## STOVE COMPANY'S TOWER

WILL BE 120 FEET HIGH

A Large Clock, Equipped With Westminster Chimes and 7-Foot Dials on Four Sides, to Furnish Correct Time.

So much interest has been manifested in the lofty tower of the Glazier Stove Company, which is looming up on Main street just beyond the Michigan Central tracks, that the Standard-Herald has taken pains to secure complete information regarding it. The height of the tower will be 120 feet above the foundation line, or 135 feet to the top of the flag-pole. This compares almost exactly with the height of the smoke-stack completed some months ago. The tower will appear considerably higher, however, for the reason that it sets on ground twelve or fifteen feet higher. The Catholic church tower in Ann Arbor is the only other structure in the county which compares with this in height. That tower is 120 feet high. The Chelsea tower will, accordingly, extend into the air farther than any other structure in Washtenaw county.

One of the features of the tower which will be most appreciated by the residents of Chelsea is a large clock equipped with Westminster chimes. There will be seven-foot dials on four sides of the tower, and the clock will, accordingly, furnish correct time for the people in all directions for a considerable distance. The dials will be illuminated at night. The Westminster chimes will have four bells of different tones striking the quarter-hours. Doubtless the chimes nearest to Chelsea which can be compared with those to be installed are the chimes in the Library tower on the University campus, Ann Arbor. The Westminster chimes in the Glazier Stove Company tower will be heavier in tone, however, and can be heard considerably farther. The four bells of the chimes are so arranged as to produce a very charming musical effect when the quarter-hours are struck.

The primary object of the tower is to carry a large tank of water for fire protection. This is used in connection with the complete system of automatic sprinklers which has recently been installed. It will hold twenty thousand gallons of water, which is sufficient to keep two full-sized fire-streams in action for three-quarters of an hour. The tower is built entirely of impervious brick and reinforced concrete. It is well known that this concrete increases in hardness from year to year and is just as long-lived as the best quality of stone. It is, therefore, altogether probable that the tower, which is now being erected, will remain one of the landmarks of Chelsea for several centuries to come.

### Official Statement.

To the Electors of School Dist. No. 3: It is conceded by every one familiar with the facts that it is an imperative necessity to furnish more school room especially for the high school department, if we are to keep up with other village schools and maintain our place on the university list. It is the intention and desire of the school board to erect an eight or ten room high school building north of the electric railroad and west of Main street, south of the M. C. R. R. and east of Wilkinson street; and we are satisfied that we can purchase site, erect building, heat light and furnish the same at a cost not to exceed the modest sum of \$30,000; paying for the same at the rate of \$2,000 per annum would mean an additional expense of only one and eight-tenths of a mill on the dollar of assessed valuation on the village assessment alone; and then the board intends to remove the small wooden buildings from the present school site, secure some more ground on the east side, improve and beautify the same, making it pleasant to the people of that part and at the same time a credit to the village, which can be done at a small cost. The reason for building a high school department separate from the present site should seem obvious to any unprejudiced and unselfish person who is ever ready to do his share in educating the young; first, experience has taught that it is unwise to throw together the very large and the very small scholars, it causes difficulty in maintaining order and discipline, and above all the unsanitary effect; if a contagious disease should break out in one of the grade rooms we would not be obliged to close the whole school and vice versa; we will have to employ additional janitor service no matter where the building is located; the heating expense will be the same; the sewerage expense will be cheaper and better from building west of Main street; the health of the scholars, the cheerfulness of new well-lighted rooms away and a part from the bustle and prattle of the little ones are material and essential elements of a well-appointed school building.

Every man and woman the owner of

property, whether joint or separately, twenty-one years of age, and three months in the school district, prior to June 11th, next, is a voter at this election.

Very Respectfully,  
J. S. Gorman

### MEMORIAL DAY.

Services in the Opera House and Cemeteries were Fine—The Entire Schools of Chelsea Took Part in the Program.

Memorial day was all that could be desired as to weather conditions. The services in the opera house were undoubtedly the finest ever held here. The Chelsea schools took a prominent part in the program, and their efforts were fully appreciated by the large audience present.

Theo. E. Wood acted as presiding officer and read General Orders Nos. 8 and 7 of the G. A. R. Rev. T. D. Deenan opened the services with prayer. A recitation by Carlton Ranciman was well rendered and suitable for the occasion. The next number was a vocal selection by the Chelsea schools. Superintendent E. E. Gallup read Lincoln's address at Gettysburg. Miss Helen McGuinness gave a fine recitation, which was followed by a vocal selection by the school children.

Rev. Joseph Ryerson delivered the address, which was a good one and replete with patriotic sentiments that will long be remembered by all who were present. The next number was a vocal selection by the school children. The benediction, by Rev. M. Lee Grant, closed the proceedings at the opera house.

A line was formed in front of the opera house, headed by the Chelsea band, Chelsea Tent, K. O. T. M. M., acting as escort for the Post, and the L. O. T. M. M. acting in the same capacity for W. R. C.; the flower-wagon, school children and citizens came next in order.

At the cemeteries a line was formed around the soldiers' monument, where the service of the W. R. C. and Post was carried out. The school children decorated the graves of the deceased veterans with flowers.

This is the first time in Chelsea that the entire schools have ever taken part in the memorial services, and they did their parts extremely well.

### COMMENCEMENT EXERCISES.

Thursday Evening, June 20th in the Opera House—A Class of 15 Will Graduate.

The commencement exercises of the class of 1907 of the Chelsea high school, will be held in the opera house, Thursday evening, June 20. A class of 15 will be presented with diplomas.

The commencement sermon will be delivered by C. S. Jones, of Detroit, in the Congregational church Sunday evening, June 16.

McKune, Isabelle Velma Richards, Clarence E. Weiss, Beryl McNamara, Hazel I. Speer, Mary A. Weber, L. Ruth Bacon, Edmund F. Robinson.

### Myers-Maloney.

Married at 7:30 o'clock Tuesday forenoon, June 4, in the Church of Our Lady of the Sacred Heart, Miss Barbara Myers and Mr. Timothy Maloney both of Chelsea. The couple were attended by Miss Marie Heafner, of Battle Creek, and Chas. J. Myers, brother of the bride. The bride wore a dress of blue crepe de chene and carried a bouquet of white carnations and the bride's maid wore blue swiss lawn and carried pink carnations. The ceremony was performed by Rev. Fr. Constline and was witnessed by a number of near relatives and many friends.

The L. C. B. A. and Ladies' Sodality were largely represented, both of which she is a member. A wedding breakfast was served to a number of near relatives. After a short trip the newly-wedded couple will reside on North street in the residence of Chas. J. Myers.

You can't tell a woman's age after she takes Hollister's Rocky Mountain Tea. Her complexion is fine. She is round, plump and handsome; in fact she is young again. 35 cents, tea or tablets. Freeman & Cummings Co.

## LOCATES FLOWING WELL

ON THE WAGNER PROPERTY

The Gusher Flows Three Hundred Barrels of Clear Water per Hour—Comes Through a Good Gravel Bed.

The common council of Chelsea has had a number of test-wells put down along the line of the present wells that furnish the water supply. On the east side of Main street one was driven near the spring on E. Hooker's property and others near the present wells. On the west side of Main street, on the Beasley property, tests have been made and in every instance water was found, but not altogether suitable for the requirements of the municipal water works.

Saturday, however, a fine flowing well was found on the property of John G. Wagner on North street. A three-inch pipe was driven down some twenty-one feet, and suddenly the workmen discovered that they had located a flowing well that will supply a large volume of pure water.

The water supply for the gusher comes through a bed of gravel fifteen feet in depth, which furnishes a perfect filter. The water is as clear as crystal and perfectly pure. The force of the stream is so strong that a large quantity of gravel-stone has been forced up through the pipe to the surface—some the size of a hen's egg. The present flow of the new well is 300 barrels, or 9,000 gallons of water per hour, and it comes with force enough to throw a stream of water about four feet above the top of the pipe.

It is quite evident that Chelsea has found in the well on the Wagner premises a supply of water that will fill the requirements of the water-works plant for some years to come.

### The Birth of the American Flag.

Friday, the 14th of June, will be the one hundred thirtieth anniversary of the birth of the flag of the United States. The flag was designed for a nation of thirteen colonies, stretched like a belt along the Atlantic coast, made up of less than three millions of people without common traditions or language; drawn together only by common danger from savages within, and oppression from without, which threatened their existence and liberties. That flag now waves over a great nation, extending from the Gulf of Mexico to the Lakes; from the Atlantic to beyond the Pacific Sea; and inhabited by nearly ninety millions of people, who speak a common language.

Our flag is now in form—the oldest flag of civilized nations. The resolution of Congress for the adoption of the Stars and Stripes on June 14, 1777, was as follows: "Resolved, That the flag of the United States be thirteen stripes, alternate red and white; that the Union be thirteen stars, white in a blue field, representing a new constellation." The design of this flag is credited to George Washington, and in part was taken from his family coat of arms. Such is the origin of a flag dedicated to the proposition that "all men are created free and equal." Let us honor the natal day of our national flag—displaying it from our public buildings, schools and homes in recognition of this memorable day.

The men of the Grand Army of the Republic, who preserved the nation in the greatest war of modern times and made vital the Declaration of our fathers, call upon all who live under the flag to recognize this day by patriotic observances in schools and—on the Sunday preceding—in churches. To this end we suggest that the governor of every state by proclamation announce the day and promote its recognition; that the press scatter this call—as seeds of patriotism—broadcast over the land. Such recognition will nourish the greatness of our nation, inculcate noble citizenship, the principles of civil liberty, and be an object lesson to the new generations that have come upon the stage since the civil war.

WARREN LEE GOSS,  
National Patriotic Instructor,  
Grand Army of the Republic.

### Notice.

A special meeting of the legal voters of School District No. 3, Fractional, in the township of Sylvan and Lima, Washtenaw county, Michigan, called on the written request of five legal voters, will be held at the Town Hall in the village of Chelsea, on the eleventh day of June, A. D. 1907, at 8:30 o'clock p. m., for the purpose of submitting to the legal voters of said school district the question of bonding the district for a sum not exceeding \$50,000, for the purpose of purchasing a site and erecting a new high school building at a cost not to exceed the above amount, including heating, lighting, plumbing and furnishing. Dated this 3rd day of June, 1907.

## SERIAL STORY

### THE HOUSE OF A THOUSAND CANDLES

By MEREDITH NICHOLSON

Author of "THE MAIN CHANCE," "ZELDA DANEZON," Etc.

Copyright 1914 by Robert Merritt Co.

CHAPTER XII.—Continued.  
"But I suppose the Sisters are awfully strict."

"They're hideous,—perfectly hideous."

"Where is your home?" I demanded.

"Chicago, Louisville, Indianapolis, Cincinnati, perhaps?"

"Humph, you are dull! You ought to know from my accent that I'm not from Chicago. And I hope I haven't a Kentucky girl's air of waiting to be flattered to death. And no Indianapolis girl would talk to a strange man at the edge of a deep wood in the gray twilight of a winter day,—that's from a book; and the Cincinnati girl is without my clan, esprit,—whatever you please to call it. She has more Teutonic repose,—more Gretchen of the Rhine valley about her. Don't you adore French, Squire Glenarm?" she concluded, breathlessly, and with no pause in her quick step.

"I adore yours, Miss Armstrong," I asserted, yielding myself further to the joy of idleness, and delighting in the mockery and whimsical moods of her talk. I did not make her out; indeed, I preferred not to! I was not then,—and I am not now, thank God!—of an analytical turn of mind. And as I grow older I prefer, even after many a blow, to take my fellow human beings as I find them. And as for women, old or young, I envy no man his gift of reasoning them into elements. As well carry a spray of arbutus to the laboratory or subject the enchantment of moonlight upon running water to the flame and blow-pipe as try to analyze the heart of a girl,—particularly a girl who paddles a canoe with a sure stroke and puts up a good race with a rabbit.

A lamp shone ahead of us at the entrance of one of the houses, and lights appeared in all the buildings.

"If I knew your window I should certainly sing under it,—except that you're going home! You didn't tell me why they were deporting you."

"I'm really ashamed of you! You would never!"

"Oh, yes, I would; I'm really an old friend!" I insisted, feeling more like an idiot every minute.

"Well, don't tell! But they caught me flirting with the grocery boy! Now aren't you disgusted?"

"Thoroughly! I can't believe it! Why, you'd a lot better flirt with me," I suggested boldly.

"Well, I'm to be sent away for good at Christmas. I may come back then if I can secure myself. My! That's slang,—isn't it adorable?"

"The Sisters don't like slang, I suppose?"

"They loathe it! Miss Devereux,—you know who she is!—she spies on us and tells."

"You don't say so; but I'm not surprised at her! I've heard about her!" I declared bitterly.

We had reached the door, and I expected her to fly, but she lingered.

"Oh, if you know her! Perhaps you're a spy, too! It's just as well we should never meet again, Mr. Glenarm," she declared haughtily.

"The memory of these few meetings will always linger with me, Miss Armstrong," I returned in an imitation of her own tone.

"I shall soon remember you!"—and she folded her arms under the cloak tragically.

"Our meetings have been all to few, Miss Armstrong. Two, exactly, I believe!"

"Then you prefer to ignore the first time I ever saw you," she said, her hand on the door.

"Out there in your canoe? Never! And you've forgiven me for overhearing you and the chaplain on the wall—please!"

She grasped the knob of the door and paused an instant as though pondering.

"I make it three times, without that one, and not counting once in the road and other times when you didn't know, Squire Glenarm! I'm a foolish little girl to have remembered the first. I see now how I-I-I-I-I have been. Good-by!"

She opened and closed the door softly, and I heard her running up the steps within.

I ran back to the chapel, roundly abusing myself for having neglected my more serious affairs for a bit of silly talk with a school girl, fearful lest the openings I had left at both ends of the passage should have been discovered. Near the chapel I narrowly escaped running into Stoddard, but I slipped past him, found my lantern, pushed the hidden door into place, and, traversing the tunnel without incident, soon climbed through the hatchway and slammed the false block securely into the opening.

## CHAPTER XIII.

### A Pair of Eavesdroppers.

When I came down after dressing for dinner, Bates called my attention to a belated mail. I pounced eagerly on it, and found it was from

prise, an American stamp and post-marked New Orleans. It was dated, however, at Vera Cruz, Mexico, December 15, 1901, and gave a characteristically racy account of his efforts to dodge the British detective who was pursuing him. He hoped, he wrote, to cross the borders into Texas, but declared that he should keep clear of Indiana, as he was unacquainted with the Indian language.

Bates gave me my coffee in the library, as I wished to settle down to an evening of reflection without delay. Larry's report of himself was not reassuring, despite its cheerful tone. I knew that if he had any idea of trying to reach me he would not mention it in a letter which might fall into the hands of the authorities, and the hope that he might join me grew. I was not, perhaps, entitled to a companion at Glenarm under the terms of my exile, but as a matter of protection in the existing condition of affairs there could be no legal or moral reason why I should not defend myself against my foes, and Larry was an ally worth having.

My neighbor, the chaplain, had inadvertently given me a bit of important news; and my mind kept reverting to the fact that Morgan was reporting his injury to the executor of my grandfather's estate in New York. Everything else that had happened was tame and unimportant compared with this. Why had John Marshall Glenarm made Arthur Pickering the executor of his estate? He knew that I detested him, that Pickering's noble aims and high ambitions had been praised by my family until his very name sickened me; and yet my own grandfather had thought it wise to trust his fortune and my future to the man of all men who was most repugnant to me. I rose and paced the floor in anger.

and I passed him and went on into the grounds. A whim seized me to visit the crypt of the chapel and examine the opening to the tunnel. As I passed the little group of school buildings a man came hurriedly from one of them and turned toward the chapel.

I first thought it was Stoddard, but I could not make him out in the mist and in my uncertainty waited for him to put 20 paces between us before I followed.

He strode into the chapel porch with an air of assurance and I heard him address some one who had been waiting. The mist was now so heavy that I could not see my hand before my face, and I stole forward until I heard the voices of two men distinctly.

"Bates!"

"Yes, sir."

I heard feet scraping on the stone floor of the porch.

"This is a devil of a place to talk in, but it's the best we can do. Did the young man know I sent for you?"

"No, sir. I kept him quite busy with his books and papers."

"Humph! We can never be sure of him."

"I suppose that is correct, sir."

"Well, you and Morgan are a fine pair, I must say! I thought he had some sense and that you'd see to it that he didn't make a mess of this whole thing. He's in bed now with a hole in his arm and you've got to go on alone."

"I'll do my best, Mr. Pickering."

"Don't call me by name, you idiot. We're not advertising our business from the house-tops."

"Certainly not," replied Bates humbly.

The blood was roaring through my head, and my hands clenched as I stood there listening to this colloquy.

is necessary for durability. If paint will not give and take, it soon cracks off. Pure White Lead has that elastic quality. Cheap substitutes make brittle paint, which will not expand and contract with the changes in the weather.

## MICHIGAN STATE FAIR

Will Be Held in Detroit Aug. 29 to Sept. 6

\$10,000 ADDED TO PREMIUMS

Determined Effort to Make It the Best  
Ever Held in Michigan and in Many  
Respects Superior to the Great Toron-  
to Exposition.

Visitors to the State Fair, held un-  
der the auspices of the Michigan  
State Agricultural society at Detroit,  
August 29 to September 6, will wit-  
ness an industrial exhibition that will  
surpass in many respects the famous  
Toronto exposition. As a matter of  
fact both in attendance, the value of  
the exhibits, and the premiums offered,  
the State Fair has grown into an  
annual exposition that has attained no  
little fame far beyond the bound-  
aries of the state.

One of the most important factors  
that has entered into the upbuilding  
of the fair is the perfect harmony  
existing between the officers of the  
Agricultural society. President Fred  
Postal, former senator, A. J. Doherty,  
Secretary I. H. Butterfield, Treasurer  
John McKay, and Business Manager  
Chas. A. Floyd, have worked early  
and late for the success of the 1907  
exhibition, and the wonderful improve-  
ments made in the buildings, grounds,  
transportation facilities, premium  
lists, and extra attractions are mute  
testimonials to their efforts. The ex-  
perience Mr. Doherty gained as chair-  
man of the finance committee last  
year has proved invaluable to him as  
general superintendent. He knows  
the fair's shortcomings and has  
evolved plans that will overcome  
them as rapidly as possible.

It has been determined to add \$10,  
000 of the appropriation made by the  
state legislature to aid the fair to  
the premium lists. This will make  
the awards given exhibitors by far  
the most liberal in the history of the  
state. In addition new classes have  
been added in the cattle, horse, sheep,  
and swine departments. Secretary  
Butterfield will begin the work of  
mailing the premium lists to farmers,  
stock growers, and former exhibitors  
about June 1.

An improvement this year that will  
appeal to every exhibitor is the addi-  
tion of three side-tracks to the rail-  
road facilities within the grounds. New  
Trunk railroad for the installation of  
the new sidings, and the improvement  
will almost triple the capacity of the  
fair yards.

The fair of 1906 was handicapped  
to a great extent through several  
buildings being completed only a day  
or two before the gates were opened.  
In many instances unfinished side-  
walks, and rough interiors greeted  
the visitor, but this has all been  
changed and the grounds undergone a  
complete transformation. Under  
the direction of L. R. Taft, of the  
Michigan Agricultural college, a land-  
scape gardener has laid out new  
walks, and arranged to turn the north  
end of the grounds into a rest spot.  
Heretofore it has been used by the  
horsemen and contained tumble down  
shacks. The beautifying of this spot  
will remove the only unsightly fea-  
ture on the many acres devoted to  
State Fair purposes. By mid-summer  
a superb collection of shrubs will be  
at their best, and the lawns that were  
seeded a year ago will be covered  
with a carpet of heavy grass.

"Something doing every minute,"  
has been the motto of Business Man-  
ager Floyd in arranging the attrac-  
tions to be seen from the grand stand  
at night and between races during  
the afternoon program. Mr. Floyd  
has contracted for almost every form  
of entertainment known to the amuse-  
ment world, and also for several spec-  
ial features that have never been seen  
outside of New York and Chicago. His  
program as arranged includes: High  
diving, deep sea diving, gymnastic  
work on apparatus, tumbling, tight  
rope walking, trained animals, excit-  
ing cowboy races, and wild west  
scenes. He is at present endeavoring  
to arrange for a genuine western vil-  
lage to be shown on the grounds. If  
he is successful in completing ar-  
rangements they Indian paposes can  
be seen as they have been unblinking-  
ly from the narrow framework strapped  
to their mother's back. War dances  
will be given in full Indian regalia  
every afternoon and evening, and  
among the relics of the old western  
days shown will be a stage coach  
that has been ridden with bullets  
time and again while crossing the  
plains. A special feature will be made  
of the Indian museum, featuring  
being present to explain the history and  
significance of every article shown.

Every visitor will be interested in  
the ostrich farm. Between 50 and  
60 birds will be shown, in addition to  
over a score of "chicks" that are far  
larger than a good-sized hen. The de-  
tails of ostrich farming will be gone  
into thoroughly while a collection of  
magnificent feathers will be on exhibi-  
tion. Several of the mammoth birds  
have been trained to draw sulkeys and  
will be seen upon the race track.

The fair management has deter-  
mined that no criticism can be made  
of the various entertainments  
granted the privileges of the  
fair grounds. Every show must be  
absolutely moral in tone, and fulfill  
every representation of what is to be  
seen inside the tents.

Dairymen who visit the state fair  
will have an opportunity of seeing a  
milk machine in actual operation.  
Gov. Warner is the owner of the only  
milk machine in the state in addi-  
tion to the one that will be shown at  
the fair. They are mechanical con-  
trivances that show the constant ef-  
fort inventors are making to reduce  
the cost of production in the dairy and  
butter business.

The educational department of the  
fair is under the personal supervision  
of George B. Horton, of Fruit Ridge,  
president of the Michigan State  
Grange. Mr. Horton has placed a  
large share of the detail work in the  
hands of Thomas M. Sattler, superin-  
tendent of the Jackson county schools.  
The work has become one of Mr. Satt-  
ler's hobbies, and in a letter to Presi-  
dent Postal he recently declared:  
"What he would like every inch of ex-  
hibition space allowed him."

Liberal prizes will be given for the  
best examples of graded school work.  
Specimens will be shown embracing  
what is accomplished throughout the  
state by classes in manual training,  
forestry, domestic science, drawing,  
clay modeling and painting. Mrs.  
Belle F. Clark, of Denton, will have  
active charge of the needlework de-  
partment, and has already asked that  
she be allowed twice the amount of  
space given to the needlework exhibi-  
tion last year.

C. A. Tyler, of Nottawa, secretary-  
treasurer of the American Hampshire  
Sheep Association, and also secretary  
of the State Livestock Sanitary Com-  
mission, will again superintend the  
exhibit of cattle. In furtherance of  
the determination of the state fair of-  
ficials to increase the premiums paid  
to Michigan bred cattle from time to  
time, the "home bred" classes will be  
treated with unusual liberality this  
year. A new class has been added for  
Ayrshire cattle, and a special prize  
will be offered for dairy short horns.  
The American Short Horn Breeders'  
Association prize of \$200 will be in-  
creased to \$400 by the society. This  
amount will be given in addition to  
the regular premiums offered for  
American short horns.

The special dairy prize of \$100 given  
last year for economical dairy produc-  
tion will be continued this year. This  
prize is open to all breeders. Tests will  
be made for three days by the State  
Dairy and Food Department based on  
cost per unit of the total product.

The horse department has been  
greatly improved. The classifications  
have been enlarged covering standard  
bred, coach and saddle horses. A new  
class has been added for the Ameri-  
can coach horse while the Clydesdale  
and Englishshire horses have been  
placed in separate classes. A cham-  
pion cup will be offered for the best  
stallion shown with a colt of his get.  
This department is in charge of L. C.  
Holden of Sault Ste. Marie. Mr. Hol-  
den is the owner of a large stock farm  
situated in Chippewa county, and is  
known to every horse breeder in Michi-  
gan.

The largest premiums in the history  
of the fair will be offered this year  
for Michigan bred sheep. The classi-  
fication and the number of breeds re-  
presented will be larger than those  
shown at any fair in the United States.  
W. E. Boyden, of Bay City, who will su-  
perintend this department, is an expe-  
rienced sheep breeder and is known  
personally to every stockman in the  
lower peninsula.

Rep. W. J. Galbraith, of Calumet,  
has been gradually adding to the min-  
eral collection that will be shown at  
the fair this year. Not only will  
every metal that is taken from the  
ground in Michigan be displayed, both  
in its natural and manufactured state,  
but the method of mining, the machin-  
ery used, and the history of the min-  
ing discoveries will also be shown.

The poultry department, Superin-  
tendent Daniel Thomas, of Pontiac,  
has prepared good lists and liberal  
premiums. A. H. Griffith, of Detroit,  
director of the Detroit Museum of  
Art, who will superintend the art ex-  
hibit, has arranged for an elaborate  
display of costly paintings. In the  
fruit and flower department many pre-  
miums have been added. Rep. W.  
Snell, of Highland Park, has stated  
that the dairy exhibit, of which he  
will have charge, will be one of the  
most complete ever seen in Michigan.

Some idea of the growing fame of  
the State Fair even beyond the con-  
fines of the state can be gained by  
the fact that Secretary Butterfield  
has received over 50 applications  
from implement dealers all over the  
country for space to display their  
wares. Hardware dealers and manu-  
facturers throughout the state have  
awakened to the opportunity offered  
by the State Fair for the exhibition  
of their wares, and it is thought that  
the booths in the industrial building  
this year will be both numerous and  
costly.

While the fair will be closed on  
Sundays this year, it will swing for  
every night. The first thing every morning  
visitors will not be locked until the last  
visitor has wended his way home-  
ward.

The executive committee of the  
Michigan Agricultural society an-  
nounces that all entries must be made  
in the various classes before the fol-  
lowing dates:

All live stock entries close on Aug-  
ust 22.  
All entries in fruits and flowers close  
August 30.  
In all other divisions on August 28.

Special prizes have been offered  
during the past five years for ex-  
hibits of grains, fruits and vege-  
tables from the upper peninsula.  
When first offered they met with little  
response, but the exhibit has grown  
to be one of the largest and most im-  
portant seen at the fair. The Upper  
Peninsula Agricultural college will  
be represented this year with a com-  
plete display of agricultural products.  
The exhibit will be in charge of Prof.  
Leo M. Gelsmar, Chatham, Mich., who  
is the secretary.

Excellent provision has been made  
at the State Fair for dining halls and  
lunch booths right near the main  
buildings, where the many thousands  
may find ample facilities for lunch-  
ing. Two large and airy dining  
halls provided by the society will be  
operated by experienced parties who  
have leased the buildings. Several  
religious orders will maintain restau-  
rants so it will be on the whole con-  
venient and unnecessary for visitors  
to bring their lunches with them.

The Agricultural college will pre-  
sent an interesting exhibit showing  
the different methods of packing ap-  
ples and pears. This demonstration  
will prove helpful and instructive to  
many Michigan farmers and fruit  
growers.

A demonstration in handling bees  
will be given each day in the apia-  
ry exhibit. This part of the State Fair  
exhibits is constantly growing year by  
year.

Consumption is less deadly than it used to be.

will result from the following treatment:  
Hope, rest, fresh air, and—**Scott's

## GOING TO THE CIRCUS?

This is the Question That Barnum &  
Bailey's Local Admirers are Asking  
One Another.

An exodus of considerable proportions  
is quite probable when the Barnum &  
Bailey "Greatest Show on Earth" exhibi-  
its at Jackson, June 15th, which will be  
the nearest place of exhibition. The  
railroads, as has been customary, an-  
nounce excursion rates on that day.

The public has learned to associate  
the idea of magnitude and novelty with  
the Barnum & Bailey Show, but it is evi-  
dent that no previous conception of its  
size and scope can do it justice.

From the standpoint of magnitude  
alone, the Barnum & Bailey circus would  
justify its title of "The Greatest Show  
on Earth." Some idea of its compre-  
hensiveness may be gained from the fact  
that five long trains of cars are utilized  
to transport the paraphernalia from city  
to city. The big show employs, in its  
various departments, nearly 1,100 men,  
women and children; the horse fair in-  
cludes over 300 horses; the zoological  
department presents three herds of big  
and little elephants, and hundreds of  
other animals, including four towering  
giraffes and the only specimen of the  
very rare bi-horned rhinoceros in this  
country.

These figures serve to give an idea of  
the colossal proportions of the show.  
The scope of the performance is indi-  
cated by the fact that, in addition to  
scores of feature acts of a strictly circus  
character, and the very best of their  
kind, the show has this season intro-  
duced a series of new acts of such  
startling and sensational nature as to  
create a genuine furore wherever they  
have been seen. An automobile speeds  
down a runway with the rapidity of an  
express train, shoots into the air and,  
continuing its journey, lands on a second  
runway and runs to the ground. This  
thrilling act is known as the "Dip of  
Death," and the daring chauffeur who  
drives the auto is a young American  
giant. Another "thriller" presented for  
the first time this season, introduces  
Capt. Carl Howelsen, the champion ski-  
jumper of the world, who performs a  
startling slide and flight for life on  
eight-foot skis.

Owing to its magnitude, the Barnum &  
Bailey circus, it is announced, will con-  
tinue to eliminate the parade.

**Insurance Claims Allowed.**  
At the meeting of the directors of the  
Washenaw Mutual Fire Insurance Co.,  
last Friday, the following losses were  
adjusted: Joseph Geraghty, of Webster,  
claim for a steer killed by lightning,  
allowed at \$40; Samuel Canby, Pittsfield,  
for damage to barn, claim allowed at \$1;  
Miss Martha French, of Dexter, loss of  
house and contents, fire started from  
burning chimney, claim allowed at \$2-  
593.48, and the claim of Wm. F. Morrison,  
who lived in the same house, for loss of  
household goods, was allowed at \$544.10.  
The claim of Mrs. Eliza J. Osborne, of  
Whittaker, for damage to barn by light-  
ning, was allowed at \$2.28.

**Remarkable Rescue.**  
That truth is stranger than fiction, has  
once more been demonstrated in the  
little town of Fedora, Tenn., the resi-  
dence of U. V. Pepper. He writes: "I  
was in bed, entirely disabled with hem-  
orrhages of the lungs and throat. Do-  
ctors failed to help me, and all hope  
had fled when I began taking Dr.  
King's New Discovery. Then instant  
relief came. The coughing soon ceased;  
the bleeding diminished rapidly, and in  
three weeks I was able to go to work."

## Deafness Cannot be Cured

By local applications, as they cannot  
reach the diseased portion of the ear.  
There is only one way to cure deafness,  
and that is by constitutional remedies.  
Deafness is caused by an inflamed con-  
dition of the mucous lining of the  
eustachian tube. When the tube is in-  
flamed, you have a rumbling sound or  
imperfect hearing, and when it is en-  
tirely closed, deafness is the result, and  
unless the inflammation can be taken  
out and the tube restored to its normal  
condition, no hearing will be restored.  
We will give one hundred dollars for  
any case of deafness (caused by catarrh)  
that cannot be cured by Hall's Catarrh

## The Diplomatist.

It used to be said that a diplomatist was a man who was sent abroad to lie for his country. To-day it would be much nearer the truth to say that a diplomatist is a man who is sent abroad to tell the truth for his country. A most interesting account has recently been given of the petition for better treatment of the Jews, and the protest against the Kishinev massacre. In order to gratify the signers of the petition, the state department forwarded it to Ambassador McCormick at St. Petersburg, although well aware that the Russian government could take no official cognizance of it. When the paper was laid on the table before Count Lamsdorf, he said, "You know I cannot receive this." Then, according to the story which is reported by Collier's, Mr. McCormick replied, "Let us talk for a few minutes as man to man. You are Count Lamsdorf, and I am not an ambassador, but merely Mr. McCormick. The time has come when you can no longer disregard public opinion. The whole world is aroused. Do me the great favor, personally, of keeping this for two or three days. Then if you are still of the same mind, send it back to me, and no more will be said." In the end Count Lamsdorf showed the petition to the czar, who was sufficiently impressed by it to ameliorate somewhat the condition of the Jews.

## Science Vs. Charlatanism.

Nothing in years has made the chemists rage together so furiously as the exploited "discovery" of a compound which will make ashes burn better than coal. Of one formula—we are aware that this was not the one tried in a hotel boiler room the other day—Prof. Gill of the Massachusetts Institute of Technology, says: "It contains nothing, nor can it make anything, that in any way will aid combustion." Even if the inventor's preposterous theory of its working be accepted, the professor says that the heating capacity of a gallon of the mixture would be about equal to that of a piece of coal the size of a pea. "Why," the scientific men all ask, "does this piece of charlatanism get itself spread broadcast over the country when discoveries of real scientific importance go unheralded?" We do not know of any reason which would not apply equally to medical nostrums. They create sensations because of the prodigious value they would have if they were only real. The inventors of ash-burning formulae, remarks the New York Post, might well ask their academic critics to point to any achievement of science within, say, 25 years that would benefit directly and indirectly so many people as a method for burning ashes.

Naming the Spanish baby the prince of Asturias is just a temporary arrangement until the geographers and the philologists can get together and, with the aid of relays of stenographers, fix up a permanent name for the helpless infant. The real and official name of a Spanish king is like a Chinese play. You read part of it to-day and come back to-morrow and the day after to get the rest. It embraces everything that the historians can think of and a few more smooth-sounding words thrown in for good measure. One would judge from reading the official title of King Alfonso XIII, for instance, that he was the supreme ruler of the earth, the air, the waters under the earth and New Mexico, Alaska, Patagonia and all intermediate points. If you will notice, their photographs show that nearly all the recent kings of Spain were stooped-shouldered. That came from trying to carry their full names around with them.

One of the modern improvements in mail service which the United States government has been foremost in adopting is the establishment of "sea post offices." This means the providing of facilities on ocean-going steamers by which mail is assorted on board and delivery thereby expedited. It is represented that mail thus disposed of reaches the intended destination 12 hours earlier than by the old system. Postmaster General Meyer approves the plan and contemplates extension of the arrangement. He is preparing to create at least two more of these "post offices" on vessels carrying American mail to Europe, the result of which will be highly pleasing to postal patrons.

## ROOSEVELT HAS A BUSY DAY AT STATE CAPITAL AND COLLEGE.

## THOUSANDS GREET HIM

Delivered Three Speeches and With Cheers and Military Display Lansing Rejoiced.

President Roosevelt reached Lansing a few minutes after 10 a. m. Friday. He went directly to the capitol, under military escort, and delivered two short speeches there—one to members of the legislature in Representative hall, the other from a balcony, under which 10,000 people had assembled to hear him.

The crowd that saw and heard him, including people along the route from the depot to the capitol and on the capitol grounds, was estimated in Lansing to be upwards of 50,000.

After speaking at the capitol the president left for the Michigan Agricultural college, where his address on the campus there was received as the special feature of the college semi-centennial celebration.

President Roosevelt's formal speech to the alumni, graduates and students of the Agricultural college, and to the great crowd of friends of the college and his own admirers gathered on the campus, was one of congratulation for the institution and the state of Michigan, and a warm commendation of the work and purposes of the college. He drew from it all the argument that after all the highest aim of the agriculturist should be the cultivation of character. He said in part:

"The fiftieth anniversary of the founding of this college is an event of national significance, for Michigan was the first state in the union to found this, the first agricultural college in America. The nation is to be congratulated on the fact that the congress at Washington has repeatedly enacted laws designed to aid the several states in establishing and maintaining agricultural and mechanical colleges. I greet all such colleges, through their representatives who have gathered here today, and bid them goodspeed in their work. I no less heartily invoke success for the mechanical and agricultural schools; and I wish to say that I have heard particularly good reports of the Minnesota Agricultural high school for the way in which it sends its graduates back to the farms to work as practical farmers."

"As a people there is nothing in which we take a juster pride than our educational system. It is our boast that every boy or girl has the chance to get a school training; and we feel it is a prime national duty to furnish this training free, because only thereby can we secure the proper type of citizenship in the average American. Our public schools and our colleges have done their work well, and there is no class of our citizens deserving of heartier praise than the men and women who teach in them."

"Governor, and you, my fellow citizens, it is indeed a great pleasure to be in Michigan today. In greeting all of you people here gathered, let me say, first, a word of special greeting, as I know you would wish me, to the veterans of the great war."

"If it was not for them we would not have any president. At this hour let me say another word of greeting to the national guardsmen. I served at Santiago beside two Michigan regiments of volunteers, and I was instrumental in seeing that the Michigan naval brigade taught the militia and the seamen of the ocean that men knew how to sail and fight on the inland waters. (Applause.)"

"One word of congratulation to the state on what Michigan has done for the marksmanship of its citizens. We are a country of between 30,000,000 and 90,000,000 of people, and we have a regular army so small that in proportion to our total numbers, it is smaller than the police force of a great city. That means that we should keep that regular army up to the highest point of perfection, or if ever a serious war should occur, we would have to trust to the volunteer forces. Just as we had to trust to them in '91. And I do not have to tell you that one of the prime necessities is that when a soldier shoots he shall be able to hit something. (Laughter and cheers.) That is so, isn't it? That's right."

## Want It in Constitution.

In the state convention of the W. C. T. U. to be held in Lansing June 4-7 the principal topic of discussion will be: "What I would like to see incorporated in the revised constitution of Michigan." A determined campaign will be inaugurated to put temperance and restrictive features in the new organic law. Another question will be: "Are the laws of Michigan adequate for the protection of the home?"

## Our Lake Navy.

The good ship Yantic will not leave Michigan waters, but will be sent to Hancock for the use of the upper peninsula division of naval reserves.

A joint resolution was passed by the house appropriating \$5,000 for decking the ship, the unexpended balance to be used to defray the expenses of sending a crew to bring the cruiser Don Juan de Austria to Detroit.

A 5 per cent dividend on a capital stock of \$800,000 has been declared by the directors of the Menominee River Sugar Co.

Deputy Sheriff Nelson, of Muskegon, chased Herman Myers, a youth who stole two horses and a carriage from a liveryman, 1,000 miles across three states in his automobile, and finally captured him in Melrose, Ia.

Lansing board of education has found that some of the teachers have been getting too much pay and others not enough. How the mistake came to be made in their checks no one knows.

## STATE NEWS BRIEFS.

At a meeting of the Saranac Business Men's association a committee was appointed to get a grain elevator.

Fred Johnson, steward of the La-peer Home for Feeble Minded since the founding of the institution, is near death.

"The Summer Girl," a single-deck, 32-foot steam pleasure craft, is the latest addition to Kalamazoo river's flotilla.

Bradley Miller, aged 60 years, died shortly after being struck by a Michigan Central passenger train in Kalamazoo.

Cleo Moross, youngest son of Joseph Moross, proprietor of the Moross house at Erie, was drowned in Monterey, Mex.

At a protest from resorters the fare between Pontiac and Sylvan and Cass lakes has been reduced from ten cents to five.

Eight thousand sheep imported by Gov. Warner and C. S. Pierce from Wyoming for their Ogemaw farm have arrived.

The daughter of Mrs. Rose Smith broke into her mother's home in Bay City and found her dead in bed. She had died alone.

Andrew Divine, of Standish, was thrown from a train at Lansing and died with but regaining consciousness. A widow and son survive.

A horse belonging to Rankin Meade, of Scotts, sank to its neck in the pasture and it took 20 men an hour to get him aboard a stone boat.

Henry Buckley, of Flint, serving time for drunkenness, saw his son brought to jail for petty theft, and greeted him sympathetically.

The home of Dr. Mary Green, one of the finest in Charlotte, has been bought by the Odd Fellows for \$5,500, and will be transformed into a temple.

Cigarette smoking is said to have caused the insanity of F. K. Brady, brought from Saginaw to the Pontiac asylum. It required three men to handle him.

Leut. Col. Ross Granger, First Infantry, of Ann Arbor, will resign soon for business reasons. Maj. Walter Barlow, of Detroit, will succeed Col. Granger.

Newspaper men declined to call on Rep. Charles E. Ward when his lawyer and doctor announced that he would not be permitted to talk on the Edith Pessley case.

A cat belonging to E. H. Williams, of Coldwater, has adopted a Belgian hare, while one belonging to Charles Moore has assumed custody of a brood of chickens.

George H. Clippert, of Detroit, has been appointed a member of the board of guardians of the Adrian School for Girls by Gov. Warner to succeed Gilbert Hart, of Detroit.

The high water on the Menominee river has caused the suspension of work in the sawmills of Menominee, the rapid current in the river making log sorting impossible.

A strike has again closed the Eureka coal mine because the 60 miners refuse to wait for their pay. The mine has been greatly damaged of late by flooding and other mishaps.

The Michigan Central has been making tests of the evesight of its trainmen for color blindness, and as a result it is said that a number of the oldest engineers are to be laid off.

When hotel attendants went to arouse John G. Benson, aged 60 years, of Mangum, who was a guest in a Chicago Clark street hotel, he was found dead. A gas jet was partly open.

The memory of Maj. Ezekiel Ransom, a veteran of the Revolution, and uncle of former Gov. Ransom, of Michigan, was honored December day by Lucinda Hinsdale Stone chapter, D. A. R. of Kalamazoo.

While gathering mushrooms, Elton H. Esselstyn and Bert Sumner, of Lansing, were attacked and brutally assaulted by three tramps. Esselstyn had his wrist severely cut by a knife, wielded by one of the tramps.

The hull of the old steamer Andrew Johnson, used as a blockade runner in war times, was decorated with flowers Memorial day, by veterans. Since being brought to the lakes Jackson has been used as a tow barge.

William Wager, of Paines, supposed to have been hobnobbing about the country, died in the Lutheran hospital from injuries received by jumping off a train between Denmark Junction and Reese. He fell under the wheels.

The attorney general has ruled that an application from a life convict for a commutation of sentence is not necessary before the governor can commute the sentence, in order to transfer the prisoner from one jail to another.

A resolution appropriating \$75 for a group photograph of the members of the legislature was quietly slipped through the house. The resolution, however, has been as quickly and quietly withdrawn, but no one appears to know who did it.

The Michigan fish commission "planted" between 30,000 and 120,000 black bass and walleyed pike in Zuke and Strawberry lakes. An equal number were placed in Whitmore and Horseshoe lakes, and half the number in Independence lake.

On Memorial day a monument erected at a cost of \$1,500, the gift of C. W. Lake, of Quincy, to the township, was dedicated. Mr. Lake was a member of Co. C, First Michigan sharpshooters, a well-to-do farmer and member of C. O. Loomis post.

Although G. L. P. Young, lieutenant in the United States navy recruiting office, Detroit, says Michigan supplies the finest samples of brawn and brain to the navy, only two out of seventeen local applicants could "take" good, some for physical reasons, others for mental.

The big turpentine factory on the plains, near West Branch, is turning out a fine grade of turpentine from pine stumps found all over the plains, and has a whole township fenced in. The stumps are pulled with machines and roots and all are used. The company will turn the land into a big ranch when the stumps are used up.

## NEWS FROM HOME AND ABROAD

## HARRIMAN'S RAILROAD DEALS AND THE GOVERNMENT'S COURSE.

## A DIVERGENCE OF VIEWS.

Will the Great Railroad Financier Be Criminally Prosecuted or Escape Scott Free?

## The Record Made Up.

A conference of great importance bearing upon the Harriman case will be held in Washington this week. It will then be known whether the administration intends to go after Mr. Harriman and his railroads through the medium of the Sherman anti-trust act, or intends to let the railroad magnate and his associates continue on their way rejoicing.

President Roosevelt's Indianapolis speech, in its bearing upon the Harriman consolidation, is open to two interpretations. Some people declare that it was conservative in tone and that the president's assertion that railroads should be permitted in law as well as in practice to acquire the stock or bonds of connecting but not parallel lines, was tantamount to a notice that the government would not proceed against Harriman.

Others are equally emphatic in their statements that the president at Indianapolis showed that he was still on the firing line and that it was his purpose to use the "Big Stick" on Mr. Harriman.

The record in the Harriman case is made up, and at the conference that will be held at the White House a decision will be reached showing the intentions of the administration toward Harriman and the men associated with him. Opinions vary as to what the president will do in this matter, and when Mr. Roosevelt gathers his advisors around him he will find that they are divided on the question as to the advisability of proceeding against Harriman in the courts.

There are members of the interstate commerce commission who are insistent that nothing except criminal prosecution—and the imposition of sentences of imprisonment will put an end to such flagrant violations of the anti-trust laws as was disclosed in the inquiry into the operations of the Harriman railroads. Other members of the commission will tell the president that the evidence in hand is not strong enough to justify the administration in embarking upon a project to "smash" Harriman.

Hundreds of old soldiers are leaving Richmond, going home to escape the rigors of searching cold and steady rain unprecedented in that city.

Thousands of delegates to the seventh grand camp and reunion of the United Confederate Veterans are lingering, however, to participate with the Sons of Veterans and their sponsors, Maids of Honor, and many friends in the parade and unveiling of the heroic statue of President Davis.

The United Confederate Veterans decided to meet next year in Birmingham, Ala. and elected Gen. Stephen D. Lee, of Georgia, grand commander.

## Shaken Up.

Three earth shocks at about 3:20 Saturday morning caused the inhabitants of Guayaquil, Ecuador, to jump from their beds and run in panic-stricken, into the streets. The first and last of the shocks were slight, but the second was heavy and lasted about 40 seconds, causing the bells in the churches to ring and stopping the clocks in the church towers. No news has yet been received from the interior, but it is considered probable that damage was done in the country. Owing to the peculiar construction of the buildings the disturbance did not cause any damage in that city.

Trust "Busting."

That the federal grand jury in Denver is secretly investigating some of the largest corporations in America and that indictments will be returned against men who are rated as millionaires and captains of industry, known as well in Wall street as in Colorado, is reported.

Fully 120 secret service men now make their headquarters in Denver, having received a large portion of the fifth floor of an office building, from where they are spreading the net that is tightening about victims in high places.

L. C. Wheeler, in the service of the department of justice, is in charge of the secret service men and says there will be some startling revelations in the near future.

## Mr. Winters Disappears.

Byron Winters, aged 55, is missing. Last Wednesday he dyed his hair and mustache black and left. This is his second disappearance.

He dropped out of sight in Lake City four years ago and went to his mother-in-law's in Blanchard. His sister-in-law did not know him, he was so changed, and sent him away; but she recognized him by his walk before he got to the gate and called him back.

## Express Change.

The American Express Co. is supposed to have made a contract with the Lake Shore railway under which it will, on July 1, take over the express business and offices of this large railway system now held by the U. S. Express Co. It is understood that at hundreds of places in Michigan, Indiana and Ohio American Express offices will take the place of the United States offices.

Three Grayling business men talked \$1,200 in less than two hours for a Fourth of July celebration.

## AT REST.

Funeral of Mrs. William McKinley Was Notable.

The most distinguished men in the nation attended the funeral of Mrs. Ida Saxton McKinley in Canton, Ohio and stood at the grave side in the cemetery where the body was laid beside the remains of her martyred husband. Simple as was the funeral ceremony, there was much that was impressive, for the woman who lay dead and the men and women gathered around her coffin recalled scenes and incidents that have formed the history of the nation for the last decade.

The service was held at the North Market street residence of the McKinleys. Not since the funeral of Mrs. Benjamin Harrison has so large a number of men eminent in the affairs of the nation been gathered at the funeral of any woman.

Among the number who paid a last tribute to the memory of Mrs. McKinley were President Roosevelt and Vice-President Fairbanks, four members of the cabinet, two of whom also were ministers of the late President McKinley; Senator Knox, of Pennsylvania, attorney general in the McKinley cabinet; former Postmaster General Gary; Supreme Court Justice and former Secretary of State W. R. Day; Gov. Harris, of Ohio, Senator Dick, and many other distinguished persons.

The cabinet members present were Secretary of State Root, Secretary of the Interior Garfield, and Secretary of Agriculture Wilson.

Feed Babies to Serpent.

In spite of the fact that a similar charge was investigated and dismissed by a grand jury some time ago, another complaint has been filed with United States District Attorney Llewellyn, of New Mexico, that a tribe of Indians in that territory are given to the worship of an enormous serpent to which is fed the new-born babies of a pueblo in which it is housed and carefully tended and guarded.

The complaint was filed by a Catholic priest, who alleges that a dozen families were segregated from several pueblos two years ago and formed into a pueblo by themselves. Although it is known that many children have been born to these families not a child is to be found in the pueblo. This led the priest to press his investigations, with the result that he discovered in an adobe house, isolated, and closely guarded, the serpent which is worshipped by the Indians of the pueblos around and that every babe born in the small pueblo, and it is suspected, in many others, is fed to the serpent.

Mr. Llewellyn, having no jurisdiction, has filed an affidavit of the priest and other evidence with the territorial authorities.

## Husband and a Woman.

The body of Nicholas de Raylan, whose sex has been the subject of dispute and litigation since last December, was exhumed on the arrival in Phoenix, Ariz., of Baron Schlippenbach, Russian consul in Chicago. The body was in a good state of preservation and the face unchanged. Baron Schlippenbach said:

"This is the body of Nicolai de Raylan, who was for 12 years my secretary."

Later the proof of sex was made, the coroner and a physician who had attended the dead person making affidavits that De Raylan was a female.

De Raylan, as a man, was twice married. His "widow" in Chicago denied that De Raylan was a woman and claimed his estate. She cannot get it now as a widow's heritage.

## Predicts War.

That in three or five years at the outside there will be a war between Japan and the United States, is the opinion expressed by J. A. Elliott, of Manchester, N. H. The strained feelings between the Japanese and the Americans, he says, cannot be imagined by those who have not seen the two nationalities clash. The Japanese are very aggressive and are going into all kinds of business with success. They are particularly strong in transportation, and now control a large part of the Pacific trade. Their success against the Russians has made them chaste, domineering in fact, and the feeling against them is intense.

Americans are hoping that the war will be no outbreak till the Panama canal is built.

## After Nine Years.

Peter Coman, an Indian, was arrested near Eagle River, on the charge of murdering Henry Taresch, of Crystal Falls, Mich., nine years ago. District Attorney O'Connor, accompanied by Sheriff Murphy, found the body of Taresch buried at a depth of two feet in a swamp near Lac Du Flambeau. Taresch was a woodsman with relatives at Crystal Falls, and the authorities searched for years to locate the murderer.

## Mine Worked Out.

The Caledonia Co., the only co-operative concern to engage in coal mining in Michigan, has worked out its first shaft, which was sunk just south of Bay City. The mine was operated three years and was owned, officered and worked by the miners themselves. The miners realized large profits, cleaning up \$28,000 from the three years. The company holds leases adjoining and has already sunk a shaft in a thick vein and is taking out coal.

Bernardo Powers, aged 60, was cut in twain by a freight train at Powers. Dr. James H. Reed, an ex-Confederate, has been made an honorary member of the very regiment he fought against, during the civil war.

He will make a Memorial day address in Clinton. In the war Reed's regiment captured the town of Michigan, which has now adopted him.

A silver cup presented by a Sunday school to William H. Stone in Allegan in 1893, was plowed up by Walter Evans on his farm near Butternut island. He returned it to its owner, who was once a resident of Portland, and lost the cup nearly 20 years ago, when the children held a picnic near the river.

## MICHIGAN EVENTS NOTED

## THE STORY TOLD BY A BRUTAL MURDERER TO THE DETECTIVES.

## LATEST DETROIT CRIME.

After Mutilating His Victim He Started to Commit Suicide But Was too Cowardly.

## Walters' Story.

Because he is cursed with the cowardice of the lowest form of brute creation, which reveals in brutality to a helpless victim weaker than himself, but whines and snivels with any pain or suffering inflicted upon him, David C. Walters, wife slayer, is steadily recovering in a Detroit hospital and probably will be almost well within a short space of time.

When his poor little wife lay in a weltering heap on the floor Walters picked up a bottle of carbolic acid, which he had brought with him, with the purpose of ending his murderous existence. He pressed the bottle to his lips and poured out a mouthful of the fiery liquid. It burned his mouth. He spit it out upon the floor without swallowing a drop, for his throat was not burned.

This was the "desperate" man who had only a few seconds before fairly hacked to pieces the body of a frail little woman.

Walters' own story of the crime is a brutal tale of a most detestable crime. The only effort he makes toward a defense is that he knew that his wife loved Kirkpatrick more than she loved him; that she refused to leave Kirkpatrick and go back to live with him. That is all.

The detectives sat around his cot in the hospital, and he told the story of his life, leading in to the crime. He told of waiting in the house for his wife's return. "When she came in I begged her to go back and live with me again," he said. "Mamma," I said to her, "you must come back to me and live with me and love me." She refused, and then I said, "Mamma, you have nearly killed me, and I'm going to kill you now." Then I grabbed the hammer and struck her over the head with it three times. God! where she fell I saw that she was dead; but I picked up the knife and slashed and slashed at her. Then I tried to kill myself, but I failed."

Horribly Mangled.

Edward Martin was instantly killed by a Pere Marquette train, a short distance north of Muskegon Saturday. He was not identified until a piece of paper, on which his name had been written four times, was found in the lining of his coat by Coroner Balbirnie. The body was terribly mangled.

It is thought that Martin had started out on a hobo trip, and while riding on the train fell between the trucks of the baggage car. The body was dragged the entire length of the train. He was unmarried.

## Smallest in the State.

What is probably the smallest school in point of attendance in the entire state of Michigan, and one of the smallest in the entire United States, had its ending several weeks ago, when District No. 2 in Muskegon township closed for the season. The two pupils who were under the tutelage of Miss Edith Hale, of Muskegon, left slates, blackboards and arithmetics and romped away to follow plows and pick berries at their home on the farm.

Miss Hale thinks that the number of her pupils compares favorably to any school in Michigan. The pupils were both young and were very orderly. One was a boy and the other a girl. They were both in the same grade in school.

District No. 2 hasn't always been so light in attendance, but early this spring many of the pupils left school to work at home.

## The Hermit's Estate.

Archimedes Galbraith, the swamp hermit, who passed away in the St. Clair county poor house a supposedly rich man, did not have enough of his estate left to make it worth while probating. The appraisers find that the aged hermit left real estate valued at \$1,200, but this being highly mortgaged, there will not be a quarter of the valuation, when a final settlement is made. He left far more in value than he had, but he left no heirs.

The value of the shares is placed at about \$2 or less.

## Detroit Valuation.

Surprising even to the assessors themselves is the increase of \$21,000, 000 in the assessed valuation of land and buildings in Detroit, as figured out at the assessors' office. This includes an estimate of the realty value at a little over \$3,000,000, and of the recent village of Fairview at \$4,000,000.

While working about an old tree Louis Bouffard, aged 58 years, a plow farmer of Delta county, was instantly killed by the tree falling on him. He was unmarried.

Charles E. Ward has been removed from the Lansing hospital to his residence in this city, and later will go to his home in Bancroft.

Contrary to the general opinion that the peach crop had been killed by the recent frosts and storms, fruit growers who have inspected the trees there is no more cold weather.

There will be a family reunion when John Jewell, just sentenced to serve a term at Ionia for stealing a copper sap bar valued at \$125, reaches prison, as his son Floyd was sent to the same institution in January, 1905, for larceny.

## Whirled to Death.

Employees at the Hecla Cement mill, Bay City, were startled to hear piercing screams, and looking beheld William Kavai, aged 35, a Hungarian, being whirled around a shaft. The unfortunate man's clothing had been caught in the rapidly revolving machinery. His body was reduced to an unrecognizable mass. He has no known relatives.

Harry Seymour, aged 35, was probably fatally injured by a falling pole at the Agricultural college grounds.

## FAIR FARES.

Does the Pere Marquette Have a Scale?

An owner of one of the cottages in the Charlevoix district, who is not a member of any of the incorporated resort associations there, is in Lansing with evidence of discrimination in passenger rates on the Pere Marquette. If he cannot, through the legislature, get relief from the discriminatory rate against himself, he may appeal to the interstate-commerce commission.

There are resort associations at Harbor Springs, Roaring Brook, Westport and two at Charlevoix, incorporated under the laws of the state. All of the resorts are reached by the Pere Marquette. People living in all parts of the state belong to one or another of the five associations. The Pere Marquette has in past years given a special rate to association members in the Detroit and Lansing districts of \$7.25 for a round trip ticket. The railroad company, it is asserted, is already issuing books to association members at the same \$7.25 rate, tickets to be good from June 1 on.

Cottage owners in the Charlevoix district who do not belong to any of the resort associations have been notified by the Pere Marquette that by strict instruction from the interstate-commerce commission the company cannot sell them round trip tickets for less than \$9.55.

Just how the company figures that it can discriminate this way against non-association members is what the latter would like to learn.

## No More Extra Charges.

No more extra charges for riding on the limiteds.

A general reduction of passenger tariffs amounting to an average of 10 per cent.

These two important changes in rates of fare were put into effect Monday of this week by the Detroit, Jackson & Chicago Railway—the old "Ypsi-Ann" road—as a pleasant surprise to its patrons. The reductions are being greatly appreciated, and the company has gone up several notches in the opinion of Chelsea's citizens.

Under the new passenger tariff, the fare from Chelsea to Detroit is 65 cents, including transfer privileges to all the Detroit city lines. From Chelsea to Ypsilanti the fare is 30 cents; to Ann Arbor, 20 cents; to Jackson, 35 cents; saving of from five to ten cents to these points.

Next Monday, June 10, the company will put into effect a new time table, involving many important changes, hardly less important than the changes in rates of fare.

After Monday there will be half-hourly service between Detroit and Ann Arbor, with two-hour service with Jackson; but, in addition to this two-hour service, there will be three "limiteds" each way daily. These limiteds will make the round trip in two hours and forty-five minutes, as against three hours under the present schedule. Going west, the limiteds will leave Chelsea at 9:48 a. m., 2:46 p. m. and 5:48 p. m., arriving in Jackson at 10:30 a. m., 3:30 p. m. and 6:30 p. m., respectively. Going east, the limiteds will leave Chelsea at 7:42 a. m., 1:42 p. m. and 4:27 p. m., reaching Detroit at 9:45 a. m., 3:45 p. m. and 6:30 p. m. These limiteds will stop only at the waiting rooms at Jackson, Grass Lake, Chelsea, Ann Arbor, Ypsilanti, Wayne and Dearborn. No stops will be made between these stations.

The regular cars to Jackson will leave Chelsea at 6:44 a. m., 7:50 a. m. and every two hours thereafter, while, going east, the regulars will leave Chelsea at 6:40 a. m., 8:40 a. m., 10:10 a. m. and every two hours thereafter until 10:10 p. m., with the last car east at 11:55 going as far as Ypsilanti.

The company is putting in many new switches for the new service and is adding to its power-house equipment all along the line. New cars have been ordered, and those for the limited run will be extremely handsome, rivaling the \$10,000 beauties on the Flint route.

## CHURCH CIRCLES

## M. E. CHURCH.

Rev. Joseph Ryerson, Pastor.

The Home Missionary Society will serve a strawberry shortcake tea in the church, Wednesday evening, June 12. Tea from 5 o'clock until all are served. Price, 25 cents.

## BAPTIST CHURCH.

Rev. T. D. Denman, Pastor.

Services as usual in the church next Sunday morning and evening.

The members of the Baptist church desire, through the columns of the Standard Herald, to thank the Women's Relief Corps for their share in presenting to the church the flag on memorial day. At the time of the presentation no mention was made of the part the Relief Corps had in it, and so they were not thanked at that time. We hope that the women will accept our thanks even at this late date.

## The New Mill.

The White Milling Co. has awarded the contract for a three-story cement building to F. L. Davidson. They have also entered into a new contract with the Machinery Co. of Port Huron, which will greatly reduce the price of the former contract for the equipment of the new flouring mill. The machinery is ready and will be installed as soon as possible after the mason-work is completed. Mr. Davidson will start at once on the structure and push the building along as fast as weather conditions will permit. The Milling Co. plan to have the mill in full running order by September 1st. The White Milling Co. have a guarantee bond from the contractors in a sum large enough to fully assure them of the speedy completion of the plant.

Mrs. W. H. Wilsey, administratrix of the estate of the late W. H. Wilsey, will sell at public auction on the Wilsey farm in Dexter on Saturday afternoon, June 8, commencing at 1 o'clock, the personal property consisting of 12 head of cattle, farming tools and a quantity of marsh hay. E. W. Daniels, auctioneer.

## A Hair Dressing

If you wish a high-class hair dressing, we are sure Ayer's Hair Vigor, new improved formula, will greatly please you. It keeps the hair soft and smooth, makes it look rich and luxuriant, prevents splitting at the ends. And it keeps the scalp free from dandruff.

Does not change the color of the hair.

Formula with each bottle. Show it to your doctor. Ask him about it, then do as he says.

At the same time the new Ayer's Hair Vigor is a strong hair tonic, promoting the growth of the hair, keeping all the tissues of the hair and scalp in a healthy condition. The hair stops falling, dandruff disappears. A splendid dressing.

Made by the J. C. Ayer Co., Lowell, Mass.

### THE HOUSE

Always Try to Arrange Things Differently Now and Then.

There are hundreds of women who clean house and every article, even down to an insignificant little pin cushion, is put right back in its old accustomed place. There is nothing so monotonous as a house forever presenting the same appearance. It is pleasant to make a cheerful change in every room. There is a woman who makes it a rule to always change some of her pictures. She has a number of beautiful frames, so she selects new prints for them. The best masters are copied and it is possible to secure beautiful pictures for only a little money. Then the old prints may be put away for future use. It has a great deal to do with making home look a little more cheerful. Women have learned that a few good articles in a room are more artistic than a great amount of gaudy furniture and this new regime of household affairs is responsible for less work, too. In this age, when there is every convenience imaginable, it really seems strange that any well-regulated household would need the assistance of servants only on special occasions. But it seems the more women have to work with, the less able are many to do even a little work without having the assistance of a hired girl. To properly manage a home every woman must use her brains to save her strength and many do so, but there are a great many who merely exist in houses and do not live in homes.

#### SELECTING HATS.

There is a set of rules about hats and their wearers that should be rigidly followed. If a woman has a thin face and is inclined to be sharp-featured let her beware of hats that go up off her face.

This kind of hat only tends to outline her defects and she should choose a hat that is brought well forward.

Her hair, too, should be loosely arranged and never drawn back in a plain fashion. Sharp or smart hats should be almost avoided and fancy edges avoided.

If one has features that look good at a casual glance but will not bear inspection a hat crushed in and pulled out with many corners and angles will be her most becoming design.

This tends to mystify and one finds herself unwilling to investigate—the effect is too good to be true.

A small face should deal warily with the picture hat. It is very liable to have its saving graces drowned in the depths of the enormity and should never be attempted by any one who has not the height sufficient to carry it.

A well-formed face can show off most any model and it is with this sort of face in view that most designs are created.

Wear Mother—Oh, Jack, if you only knew how tired I get of saying

### THE SEWING CIRCLE

To make a dainty bedspread, cut sprays of flowers from cretonne and sew raw edge on cotton cloth of any preferred color for a background. An old white sheet may be used as a background. Over this throw a plain net spread with a deep flounce hemmed or edged with lace.

Pieces of tea matting, round or square, with a double layer of cotton batting, make the best porch pillows. Bind with green carpet binding and leave a loop by which to hang them up. If preferred, a conventional design of yellow may be quickly worked in with crevells or painted on with oils.

A handsome rag rug can be made from worn pillow cases and sheets. Color half the rag dark blue, tear in narrow strips, and sew on the machine; sew the white ones in the same way; twist separately on a spinning wheel, then double white and blue together and twist again. Weave with a white warp.

Skirts cannot hang badly if they are fitted by shaping the front and side gores either by goring or darts near the waistline so as to make every seam hang in a vertical line from the waist to the foot. It is the twisting of the seams out of line in the fitting that produces most of the badly hung skirts. Each seam should represent a straight line from top to bottom, curved as it is carried in at the waist, and care should be taken not to stretch it out of line when the belt is attached.

The trouble with the necks of blouses is caused by two mistakes of most frequent occurrence. The space between the shoulder seams in the back is too narrow; that causes hump. The neck should be divided into three equal portions, back and two fronts. Shoulder seams must always be straight at the neckband, but alterations being made toward back

band is made longer than the neck of the blouse, the latter being "nicked" here and there as it is sewed on. This is a simple remedy, but most complete.

#### FOR THE SICK ROOM.

If the patient is beginning to sit propped up in bed do not depend upon pillows. Make a good home-built imitation of the supports used in hospitals. Select about six strong two-inch boards and set them into a frame, big enough to tilt at an angle of 45 degrees or more from the top of the head of the bed to the mattress. Paint this rack white to match the iron bed and fasten it to the top iron rod with stout tape or canvas bands. Lay one or two pillows against this and you will find the invalid rests more comfortably than against a nest of pillows.

If the patient complains that the room smells close and yet you know that it is properly ventilated, try this new form of sick room incense: Soak a sheet of brown paper in saltwater, allow it to dry, powder it thickly with dried lavender leaves. Lay this in a deep tin pan and burn it.

If the patient can sit up in bed for brief periods of relaxation, at once provide a bed table. If you have an old sewing table with legs that fold, you can brace this on either side with pillows or cushions, and the legs folded under, or, better still, cut off the legs until they are only about six or eight inches long and place this queer table over the patient's knees. On it can be arranged games, writing materials, or, for a child, toys.

If the patient is fond of flowers and the cost of cut blooms is beyond the family purse, this is just the season when ferns and wild flowers can be used to advantage. Set a deep, cracked dish in the bottom of a flower basket with or without handles, fill it with dirt and moss, and transplant woodland treasures to the sick room. They will not live many days, but they will give the patient

### LINENS ARE VERY POPULAR

For This Summer They Are Very Fashionable and Every Well Dressed Woman Will Have One or More Garments of This Desirable Fabric in Her Wardrobe.

Linens are to be more popular than ever and predictions are that we shall see more costumes of colored linen than we have seen in the past seasons. Certainly the colorings are calculated to tempt one from allegiance to white and string color, though these two are the most practical of all linens for genuine tub frocks.

The string color, biscuit, natural tone and other colorings of similar character are pronounced favorites and the cool, soft light shades on this order are shown in exquisitely fine and well woven linens, which should be extremely serviceable as well as charming for coat and skirt costumes, gumpie frocks, etc. Buttons of crocheted linen or buttons covered with linen and embroidered in a star or dot or circle are liked for linen frocks, but the pearl buttons are also much used.

Plain tailored coat and skirt costumes of white, blue, brown, biscuit or lavender linen, buttoning with large white pearl buttons and finished with separate collars and cuffs of white linen or pique, plain or embroidered, are to be very popular. The coats are cut in a box or semi-fitted shape and of moderate length and the collar and sleeves are of the plain coat order.

Other models, less severe, follow modified pony-coat lines and are made collarless and with three-quarter sleeves. Cuffs and collar of embroidered lace or of heavy lace are supplied among the separate accessories for the embellishment of such coats.

grays and ecrus have precedence. White linen is evidently to be as popular as ever, for elaborate costumes and models heavily and lavishly embroidered by hand and trimmed in handsome laces are shown among the models imported for southern wear.

Irish lace holds its own for such frocks and cluny and various heavy, flat laces seem to rank with the Irish. Some of the coarse flat-mesh laces with darned-in designs are remarkably effective upon linen. Such a lace entered into the composition of a cream and white linen frock taken south by a midwinter bride. The lines of the bodice were unusual and effective in this model and a touch of color was introduced in the hand embroidery of the inner neck finish. The sleeve cap, or upper sleeve, cut in one with bodice or jacket and giving a long shoulder line, a mode which invaded winter fashions with a rush, is introduced upon the frocks of summery materials. Wide silk braid and soutache both appear upon white serge and cloth costumes and even upon thinner stuffs such as voile.

For the plain linen or white serge the rather short coat with straight front and semi-fitting back and with plaited skirt of walking length is a model best liked by the fastidious though one sees some half-length and three-quarter coats, some etc. and, in serge, close-fitting models shown.

#### TO RESTORE SCORCHED LINEN

Mix thoroughly two ounces of Fuller's earth; one ounce of soda, one-half ounce of cake soap and the juice of two lemons, to obtain which, cut lemons up and beat and press into a mortar. Boil this mix a half-pint of sharp vinegar, occasionally until it forms a liquid compound. Spread the linen over the scorched part and let it sit for twenty-four hours. Scorching was slight this evening will be enough, and two washings after it will all the stain, but if it is more scorched the compound will be put on for a second time, and in very bad it may require a third hours' application, but don't worry, as a rule entirely disappears after

### ODDS AND ENDS

well-washed rice in one pint of water. Put it on to boil in cold water and strain and add sugar or salt to taste.

Stains on flannel blankets and light-colored woollens may be removed by an application of glycerin and raw yolk of egg—equal parts of each well mixed together. Lay this on the stain, and when it has done its work, remove it by washing with soapy water.

Cut stale bread into the thinnest possible slices and brown it in the oven. Then crush in warm soda made with yellow soap and a few drops of sal volatile. You will find this makes the ornament brilliantly clean.

To clean jewelry with stones in it, wash it in warm soda made with yellow soap and a few drops of sal volatile. You will find this makes the ornament brilliantly clean.

People who own pet guinea pigs must remember that the little creatures suffer greatly for want of water. Clean, fresh water should be supplied for them as regularly as food.

Holes in walls can be stopped with plaster of paris, but mix this with vinegar instead of water, or it will harden so quickly that it will be difficult to manipulate.

### TO REST PROPERLY

It is very necessary to learn how to rest properly. Do not insist that nature of occupation is rest; there is a greater delusion. To acquire perfect rest, settle yourself in a corner, arrange your feet and arms, and, indeed, your whole body, until you are comfortable from head to foot. Sit in this position for five minutes, motionless. Don't move, don't breathe, don't think, don't do anything, but take long, chest-expanding, easy breaths. Whether you are tired or not, don't move. At the end of five minutes you will be very much rested. If it is possible, take these treatments two or three times a day. At any rate, try yourself to observe the treatment at least once every day. You will be surprised at the amount of rest it will accomplish for you. The nervous woman who feels inclined to scream if the door bangs or the drops a fork, the girl who in the least stress, though all day long she is, but who can

#### SOAP POWDER.

Soap powder is principally composed of soda and water, and as washing soda does not cost more than one-fifth the price of soap powder it would be more economical for the housekeeper to use that substance, with the addition of a little soap solution to the water, which would form a lather equally as well, and

### Mrs. Anna Maria Schaeufele.

Anna Maria, wife of John Schaeufele, died at the home of her daughter, Mrs. J. Spiegelberg, of Lima, Monday evening, June 3, 1907, aged 77 years, 8 months and 14 days.

Anna Maria Dutt was born in Pfaffingen, Oberamt Herrenberg, Wuertemberg, Germany, September 19, 1829. In 1857 she came to America, locating in Ypsilanti, Mich., and was married to Mr. John Schaeufele in 1859. Some years later they moved to a farm in Dexter township, where they lived until 1898, when they located in Chelsea, residing here for about eight years. A little over one year ago the aged couple went to live with Mr. J. Spiegelberg, in Lima, whose wife is their daughter. Deceased leaves her aged husband, one son, John J. Schaeufele, contractor, of Chelsea, and three daughters—Mrs. Henry Schaeufele, of Dexter, Mrs. J. Schultz, of Ann Arbor, and Mrs. J. Spiegelberg, of Lima—to mourn her loss.

The funeral was held in Lima, Wednesday afternoon at 2:30 o'clock, June 5, Rev. Mr. Koehler, of Manchester, officiating. Interment in Oak Grove cemetery, Chelsea.

Assessment No. 92 L. O. T. M. M. is called for June. Also have dues and per capita tax must be paid. Payment can be made at the regular live meetings on June 11 or 25.
