BALL GAMES\_THE FEATURE OF DAY.

Not a Single Accident Reported--- A Goodly Display of Fireworks in the Evening.

The Fourth in Chelsea this year was a comparatively quiet day. Of course the small boy with firecrackers was in ones amused themselves with revolvers and blank cartridges. During the mornng and until the rain in the afternoon there was a high wind that kept the air filled with dust, and had a fire broke out the fire fighters of this place would have had the time of their lives to get it under control. There was two good games of ball at the park, between the Plymouth and Chelsea teams and both the forenoon and afternoon game had a good sized audience of "Fans" who enjoy the great American game, and at both sessions the visiting and home teams played good ball from started to finish. The rain storm in the afternoon delayed the game for a time and to a degree dampened the enthusiasm of

some of the attendants. Many of the families about town had all there was not a single accident reported.

The most serious accident reported in Ann Arbor the Fourth was that which happened to Fred Graupner, aged 15 years. While he was holding a toy cannon it exploded, tearing a large hole in the fleshy part of his leg. It is not thought that amputation will be necessary. Architect Herman Pipp was also explosion of a giant firecracker. There affliction. was a heavy wind in the afternoon and the flagstaff on the court house was blown down.

The afternoon game was the best exhibition of base ball that the people of Chelsea have ever seen on the local grounds. It was baseball from the first inning until the last man was out in the tenth; the score being a tie in the ninth, necessitating an extra inning. The Chelsea team played rings around their rivals at the bat and in the field, but a few errors at critical times allowed the Plymouthis to tie it up, and then they fell before the fine pitching of McCain in the next three innings, while in each inning the Stars had men on bases, but were unable to force any around to the plate until the tenth when Wood gave Reynolds, Chelsea's new catcher, a base on balls and he promptly stole second, taking third on a hit by Jones and scoring when Miller hit to pitcher. Although Miller made the second out, nobody cared as Reynolds had scored the winning run amidst the greatest excitement

WILL GOST ELECTRIC ROAD \$520 Through a blunder in the construction at the Michigan avenue separation of grades in Detroit the D., Y., A. A. & J. will have to put new trolley stands on all their cars or in some other way make the stands lower.

When the room for the electric cars was determined President Hawks, of the D., Y., A. A. & J. stated that there should be more than fourteen feet of room under the steam road bridges in order to let the Ann Arbor cars under. It was finally decided to make the head room exactly fourteen feet, but now that the work is completed it is found that through a blunder the distance thirteen feet ten inches.

It is a question of getting another approach to Detroit or shortening the trolley stands, so the D., Y., A. A. & J. have chosen the latter alternative. The old cars are lower than the new ones. and can be made to pass under the Mr. Tiger changed his stripes of a steam bridges by placing the trolley Both cars were running east, but the pretty white robe in the Great Beyond stands directly on the roof, but in the case of the new cars it will be necessary to put in new stands. sound came from the opposite side. He was there in an instant, his ear again pressed to the wall. The same murmur reached him.

"By heaven, the place is alive with people," he exclaimed. "What does it mean?"

A grating sound, different from any he had yet heard, reached him. He felt that something, he knew

not what, was about to take placethat the danger, if danger it was, was at hand. The place, its appearance, they were last in the distance, and the mysterious noises-all boded deadly peril of some kind. He was in a den of criminals.

"Trapped!" he thought, "caught, by heaven, like a rat in a trap!"

Alexis Nazimoff was a brave mannone braver. But the bravest man may be unnerved by the presence of an unseen danger-of a danger that is felt, not confronted. He was accustomed to think quickily, and to act impulsively. Hastily thrusting the cigar case into the open front of his coat, he quickly but softly moved to where Ivan's coat was lying on the

To take the coat and move to the long bench that stood alongside the wall was the work of a couple of seconds, and in as many more he had lain down, pulled Ivan's coat over him, and was apparently asleep!

But he had so arranged the coat that while it covered his head he could see anything that transpired on the opposite side of the room-the side on which he had heard the sound for the second time.

Softly and silently as a shadow the solid wall seemed to move!

Every panel was a revolving door which turned noiselessly on its axis, and from every door entered as silently as a specter an occupant of the mysterious recesses beyond. A rush of air and the movement of softly treading feet convinced Alexis that exactly the same movement was being executed simultaneously behind the interim between the time when his back.

Such was the fact.

Then to the amazement of Alexis that Ivan had not, after all, admitted he realized that the apartment of which he had been the sole occupant "Well," was his silent conclusion, a moment before was now tenanted "there is nothing for it but to wait by a score of people.

The man thus addressed went to the wall, and touched a concealed spring, a section of the solid structure revolved and a clumsy handpress of an old type was run on noiseless rollers into the room.

"Go ahead with that bomb," directed Oramicsky, addressing two of the men. "You, Orloff," to another-"go ahead with the wires. You, Palet, see to the tunnel-quick, to work, all of you. There is no time to lose. Let us work to-night! Our task will be complete, and then, one touch to the wire and Russia will be free from the tyrant." -

Alexis never moved. He under stood it all now.

The press began running, and as the first impression of the work was taken off Oraminsky held up his hand -- the signal for silence.

"Here, brothers, listen to this," he said, as he took up the paper, and, speaking in low tones, read as fol-

then the silence was broken. He ould hardly tell how or by what. But he spoke. "Fool!" muttered Oraminsky, "he has no right to sleep at such a time as this. Wake him up, Hersy!" Alexis drew a deep breath.

"Wake up, Ivan Barosky! wake up! ! We have just finished a letter of invitation.' "To the funeral of the czar," said

Kirshkin, whereupon there was a laugh. "And printed in red, too-red will be the fashionable color in St. Peters-

burg," said another. "Because the czar will wear it and set the fashion for all."

"Come, come," said Hersy, "wake up!" and as she spoke she grasped the coat and pulled it from the recumbent form.

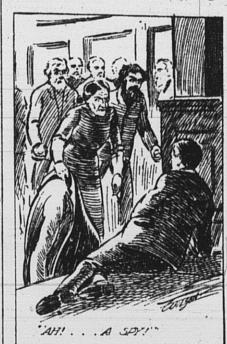

"Ah!" with a scream of astonished rage as she discovered the stranger, Hersy pointed one finger at Alexis-"a spy!"

Quickly springing to his feet Alexis drew his sword.

"Down with him!" "Kill him!" 'His life!" were some of the exclamations which fell on the ears of Alexis, as pale and resolute, with no evidence of fear in the steady eye, he gazed at the faces of the now bloodthirsty crew before him.

"Well, dogs of the gutter," at length he said, as for a moment they stood at bay, held back by his undaunted front, "what seek you? My life? Take it when you can!"

And now with knives drawn, with such weapons as came to hand-a hammer, chisels, an ax-they began

to close in upon him with murder in their eves.

But none, not even Oraminsky himself, felt like leading the assault, and being the first to feel the thrust of the naked blade which Alexis held with the grip of iron and the masterful ease of the perfect swordsman. "But a scratch and we have him,

said Oraminsky. "Rush on him in a body!" But nobody rushed. Nobody was

itching for a scratch. Kirshkin at the first moment had left his press, and as Alexis drew his sword he had crept up the room behind the others and on all fours had gone under the stairs and around to the rear of the dauntless swordsman, who, with certain death staring him

He made a threatening movement forward with a bar of iron as a weapon. Alexis made a pass as he came within reaching distance, but the weapon never reached Oraminsky, for at that moment Kirshkin, with a suppressed yell of triumph, sprang upon the back of the young soldier. There was an instant rush,

ing Spotless. Sir William Butler, an English soldier of distinction, said recently in

giving testimony before a British commission in regard to militia service: ','Warwickshire men miners and that class of people, like to get to the sea for ten days if they can possibly afford it-they will spend their own money to do it. They all bathe. I have a very long seacoast and we have a number of miners who really erjoy being out with their regiment of garrison artillery near the sea. They go to the sea because they fire over the sea and the bathing parade is as valuable, if not more so, than the drill; it freshens the men up and cleanses them. An officer told me last summer that when they were bathing there was one fellow with a very black skin,, and he heard a man say to him 'Jack, you are pretty dirty.' 'Yes,' he said,, 'I was not out at last year's training."

Last Etop Was His Undoing. Max von Pettenkofer, who has been called the founder of scientific hygiene, and, next to Humboldt, the most popular of all German naturalists, lost a fortune in umbrellas, seldom bringing back what he had taken

away. Once, however, he made a trip as far as England, and was very proud of having actually succeeded in bringing back his umbrella to Germany. At Augsburg he stopped on business, but sent a telegram reading: "At 6 o'clock I return with my umbrella." He did return at 6 o'clock, but as he entered his house in Munich he saw to his dismay that he had no umbrella. He had left it at the telegraph station.

Scientific Rubber Production. The production of rubber from the Ficus Elastica in Upper Burma, Assam, and the Netherlands, is being rapidly increased. The seed of the Ficus Elastica, when the tree grows naturally in the forest, germinates almost invariably in the forks of trees thirty to forty feet above the surface of the ground, and the young trees grow in consequence for some six to ten years as epiphytes, after which the aerial roots reach the ground, and increase in size until some of them reach a girth of from four to six feet. It frequently happens that the trees on which the rubber seedling first germinated is killed by the more vigorous growing Ficus Elastica.

day a little dark-haired boy, with eyes large and round. "I wish you'd tell me a story," said

the little boy to the old tree, for they were fast friends. The old tree loved the little boy and this is the story it told:

"I see you hold in your hand a bunch of oxeyed daisies," it began. "They remind me of their birth, which happened here on the plains many years ago. I am very old, you know; just how old not even the red men can tell. But under my shade these wild children of the west used to gather and hold councils of war and smoke the stableman quieted the tumult by putting pipe of peace. I was always glad when they smoked the pipe of peace, because there was to be no war, but I shuddered when they painted their faces and dipped their arrows in new-made poison, for I knew the wail of the wounded would be brought to my ears by the winds.

And yet, at what a cost, for among the others, found with his face to the foe and a tiny bow in his hand, lay the pride of the chief-Wau-nee.

"Carefully the body was lifted and brought back to camp, where for three days and three nights he and the others were mourned. Even the old chief shed tears, perhaps the first in his life, and in his Indian tongue vowed that up from the heart of the little boy should spring a flower which would spread all over the west and prove to the Arapahoes that the race of the Ogallalas was immortal.

"Then they buried the little Indian boy, digging a deep grave by my side, and over the mound they heaped rocks brought from the banks of the Rawhide, leagues away.

"Summer passed, fall waned and the plains were covered with a mantle of snow. Under the snow slept the little red boy. Then spring came and the south wind melted the snow, I watched and one day saw a green leaf coming out of the little red boy's grave. The waist consists of a fitted lining, hich can be used or omitted as preterred, front and back of blouse, with the full sleeves, and the bolero, which s quite separate and is made with monts, back and bell sleeves. The waist is full and blouses over the draped belt, the closing being made invisibly at the center, and is finished with a regulation stock. The bolero is exceedingly simple and is laid in outward-turning plaits that fall over the arms-eye seams.

The quantity of material required for the medium size is: For blouse, vards 21 inches wide 4 vards 27 inches wide or 2¾ yards 44 inches wide, with one-half yard of all-over lace and one-half yard of silk for belt; for bolero, 2¼ yards 21 inches wide, 2 yard 27 inches wide or 1¾ yards 44 inches wide, with 5 yards of banding and 3½ yards of fringe, to make as illustrated.

Lace on Hats.

Point d'esprit and the old-fashned blonde lace is fashioned into Marie Antoinette hats, a fall of lace coming well over the edge of the brim and a garland of small flowers encircling the crown, with a deep fall lace in the back. A dainty hat of fine white chip has a brim of tucked lawn and a frill of fine embroidery hanging down from the brim in the back, and it has two pink satin bons running in and out of the imbrofdery and forming rosettes.

Mix them well together and place the jar in any suitable corner of the parlor or living room. A few drops of attar of rose or any desired extract of flowers can be added at any time.

The New Handkerchief Kimonas.

Kimonas made from large, square handkerchiefs have taken a new twist this season. Instead of brilliant bandanas and the old-fashioned combinations of dark blue and white, or vivid red and white, the most delicate colorings are seen.

The center of the handkerchief shows delicate pink, blue, green, yellow or lavender, with a dainty border in pale Persian colors or Dresden effects, with the color of the center predominating in the conventional or floral design. Another difference in the style lies in the fact that the points of the handkerchiefs are brought to the neck line and then turned over to form a small, shawlshaped collar.

Shawls a Fad of Fashion.

Shawls are Seen in rather unusual numbers. There are enough of them to suggest a revival of the 1830 and 1850 fashion. The silk shawls are specially attractive, embroidered in self or a contrasting color. Pale salmon pink is embroidered in white; dull rich magenta has a pattern worked in red of a deeper tone. Of course all the usual pinks, pale blues and creams are also strongly in evidence. Pongee color, with stitchery in white or yellow, is

A few years ago the movement gained some headway, but was blocked by interference by the owner of the property where the house stood, who was not in sympathy with the plan. Recently it was announced that the plan was again to be suggested to Berkshire lovers of the novelist, and that the site of the shrine to which worshipers of genius made their summer and autumn pilgrimage until the house was burned, June 22, 1890, is to be marked by a suitable shaft.

Its sight is almost as much sought, for the view from it remains as lovely as when they soothed and renovated him, after hours of intense labor on "The House of Seven Gables" and "Tanglewood Tales." Tanglewood is there yet, and so is his memory. Mr. Hawthorne's biographer says of the rouge pot and mirror, which form incottage that "it was far from a comfortable residence; but he had no means of obtaining a better one. The desk upon which he wrote has for some years been the relic first inquired for in the historical section of the Berkshire athenaeum at Pittsfield. It is of plain design, but its material is mahogany, richly colored by age. It is not very large, but is so compact in its construction that a novelist would find complete room for under Philip III, after whose death the all his machinery and material, except, of course, books of reference, within short arm's length.

The change would have been a most happy one, for the Kemble cottage was perfect. But only eighteen days afterward he records in his diary, his determination to leave Berkshire. He scolds about the weather, but it must have been bad to cause him to leave the country, whose scenery he had enjoyed intensely, and which was the home, either permanently or in summer, of some of his truest and warmest friends.

In commenting on the change his son Julian writes: "In fact, after freeing himself of Salem he never found any permanent rest anywhere, but soon wearied of any particular locality. A novelist would say, that he inherited the roving dispositon of his seafaring ancestors." But when his restlessness came on at Lenox in the summer of 1851, it made things worse

There he determined to spend the winter, pending negotiations for the purchase of a home in Concord. Therefore, on the 21st of November, 1851, the family, with their trunks, got into a large farmer's wagon and were driven to Pittsfield, leaving the little red house empty behind them.

It was a bleak day, but one of the party remembers that the five cats, which for five months had been fellow inmates with themselves, vacated after the wagon for a quarter of a er. The party reached West Newton in the evening, and there Hawthorne passed the winter in writing "The Blythedale Romance." His son, by way of compliment to the place, writes thus: "A more dismal and unlovely little suburb than West Newton was in the winter of 1851-2, could not exist outside of New England."

Old-Time Authors Poorly Paid.

Johnson sold for £200 his "Lives of the Poets," the monumental work which brought £5,000 clear profit to its publishers within a quarter of a century; and the £100 he received for his "Rasselas" proved little more than sufficient to bury his mother, the object for which he wrote it. Fielding was more fortunate, for "Tom Jones" rewarded him with £700 and "Amelia" brought him £1,000 "as dower."

Tradesmen Forget Soldiers' Bills. As an evidence of the interest and earnestness of the Japanese people it is customary among the trades people, whenever a family that they have been supplying with the necessaries of-life is deprived of the father of the family in consequence of his going to war, to continue to supply all their needs the same as before and without sending any bill therefor.

#### "UNDER THE OAKS" CELEBRATION

the Republican Party Commemorate Yesterday at Jackson.

Probably the greatest celebration hat was ever held in the city of Jackon took place there yesterday. The sion being the 50th anniversary of he formation of the republican party Inder the Oaks" of that city in what s known as Loomis park. Located somewhat near the scene of where the organization was perfected.

It is estimated that the city had over 30,000 visitors from various sections of the United States, among whom could be seen many venerable men who cast their vote for John C. Fremont, the first president nominee of the party. At the park where the addresses

were delivered nature had formed a natural amphitheatre and the Fremonters were comfortably scated in a position that all could hear easily the different speakers. The principal address of the day was delivered by Secretary of State John Hay, who though not a Freemont voter was the private secretary of President Lincoln. Senator Fairbanks of Indiana, the nominee for vice president on the ticket this year with President Roosevelt, Speaker Canon, Gov. Bliss, Senators Burrows and Alger, Attorney Gen. Chas. Blair and many other prominent men of the state were present and delivered addresses. Mayor Todd of Jackson, who by the way is a democrat, made the welcoming address in a very able manner on strictly nonpartisian lines. Hon. Jas. O'Donnell, made a very concise statement of the formation of the party.

Upon the platform was seated the majority of the nominees of the Detroit convention of last week and a host of leading men in the party.

For about two hours at the Hotel Otsego, Gov. Bliss, Secretary of State Hay, Senators Fairbank, Burrows, and Alger and Speaker Canon stood in line for a reception and gave a hearty hand shake to all who passed by them.

Chelsea was not behind in furnishing visitors, two hundred left on the morning train accompanied by the Chelsea band and almost every westward bound electric car during the day carried many of her citizens to the scene.

Michael Kearney, a former well known Ann Arbor resident, died at Racine, Wis., recently at the age of 90 years. He was one of the early settlers and in 1838 helped clear the ground and cut the timber on the campus.

Monday, John Raftrey and Leonard Beissel went to Gregory to take in the celebration. Among the list of sports for the day, was a fat mens' race and another of ancient times known as tugof-war. Mr. Raftrey being an athlete of considerable note, concluded he would renew his youthful day and take a hand in the two games. His side won the tug-of-war honors and in the fat mens' race John captured the first prize.

A FOREST IS MORE THAN A COL-LECTION OF TREES.

It Has Its Inhabitants Who Are Quite as Interesting in Their Way as Those of a City-How to Study Them.

A forest is sometimes described as a collection of trees, and the description is about as enlightening as the statement that a city is a collection of buildings. Like the city, the forest has a vast population, without which it would be as uninteresting as a city without its citizens. We admire beautiful trees as we admire beautiful buildings, for themselves, but more interesting to some of us at least are the lives and works of the creatures which inhabit the buildings and trees respectively. When I enter a forest in winter or summer, I am always aware that I am not alone, though the air be so still that one might hear the growing of the trees. I know that I am watched by many eyes, and that, at every footfall, scores of ears are at all times on the alert.

If you go into the woods in the early impression that there is little life about you. But sit down awhile, and wait in some spot where your figure will not be too conspicuous, and you will probably see some of the creatures whose First of all, perhaps, you will hear a faint, crisp drumming sound-the sound made by a wood mouse, when he drums with one fore foot on a dry leaf, and after a short interval, you will probably hear the answering "br-r-r-r" of another mouse. Then, if you are quiet, you will see the dainty form of the creature itself, with its tawny upper parts, white belly and feet, its large black eyes, its well-shaped, translucent ears, its trembling whiskers, and its long, silky tail, the latter held carefully off the ground in a graceful curve. Out from the shadow of a bunch of withered leaves he skips, leaps lightly over the ground to a wild cherry tree, where he searches for and eventually finds a cherry stone. A simple matter, this hunting for and finding of a meal; and yet to the mouse it was businessvery important business, since it must be attended to faithfully every day if he would avoid hunger or even starva-

And these little hoards, how many busy days they represent-days at the end of which even the wiry legs must have ached. I sometimes wonder if, at the end of autumn, the squirrels and other creatures which have been laying up food for the winter, feel any satisfaction, askin to that which is felt by farmers when their crops are all garnered. And I wonder if, when the stores of a red squirrel are discovered and eaten up by a pig, the owner does not have a feeling somewhat similar to that experienced by a thrifty man whose savings are stolen by a

And, perhaps close to you on the ground, a pellet of matter fur may betray the presence of some large owl; probably the barred owl which lives in a hollow high up in the very tree against which you lean. He, too, has much business in the wood, and his business is with the mice, the squirrels the rabbits and the grouse-with any owl with the big round head, and the dark-brown half-human eyes. Now he is the midnight hunter, coursing the startled rabbit through the forest glades. Now he is a poacher, killing him as the farmer's ally, exterminating mother squirrel, whose babies will slowly starve to death in their nest; at the next he is an angel of mercy, ending as with lightning the sufferings of some trapped or wounded creature which otherwise might linger in agonyfor days.

Yes, there is always important business going forward in the forest and the better it is understood the more important it seems. There are beavers felling trees, making dams, flooding acres of land, and building houses superior to those of certain tribes of men There are porcupines stripping and killing a hundred trees apiece per annum; woodchucks and chipmunks excavating long, winding subterranean and the roots of water plants, and mink ponds. All the year round, and at all hours of the day and night, there are citizens of the forest city plying their trades, earning their "bread," and do-

DOG KILLED BIG WILDCAT.

New Hampshire Foxhound Encountered a Fierce Opponent and Came Out Victorious.

In a fight between a foxhound and a wildcat, the betting man would be inclined to place his money on the latter, and feel that the percentage in favor of his winning would be great enough to satisfy any reasonable man looking for a gamble.

Nevertheless, a good, husky wildcat was put to the bad by a foxhound in Charlestown, N. H., a few days ago, which shows that it is no "cinch" to bet on the wildcat. No one saw the fight in which the wildcat, in this particular instance, came out second best, but the results were very much in evi-

Sport could not tell how things happened to be that way, but he seemed to be pretty weil satisfied with his own part in the mixup, and the way he had come out of it. He had been bitten in the right fore

She coughed; once, daintily, without effect; again, vehemently, with so strange a bidden-by parental authority. What sound that Herresford emerged from his more could a girl want? Certainly a paper with a start.

"I beg your pardon-I'm awfully sorry," said he, scrambling down and facing her over the stile.

Susannah bent her head solemnly, by this, means lowering the brim of her hat over a pair of dancing eyes.

But the situation grew still more embarrassing. The stile must be :limbed, and Herresford showed no signs of retreating. Not a bit of it; he said it was a lovely morning, and then, throwing down pipe and paper, held both his nands out over the stile.

As Susannah urged on her mother afterwards, what could she do but allow him to help her over the obstacle? Certain it is that she did nothing else. The ascent was dignified; the descent a little less so. Safely in the road she thanked Herresford and went on her way.

On her return the stile was unoccupied. but she observed the wicked painter bearing stool and easel, trudging up a distant bill.

"I'm sure he is a gentleman," she reflected. "Mother doesn't know anything about him." And Herresford, painting on his hill,

At the end of the progress of affairs may be gathered from a letter that Herresford wrote to his friend, Felix, himself an artist and busy on a masterpiece in a London studio. The note was

orief, but full of information. "Have finished two sketches and fallen in love. The most glorious creature. Felix, and hang your grimmings! You could never paint her. Parents strongly opposed to me; they don't like my trade. But weather perfect and lady kind. Al-

together a charming time." At which Felix growled and went on with his masterpiece, "Orpheus Seeking Eurydice in Hades." A misogynist, this Felix, with long legs and a long face; called by his friends "the Gravedigger.")

Throwing the letter aside he pondered how he could have his friend. But the thought came that perhaps his friend wanted to be lost, and so he put the matter aside and went on painting flames and shadowy figures writning in

"If our friendship is to continue," in terrupted Felix, "you had better save it all for after dinner. My feelings are more under control at that time; at the least, shall be sleepy."

It was in the cool of the evening that Felix, having been carefully fed, felt able to approach the subject of his friend's state of mind.

"Well, what's the matter?" he inquired 'Gone crazy over a woman again?" "I'm in earnest this time."

"It's rather hard, of course," said Her resford. "There's nothing worth doing in all the world but making plotures. But "There's nothing worth doing I can paint for amusement.'

Felix grunted in huge discella.

"Perhaps if I had been more successful I should find it harder still. But I don't make much headway. Now it won't matter if I can't sell my pictures."

"In a year you won't paint any, You'll add up figures, not draw them. There will be no interest taken in them, and an art ist must have sympathy. He breathes it. "I shall keep my old friends.",

"It's a horrible trouble." Felix pulled savagely at his pipe. He "I called yesterday evening; but what was butting his head against a stone Balaam's ass—but I'm not. Well, not wall and knew it. He fancied he had been Balaam's, for certain."

sign that his conviction needed stimuating.

"I'm sorry you don't think I'm doing right," said Herresford.
"I'm glad I'm not such a fool as to think so," retorted Felix.

Herresford threw away his cigarette and walked to the door. But Felix caught him as he opened it. "Perhaps you don't" understand your feelings, Jack," said he.

Herresford's smile was never far away. You will one day," he said. "May I be protected," quoth Felix piously as the door shut.

Herresford walked quickly down moonlit road until he reached the stile; then he vanished in the dark shadow of the trees. At the top of the hill path was the gate of the house. Who could doubt Susannah waited there? Certainly not Felix, left to the companionship of his pipe.

For more than an hour he smoked thoughtfully, ill at ease, for he was fond of the young artist and believed he could do great things. Then, in the glory of the full moon, came Herresford back along the road. Susannah had him still faster in the toils; a very riot of splendid love was in him.

"What's dabbling paint about to love, Felix? When did it ever make me, sohappy as I feel now? She's wonderful -she's magnificent! I would give up any-thing in the world-!" "O, go to bed!" said Felix crossly.

Perhaps in all the ages never dawned more beautiful morning than Felix, waking early the next day, observed from his bedroom window. Early as it was, he could see Herresford busy with pencil and sketchbook.

"The man's an artist, and yet he means to give it all up for this mid-summer madness. It's only a passing fancy for the ways mean encouragement. But the night is not the morning. Felix, watching him, brightened a little. decision, he knew, must be made that day. If he chose his new love, it would be a grave offense to Susannah to seem to hesitate.

It was not until summoned to breakfast that Herresford joined his friend, who contented himself with remarking on the weather and drawing attention to a letter that lay on the table. Presently, deep in a newspaper, he heard Herresford whistle and swear softly and pleasantly. Then the letter was thrown at him.

"Read that!" cried Herresford, cracking an egg as one who says, "Here is my enemy-see how I crush him!" Felix read that an eminent collector and connoisseur had noticed one of Her-resford's pictures and wished to buy it, besides desiring an interview with the

artist and hinting at a commission.
"My fortune's made!" cried Herresford. "Isn't it a few days too late?" asked Felix, quietly.

Herresford made no reply; he had picked up the letter and was reading it again. His face was alight with pleasure and pride. Dispirited with want of success he might have abandoned what he knew to be his life's work, but now—
"I must go to town at once," he said.

"There is a train in an hour," said Felix. "We can catch that." He would give Herresford no chance to see Susannah again.

But chance intervened: for, as the train was on the point of starting, they saw her standing by the gate of the level crossing. Immediately Herresford thrust his head out of the window, while Felix muttered curses on the tardy train. Susannah, seeing Herresford, hurried on to the platform, but, at last, the train was "Must go to town-important business

Seated in the box, well to the front, and attired in an elaborate evening costume, was a girl possibly 22. Eyes we s blue, blonde hair made into a thick, wavy pompadour, and a little nose with a tendency to tip up a little, singled this girl out of a collection I had seen that extended from coast to coast. I am not a believer in affinities, but it seemed to me at first glance that I had known her engaged till she had graduated always. Even this might not have caused more than passing attention on my part, but each time I looked her way her eyes ed out one complete season as a were fastened on me intently, whether I man. Between the acts I applied my eye assiduously to the "peephole" of the curtain, but not to my knowledge had I ever seen her before.

The climax of the play, at the end of the third act, brought forth a storm of lovel. It contained a card and this inscription:

I shall be in Public Square to-morrow at 12. Would like to have a few words with you if convenient.

A feeling of disappointment swept over me. While I was overjoyed at the possibility of the writer being the occupant of the box I had noticed, I was half sorry that she (if she it was) had stooped to such unconventional methods.

The clock on the postoffice was striking 12 o'clock the next day as I crossed the street lending to one of the rather imposing entrances for such a modest little bark. Threading one of the many curve valks I saw none other than the you enter at the two previous pe

I don't know just what; and the conversation drifted to general topics without further reference to the object of our meeting. I found her ideas and mine much alike. She was unmistakably refined, and her embarrassment was proof of the unusual nature of the present incident. I admit I was more deeply impressed every moment I spent in her society.

A certain little girl up in Providence kept coming into my mind, but I resolved to see this through, then sit down quietly and sift this affair to the bottom. In fact, I was in that condition described by some one as "miserably happy," when one wonders if it's worth while thinking at all.

We walked for perhaps half an hour and before we parted I had learned that her name was Dorothy Morton, that she lived at "Oak Lawn," a mile or more out the Jackson boulevard, and that she was to meet her mother and the carriage somewhere in the shopping district. I had also expressed the hope to see her at the theater in the evening. "I won't promise," she said, with a smile that reassured me but perhaps. "Once there was a man a long ways from his home; a very lonesome kind of man, of a good enough sort, but not a bit good at saying what he had in his mindunder some circumstances. This lonesome man met a dear, sweet little girl, and loved her. He knew it was love as soon as he saw her-but he didn't dare hope that she would care for him. But something was said on both sides-not much, The conversation immediately drifted to you know-but then the man was worse shop talk," a discussion of plays and on than ever, because he was afraid he players, proving the old lady to be par- would offend the little girl if he asked her what he wanted to know most of all atrical, and passing the time, till I was But he just had to make her know some urged to stay for tea, on the promise of way-even though he felt almost sure he their carriage to the theater as soon was wrong, because he loved this little thereafter as I wished. It was another girl he had found, and he wanted her for victory for that hospitality for which the himself, for always, and couldn't bear to think what it would mean to him if he was mistaken. That little girl is-you, neans unpleasant in Mississippi, and when Miss Morton-and the man is-me. What after tea Mrs. Morton urged us to make are you going to say to the man-Dor-

time. We rose at the sound, and started back to the house. "You aren't going to let me go without some message for the lonesome man of the story are you-Dorothy?"

She had wiped away her tears, and was

came to an end at last. I walked out toward Oak Lawn on Saturday, too early for tea, and stopped every now and then to wonder what was in store for me. I pictured Dorothy walk-She sat down on a rustic seat at the ing among the trees; again the rustic bench-and my fate.

The grounds were deserted. Even the house showed no signs of life. I quickened my steps and touched the bell. Arthur answering the summons, invited me in and announced my arrival to Mrs. Mor-

In almost the same breath with her greeting she told me of Dorothy's departure on a visit of some days to relatives in the country.

It was more than a shock.

I was so completely unnerved I scarcey heard Mrs. Morton. I felt like telling her everything-taking her into my confidence-asking her advice and help. It nearly crazed me to have that fearful weight on my mind, unable to unburden nyself to any one.

Mrs. Morton thought Dorothy had left something with Arthur to be delivered to me that evening at the theater, and would ask about it. She returned shortly with a package. I took my leave some way-how, I don't know, and tore open the wrapper. Two letters were inclosed, one, with seal broken, addressed to Dorothy, the other bore my nameand was unopened. The following are faithful copies, and they tell their own Providence, R. I., Nov. 2, 1901.

My Dearest Dot: Papa has at last given his consent for my marriage with "Jack" at the end of this season, his first as a leading man, so you see I am not to be a spinster, after all. "Jack's" company reaches your city on the 10th of this month, and I am going to ask you to do the greatest of favors a friendship could prompt. You may shrink from it at first as dishonorable, but you can't know how anxious I am to know beyond question that "Jack" is proof against the charms of every other woman. Perhaps it's only a whim-a girl's fancy-maybe jealousy; but humor me in any event.

Get acquainted with him some wayany way; make an impression on him. if possible-he doesn't know you, so there's nothing to fear on that score. Let me know, dear, all he says and es. Write me in detail, and remember that I am counting on that love

of the card and flowers. That's the way it started. God knows I'm sorry it ever started. It's the old story of playing with fire-with the inevitable consequences. I cannot accept the love I have won. I will not prove false to the trust Mabel has reposed in me. Of course, I can never see you again. If you knew how I love you, you could appreciate what it costs to pen these lines-my first and my last to you. In only one respect am I going to

fall short of Mabel's demands; I can't tell her what she wants to know. You do that, dear, somebody must-I can't. Forget if you can, when you come to our city again, that Dorothy Morton ever occupied that box night after night-flirt she will not again-though in doing so once she won and lost the

only sweetheart she will ever have. Goodby, darling. Surely I can be forgiven that little word when I am sacrificing so much. And, remember. you will always have, even if honor makes it count for nothing, all the love, now and always, of

DOROTHY MORTON. That's all: I could not find it in my heart to do the telling, either. One of my best friends in the company did it for me. I suppose he must have told the boys about it, for they heard it somewhere, and wanted the facts preserved as a memorial of the time when, instead of being happily married, I grew to be the morose, unsociable member of a company of as good men and women as ever trod a board behind a footlight.

RACE GEORGE has justified the hundred thousand dollars her husband, Manager William A. Isrady, spent in proving her worthy being a star. She has done her part, too, for she has given her whole life to the hardest kind of work. She was born in Brooklyn, and was educated in a convent, which she left to go on the stage, making her debut in 'The New Boy.'' Afterward she succeeded Odet e Tyler in 'The Girl I Left Behind Me.' She attracted attention in 'Tharley's Aunt' and in 'The Wandering Minstrel' She made a brief excursion into the vaudeville and then returned to farce, making distinct hits in 'The Turtle' and 'Mile. Fin.' When Mr. Brady made her his wife he straightway set out to make her a star into the bargain, starting her first in 'Countess Chinon' which she played very well but which was a taking.
