### DETROIT WAS A VILLAGE.

C. B. Seymour of Titusville Pa., who s in town on a visit to his nephew, E. D. Foster, of 124 Charlotte avenue, was a resident of Detroit when it was only a little hamlet of 1,000 inhabitants, the supervisor in each township or city chestnut groves I have seen anywhere lying on Jefferson avenue. At that to prepare a list of all births which had are on these islands and about the time there was nothing below Jefferson avenue and very little above it, "I dropped in to see if this is the

orchards, and the fruit is largely fair. mour, used to publish from 1825 to nal office. "Not the same; well, well. The Journal of my early days was a four-page paper about 18 by 12 inches in size. It was a Whig paper then, for

> "I was six years old when we came to Michigan in 1827, and I remember people telling us that we had made a remarkably fast trip from Rochester, N. Y. We came up by the steamer, William Penn, and it took us four days and four nights. We would not call that remarkably fast now.

"Lewis Cass was governor of the territory at the time, and I remember as well as if it was yesterday when he was succeeded by Governor Mason. At that time there was a public road as far west as Plymouth, and nothing beyond it. At Ann Arbor there were only

"Perhaps you never heard how Ann Arbor got its name. Well, there were two Detroit men, Rumsey and Maynard, who moved out there in ox wagons, and when they camped for the night they lifted off the tops of their wagons and made an arbor of them, which they named Ann's Arbor, in honor of their wives, both of whom were named Ann. Both of these families are represented at Ann Arbor yet.

"The old government fort was located at the corner of Jefferson and Woodward avenues, and my father took rooms there for us while he went to locate. He took up land about two miles east of Dexter. Judge Dexter and Dr. Nichols had already settled there; John Williams was two miles to the north and a man named Bawden two miles east. Outside of these we had no neighbors nearer than Ann

Mr. Seymour, although in his 84th year, does not appear to be more than 60. He is bright and active and his physical and mental faculties are still mimpaired. He was for ten years assistant superintendent of the State Reformatory school, now the Industrial School for Boys.—Detroit Journal.

### THE HUNTING SEASON. The passing of summer and the ap-

proach of fall is apparent when it is realized that the hunting season is now less than two weeks distant and duck hunters are already planning their fall excursions into the wilds to bring down the canvass backs and teal, the latter reaching these parts early in the season.

The new duck law will take effect September I and last until January I The law now in force provides that no one shall kill more than 25 ducks in one day and nobody shall have more than 75 ducks in his possession at any

The partridge season is from Octostriking and radical changes observable speeches were made by Mayor Todd, of ber 15 to November 30, and quail are

# THE PEACE

NEGOTIATIONS FOR PEACE REACH A TRYING CRISIS.

RUPTURE AVERTED BY PRESI-DENT ROOSEVELT'S PROPOSAL.

ING FOR A PERMA-NENT PEACE.

President Roosevelt is exerting every particle of his great influence to prevent a rupture of the peace conference at Portsmouth. He is engaged in a supreme effort to induce the envoys of the belligerent governments to compromise their differences and reach an agreement that will result in "a just and lasting peace."

In this effort he has the active and contribute along with the Lansing France and Germany. Tremendous and world-wide pressure is being brought to bear upon the governments at St. Petersburg and Tokio not to permit the Washington conference to fail of affirmative result. It can be said that there is ground for the hope that it will not fail.

Baron De Rosen, Russian ambassa dor to the United States and second of the Russian emperor's envoys to the peace conference, was with Presi-Gen. James Carnahan, major-general dent Roosevelt late Saturday after-Oyster Bay by invitation of the presithe situation, but to have presented which, it is hoped, may resolve the differences which have arisen between the plenipotentiaries of the two governments. After his conference with the president, Baron De Rosen left immediately for his summer home at Magnolia, Mass., where he and Mr. Witte, the principal Russian envoy, expect to spend Sunday.

Japan has implicit confidence in the president and although without any official knowledge of this latest movement the Japanese plenipotentiaries feel certain that the president is act-The first number of a denominational school paper printed in the Dutch Russia; that before Baron De Rosen During the year ended July 1 the might under certain conditions yield views and knew on what points she postoffice at Calumet, the metropolis and what demands were regarded as of Houghton county and the copper essential and unchangeable. CHICAGO CONTRACTOR MYSTER. IOUSLY DISAPPEARS AFTER A FIGHT.

R. H. Davidson, a building contractor, is missing, and is believed to have met death at the hands of a union the employ of Frank W. Adams, as superintendent of construction of a building at Rockwell and Thirty-seventh streets. The construction of the building has been marked by continu- TO BE READY WITH A LARGE ous labor troubles.

After he had discharged a number of bricklayers, Davidson received a call from a man who is supposed to have been a union business agent CHINA MUST STOP THE BOY That was several days ago.

The interview between the contrac tor and the stranger ended in a violent quarrel in which Davidson knocked his caller down on the floor of the new building. Two days later Davidson left his work as usual. But he did not reach his residence. The next day an unknown person called Frank W. Adams on the telephone and said: "You will find your man Davidson

in the river." Since that telephonic communication no word has been heard of Dav-

Didn't Frighten the President.

That Erie railroad officials were alarmed for the safety of President Roosevelt on his way from Chautauqua to Jersey City, Saturday, is shown now that the record will stand. The by the fact made known that the president's car did not come in over the main line. Instead, the Chautauqua special was broken in two at Buffalo, N. Y., and the presidental party was brought in by a roundabout way over two small branch roads.

President Roosevelt was said to have objected to the unusual precautions taken but acquiesced when positive orders from President Underwood, of the Erie, were shown to him. These orders were issued as a result of a letter received by the Paterson police which said there was a plot to blow up the president's train near Ridgewood, N. J.

Slow time was made over the Piermont branch and the Northern railroad and extra men guarded every part of both roads. This explains the fact that the president reached New York at 8 a. m. instead of 2 a. m. It was said at first that the train had gone very slowly to allow the presidential party time to get a good rest-

A Woman's Prophesy Hundreds of families are leaving Marion, Grant county, on account of a prediction by Mrs. Viola Pownell that the city is soon to be visited by a disaster, the full extent of which she does not know, or exactly in what form it is to come. Some time ago, however, she prophesied that all evil places would be uprooted and that much of the worst element of the ity would be scattered. Since that ame 40 of the 108 saloons and all the pool rooms have been closed and all the gamblers have been run out of on file in the war department and who the place.

Mrs. Pownell is not a religious whose addresses would be filed with fanatic, but a modest, retiring woman, the department. They would be paid the mother of four children, and do-mestic in her tastes. The people that are leaving are not all ignorant or un-educated but many of them are intelligent of the army up to 250,000 educated, but many of them are intelligent and some of them engaged in business

## Remarkable Explosion.

A recent fatality at the Ludington and medicine have failed to restore mine at iron Moutain was one of the his health, he has turned to nature most remarkable chronicled in the for relief. It was soon after dawn, Lake Superior mining region. Three when the lawn was still wet with dew, men were working at the bottom of the new shaft, which is about 1,000 feet deep. A crew of miners had just Hill home. Around his form he drew finished drilling nine holes and filling them with dynamite. The three-Anton Erickson, William Anderson and Plunging boldly on, Mr. Rockefeller-Charles Anderson—were connecting walked over the grass, apparently not dynamite, preparatory to exploding, when lightning struck the shaft house, ran 1,000 feet down the steel cable attached to the skip, which was resting at the bottom, and exploded the charges. Erickson was instantly killed and his companions severely hurt.

Typhoid in Washington.

Twenty-nine new cases of typhoid fever and two deaths from the disease were reported to the health office in Washington, D. C., Tuesday. The outbreak has passed in severity that of 1903, when the greatest number of persons under treatment for the disease at any one time was 224 and it spread rapidly. Health officials are bending every effort to fight the disease, including a house-to-house inspection of back yards and cellars with a view to remedying unsanitary conditions.

## A Rich Cook.

Bates, widow of John D. Bates, to Capt. Henry F. Fitzgerald, until lately a British naval officer, has called at tention to the bride's strange career. She came to Boston from Ireland 13 years ago and became a cook in the residence of John D. Bates, who eventually married her. When Bates died five years ago he left her a fortune of \$8,000,000.

More Homestead Lands.

Dr. Francis Pounds, of Philadelphia says spotted fever is due to bathing in polluted waters. A seventh satellite of Jupiter has

been discovered by the astronomers at the Lick observatory. Secretary Taft and party have arrived in the Philippines. They were welcomed to Manila with a gorgeous

labor slugging gang. Davidson was in GETTING CONTROL OF THE YELLOW SCOURGE AT LAST.

> ARMY IS THE NEXT MOVE.

> COTT OR THE CONVEN-TION IS OFF.

Controlling the Fever Spread. The official report on the yellow fever situation in New Orleans, Saturday, follows:

New cases..... Total cases to date.....1,343 Deaths.... Total deaths to date..... 192 Cases under treatment.... 401

This Saturday's record presents quite a contrast when compared with that of a week ago, when 105 cases were reported. It has never reached that figure since and it is believed deaths continue few, which indicates that the patients under treatment are recovering more generally than hereto-

Beyond the statement that the daily figures continue to present evidence that the modern scientific campaign in progress is controlling yellow fever, the officers in charge of the work had no comment to make today. pared with the yellow fever scourge of 1878, the death list of the present visitation is low. In 1878 there were 30 statalities a day after the fever had run as long as at present. Surgeon Berry, of the marine hospital service, left his room Saturday recovered after 10 days, from his second attack of yellow fever.

### A Great Army.

It is planned by the officials of the war department to put the army oi the United States on a war footing of 250,000 men. A scheme with this end in view will be submitted to congress at its next session. It has been under consideration for several weeks by officers of the department, and they now have the plan in tangible form

The regular army now consists of 50,000 men, but it can be expanded to 100,000 by filling up the companies of the regiments to their maximum strength. The new plan contemplates the creation of a "regular reserve" of 40,000 men, which would consist of the able-bodied discharged soldiers, whose names would be placed he gamblers have been run out of he place.

The fulfillment of this prediction has been so remarkable that there is with the department.

The new plan includes the creation

John D. on Parade. John D. Rockefeller has decided to

that Mr. Rockefeller was seen to come from the kitchen door of his Forest a bathrobe and shivered as the chill caring who saw him. Possibly he thought that the early hour would prevent curious eyes from prying, but he neglected to count on the milkman, the news carrier and a few belated pedestrians, who stopped on their way to witness the spectacle. After half an hour's vigorous exercise Mr. Rockefeller returned to his room, Beads of perspiration stood on his brow and his face was a ruddy color. He appeared in excellent spirits and seemed to enjoy the exercise.

## China Must Stop.

It is reported in Pekin, upon good authority, that the American government has notified China that all negotiations for a new convention to discuss the Chinese exclusion act will be discontinued until the anti-American boycott is stopped and has also given notice that China will be held responsible for any loss sustained by reason of the boycott. The Chinese authori-The marriage here of Mrs. Mary steps to stop everything of an illegal or disorderly character but that they cannot stop the boycott.

## The Czar's Manifesto.

The publication of the czar's manifesto creating a consultative national assembly, the first step toward a constitutional and representative government in the history of the empire, was received today with the stolid indifference characteristic of the Russian peo-The president has modified his radicals were prepared in advance to ple. Startled the Doctors. Louis Viel surprised several physicians and nurses at Mercy hospital, in Des Moines, Ia., by suddenly regaining life Shortly after postmortem on him began Dr. Conklin happened to take hold of the supposedly dead man's heart and pinch it slightly. Almost instantly the organ began to throb at a natural rate. The incisions made were quickly closed. Viel regained con-sciousness a few hours later and will soon be able to leave the hospital.

The military procurator of Odessa, for every 12,000 persons.

The State Fair. putside the limits of Detroit, on which buildings, costing \$150,000 have been erected, the 56th annual State Fair of the Michigan Agricultural Society will take place September 11-1. These grounds, containing 145 acres, were the gift of Detroit citizens, who added 50 acres to their original gift of 96 acres to make space for the mile track, recently fished. Besides being extensive, the fair grounds are easily accessible to both passengers and shippers. The Detroit United Railway, running directly into the grounds, charges a five-cent fare from any point in the city. A spur of the Grand Trunk runs into the grounds

from the east.

The most interesting of the structures is the Michigan building, transported at a cost of \$15,000 from St Louis, where it represented this state at the exposition, and erected nearest Woodward avenue. Behind it is the main building, of brick, steel and concrete. The horse barns, 270 by 156 feet in size, are the largest and most substantial on any state fair grounds in the country. The grandstand, erected of steel and concrete at a cost of \$50,000, is 400 feet long, will seat 6,000 people and is absolutely noncollapsible.

The new grounds are thoroughly drained, over eight miles of drains having been laid this spring. Besides being admirably fitted and located for the state fair purposes, the grounds have immense possibilities for artistic landscape work. Eighty acres are already covered with a good turf, while two small groves will afford rest and shade for the weary. With the care and attention that will fall to their lot later, these grounds will in course of time be made as beautiful as any park. The society has been looking for a permanent location for years, and its officers consider the one they have now secured as almost ideal.

### A \$25,000 Cigarette.

Just after work had stopped in the Michigan Washing Machine Co.'s factory at Muskegon Heights Thursday night, a youthful employe tossed a lighted cigarette aside and it fell into a pile of oiled waste. Fire started almost instantly and spread rapidly. While workmen were trying to extinguish the flames a large tank of naptha exploded and the flames were scattered throughout the entire second floor, a hole blown through the roof and the interior of the factory was a furnace in a moment. All of the workmen escaped, but it was thought for a time that the night watchman had perished and his wife tried to throw herself into the flames. He turned up uninjured later. The fire was not under control until 9 o'clock, and then the main building, with a large number of washers were destroyed. The loss is \$25,000, partly insured

Gen. Miles' boom for governor of Massachusetts is spreading.

"The world owes us nothing," said "Bluebeard" Hoch in a short address to his fellow prisoners. "but we owe the world all we have. We are all victims of circumstances, but we must learn to be cheerful and make the best of our position in life. Boys, every who serves one day should be taught a lesson that he will remember to his dying day. Imprisonment, whether you are guilty or innocent, should not make you bitter against the world; it should teach you a lesson. Do good, it does not pay to be bad. That is my advice to you, hove."

down by the lake?"

that subject."

The Contented Man Contented? What makes him contented?
The comforts that struggles have gained.
Which men discontented invented,
The safety that fighters obtained.

Content in the mire would still wallow,
With trogledytes huddled in caves,
Or find in a tree's ready hollow
The shelter an animal craves,

Content hinders progress and action And cultivates ignorant sloth, Counts study a sort of distraction, And pities the follies of both.

Content maketh freemen dependent, And fastens the shackles on slaves, Its motion is ever descendent, To ditches and paupers' sad graves.

But the reverent, hearty submission To Delty's footstool men bring, After tolling with little fruition, Is a different, manlier thing. -W. J. Herbert.

Miss Courtwright stood looking | met a girl at last who will take your down the rose-bordered walk toward place in my heart and I am going to the white road. She hummed a little love her always and try and make her tune and tapped her white clad foot happy. She was thinking of wife cares for me more than I am Billy as she stood there, of his fresh, worthy of. She is one of God's best boyish enthusiasm, his invigorating works, a sweet, straightforward girl." personality and his love for her and Billy bared his young head reverwhich never seemed to change, al- ently. though she had told him every Sunday for weeks that he was not the fixed on the sparkling water; she kind of a man she could marry. And after this dash of cold water,

Billy would look very thoughtful for fully thirty minutes. They had known each other for almost five years. · Billy had met her

abroad when she had been traveling with her mother, and the tender, fragie little mother had been completely won by Billy's smile. As for Billy, "I never knew what my

mother was like," he said to her once, "but she must have been just like

They had been so much to each other, this mother and daughter, and since the mother's death Billy had never missed spending his Bundays in the little town where Mrs. Courtwright had died and where her daughter lived. He realized how lonely the girl must be, and although sne would not admit it herself, the impressive stillness of the big house was very trying at times.

To-day was one of those perfect days in June and Miss Courtwright, as she stood in the door was glad, in a vague sort of way, to be alive.

"Dear Billy," she mused tenderly to rself, "I wonder why he doesn't marry some sweet dimpled little girl and leave me to enjoy my spinsterhood in peace." But the smile died out of her eyes at the thought. It was useless to deny that Sunday was the brightest day in the week to her, and the last few Sundays especially hadbecome very deligntful memories.

know you will be happy." Could she ever forget the time they had broken the Satbath by fishing in the big lake behind the house, her wild excitement when she had first felt a tug at her line; how tney had worked thing of the girl who is to be your to land the big fish, and how dirty and wet and happy they both had been! She had told him that day, as she had for many weeks past, that she had no intention of marrying him and he had responded, as was customary, that he would not mention the subject

Finally Miss Courtwright orened the able." "Tall," asked Miss Courtwright, screen door and moved with a slow whose glorious hair was the color of grace out on the porch. A tall young man in white flannels was coming up ripe wheat. "No, short and plump and dimpled,"

the walk. "Why, Billy, you're late," exclaimed

Hummed a little tune. than never. Shall we sit here or go

"The lake for me," answered Billy. Then earnestly, "I want to talk to you, Edith. I have something to tell you." This was his usual beginning. Miss Courtwright sighed in mock resigna-

thought you were never to speak of than once during the course of her

solitary meal. And then all at once while the twiwords. "I am not going to speak of light fell Miss Courtwright found hersat down on the rocks by the water "ever again." He was watching her face intently as he spoke. "I have said, brokenly, longing by the water to will be state when the people awoke to the fact that they must do something to wait dinner for me?

There came a time in the instity of the state when the people awoke to the fact that they must do something to wait dinner for me? that subject," he said, slowly, as they self sobbing quietly.

For the second time in her young life Miss Courtwright was genuinely,

supremely miserable. She did not see the consciencestricken Billy as he emerged from out of the shadows in the garden. She face, but suddenly she felt his arms about her.

And forgetting how happy she was,

into his eyes.

"The other girl, the one who had loving patron of the big summer hotaken my place?" she asked, weakly. tel. "Doesn't exist," said Billy, promptiy. "She was only a bluff," and he kissed her on the mouth.

When Music Hall Artist Was First and Sarah Only Second.

Sarah Bernhardt has told in her memoirs, recently published, about the result of the final examination at the Paris conservatory, says the Pittsalmost overcome, failing to receive even honorable mention for her performance in tragedy and obtaining only the second prize for her work in comedy. The first prize went to Marie Lloyd, who afterward became a music

Of her chagrin and disappointment on that occasion Mme. Bernhardt

"The tall girl I had pushed went forward, looking graceful and radiant as she arrived on the stage. There were a few protestations, but her beauty, her distinction and her charm won the day with every one, so that affectionately. We were great friends received any prize the year before, Cleveland. but no one expected her to have the prize. I was simply petrified with amazement. 'Second prize for comedy, Mdlle. Bernhardt.' I had not heard, but I was pushed on the stage, and while I was bowing I could see hundreds of Marie Lloyds dancing about in front of me. Some of them made grimaces at me; others threw kisses; some of them were fanning themselves, others were bowing; they were all very tall, all these Marie Lloyds; they were higher than the ceilings; they walked over people's heads and they came to me, seizing me, stifling me and crushing my heart. My face, it appears, was whiter than my dress."

Cash The preachers in the pulpits and the wise men everywhere
Who have to earn their "vittles" and the
raiment that they wear
Are earnestly declaring, as men have That the rich are far from happy and that money isn't all;

perience. In a sense the world is up-Mr. Pullman was thrown from his buggy while returning home from San Mateo, being unable to control his horse, which ran away.

Walter Sanger Pullman, last repopulation is always underground, and maining male child of the late George M. Pullman, was 30 years old. His twin brother, George M. Pullman, Jr., died two years ago, also in California. The boys were much alike in character. When their father died it was found that his will had granted to But it is rich-very rich-interesteach of them an income of only \$3,000 ingly rich. The payrolls of the mines a year, the will explaining that Mr. and smelters are \$2,000,000 a month,

Walter Sanger Pullman.

Pullman's reasons for limiting the amount left them was due to his belief that neither had developed a sense of responsibility "requisite for the wise use of large properties and considerable sums of money."

In subsequent years their mother, Mrs. Pullman, is said to have supplemented their incomes with gifts from her personal purse.

Sanger Pullman attended the public schools and the Harvard school in Chicago, later going east to a school on the Hudson. When he was 18 years old his father gave him the position of traveling secretary for the Pullman Palace Car Company, a place that he held for only a short time.

Afterward he became a clerk in Marshall Field & Company's wholesale house, a position he held for two years. Then he quit business.

He was married on March 16, 1898, to Miss Louise Lander West of San Francisco. Since the marriage he had liven in California.

The death of Pullman leaves but two living direct heirs to the estate-Mrs. Frank Orren Lowden of Chicago, now in the Thousand islands, and Mrs. Frank Carolan of San Francisco.

Reasons for Russian Unrest.

One reason frequently given in explanation of discontent in Russia that most of the population is composed of conquered races that still remain rebellious at heart and only await a favorable opportunity to make trouble. This is a mistake if the latest Russian census can be regarded as accurate. According to the census the population of the empire is 125,000,000. Of this number 84,000,000 are purely Russian, others are mixed. One man in every 100 is a nobleman, one in every fifty either a nobleman, official or holder of some honorary title, one in every 200 an ecclesiastic, one in every 500 a merchant. The Russian nobility and the favored classes have all the time constituted the barriers which have kept the common people in the background. They have lived upon the earnings of the peasantry and have drawn heavily upon the resources of all below their own rank. If it is not found to be possible to lop off the nobility in anything like a wholesale way there should at least be a careful pruning of the most pestiferous of the titled cormorants .-New York Mail.

## BASE BALL NOTES.

The Chelsea Cardinals expect to play game of ball with Ypsilant at McLaren-BeGole park on Saturday afternoon of

The Chelsea Cardinals and the Yanigans, of Ann Arbor, played a fine game of base ball at McLaren-BeGole park on Monday afternoon of this week. In the first inning Reid of the visiting team, collided with BeGole at first base, giving Rapids. both a bad fall. BeGole, though quit severly injured on the leg, continued in the game at first base. Stenbach going to the catcher's box, where he did very creditable work. In the tenth inning Chelsea won their game by a pass to Holmes and Bacon and an error by Cush ing on Mohr's grounder filling the bases on which he should have retired the side. Graham then hit out a safety scoring all three men. The fine fielding of West and timely hitting of Graham, of the local team, with men on the bases were notable features of the game. The score by innings:

Cardinals .... 001000120 3-7 7 Yanigans ..... 101101000 1-5 6

Batteries-Cardinals, Ackley, BeGole and Steinbach; Yanigans, Nagel and Reid. Struck out, by Ackley, 15; by Nagel, 9. Umpire-John Marrinane, of Grass Lake.

The board of regents has appointed a committee to confer with the auditorgeneral and the state treasurer in regard to the construction of the law governing the new psychopathic hospital. TO AID TREE GROWTH

BUREAU OF FORESTRY STUDY-ING MISSISSIPPI LANDS.

Cottonwoods Would Stand the Overflow and Their Value Increasing-Recommend More Conservative Lumbering-Fire Precautions.

One of the investigations with which the bureau of forestry has been engaged recently is a study of the tree growth along the Mississippi river from Cairo, Ill., to New Orleans. Bordering the river is a strip of land about 15 miles wide on either side, which is subject to repeated overflows; consequently a large proportion of the area is unavailable for agriculture, notwithstanding the richness of the soil

Following the channel at a distance of from one-eighth of a mile to two miles from low-water line, levees have been erected to control the stream. Between the levees and the river there can be no question of cultivation because of the certainty of overflow, but the land easily serves to raise cottonwoods, since the trees do not object to the periodical high water. Behind the levees much of the land can be drained and cultivated. Other parts are too wet for field crops,

and there is a dense and valuable forest is found, composed of ash, oak, hickory, cypress, gum and cottonwood. The opportunity which the bureau of

forestry finds is this: On the narrow strip inside the levees cottonwood can be grown with almost no care and harvested when the trees are from 35 to 40 vears old. This wood now has a recognized place in the market for the manufacture of boxes, for furniture backs washboards, etc. One company alone uses 60,000,000 board feet a year for making washboards Behind the levees much of the land

will undoubtedly be reclaimed for agriculture, but until that shall be done the opportunity to maintain a forest of valuable trees is too good to be lost. In this forest white ash is the most important rapidly than oak and some other woods, and because it is in constant demand and can be used in small sizes. The ash has been pretty well cut out of this forest, even to trees as small as six inches in diameter. This is wasteful, and the bureau recommends the application of more conservative lumbering to these lands. This simply means that the mature trees of all species shall be logged carefully, and that in taking them out the young, immature trees, especially those of ash and hickory, of which there is also a small quantity, shall be carefully preserved and left to grow until they reach merchantable size, or a diameter of about 20 inches. If this is done, the owners of the land can count on a second crop of valuable timber before the land may be required for farm-

Of course, under such a system of management the forest must be protected from fir . The practice now is to burn out the undergrowth periodically. That destroys all the small trees. Forest management and fires cannot exist together, but there appears to be no necessity for setting these fires, and since the ground is nearly always moist, there is little danger of their being started acci-

The whole question of the profitable management of these forest lands lies within the control of the owners. Instead of reaping one harvest, as they now do, it will be almost as easy to se cure successive crops so long as the land remains unavailable for farming. When that time comes the forest must give way permanently.

Not Possible. Jones is a well-known young lawyer who some time ago established his home in one of the suburbs where a cot with an acre and a cow is supposed to be the earthly paradise.

His old chum, Brown, also of the

bar, after hearing of the rural delights for a long time, consented finally to spend Sunday on "the farm." He was received with all the honors and all the attractions were shown to him. At each meal he had to listen to eulogies of "our own make" viands. He stood patiently our own milk, lettuce from that frame you saw, peas off

## Is In-Breeding Injurious?

To this question breeders practically without exception would be expected to return an affirmative answer, but here comes Mr. N. W. Gentry of Missouri, writing in Hoard's Dairyman, and says; "We are told that in-breeding lessens constitution, vigor and size. I do not believe this to be true. believe in-breeding, if done intelligently, will simply intensify what you have, and that a vigorous constitution, large bone and great size can be as easily intensified as the reverse. You simply intensify what you have to start with. I have never been able to detect any evil effects from inbreeding in my herd, and I have watched it carefully."

This statement will be considered rank heresy by most breeders and not without good reason. That in-and-inbreeding is injurious in the long run has been proved times without number by intelligent breeders, else the practice would be as common to-day as it was in the time of Bakewell and the Collings. Even line-breeding, which is considered to be the safety valve of in-and-in-breeding, is less followed now than heretofore for the reason that even this less dangerous method of breeding was found, injurious. Duchess Shorthorns were for many years the most popular family of this fine beef breed, but we hear less of them to-day and much more of the Scotch Shorthorns which were originated for practical purposes by leaving in-and-in-breeding and line-breeding alone and simply breeding to fine, pedigreed individuals by the sensible methods of selection, writes A. S. Alexander in Farmers' Review.

Mr. Gentry inserts a loophole in his assertion when he says "if done intelligently," for no one can criticise intelligent in and in breeding, which consists in taking one or even two incestuous or consanguineous crosses to intensify evident progress made perhaps unexpectedly by a certain blending of blood. The in-bred animal is usually most impressive or prepotent as a sire in transmitting his individual traits and characteristics, and so, to intensify a happy "nick" in breeding it may be wise and safe to in-breed once or twice to obtain this prepotency. Apart from this step, which is little taken nowadays except in rare instances, in and in breeding is poor policy for the average swine breeder to follow. We have bred our purebred hogs fine enough in all conscience as seen by small litters, delicacy of constitution and susceptibility to disease. The average breeder finds it necessary by every possible means at his disposal to keep up and improve the vigor and stamina of his hogs and this cannot be done by in-and-in breed-

Like produces like, 'tis said, and correctly so. Weak hogs bred consanguineously cannot by any possible chance improve in strength, and the longer and closer we breed them in a straight line the faster and surer will be their degeneracy until they become useless or die off. Intelligent in-andin breeding means fighting against the well-known effects of such mating if carried too far, and Mr. Gentry has not seen bad effects of in-breeding for ried the practice to the confines of degeneracy. Would he advocate the in-breeding of men and women? Would he deny that such mating has led to insanity and sterility? We second thought this great and successful breeder of Berkshire swine would next time put his statement in very different words, lest young breeders, taking a cue from him, go wrong by carrying in-and-in breeding to ex-We assert with every assurance that we are correct and that the assertion will be corroborated by all men who have made the philosophy of breeding a scientific and practical study that in-and-in breeding carried to extremes does lessen constitution, vigor and size and should not be followed by the average breeder. Meanwhile Mr. Gentry's "intelligence" may and apparently has enabled him to prevent those ill-effects of in-and-in breeding, which hundreds of breeders in the past have found detrimental to their animals.

## The Apple • in Cookery

There is no other fruit which can be worked into as many appetizing dishes mercy of an unskillful cook may become tired of apple pie and applesauce, but if the housekeeper will try introducing this favorite fruit in new dishes she will find that there are endless tempting ways in which to serve it. And the chief consideration which commends its daily use is its healthfulness. It purifies the blood and tones up the system to such a perfect state of

## Floors of Fruit Storage Buildings

Within recent years a good many expensive buildings for the keeping of (17 in flavor). It was not supposed of the houses were well insulated by Apple Dumpling.-To one cup of means of paper and air spaces and it such quantities of ice should be used. either more ice was required than had

It has now been well demonstrated that the loss of frigidity was through the floors. These floors have been conwhich cinders and cement have been popular. It was taken for granted that cinders were good insulating material as they should be surrounded by innumerable air spaces. When a cement floor is laid on top of cinders the results ought to be those looked for. As a matter of fact cinders pack too closely to be a good means of insulation, and the cement on top of them does not improve matters, as cement is a conductor of heat, just as is all sand Not till the last few years has it been of too much heat to be used in a structure designed for the keeping of farm products. The temperature of the earth immediately beneath the first three feet of soil, even in winter, is such that heat constantly passes upward into the cold storage house. The below the floor is about 50 degrees, even in midwinter, and there is a constant tendency to equalize degrees of heat and cold between the cold storage

It is evident therefore that the floor of the cold storage house must be made as impervious to the passage of heat as are the sides and roof. To do board floor could be laid on mineral wool resting on the earth, the problem would be solved without getting rid of the cement floor. But at the present time mineral wool is too expensive to be used in that way. It is believed that, as this commercial article is manceedingly abundant, the inventions of men will yet find a way of producing it at a cost that will make it generally available. When that time comes the

Wood is four times as effective as brick, sand, cement or cinders for insulation purposes, and dead air is twice as effective as wood. It therefore follows that the cheapest insulated floor we can build for the cold storage houses must be constructed of wood and air spaces. A good floor is made by putting in a layer of matched boards, tarred paper, another layer of matched boards; on this may be laid two by four inch joists, and the space be filled with planer shavings, as these give innumerable air spaces Over the top of the joists place an

## **Best Temperature** for Butter Storage

In a talk to cold storage warehouse men, C. B. Lane, of the Dairy Division U. S. Department of Agriculture, said The best temperature to hold butter in storage was believed to be worthy of investigation by the Department of Agriculture and plans were perfected for an extensive experiment. The object of the investigation was to study the influence which a range of temperature exerts upon the quality of butter as determined by flavor and texture. The temperatures of the various rooms were 30 degrees, 20 degrees, 10 degrees above zero, zero and 5 degrees below, the 30-degree room being chosen as a check on the others since this temperature was As the days went by and Mr. Dick known to be too high for a long period stands for public service. The mare did not appear, I became curious and of storage. Ten thousand four hun- owner will in this way be able to determined to ask Mrs. Perry about ired and ninety-four pounds of cream were gathered by rail in the usual breeding of the horse he thinks of tion and called to her son, "Gordon, way from 19 stations, thoroughly patronizing. The The butter stored at 5 degrees pigs should not be turned in on the scored better than that stored at other | this trouble materially.-A. S. Alexanrape till the plant is twelve to four-temperatures, having lost only four der in Farmers' Review. ples, sprinkle with sugar and shreds of teen inches high. Then they will points in flavor after eight months and

bitter flavor developed after five months. The butter at 10 degrees lost quality rapidly at first, but later showed a better record, finishing with a score of 83 against 80 for the zero temperature. The lot scored at 20 grees underwent rapid and constant deterioration from the start. At four months the butter was fishy and aged and at eight months had lost 19 points well, this being used as a check tem perature. The loss in quality was excessive and shows that a much lower temperature is needed for storage of

The data gathered from this experi ment emphasize strongly the need put into service it was found that of very cold temperature for the storage of butter. A modern cold-storage house using mechanical refrigeration, where temperature of zero to 10 degrees below can be readily maintained, affords a minimum loss in quality and the question of shrinkage need scarcely be considered.

## **Government Supervision** of Stud Books

The Department of Agriculture at

Washington is doing good work in

having all stud book societies and all

societies for the registry of pedigrees

of other animals certify to the department and show that they are issuing honest, reputable books of registry based upon sufficient numbers of purebred sires and dams in each pedigree to constitute pure-bred, prepotent animals for breeding purposes. This work was engaged in to prevent undesirable horses from entering our ports duty free for breeding purposes. It became necessary when the great de- the only chance left for a touch of the mand for horses in this country tempt- sublime." Trains then proceeded uned men to bring over cheap, ill-bred der wonderfully good condition occabeasts that could not possibly serve a good purpose in our breeding operations, but which brought the importer mum. great profits in that they were cheap and could by misrepresentation be sold at high prices. The country was at one time flooded with such animals. It is now a very difficult matter to get them into the country without paying high duty fees, and few importers care to pay this tax. Naturally enough some mistakes have been made by the department in recognizing existing pedigree registry societies which should have had no such recognition. For example the department up to last month recognized the Select Clydesdale Horse Society of Scotland, although that society was openly established for the registry of pedigrees of horses produced by crossing two distinct breeds of horses, the Clydesdale and the English Shire. The name "Select" was doubtless hit upon to fool the public into the belief that these cross-bred horses were a little better than ordinary Clydesdales, whereas ing purposes, for we have shown many | time remarks: times in this department of the paper learn that the Department of Agricul- shanks. ture has at last acted against this society. Nothing else could be done, however, for the society is no longer in existence and it was this fact that led the department to expurge it from its list of recognized or certified stud books. Meanwhile many "select" Clydes have been imported and have been sold for breeding purposes throughout the country and it is quite possible that such horses will still be imported by dealers who may find it profitable to pay the duty fees. Our readers should see to it that each stallion bought for service or standing for service in their districts has a pedigree recorded in one of the foreign or American stud books recognized by the Department of Agriculture. In Wisconsin these matters are to be properly looked after for the benefit of mare owners. The pedigree of each stallion standing for public service is to be submitted to the department of horse-breeding of the State College of Agriculture and certified to by the officers of that institution, who will issue certificates of three kinds, one. for pure-breds, one for grades and one for cross-breds, and the stallion owner must have copies made of the certificate he receives and post them upon the inside and outside of the doors of every barn where the horse know in a second just what is the mare to a scrub, grade or cross-bred him to boycott such undesirable sires. unsound stallions. The work of the possible for state institutions to undertake the line of work first inaugurated by the Wisconsin College of Agriculture, for the list of stud books certified to by the Department

READ ON OLD TOMBSTONES.

Two Quaint Inscriptions That Gave Strong Testimony.

I was a visitor to the West cemetery in Litchfield a few days ago (where my bones will ultimately rest, unless l am unfortunately drowned at sea), and after inspecting the tombstones of ancestors I was interested in reading the inscriptions on some others, to wit: "Here lies the body of Mary, wife of Dr. John Buel, Esq. She died Nov. 4th, 1768, aet. 94, having had 13 children, 101 grandchildren, 274 greatgrandchildren, 22 great-great-grandchildren-total 410; 336 survive her." Another: "Sacred to the memory of Inestimable worth of Unrivalled Excellence & Virtue, Mrs. Rachel, wife of Jerome B. Woodruff, daughter of Norman & Lois Barber, whose etherial parts became a seraph May 24, 1835, in the 22 y'r of her age."-Correspondence in Hardford Courant.

### An Independent Poet.

"I'll make enough cotton to pay for my new book of poems," says the Sweet Singer of southwest Georgia, "and I'll not care a bale o' hay what the critics may say of it-so there!" -Atlanta Constitution.

### The Reason Why.

Drummond, Wis., Aug. 21st (Special)—Whole families in Bayfield County are singing the praises of Dodd's Kidney Pills and the reason why is given in experiences such as that of Mr. T. T. Wold, a well-known citizen here.

"I had such pains in my back that I did not know what to do, says Mr. Wold, "and as I came across an advertisement of Dodd's Kidney Pills, I sent for a box. That one box relieved me of all my pains. My wife also used them and found them just what she needed. I recommend Dodd's Kidney Pills as a sure cure for Backache and other Kidney Troubles."

Backache is one of the earliest symptoms of Kidney Disease. Dodd's Kidney Pills cure it promptly and permanently and prevent it developing into Rheumatism, Dropsy, Diabetes or Bright's Disease.

"I care for nothing now—I have gotmy will!" said the Princes Mar-aret, nodding her head to the Father and took hands. "Already!" said

"Already!" said Margaret faintly, For the golden lamp was burning self out, and without in the dark the lia said "Hush!" like a mother who sothes her children to sleep. might have left us alone a little longer. How shall we meet this? What shall we do? I had counted on this one day." "Margaret," answered the Sparhawk

CHAPTER XXI.

A Perilous Honeymoon. Never was day so largely and glo- Duchess Joan is safe out of his reach, tously blue since Courtland was a Kernsberg is revictualed, the Musco-ly as the first morning of the mar-led life of Maurice and Margaret von to keep up the masquered. mar, Count and Countess von Loen. summer floods had subsided, and to your brother. That will end it a tawny dye had clean gone out of he Alla, which was now as clear as quamarine, and laved rather than retted the dark green piles of the ummer Palace.

The Princesses (so they said withut) were more than ever-inseparable.
hey were constantly talking confientially together, for all the world ke schoolgirls with a secret.

"There is something toward to-ay," said a decent widow woman who ted in the Konigstrasse to her neigh-or. "My son, who as you know is a horister, is gone to practice the Wedding Hymn at the cathedral. I am oing thither to get a good place. I ill not miss it, whatever it is. Peraps they are going to make the princess Joan do penance for her hult, in a white sheer with a candle her hand a yard long! That would erare sport. I would not miss it for much as four farthings!"

And the chorister's mother hobbled if, telling everybody she met the ame story. And so in half an hour he news had spread all over the city, presently escaping into the yet greennd there began to be makings of wite a respectable crowd in the Dom er corn lands on its way to the sea. Platz of Courtland.

It was half past eleven when the rchers of the guard appeared at the them before. \* \* \* I have it. ntrance of the square which leads from the palace. Behind them, rank pon rank could be seen the lances of he wild Cossacks of Prince Ivan's eshe Muscovite army went back to the that. They say an Astrakhan trader tinuous sibilance of their whispered Sussian plains. Their dusky goat's-air tents, which had long covered he banks of the Alla, had now been call Thora. She is staunch and fully truck and were laded upon baggageto be trusted."

horses and sumpter mules.

Meanwhile, in the river palor of the wing grateful let Summer Palace, the two Princesses d suffered agont vere talking together even as the peohands, and I had said. The Princess Margaret mher companion's knee. And though the sometimes looked away, it was her ever-recurrent gaze, found that a

new thing had come into her eyes.

Presently a low tapping was heard of-that which gives the appearance of sickness unto death without the reit the inner door, from which a passge communicated with the rooms of the Princess Margaret. The Sparlawk would have risen, for the moeven the Prince's physicians." ment forgetful of his disguise. But with a slight pressure of her arm up-

n his knee the Princess restrained "Enter!" she called aloud in her clear, imperious voice.

ried in her pocket. Thora entered hurriedly and, closing the door behind her, she stood with the latch in her hand. "My Princess," to her young husband. "What Thora of the Sword Hand!" the said in a voice that was little more than a whisper, "I have heard Il news. They are making the cathedal ready for a wedding. The Costacks have struck their tents. I think a plot is on foot to marry you this day thinks or knows does not matter. I can trust Thora with my life-nay, with what is far more, with yours."

sharply.

waiting on such a signal.

whisper, "we must put off this mar-

riage. I would sooner die than marry

A light tap and the girl re-entered, a look at her mistress to obtain permission, she went to the couch upon which the Sparhawk had lain down. Then with deft hand she opened the bottle, and pouring a little of the colorless liquid into a cup she gave it him to drink. In a few minutes a sickly pallor overspread Maurice von Lynar's and his whole countenance took on the hue and expression of mortal sick-

Avoiding Potato Rot. It has for many years been a theory

to each other with one pregnant in- effect the drug had wrought in such clusion I learned that the theory had been already proved by the scientists. "You are sure that you do not feel One year I dug in the fall two fields well?" she said, with tremulous anx- blight. One field was dug while the potato vines were still green, and the The Sparhawk smiled and nodded potatoes from this field rotted badly in the cellar. We did not get around "Never better," he said. "My to digging the second field till after nerves are fron, my muscles steel. I the frost had struck and killed all the feel as if, for my Margaret's sake, I tops in that field and a light crust had could vanquish an army single-hand- formed one night on the ground. The potatoes from that field kept well all The Princess rose from her place through the winter. In both cases we picked out all the discolored potatoes produced in each field before storing them in the cellar. I have no doubt that the frost killed the blight spores And, having drawn the curtains in the latter field. Since that time, somewhat closer, she kneeled down when I have had a potato field affected by blight, I have let the digging | rogen, pyridine, viridine, picoline, lutigo as long as possible. But a man dine, collodine, parvoline, coridine and must not let them remain in the rubedene. ground till the frost hardens the soil for the winter, else he will lose his potatoes.—Charles Comstock, Cass Co., Mich., in Farmers' Review.

The Cottony Grass Scale.

In some of the eastern states during the past two years the cottony grass scale has been troublesome, destroying much grass. This is unusual, as the scale is not a new insect, but has generally been present in such small numbers that losses from it were considered insignificant. The present increase in its importance is supposed to be due to a sudden de- in the shape of a lamp post, with crease in the number of its parasitic letter box attached. On the front of enemies that kept it in check. Just the letter box in place usually occuhow far westward it is working we pied by the placard giving the hours have no record, but it is well to be on the lookout for it.

The mature female scale lays an the morning cocktail to the night cap. immense number of eggs, inclosing them in a small white sack, which is produced at the same time. Sometimes this sack is half an inch in length. When they are fully developed they are easily seen. The remedy is to burn the dried grass, either in fall or spring, but it is just as well to leave them till spring if the matter will not then be overlooked. The burning of the grass destroys the entire generation.

Farm Accounts.

One of the greatest obstacles in a darkened room with closed eyes and the sweetheart of Namon Fernandez. he way of successful farming is think of nothing. Even five minutes of Madrid. "They shall not call you the general lack of farm ac- of such rest is valuable; the muscles a liar," said Fernandez, and shot her were on the pleasant, creeper-shaded count books. H. HESELSCHWERDT, Clerk.

MRS. CHRISTINA HOFFMAN LANTIS. Mrs. Christina Hoffman Lantis passed to her eternal reward Saturday, August 19, 1905, at the home of her daughter, Mrs. A. H. Mensing, of Chelsea, with whom she has made her home since the death of her husband, five years ago.

Mrs. Lantis was born in Geri September 17, 1826, and came to Michi- lifes of the valley, and can with her parents in 1841. She was inited in marriage with Daniel Lantis October 28, 1845. This union was blessed with eight children, two of whom receded the mother in death.

Deceased was a faithful member of the German Episcopal church for many years, and loved the church and the fellowship with God's people, and like St. Paul, she pressed toward the mark for the prize of the high calling of the od in Jesus Christ.

A WONDERFUL OFFEI

erers from kidney and bladder froubles, at most convinced, that Dr. Kennedy's Calcura Solvent will cure these dangerous troubles.

Calcura Solvent's wonderful power to cause diseases of the kidneys and bladder as the happy result of the efforts of that skilled physician and surgeon, Dr. David Kennedy, to make a medicine

that would dissolve and expel from the system stone, gravel and uric acid. In this way, Calcura Solvent not only cures the disease but also revent not only cures the disease but also reves all irritating causes. It is not a patent dicine, but a prescription used by Dr. Kennedy its large private practice with unfailing success. To show our great confidence in this scientific sedy, we make this wonderful offer — to pay what Calcura Solvent you use if it does not a you, It is the only guaranteed cure for kiddesases. Try it at our expense; it will be you well. All druggists, \$1.00.

SH. CALCURA COMPANY, Kingston, N. Y.

TE CZAR'S BEAUTIFUL HOME

is Historic Spot on the Baltic Favorite Resort with the Ozars The Sea and the Long

The view of Peterhof, that histowhich for centuries gone by has the favorite summer resort of t sian emperors, is almost unrive beauty. Through a dense mas age one sees its blue star-be domes and gilded minarets glit the hot sunshine, and on a one can easily hear the melo tinkle of its innumerable i cross the water.

The imperial palace many-are built in full view Gulf of Finland, and the Alex Datcha (small wooden house) in w the czar usually takes up his suu residence, is situated at the very

Long reaches of silver birch, bee and pine meet the eye on all sid broken here and there by grassy mer ows. The trees are vocal with son stately pheasants sweep majestica through the undergrowth; partrids scream in the tall grass, and countil rabbits scurry across the

Peterhof is a veritable gard such a profusion of wild flowers. parks and woods are carpeted night-violets, that close their petals all day long and only wake at twi get-me-nots cluster near the no blood-red blossoms stain the bushes on all sides, and perfamed hyacinths and wild orchids cover the slopes until they look as if they are shrouded in a mauve-tinted mist, while deep down in the dim recesses of the birch-forests, the air is heavy with the fuscious smell fronds of giant ferns. And eve

CURE FOR BLINDNESS

VIOLET BAYS SAID TO RESTORE

Interesting Experiments with Elec tric Current in New Form-How the Treatment Is Applied.

New York.—A series of interesting xperiments with the violet ray as a cure for blindness has disclosed that electricity in this weird and strangely beautiful form has possibilities before undreamed of. Heretofore it has been used chiefly to destroy bacilli and malignant, diseased tissue, but this new experiment applied it to the optic nerves of a woman who had been properties and high merits of pronounced incurably blind by the spe Kidney Pills, and I unhesitatingly to cialists in one of the eye and ear hospitals of this city. As a result of the treatment the patient, Mrs. Charlotte Walker, is able to read the headlines on a newspaper, see the hands on a watch and pursue the ordinary vocations of

The fact that the nerves responded to the treatment proves that they were not entirely atrophied, as supposed by recommended by parties who used the physicians that administered treatised them but a very few days were position. I noticed Doan's Kidney Procured a box, and took them to the physicians that administered treating the physicians that administered treating the physicians that administered treating the position.

Whether the sight can be entirely restored will depend, according to the exabout 200 feet. Gas was struck twice perimenter, Dr. S. S. Yalian, on the patient's general condition and the cause of the trouble. If there be deep seated organic disease, affecting the entire system, the cure may not be perimenter.

fected and the improvement is likely to be only temporary. The electricity may be generated by grove, one of the most successful ever a static machine or by a coil, the static machine being used by Dr. Yal-lan. Mrs. Walker sits beside it on an insulated platform. The electrode is a glass vacuum tube with an expanded bulb at the end and an insulated handle, or one having two bulbs, this being used on both eyes simultaneous-ly. The physician applies the bulb to the temples, to the eyeballs, to the back

of each ear and over the spine and back in order to reach the cervical formerly lived in Sclo, but who has made | While the treatment is in progress his home in Ann Arbor for the past three the glass bulb is more beautiful than years, died last Saturday night, aged 47 any flower, the ray changing from pale STATE OF MICHIGAN, COUNTY OF W
