FOURTH ANNUAL PICNIC.

Chelsea Bay View Reading Circle Entertained at Cavanaugh Lake Home of Hon. and Mrs. F. P. Glazier.

The Chelsea Bay View Reading Circle held its fourth annual picnic at the beautiful and spacious summer home of Hon, and Mrs. F. P. Glazier at Cavanaugh Lake, Friday, July 12th. The continuous heavy rain of the previous day caused much dismay to those who were unaware that the weather man had ordered a perfect day for us, as if in compensation for the cloudburst he provided for our banquet of comparatively recent date. Now confidence in him is restored and we will be pleased with whatever he sends-at any rate, we will accept it and forgive his past misdemeanors.

About forty were present and a very happy day was spent in conversation, music, speeches, launch-rides and partaking of picnic "vittles" without the Department of Public Instruction Will proverbial "ants in the butter and skeeters buzzin' around."

The reading of a letter and giving to each member the souvenir cards sent by Mrs. Charles S. Winans, wife of our minschools have been employed by the deof the Bay View Circle, was an extremely pleasant feature of the day. Each card gave a different view of Valencia and, by interchanging, a comprehensive impression was gained of the city, although Mrs. Winans said the pictures looked better than the original. There is an American colony (?) of three and an English colony of thirty. They expect to find their new home pleasant after they form the acquaintance of a few of the 250,000 inhabitants.

> The day ended too soon, and we came home feeling that one more happy occasion had passed into the memory of its participants.

This progressive society has enjoyed a greater degree of prosperity and made a greater increase in both membership and assets than almost any other fraternal order operating in the United States at this time. It now has a total membership of 230,000 and is backed by over \$3,700,000 of assets. There are about 300 members in Chelsea, enjoying the benefits of membership in this order. They receive benefits in case of sickness or accident, and each five years participate in the earnings of the whole society.

State Owns the Flats.

St. Clair Flats are owned by the state, and the swamp scrip title held by Schuyler S.Olds will not be accepted by the state. This is the effect of a decision by the supreme court, Monday, and it disarranges the plans of many cottagers at the Flats. The court held that at the time of the swamp land grant in 1850 the property was lake bottom and hence not patentable under the swamp land act. The only way to get title to that property is to buy direct from the state under the legislative act which gives owners of property at the Flats a right to purchase on a fixed scale of prices. All such purchases will be subject to limitations as to area and frontage.

To Go Slow.

A note of warning was sounded by the President of the United States when, on two occasions, he told the people of this country, "To Go Slow." Now, I am no alarmist or a pessimist. I believe and have confidence in the future prosperity of this country, but assert that temporary periods of depression will come. When one sees the wild, extravagant pace set by the idle rich and imitated by the working class, he cannot hesitate in delaring that a few doses of the "hard times" of '73 and '93 might bring the extravagant to their senses .- Mack in Michigan Catholic.

The war had been carried openly into the house, but Bates,-just why should any one connected with the conspiracy injure Bates, who stood so near to Pickering, its leader? The fellow was undoubtedly hurt,-there was no mistaking the wound on his head. He spoke with a painful difficulty; that was not assumed, I felt increasingly sure, as he went on.

HEART-SHAPED SHOE POCKET.

The difficult problem of how best to keep one's shoes fresh and free from dust when not actually in use is one which is not very easily solved, especially in the case of a small bed room where anything in the shape of an or dinary boot cupboard would take up too much room. In the accompanying

Summer Day Wear.

A pale mauve cloth in light weights is popular for gowns to be worn on cool summer days, while an exquisite shade of coral pink and one in blue are most effective. Olga cloth has come into notice again, for its satin finish and luster make it extreme well adapted to the long, graceful lines that are a feature of this year's styles. Effective Color Scheme. Pale moutarde yellow and mauve make a charming color scheme if the right tones are used, and the same is true of yellow and willow green and yellow and nattier blue. A model observed along the Place Vendome, says a Paris correspondent, is gracefully carried out in pale yellow mousseline bordered by wide black stripes and a crossed fichu of white mousseline is folded inside of the draped bodice, A knot of soft mauve satin is at the bust line, and the girdle is of the striped mousseline plaited lengthwise so that

Woman's Assistance Meant Much to This Tramp.

A certain lady, noted for her kind heart and open hand, was approached not long ago by a man who, with tragic air, began: "A man, madam, is often forced by

the whip of hunger to many things from which his very soul shrinksand so it is with me at this time. Unless, madam, in the name of pity, you give me assistance, I will be compelled to do something which I never before have done, which I would greatly dislike to do."

Much impressed, the lady made haste to pl ce in his hand a five-dollar bill. As the man pocketed it with profuse thanks, she inquired: "And what is the dreadful thing I have kept you from doing, my poor man?"

"Work," was the brief and mournful reply.-Harper's Weekly.

WESTERN MEN IN NEW YORK.

Brains of Mountain and Prairie in Demand in the Financial Center.

Ever since the early days, when D. O. Mills, J. B. Haggin and James R. Keene "emigrated" from California to New York, the metropolis has bee drawing largely on the west and south tor its supply of "men who do things." Theodore P. Shonts, both a southerner and westerner, who has undertaken to solve New York's great transit problem, is the latest importation in re-

sponse to the call of the east? The promptness with which Thos. F. Ryan, of Virginia, turned the Equitable Life Assurance Society over to its policyholders, who now elect a majority of its Board of Directors, and divested himself of the control of the stock which he bought from Jas. H. Hyde, and the success of the new management of the Society under the direction of President Paul Morton, have created a demand for the strong men of the south and west that is greater than ever before. Under the Morton management the Equitable has | blown into shape, and each fi made a better showing than any other insurance company in the way of improved methods, economies and increased returns to policyholders.

Vacation.

The secret of rest is to get rid of detail for a time. Why is it that a sea voyage is regarded as the best of tonics? Simply because the entire change of surroundings wipes out the mass of complications attendant upon the daily routine of the ordinary worker. We all need occasional freedom from the bondage of the tiny strings that bind us to wearing tasks. The man who realizes this and plans his vacation accordingly makes no mistake.

Mrs. H. Portlensee, B Street, Chey boygan, Michigan, says: "It is over six years since I was cured of kidney complaint by Doan's Kidney Pills. At that time, I suffered very much from a dis ordered condition of the kidney secretions. They were very scanty, contained a heavy sediment and were of a disagree able odor. My back pained me very much and I could not straighten. I ached as much during the night as in the day time and I received very little In the winter when I caught cold, it was always sure to settle in my kidneys and make the trouble worse. A friend advised me to use Doan's Kidney Pills and I procured a box and used according to directions, and they cured me. BACK TO FRANKLIN THEORY.

Modern Scientists May Be Forced to Rehabilitate It.

More than a hundred years have elapsed since Benjamin Franklin, employing a phraseology now superseded, put forth a theory of matter, says a writer in Current Literature. It was pronounced "a delusion" by the physicists of the ninteenth century, but the scientists of the twentieth century, according to Sir Oliver Lodge, may be forced to rehabilitate it as the only means of issue from the labyrinth in which all physical study is now involved. Stripped of technical verbiage and put briefly, the Franklin theory is that electricity and matter in combination form a neutral substance, which is the atom of matter as we know it. The most interesting part of the problem for ourselves, says Sir Oliver, is the explanation of matter in terms of electricity, the view that electricity, as Franklin seems to have supposed, the fundamental "substance." What we men of to-day have been accustomed to regard as an indivisible atom of matter is thus built up out of elec Mrs. Widmayer, of Francisco, Suntricity. All atoms-atoms of all sorts day of "substances"-are built up of the same thing. In our day, to put it more from Franklin's day to ours have always sought-a unification of matter -is offering itself to physical inquiry.

St. Petersburg Postoffice Service Attractive, But Not Efficient.

The Slovo of St. Petersburg recently asked its readers: "Have you ever the general post office at St. Petersburg are almost without exception good looking?" Most people might consider this a mere coincidence, but that this is not the case is shown by Miss Petrowa, who writes to the newspaper to tell how two friends of hers recently applied for clerkships in the general post office. After a time, the application papers were returned with a formal note to the effect that at present there were no vacancies. The returned documents, however, revealed marginal notes which had been imperfectly obliterated with rubber. One read: "She looks to be over 30, is small, plain and flabby." On the other paper in microscopical characters were the words: "Old maid, tall, bony." The Slovo asks what might have been the marginal notes on the papers of successful candidates and who are responsible for them. It adds that the selection of youth and beauty for this branch of the public service has by no means improved the unsatisfactory condition of the general post office.

TOBACCO TRUST ATTACKED.

sent Orchard back to Cripple Creek to | Petition Filed Against Several Individuals and Conc 'ns.

> New York. - With a severe thud the blow has fallen on the tobacco trust. Attorney General Bonaparte, who for a long time has been investigating the great international combine, under the president's direction. Wednesday caused to be filed in the United States circuit court in this city a petition against the following concerns:

> American Tobacco company, Imperial Tobacco company, British-American Tobacco company, American Snuff company American Cigar company, United Cigar Stores company, American Stogie company, Macandrews & Forbes company, and Conley Foil company.

Fifty-six other corporations and 29 individuals connected with the foregoing companies also are named. These corporations and individuals constitute what is generally known as the "tobacco trust." and the petition directed against them sets forth the intention of the government to dissolve this trust by breaking up the agreements under which the concerns are working.

James J. McReynolds, the special assistant attorney general who filed the complaint, said that criminal proseccution of some of the defendants was highly probable, as the Sherman law, under which the action is brought, makes a conspiracy in restraint of trade a criminal ofense.

WHITE DAMP KILLS NINE

ITALIAN MINERS PERISH IN AN ABANDONED SLOPE.

Bodies of the Victims Are Recovered-Disaster Occurs at Honeybrook, Pa.

Hazelton, Pa.-Seven mine workers, all Italians, were killed in an abandoned slope of the Lehigh and Wilkesbarre Coal company at Honeybrook Thursday by deadly white damp, Three others are missing.

Of the dead only the body of James Lavanno, a foreman, has been recovered from the slope.

The accident is said to have been due to the ignorance of the workmen regarding the mine gases. Two of the men had been sent into the slope to measure water by Foreman Lavanno. When they failed to return to the surface two other men were sent into the mine to assist them. These also failed to return and two more descended. Finally Lavanno went into the workings with Frank Bowda, an experienced inside man. Bowda detected the white damp and got out safely, but Lavanno refused to leave and perished

James Goldsmith, superintendent; William Goldsmith, fire boss: William Davis, foreman; Charles Schaar, fire boss, and Philip Harsleft, a pumpman, organized a rescuing party and went into the slope, but they were driven back. Dr. J. K. Farrar, of Audenried. was finally lowered 160 feet into the slope and succeeded in bringing up the body of Lavanno, though he was almost unconscious when he, was drawn up from the workings.

TALK OF PEACE ENDS.

Telegraphers' Strike Likely to Be Extended at Once.

Oakland, Cal.-Following refusal of Assistant General Superintendent Miller, Jr., of the Western Union Telegraph company, Tuesday, to meet a committee of the striking operators. President Small, of the Telegraphers' union, will leave Wednesday for the east. It is believed he will order strikes in Chicago and other cities.

Mr. Miller refused to let the committee enter his office, but sent them a note stating that he would meet them as individuals if they sought reinstatement, but would meet no union man as such.

President Small, much disappointed at the failure of a peace conference, issued the following statement:

"I feel absolved from further responsibility, inasmuch as I have made every effort, before and after the strike occurred, to bring about a conference. In the future we will have to pay less attention to the feelings of the opposition and public opinion and carry on our fight with more determination and with the one object lishing the plant," etc. in view of crippling the enemy until they are willing to meet us in a peace they are willing to meet us in a peace they are willing to meet us in a peace they are willing to meet us in a peace they are willing to meet us in a peace they are willing to meet us in a peace they are willing to meet us in a peace they are willing to meet us in a peace they are willing to meet us in a peace they are willing to meet us in a peace they are willing to meet us in a peace they are willing to meet us in a peace they are willing to meet us in a peace they are willing to meet us in a peace they are willing to meet us in a peace they are will be able to subtract \$50,000 from \$175 and have \$150,000 from \$150, forcible and decisive.

According to an interview printed in the Newark newspapers, the linking of the new "mono-rail" line with the McAdoo tunnel is a possibility. Bion L. All that would be necessary would be the laying of a single rail between the two rails, and the installation of the necessary overhead rails to preserve the equilibrium of the "mono-rail" trains.

If this is done, it is asserted, passengers can be carried from Newark to the heart of Manhattan in ten minan operating agreement with the "mono-rail" company, William Mc-If what the young Baltimore en- Adoo, head of the tunnel company, is

Trend of the Testimony Before the Wayne County Coroner-Ward's Father Seriously III.

Bring Out the Facts.

"Rep. Charles E. Ward, whose name is connected with the death of Edith Presley, has been called to the bedside of his dying father in Du Quoine, ate resolution No. 81, and submitting against the company was overruled Ill. He stands ready to come to Detroit as soon as we telegraph him that we want him. And we shall surely want him.

That was the statement made before Coroner Parker Thursday morning by Prosecutor Robison. The prosecutor said he deemed it wise to make the statement in order to satisfy the desire of all directly interested and the general public as well as to whether Ward intended to come to testify.

In the afternoon the prosecutor introduced a small black volume containing the diary of Miss Presley. It was written in shorthand with here and there a name in longhand. From questions' asked of Miss Letta Brown, a Lansing stenographer, it is apparent that the prosecutor will have the diary read in evidence.

One of the letters written Miss Presley by Ward reads: "I wish you might know, my dear one, how lonesome it is around here for your old fellow. Some time, some day, there wil be happy days when life's cup of bliss will be full to overflowing; where flowers will bloom, birds will sing and the music of childhood's mirth and prattle will make an endless symphony of coning star of my ambition. How dost like the picture? And can you solve the allegory?'

Real Forbidden Fruit.

In some countries there grows a kind of fruit belonging to the shaddock family and which is commonly called "forbidden fruit." It is similar to grape fruit, but is larger and the inside is somewhat coarser than the delicious acid delicacy of which we are so fond. The name forbidden fruit was given on account of three dark brown stains, like finger marks, which invariably show on this variety of the shaddock. The stains are close together on one side and are believed to be the marks of Eve's fingers left as a brand on the apple whose eating caused so much trouble in the world. Forbidden fruit is much liked by people who are able to get it fresh, but so far it has not been shipped abroad as extensively as its cousin, the grape fruit and shaddock.

Company's Mercantile Holmas Continues for Commences Saturday,

In times past it has been possible for merchants to gain business by sensational and unreliable statements in advertising, but conditions have changed, and it is becoming more evident every day that straigtforward, truthful statements are the only kind that are noticed and get business. In other words a merchant must "make good" each and every bargain he advertises. We have this sale in July for several reasons. It is necessary for merchants to reduce their stock and make room for fall goods. Coming at the end of the season it turns goods into money. It turns a dull month into a good, busy month. It makes business for us and bargains for the public. The public looks to us for bargains, and we can afford to sell out goods cheap now, rather than carry them over.

There are a great many Bargains below and some will surely interest you

Waists and Shirtwaist Suits.

These seasonable garments priced for quick sales.

98 Cents

One special lot of White Waists, lace and embroidery trimmed, fine Batiste, with tucked and fancy lace yokes, worth up to \$1.75. Now 98c.

FROM FASHIONDOM

The Very Latest Fancies and Ideas From the World's Fashion Centers.

Hems of satin if added to plain materials are usually headed with lace or braiding of irregular forms.

Of the materials for lingerie gowns of handkerchief linen, the mulls, batistes and dotted embroidered swisses are the most used.

Trimming of alternate rows of ribbon and lace insertion are seen on some of the late summer-silk models.

Navy blue is more in favor than it was at the beginning of the season, especially mixed with crude green and mandarin.

Some of the new hatpins can truly be regarded as jewelry. One of the novelties was a large head of tortoise shell, set with rubles and diamonds. Still another was incrusted with turquoise and diamonds.

A smart sailor hat has clusters of moss rosebuds in the form of floral aigrettes, high on either side of the front, and a wreath of white hya cinths around the crown.

Lace on lingerie, while still much in favor, is less popular than embroidery for trimming the corset cover intended for ordinary wear. The latter both lasts longer and washes better than lace, even the durable German valenciennes.

A simple dress may be given quite an air by wearing with it one of the new ruches that are so fashionable just now. The latest ones are long and stole shaped. A lovely one recently seen was made of cluny lace, the design lightly covered with tiny ruches, but not so closely as to conceal the pattern of the lace.

The quaint and becoming cloche shape so much in eridence this season may be developed charmingly in a hat of fine chip in a soft pastel pink, with a full wreath of shaded pink roses for the chief trimming. The flowers pass over the brim toward the back and are arranged under the brim in a decorative "cachepeigne" emixed with soft choux of tulle and a knot of black velvet rib-

Chiffon and all the gauze materials are even more in vogue than usual this season. Striped gauze in two tones of the one color made up over silk, preferably of the lighter shade, is always attractive. Many of the very sheer materials have a satin or satin finished foundation, and if it is desired to make either of the colors more prominent satin will show up much better than any dull-

The small girl's coiffure will be embellished this year by a coquettish ribbon rosette of four loops and two ends, which may be worn either on the top or on the side of the head. To obtain this effect a yard and a half of ribbon from three to four inches in width should be first tied in two loops, each three inches in length; when these are secured tie two more loops of the same length. This leaves two ends. Flatten the bows with the fingers, pull-out the loops and you have a mushroom rosette suitable for any occasion. These bows are daintiest in Dresden ribbon.

Silk Colors.

Salt will do a great deal toward preserving the color in silk that is to be washed. Soak for a time in cold water, to which has been added a pinch of salt, and there will be very, little danger of the color running.

Scorched Linen.

A scorch mark on linen, if not too brown, may be removed by moistening with water and laying in the sun. Repeat the moistening two or three times and the mark will disap-
