fletcher Carney, celebrated her Galesburg, Ill., the other day. She wrote the poem in 1845, when she was a teacher in a school in Boston, and her purpose was to persuade her scholers of the value of little things.

It is said that the Minnesota, the ew monster freight carrier built for the Pacific trade, draws so much water that she cannot enter any of the greater Asiatic ports except Hong Kong. The extraordinarily deep waters of Puget Sound make it easy to load her to her full capacity at the terminal points of the Northern Pacific railways, but her usefulness will be much impaired if she cannot enter the shall ower bays and estuaries of Japan and China.

The fifteen shell holes in the hull of the flagship of the Spanish Admiral, which was abandoned and sunk in the fight with Admiral Dewey in Manila Bay, bear testimony to the deadly accuracy of the American gunners. The other day an American lady and her daughter, whose names, however, have not been made public, were robbed in this way, losing with one satchel a jewel case containing 50,000 lire worth of jewelry.

Is it possible to steal your own property? queries the New York Commercial Advertiser. The following case occurred at a club. A man went to an "at home" with an umbrella, which he left in the ball. When he came down to go away his umbrella had gone before him. Four days later he went o his club and saw in the rack an umbrella which was so exactly like his that he took it up to examine it. Now the handle of his own umbrella was a peculiar one to start with, but in addition the silver top had come off and he had fixed it on temporarily by stuffing in a piece of paper. He tried the knob of the club umbrella and found that it was fixed on with a piece of papersurely a not common arrangement. talk about "unlucky numbers." Fish in Old Haunts. Both gravling and trout fishing are excellent again in the Michigan woods in the Pigeon river district, since the railroads went into the lumber woods and did away with the logging in the streams. It was to the choking and jamming of the streams and the plowing and tearing up of their beds by the interminable log drives that the apparent annihilation of trout and grayling in their favorite haunts for years was due. The lumbermen found that they could get their logs to the mills quicker, safer and cheaper by building railroads into the woods, and cosequently, most of the streams have been abandoned to the possession of their native fish again.

Pigeon Has a Boom.

Just at present the village of Pig eon. Huron county, is undergoing a great clean-up, together with a substantial boom. Since its incorporation six months ago 25,000 feet of cement walks have been laid, eight or ten fine dwelling houses built and other improvements made. At the present time President Roosevelt stands squarely behind his postmaster-general. He says he is all right and that it is absurd to talk of letting him go. Though not denying that Payne has made mistakes, he says they were trivial errors, of the head and not of the heart, and have no important bearing on the question at issue,

President Roosevelt has inaugurated new policy as to the manner of giving to the public the developments in the postoffice investigation. Hereafter nothing will be given to the newspapers by the officials conducting the investigation except when an arrest has actually been consummated, then the details as fully as they can be at the time will be made known. Mr. Roosevelt will, however, keep a close watch on the inquiry. He goes to Ovster Bay for the summer next Satorday, but before leaving Washington hopes to be in a position where he can issue a statement telling what has been accomplished, and what he aims to accomplish toward the cleansing of the postal service. He had this partly in view the other day when he instructed United States District Attornev Beach to expedite matters in his office relating to the postal frauds.

Must Make No Delay. President Roosevelt spoke very plainly to District Attorney Beach and Assistant District Attorney Taggart Thursday concerning the leisurely manner in which the postoffice fraud Pittsburg says that Abner McKinley, New York, brother of the late president, is being "sweated" by postoffice inspectors at his home at Somerset, Pa., near Pittsburg. There is neither denial nor confirmation of the report in Washington. It is learned on unquestioned authority that the grand fury has voted to return indictments against August W. Machen. Diller B. Groff, Samuel A. Groff, George E. Lorenz and Mrs. Lorenz, the two latter being residents of Toledo, O. The specific charge, it is understood, will be conspiracy to defraud the government.

As a result of alleged indiscretion in matters pertaining to the award of contracts for printing the money order forms of the government, James T. Metcalf, for many years superintendent of the money order system of the postoffice department, today was removed from office by the postmastergeneral. A full investigation of the case will be made later.

The Canr's Danger. The attempt to assassinate the czar of Russia, made known Saturday, revealed to all Europe the danger in which the ruler of Russia stands of sharing the fate of King Alexander of Servia and of his own ancestor, Czar Paul, who was murdered more than a century ago. An effort was the highly nervous condition of the czar since the Belgrade royal mas-Nothing has yet been made public, however, as to the identity of the would-be assassin. The most amazing report yet received, however, is that the czarina shares in the general condemnation of her husband's weakness, and would view without great regret his assassination. The amiability of the czarina's character has long been known in Europe and the report is not generally credited. Apparently the attempt on the czar's life has been kept a profound secret from Nicholas himself.

AND THE LAWYER SUBSIDED.

Newspaper Man Won His Tilt with Bumptious Lawyer. A Philadelphia newspaper writer, be

"So you are a writer, are you? Well, sir, with what great paper or magazine are you connected?" "With none," was the modest re-

"Then why do you call yourself a writer? What do you write-novels, scientific works, histories, or what?" "I write anything and everything that occurs to me as likely to be worth reading or to sell, whether it is worth reading or not."

"Well, then, for whom or for what do you write? You say you are not connected with any paper or magazine."

"Yes, sir. I so stated. I am an unattached writer, for the general mar-"Just so. You write anything that

occurs to you. Well, now, do you ever write up the proceedings of courts?" "I have done so occasionally."

"Can you state to the judge and jury what particular kind of a court proceeding you would deem worthy of

your pen?" "Yes. If I saw a young lawye: treating a respectable witness in a very rude and disrespectful manner and making an ass of himself generally I should think that possibly worth

writing up." The court and jury smiled audibly. The judge took the witness in hand

for a moment. "How much do you think a scene like this, for instance, ought to bring, if it were well written up?"

"It would depend upon the actors If the lawyer were a person of any note or character, possibly \$5 or \$10." "What would you expect to receive, should you write the facts of this par-

ticular instance?" "About 75 cents, your honor." Counsel for the defense had no more questions to ask.

There are people of taste who still re-

main as strongly antipathetic to deckle

edges in fine bound books as they do to deckle edges in tall collars, says the San Francisco Argonaut. They are continually putting the question to booksellers, "Why don't publishers finish books while they are about it, and not leave them all ragged?" And the booksellers are continually saying in weary voices - or perhaps coudescendingly-"it's the style." The antideckle edge people have, however, at least one able champion. The New York Times says roundly that rough edegs in bound books are a nuisance, and it defends its characterization with cogency. Originally the edges of books were left rough so that if rebound the leaves might be trimmed without making the page margin too parrow. In France, practically all books are issued in paper covers and rough edges, and the purchaser is supposed to have them bound according to his individual taste. In such a case the rough edges and wide margins are necessary and proper. But are they so where, as in this country, books are issued in permanent binding and are very rarely rebound? A rough edge is certainly a dust-catcher, as everybody knows who handles such books. To cut the pages requires a certain amount of labor, which, in large libraries, can ill be spared. If the rough edge is to make the reader think the paper is handmade, then it is in most cases a deliberate misrepresentation. However, the publishers probably know their business, and are convinced that the generality of people want their fine books with rough edges. And until the majority of book buyers cease to clamor for deckle edges, deckle edges we shall probably have.

Germantown's Extra Policeman.

If youthful tendencies count for anything there is a boy in Germantown who should one day be a captain of the mounted police or an officer in the cavalry. He is about thirteen years' old and is the owner of a pretty and speedy pony. Every morning before breakfast he goes for a ride which is by no means the ordinary canter in search of an appetite. He has his regular rounds and has given himself specific duties which he performs just as though he were a member of the police force. He comes into Germantown by way of Upsal street. Some distance out he meets a mounted officer going to his post. There is a dignified salute on each side, a short parley, another salute and the two gallop away in true military fashion. At the corner of Upsal street and Germantown avenue the boy meets two officers returning from their rounds. They salute and gallop to Washington lane, where they salute again and part. Here the boy dismounts and waits for the patrolman to report at the box. The same military form is gone through with and after a few moments' conversation the boy gallops home to breakfast.-Philadelphia Press.

ART IN CLOCKS

It will be worth your while to stop in at my store, when in the neighborhood, merely to see the latest artistic creations in clock cases. You will admire several sumptuous examples in Onyx, and some Bronze types that are superb; while in clocks that we can sell at \$5.50 are some immitations of black marble, in Ebonized wood, that are strickingly beautiful, there are novelties in Porcelain at prices that seem impossible. If you will inspect these beautiful goods, we promise not to make a suggestion of a sale; for the clocks themselves will be arguing eloquently in that direction.

Please Stop and Think for One Moment.

Are all your Clocks doing as well as they should? It will cost you nothing to let us inspect them. We never find imaginary faults, nor make unnecessary repairs.

CHAPTER XV.

"Hush! Love Is Here!" On the morning that Hyde sailed for America, Cornelia received the letter he had written her on the discovery of Rem's dishonorable conduct. So much love, so much joy, sent to her in the secret foldings of a sheet of paper! In a hurry of delight and expectation she opened it, and her beaming eyes ran all over the joyful words it brought her-sweet fluttering pages, that his breath had moved, and his face been aware of. How he would have rejoiced to see her pressing them to her bosom, at some word of fonder memory or de-

"I owe your daughter as much as I owe you, sir," he would say to Doctor Moran, "and I owe both of you a bigger debt than I can clear myself of."

This afternoon he looked at his vicitor with a wondering speculation. There was something in her face and manner and voice he had never before seen or heard, and madame-who watched every expression of her husband-was easily led to the same observation. She observed Cornelia closely, and her gay laugh especially revealed some change. It was like the burst of bird song in early spring and she followed the happy girl to the front door and called her back when she had gone down the steps, and said, as she looked earnestly in her

Madame Van Heemskirk sitting with her mother, and the sweet old lady rose to meet her, and said before Cornelia could utter a word:

"Come to me, Cornelia. This morning a letter we have had from my Joris, and sorry am I that I did thee so much wrong."

"Madame, I have long forgotten it, and there was a mistake all round," answered Cornelia cheerfully.

"That is so-and thy mistake first grandfather, and also to me, and very busy will he keep us both. That is my pleasure also, and I have been talking with thy mother about the house. Now I shall go there, and a very pleasant home I shall make it."

Then Cornelia kissed madame, and afterwards removed her bonnet, and madame looked at her smiling.

For nearly a week Cornelia was too busy to take Arenta into her consideration. She did not care to tell her about Rem's cruel and dishonor-

able conduct, and she was afraid the shrewd little Marquise would divine some change, and get the secret out

After a week had elapsed Cornelia went over one morning to see her any man that received them. A poor friend. But by this time Arenta knew hand you must be to blunder over two everything. My interest in him was no greater than his in me, and we soon became very good friends. He would follow me on long tramps when I was out with my gun, and he took great delight up and planting one of his tiny arrows in the bird or beast, and then rushing in and seizing it, in true warrior style.

Our hunts were silent, as neither understood the other's language; but he comprehended every motion I made, and there was a bond of sympathy between us-the love of nature-that made our trips very pleasant. This small brave had a knowledge of nature that would put to shame most civilized boys of twice his years. Many the deck. It was near the cockpit and fishes, with arbitrarily formed plurtimes he took the lead, and seldom not a foot from King.

Sometimes we would take our poples across the river, and ride up into the canyons, spending the day wandering about the little parks, or climbing to the almost inaccessible prehistoric stone villages on top of the mesas, there to hunt for stone arrow-tips, axes and other remains of the old Pueblos. His eyes were very keen, and many were the additions he made to my collection. All the time the spirit of the hunter was uppermost in him: no animal was too small to attract his attention, and then the craft of his hunting ancestors would come forth. He would glide upon the game with the stealth of a cat, and more than once he came strutting back with a bird or little cottontail tied to his belt. The little Ute was a leading spirit among the more docile Pueblo boys, whom he ruled like a little chief, and many were the forays he led against stray dogs from another village. Even in the adult dances his small figure, dressed in regular dance costume. would be seen bobbing up and down in perfect time to the beat of a drum.

During the hot, dry summer weather the people slept on their roofs, and with the first streak of light in the east the Pueblo was astir. Down in the plaza, the children would be playing at their various games, many of them with little brothers or sisters strapped to their backs. Among them, leading in some heroic sport. Soon the little dark figures surrounded the enemy, bows drawn, miniature spears and tomahawks in readiness. Suddenly there were shrill war-whoops and yells. A big dog, rushing out, made for his own village yelping at every jump. He had come to forage upon the enemy's camp, but Agoya and his band soon drove him off. It was a glorious victory for the war-

GROW BEST IN THE NORTH.

The interesting fact has lately come

These Animals and Plants Attale Their Finest Development

to the attention of the government scientists that the frog (the edible variety) attains its greatest and best development, not, as one would imagine, in the semi-tropical swamps of Florida and Louisiana, but in far northern Canada, on the extreme northern limit at which these reptiles are found. This bears out an old and pretty safe rule that both plants and animals attain their best devolopment at the northernmost point of their habitat. Thus the diamond-back terrapin of the Chesapeake brings nearly eight times the price of the diamondback of Louisiana, and the best oranges are grown, not in tropical Cuba (people of the older generation still remember the coarse-grained, sourish Havana oranges), but in northern Florida, where the trees are frequently cut down by the hard frosts and cold weather.-Washington Post.

of England for 300 years. Arthur Eric Paget Roper-Curzon was a youth of experience when he first met Miss Marguerite Gwynne. although he was only twenty-three. His birth and the allowance given him by a rich and generous father, gave sure cure for just such conditions, and him abundant opportunities. He met one day when in Trenton she brought his American sweetheart on board a

ship that was cruising on the Mediterranean.

Miss Gwyrne was very lovely, and she had the breezy charm and freshness, the lively independence and nerve which make American women so attractive to Britishers. Young Roper-Curzon fell head over heels in love with her.

He gained a reluctant consent from Miss Gwynne, but her parents did not look with favor upon the proposed match. The mother especially opposed it. The Gwynnes insisted that Roper-Curzon must gain the consent of his family before he married their daughter.

Curzon hurried to England and straigthway sought his father, making a clean breast of the whole affair.

"You must not marry beneath your position," cried the elder Roper-Curzon, adding a threat of disinheritance. So the young man lingered in Lonson suggested by its title. Stepping don. The pleased father increased his allowance and Arthur Eric Roper-Curzon tried to enjoy life in social dissination.

After more than two years of separation he decided to sacrifice everything and seek her in America, to exactly." The preacher murmured marry her if he could persuade her to consent. He gathered a small amount of money and started for Canada. He had told his father of his determination, and the old gentleman promptly stopped his allowance.

When the young man reached Toronto it was to find that his sweetheart was married. She had not made a brilliant match from a material or social standpoint, but she was supremely happy.

Capt. Roper-Curzon realized that he must forget in good earnest. He decided to settle in Canada, to become a farmer in the far Northwest.

He enrolled as a student in the Ontario Agricultural College at Guelph. He learned how to rake and hoe and plow. He milked cows, fed hogs and performed the other work required on a farm.

He wrote to his father, saying that he would not marry Miss Gwynne. He did not think it necessary to explain the reason. Also he told what he was

doing. The father was immensely pleased. He forwarded handsome remittances and advised his son to keep curtain rolled up disclosing a Brocken at work on a farm. And Capt. Roper scene, while bats fluttered about the Curzon followed his parent's advice-

He quickly tired of the rigors and hardships of arctic travel. The outfit was not suited for fast progress in that country. One day Capt. Roper-Curzon said to the others:

"Boys, I'm tired of Indian bucks and squabbling squaws; let's go back where there is something decent to eat and something going on."

Of course they were willing to re turn. He was paying for the whole show. The head of the party gave their guides pretty much all of the outfit, including four horses, and led his friends to Winnepeg. The Klondike trip cost him something more than \$10,000.

At Winnipeg an idea struck him, and as a result there appeared an advertisement that read like this:

agreed. He brought them together, had s minister waiting and they were promptly married. He also furnished the bridal dinner.

Then it occurred to him that the pair ought to have a wedding trip, so he took them to Toronto and afterward to Boston. They had everything that money could buy-the finest suites in the best hotels, the most elaborate dinners and carriages at their disposal. They were permitted to buy everything they wanted in the way of clothes.

"That was really a delightful experience," said Capt. Roper-Curzon reminiscently. "Those people had the jolliest kind of a time. I don't know what it cost me-something more than

\$8,000, I believe." He didn't stay long in the West, but went back to Toronto. He had not succeeded in forgetting his old sweetheart. Melancholy possessed him. He resolved to give a dinner that was in harmony with his state of mind. His famous "dead man's feast" was the

"You can cinch a horse up until there is little possibility of the saddle's slipping, but it can not be done of Sergt. Mortimer, one of Canada's on a steer, for the simple reason that the skin is so much looser and there is no place in which to gather up lost motion. The horse has eighteen ribs and a steer but thirteen.

"When the horse bucks, as he does when he is burdened with something he doesn't want to carry, his rider can get a pretty firm bridge at most any place between the crupper and the shoulder. When the steer bucks, as he generally does when he feels a saddle on his back, there is a rolling motion that is for all the world like tnat of a vessel at sea. The steer pitches with a head and tail movement, while a horse stops his side swings before they range far.

"The steer riding fad had its start down in Texas, where the animals are wild enough to suit even the most exacting cowpuncher, and it is now being introduced further North. A puncher's playtime is often long enough to give him a chance for experiments, and some of the more skilful have go: it down to a fine point.

"But the hombre who thinks it is an easy task to stick to a wild boy who knows enough to do the grand buck and pitch is down for an experience he will carry in his book of remembrance for a long time."

FORGOT THE TAILOR'S NAME.

Unfortunate Experience of Youth Ir New York.

"It is not very often that tailors collect cash for clothes they are unable to deliver," said an up-town merchant, "but a singular instance of that sort came under my observation last week. A young man from the West was in here wanting to know whether he had left \$50 on deposit for clothes. He seemed very much disappointed when I told him he had not.

"It appeared from his story that he wanted about \$300 worth of clothes in a hurry-two or three business suits, dress clothes, and some trousers. He saw some patterns that he liked in a shop window, was measured, and complied with the request for \$50 on deposit without a word. He got a receipt for it, of course, and then went down town to see some fellows he knew from the West. They gave him a rousing good time all day, and took him to the theater at night.

"When he looked for that receipt in the morning he couldn't find it. Then he started from the hotel, thinking it would be an easy thing to find the tailor from whom he ordered the clothes. But he couldn't remember the name of the firm, nor was he sure he could recognize the shop unless the same goods were in the window. The chances are ten to one they would not be, or, at least, not arranged in the same manner. About all that youth knew was that the shop was on one of the cross streets somewhere between Forty-second and Twenty-third, but he didn't remember whether it was East or West. He trotted around for two or three hours telling other tailors the same story he told us, but he hadn't found his clothes when we bade him good-bye. That is the funniest case of forgetfulness I have run across in my experience in this business."-New York Times.

Fugacious Time. There is a sort of revival of "Uncle Chet" Thomas stories. The Topeka Capital tells this one: One day "Uncle Chet" drove out to South Topeka to sell a man a horse. The man was no judge of horseflesh, and he knew it. So, after looking the animal over, he told "Uncle Chet" to come out again in about ten days. "A friend of mine who knows a horse when he sees it will be here then," he said, "and I'll see what he thinks." And, by the way," he added, "how old did you say the horse was?" "Seven years old comin' February," said "Uncle Chet," as he gathered up the reins and drove away. In about ten days "Uncle Chet" drove out to South Topeka again. The prospective purchaser's friend was there, and after looking the horse in the mouth, asked his age. "Twelve years old this spring," replied Uncle Chet," smiling blandly. "But," broke in the man who wanted to buy the horse, "you told me not ten days ago that he was only seven. "So I did," squeaked "Uncle Chet," "so I did. Heavens, how time does fly!"-Kansas City Star.

The Home Ruler.

A short time ago a party of young men, who in their boyhood days had been chums, met by chance. They had all got married since they last met. and the conversation drifted to their wives, and, incidentally, as to which was "boss" of the house. One of the party was so vehement as to his "ruling the roost" that the others thought they would investigate. A few days afterwards one of them went to his house on pretense of visiting him. His wife answered the bell, and she was

They are present in dirt and dust of every description, and because of their great numbers and their wide diffusion no practical method has yet been devised by which milk may be drawn absolutely free from contamination with living germs. Yet they are unnecessarily numerous in milk as ordinarily drawn, because it contains a thousand times more bacteria than that which may be obtained by using extreme care in regard to cleanliness. Hence the necessity for keeping everything about a dairy scrupulously clean, particularly in hot weather when conditions are especially favorable to bacterial growth. Clean milk

Scrub Feeding.

From Farmers' Review: Men who grow live stock at home often become over-enthusiastic over pure-bred stock after returning from a visit to the agricultural fairs or fat stock show. They reason that the difference in size and appearance between the ribbon winners at the ring and their own stock at home is due solely to good breeding. Oftentimes good blood is sent home. The rapid change in form, and a tendency to early maturity do not take place. The good animal is given scrub conditions. A scrub farmer with scrub feeding will soon make scrub stock out of the progeny of our national prize winners, even though they have a long pedigree of royal blood. It takes an improved farmer who will improve his system of feeding and care to handle successfully pure bred animals on the farm. He must know their characteristics; he must know the relation of various foods to animal nutrition, and then be willing to bestow patient care and attention upon the animals he has in charge, Before launching into the business of breeding high-class animals the farmer has much to learn; but if he will set himself to do it he is sure to be amply.rewarded, not only in a financial way, but he will get what money cannot purchase-a genuine satisfaction that he is doing a creditable work .-W. B. Anderson.

From the Farmers' Review: Many

dairymen apparently fall to recognize the fact that when milking and caring for milk they are handling human food and that it should be treated as such. In many dairies the milker goes to his task with soiled hands and dust-laden clothing and without so much as brushing the loose dust and dirt from the cow. Under such conditions much filth must of necessity find its way into the milk. No other food is produced in such filthy surroundings as is frequently the case with milk and no other food will absorb odors so readily and become tainted so quickly as will milk. It is, therefore, doubly important that great care be exercised to have milk produced under the most sanitary conditions possible. One can judge something of the amount of filth in milk by the sediment found at the bottom, but only a small part of the contamination is in visible form. Milk sours because of the presence of certain kinds of bacteria, which, acting upon the sugar of the milk, change it into lactic acid. Other organisms to taste and smell and a few dangerous to health. These bacteria are living organisms, though so extremely minute that 250 of them placed side by side are equal only to the thickthorough straining will remove all visible filth the greate part of it is in solution which, of course, will pass Milk in the udder of a healthy cow is both pure and sterile, and if it could tamination would remain sweet and wholesome for an indefinite length of time. dently changed the length of the intestines. He quotes Cuvier as reporting the total length of the intestines of the wild boar to be nine times the body length; in the domestic boar 13.5 to 1; in the Siam boar, 16 to 1. The writer measured the intestines of thirty-nine fattened hogs and found that the large intestine varied from 13 to 16 feet. and the small intestine from 54 to 60 feet in length. The average exteme body length of these animals was 3.5 feet. This makes the small intestine alone from 16 to 19 times the length of the body, and the large and small intestines combined about 21 times the body length. From these figures it appears that the intestines of pigs of the improved breeds are longer in proportion to the body than those given by Cuvier. This may indicate that the modern pig can digest his food more thoroughly than his aucesquantity of food in a given time.— Prof. W. A. Henry.
