GLAZIER STOVE CO.

Special Dividend---Will Manufacture Line of Steel Ranges.

The directors of the Glazier Stove Co. net Friday, September 29, and declared special dividend of fifty per cent on he company's capital stock from the arge surplus fund that has been accumulating year by year after regularly paying the semi-annual dividend of four per cent. This company has paid to its stockholders \$108,000 in its regular semi-annual dividends since the incorporation of the business in 1901. This is proof positive that the Glazier Stove Co. deserves the reputation it has earned of being one of the most prosperous concerns in the state of

Immediately following this action the stockholders, by a unanimous vote, decided to increase the company's capitalization from \$300,000 to \$600,000, putting back into the business their dividend and a great deal more as well.

The first action meant a splendid thing for the stockholders, but their action in turn in unhesitatingly increasing the company's capital means prosperity for every one in and about

For a number of years past The Standard has insisted that Chelsea is the biggest town of its size in the state and now still better things are in store for us. The increased capital of the Glazier Stove Co. is to provide for carrying out plans that have been maturing for some time for taking on the manufacture of steel ranges and gasoline stoves in connection with the

present large business.

This move will unmistakably add to the prosperity of the company as the channels for the disposal of the company's product have been opened already through long years of satisfactory connection with the stove jobbing trade of the country. From Maine to California the trade mark "Brightest & cellence in stove quality.

will undoubtedly be built in Detroit, as it has been found inexpedient to enlarge the present plant. However, some of the new work will be carried forward here and in that all will rejoice.

Just preceeding their official action the board of directors and some of the stockholders accompanied by a representative of The Standard made a tour of inspection through the plant. In all he eighteen buildings visited not one was found but what it contained something of interest and something vital to the whole process of manufacture Probably no more significant feature was noticed than the systemization and organization which prevails. Some buildings are so crowded that seemingly there is insufficient room, yet every piece handled moves through a designated channel and no friction arises and the various stoves are assembled piece by piece and moved forward until securely crated for shipment they arrive in the warehouse or car on the company's side track. No one can realize the extent of the plant, the quality of workmanship, and the wealth of facilities in the way of high-class machinery until every department is thoroughly inspected.

The prosperity of the company is an object lesson in the wisdom of manufacturing an article of small cost, which has always an assured and stable market, and hammering home, year after year, the entering wedge of reliable quality. The oil stove, both cooker and heater, is no longer a fad but is an article which yearly appeals to thousands upon thousands of the great plain people who constitute the greatest market of the world.

#### MEET AFTER MANY YEARS.

A picture that is good to look upon, but is rare, is the meeting of two aged men, one 88 and credited with being one of the country's leading educators, and another who is past 70, who was a student under him.

The first named is Dr. Thos. Holmes, of Chelsea, Mich., now a guest of Defiance College, and for a number of years connected with Antioch College as professor of Greek. He taught there when Dr. Horace Mann, one of America's most noted educators in his time, was president of the institution.

The second character in the picture is Hon. W. D. Hill, who was a student under Horaee Mann, and took his Greek under Dr. Holmes. #### Robbed Twining Postoffice.

The safe in the postoffice at Twining was blown open by robbers early Friday morning and they secured about \$900 in cash, stamps and money orders. The robbers are believed to be the same gang which raided the postoffice at Omer on Wednesday night. The robbery occurred about 3 a. m., and the postoffice being located in Twining's store, in the heart of the village, the whole population was aroused by the explosion. The work of the dynamite was so complete, however, that the robbers were able to get their plunder and get away before anyone could intercept them. Three men were seen in a rig driving toward Prescott but they escaped when chase was given. Persons who saw them think there were two colored men and one white man. There was \$850 in cash in the plunder taken.

ARMARKABLE BURIAL OF AN MCCENTRIC ILLINOISAN.

Peeria County Man Stipulated That No budertaker, No Minister, No Hea. se or Mourners Should Bu round His Bier.

Bloomington, 311.-Perhaps the mos remarkable burial an record in Illinois was that of W. B. McClelland, of Peoria county, which opcurred in a cemetery near Elwood, No . earse conveyed the remains to the fast 'esting place; no minister of the gospel stood over the bier; no relatives were present, and no mourners assisted in the final rites. The interment, however, was exactly in conformity with the dying request of the decedent and of the wishes frequently expressed by him during the remaining years of his life. For 15 years McClelland was en-

gaged in business at Nokomis, Ill. Recently he became ill and was informed that his last days were numbered. He betrayed no emotion over the information, but sent for two residents of Nokomis, John Thorp and R. C. Hanlon, to whom he imparted his last wishes. He swore them to compliance by a solemn oath and they regarded his last requests, strange and unaccountable as they appeared, as sacred. The instructions were as follows: First-That no undertaker should

embalm his body or have anything to Second--That no car wheels should

turn under his coffin. Third-That he should have a metal

specially constructed vault. Fourth-That his remains should be interred in the cemetery at Elmwood, Peoria county.

around when he was laid to rest. Sixth-That no hearse should be Seventh-That none of his relatives

should be notified of his death until one day after his burial. Hanlon and Thorp carried out these

instructions to the letter. They experienced considerable trouble in doing so, however. They procured a light wagon and the body was conveyed from Nokomis overland to the cemetery. There, in a shallow grave, unattended by clergy, relatives or mourner, the body of the eccentric man was laid to eternal rest. The remarkable burial was kept a complete secret until homes of L. Tichenor and wife and other all the details had been carried out, as the dead man had wished. He left considerable property, and there will be considerable interest in the wording Rowe's Corners a week ago Sunday of his will, providing he left such a document. He may have provided for the distribution of his property with the same eccentricity as characterized

### COSTLY CUP OF COFFEE.

On Complaint of Woman Awaiting Letter Postman Is Suspended for Twenty Days for Stopping It.

Elizabeth, N. J.-For stopping at a house a few minutes to drink a cup of coffee while on duty, Nicholas Flynn, well-known Elizabeth letter carrier who for the last three years has been president of the State Letter Carriers' association of New Jersey, has been suspended 20 days by Postmaster Palmer Howe Charlock. This entails on the postman a loss of \$50, the high est price, it is believed, ever paid for a cup of the refreshing beverage in the United States.

Flynn has been in the service of Uncle Sam 16 years, and this is the first complaint, it is alleged, ever made against him. A woman living near the place where he drank the coffee, who was impatiently awaiting his arrival with her mail, wrote a letter of complaint to the postmaster, which brought about the suspension.

Flynn is a total abstainer, and for four years was president of the Elizabeth Branch No. 67, National Letter Carriers' association. He is treasurer of St. Paul's Episcopal chapel and warden of St. Paul's guild. He is also past chancellor of the Knights of Pythias, past chief ranger of the Foresters, a past sachem of the Red Men and a past councillor of the Order of American Mechanics.

#### DRIVEN AWAY BY PROPHECY

Families Leave Marion, Ind., Because Woman Predicted Disaster for the Near Future.

St. Louis.—Hundreds of families are leaving Marion, Ind., on account of a prediction by Mrs. Viola Pownell that the city is soon to be visited by a disaster, the full extent of which she does not know or exactly in what form it is to come. Some time ago, however, she Ohio college, has done a wise thing in prophesied that all evil places would taking a partner. Good luck from yours be uproofed and that much of the worst element of the city would ba scattered. Since that time 40 of the 08 saloons and all the poolrooms have been closed, and all gamblers have been run out of the place. The fulfiliment of this prediction has been so remarkable that there is implicit reliince in what she says, and many are eeing from the wrath to come.

"I do not know in what form this udgment will come, nor at exactly that time." she said recently, "but I a e seen the signs in the heavens in or else they part their hair in the midhe form of stars that shone like elec- dle with a wide swath, and it is warm ric lights, and the day of the visitaon is not far off. People should preare themselves now."

## YOUR MONEY BACK IF CAL-CURA FAILS.

If you have an aching back, brick dust sediment, or inflammation and pain in bladder or kidneys, go to your druggist at once and get a bottle of Cal-cura Solvent, Dr. David Kennedy's latest medicine. Its effect is marvelous; so uniformly successful that we offer you your money back if it does not help you. Cal-cura Solvent dissolves stone, gravel and uric acid in kidneys and bladder. If it did not have this power, we could not afford to sell it on a guarantee like this. Cal-cura Solvent is the only medicine for kidney and bladder troubles sold under a guarantee to cure or refund the money. We are warranted in doing this, for it has a record of cures in nine out of every ten cases. It is not a patent medicine; it is a prescription from the hands of that skilled physician and surgeon, Dr. David Kennedy, and used in his private practice with uniform success. EMPEROR FRANCIS JOSEPH.

The political crisis in Hungary has reached a point where it seriously imperils the union between Austria and Hungary. Backed by a large majority in the house of representatives and an overwhelming popular sentiment, the leaders of the coalition party of Hungary went to Hofburg to present to Francis Joseph the conditions upon which they would consent to form a cabinet and carry on the Hungarian government. The emperor-king handed them an ultimatum in which he demanded that they form a cabinet, but declined to grant any of the concessions they asked. The coalition statesmen refused to yield and returned to Budapest, and Hungary still is without a responsible government, as it has been for some months. The strained situation can hardly last much longer without some decisive result. It would be a mistake to regard the

struggle as one merely between the emperor-king and the Hungarians. It is a struggle, between the emperor and Austria on the one side and Hungary on the other. When, fifty-seven years ago, a delegation of Hungarians, headed by Louis Kossuth, obtained at Vienna the Emperor Ferdinand's | in the Hungarian army. The average soil of the corn belt does not contain 2,100 pounds of phosphorus per acre in the surface eight inches, but only about 1,500 pounds of total phosphorus to that depth. A 100-bushel crop of corn requires 23 pounds of phosphorus; consequently the total phosphorus content of this surface soil, instead of being sufficient for 10,000 crops or for 500 crops, is, as a matter of fact, sufficient for only 70 crops of corn of 100 bushels each. On the other hand the nitrogen content of the Illinois soil, instead of being only 2,600 pounds, is about 6,000 pounds per acre to a depth of eight inches; and where clover or other legumes are being grown in rotation or as catch crops, the supply is being to some extent at least renewed.

Two men would stand on the harrow at once, and yet the harrow would slip over the heavy clods. The plowing had been done at the usual time and this was in that year just "Oh," said the butcher, "that is the wrong time for it. Had the plowsaved. The kind of tillage should vary it can do

with the soil, the time of year when the plowing is done, and the particu lar time when the crop is to be put in. There are some lands that can be tilled at almost any time when the frost is out of the ground. We know of large areas of rolling farm land where men can go on with the plow and the harrow an hour after a heavy rain has stopped. We know of other fields where land cannot be worked for weeks after a heavy rain, and where all work would make the soil worse instead of better.

Pollination of Kieffer Pears.

An experimentor in the east has been pollinating Kieffer pears. He has been using Kieffer pollen. Only four per cent of the crosses of Kieffer pollen started to grow, and the fruit dropped before it was a fourth developed. The few pears that did develop were much smaller and weaker than the Kieffers that had been crossfertilized. Pollen was brought in from trees that were 50 miles away to see if the different localities would affect its efficacy. This pollen from a distance was found to be no more effective than pollen from the same tree. The same gentleman counted the blossoms per tree and estimated that if two blossoms in a hundred should produce pears, the branches would be so heavily loaded that they would be bent to the ground. He had found some orchards where Kieffer pears were planted in blocks, and the inside trees were generally unfruitful The outside trees were evidently cross pollenized from other trees that were near enough to have their pollen carried by bees or other insects.

It so chanced that all the passengers that entered one of the elevators in a tall building were going above the sixth floor, so they had opportunity to glance at the book which the young elevator man had been reading, and which lay face up on his stool. He had been so intently reading it before starting with his passengers as to be almost abstracted, although very lively and handy with the actual work once the start was made.

"I'll bet that book is an Indian fighting blood-and-thunder," whispered one passenger to another he knew.

"No; he's too old for that-I'd say t was a thriller of a love romance." "Or one of the six best sellers of the month," interjected a third.

Everybody was interested. All were "rubbering" at the book and when the group of passengers got out of the cage one deliberately stooped and looked at it.

"Young America forever," he said; "it is a volume of Blackstone. This kid will be sitting on the bench some

Tablets

# No More Constipation

Constipation doesn't get cured by itself. If let alone it gets worse instead of better. IRON-OX Tablets cure constipaton and all the ills that result from it. They tone and strengthen the liver, kidneys, bowels and stomach, and build up weak, fagged-out systems.

Iron-Ox Tablets not only relieve, but entirely cure constipation. There are no "life" or "ands" about it—to doubt is only to delay your cure.

Iron-Ox Tablets are different from any other medicine you have ever tried. They are quick, but gentle. They do not purge the bowels in a violent manner, but contain powerful tonic properties that go direct to the root of the trouble Instead of still further weakening the delicate nerves and linings of the bowels, they strengthen and heaf. The result is a cure, a permanent and lasting state of health.

Thousands of people have used Iron-Ox Tablets and regained their health through their powerful healing agency—not only in cases of constipation, but for the many ills that result from a disordered condition of the stomach and bowels.

Read the testimony of those who are in a position to say what Iron-Ox Tablets have done in their own

Mr. Mochling's Health Restored Mr. Valentine Moehling, 1857 Helen Ave., Detroit, says: "When in a run-down condition, I used Iron-Ox Tablets with the best results. They are certainly the greatest tonic on the market."

Gained Siz Pounds Mr. J. T. Bailey, 16 Camden St., Boston, Mass., says: "It affords me a great deal of pleasure in recommending your tablets to all my friends... I have found them to be the best thing I have ever used for Constipation. I have gained six pounds." Olde

Wonderful Results in Mr. Goss' Case

"I have been troubled for years with constipation and had reached that stage where Scidlitz powders and all common remedies had no effect on me, so I decided to try your Iron-Ox Tablets. When the druggist gave them to me, I felt much disappointed on account of the small size of the boxes, and thought one dose to the box; but the second day showed I was mistaken, as they worked mild but sure. Am much pleased with them. They prove the adage that "valuable things are done up in small packages." Orren W. Goss, 9 Columbia St., Watertown, Mass. "I have been troubled for years with constin
