21 1-2 PER CENT DIVIDEND.

Glazier Stove Co.

On Saturday the Detroit Trust Co. filed its final report as trustee under the mortgage on the foreclosure of which Detroit bank creditors took possession of the Glazier Stove Co., of layed until the status of the Dexter Savings bank's \$25,000 claim could be determined. This claim was finally listed at \$12,500, by a compromise agreement, and the bank gets on the \$12,500 the same dividends as other creditors. There remains \$8,200 to be distributed.

A 20 per cent dividend, aggregating about \$100,000, was distributed shortly after the foreclosure. The final dividend was 14 per cent, making a total of 211 per cent for the creditors, whose total claims were \$403,887.

Musician Home for Vacation.

Ann Arbor Times News: A musician of whom Ann Arbor is very proud, Miss Frances Caspari, is at her home in this city to remain until September 1. Miss Caspari came the first of the week, but as she was very tired her arrival is not announced until this time to give her a chance to rest before seeing her friends, who are anxious to congratulate her upon her year of successful work in New York city. She has held this year one of the most desirable church positions in New York, that of soprano soloist in the Brick Presbyterian church on Ffth avenue, besides doing a great deal of concert and oratorio work and special work at weddings and funerals. Her success in recital work has been great, and she has been very enthuslastically received wherever she has to 9. appeared.

New Use For Peat.

The Scientific American recently had an article of nearly a page, with illustrations, both explanatory of the new invention. It is stated that "Col. Astor is now erecting a peatfuel gas-producer plant at his country place at Rhinecliffe on the Hudson, in which the vibratory disintegrator 10 to 9. vill be given a practical test. The plant, of about 150 horsepower, is to sports, the speech making occurred at run a stone crusher; and if the peat yields its gas, as it is confidently believed it will mean an engineering advance that may have very farreaching results."

The practical effect of the invention, as stated and expected by the Scientific American, follows: "Inaspuch as peat can be obtained by the farmers in many sections of this country for the mere trouble of digging the same, it is evident that producer gas could be manufactured at a very low cost. This would permit the farmers to drive various kinds of farm machinery by gas engines, to illuminate and heat their homes, and give their impoverished soil as a by-product in the peat residue."

The man who hunts and fishes was talking. "There is some money," he said, "for anybody who will invent a match that can be ignited after it has been thoroughly water soaked. Illustrating a Word.

Myra Kelly, whose stories of child life on the New York east side are well known to magazine readers, tells many amusing stories of her experiences in teaching the young idea of English. On one occasion she was attempting to demonstrate to a class of various words, using the plan of taking a word, carefully explaining its ing that word. Among other words she selected was "disarrange," and after having attempted to make its meaning absolutely clear, called upon a little Italian boy for an oral demonstration. After an interval of deep thought he gave utterance to this:

Thank You.

Yesterday we had a little reprint concerning the expression "Thank you." It is about the first English the people of another country learn. Down in Porto Rico it is quite common for the natives to get it mixed up with "good morning." Many a time has the writer been greeted with "Thank you" as a morning or evening salutation. It is a pleasant fact, for it indicates that the first and most common intercourse between strangers is a kindness. It is this from which the greeting "Thank you" comes. The natives get to saying it slips from the lips as a greeting. They know that something pleasant is to be said, and that is the first thing that occurs to them. It is the flower of kindness whose fragrance is gratitude.-Columbus Journal.

Judge Wiest's Decision Affirmed.

The supreme court has affirmed the decision of Judge Wiest of this county overruling the demurrer filed by the six bonding companies which furnished the surety bond filed by former State Treasurer Glazier to cover the deposit of state money in the Chelsea Savings bank. The court says the declaration filed by the state in the suit instituted against these companies to collect under the bond is good at least so far as the first term of Glazier as state treasurer, but adds that it is a question for later deter mination whether the bonds covered latter says there will be no money deposits made during his second available for this purpose until after

Attorney General Bird started suit against the Title and Guarantee Company of Scranton, Pa., to collect on the \$150,000 bond furnished by that company to the state for Glazier as state treasurer. The amount this company is liable for, however, cannot be determined until after the suits against the other six companies have been finally decided.

Michigan Day Postponed.

Michigan day at the Seattle exposition has been postponed from July 19 to August 11. John R. Bowdish, treasurer of the Michigan building committee, says the postponement was caused by the fact that advices from Michigan say the residents of that state are busy through the month of July and that a much better delegation would come to the fair if the date was August instead of in July.

Court Favore Sunday Ball.

The supreme court has handed down a decision confirming the opinion of the lower court in regard to the question of a writ of mandamus asked by ex-Prosecutor Yerkes to compel Fred Smith, ex-chief of police in Detroit, to stop Sunday baseball. The court says:

"Before the respondent could be required to arrest anyone there must have been either a breach of the peace already committed or a failure to comply with the order to disperse." The court adds:

"The mere playing of a game of paseball on Sunday is not of itself necessarily a breach of peace, justifying arrest and indictment. In a sense a game of baseball on Sunday may often be a breach of the peace, perhaps usually so, but it cannot be said that it is necessarily so, and before a summary arrest can be made for the breach of peace, not only must overt acts be committed in the presence of the officer, but there must be violent and dangerous acts of some sort."

The court adds that the prosecutor is not the one to order the crowd to disperse, but that the sheriff should "read the riot act, and command a dispersal of persons in time of riot."

THE NEW AMENDMENTS TO THE TARIFF BILL SHOW FREE RAW MATERIAL.

THE STRONG HAND WINS.

That the Stand Patters Listen to the Reasons of the President is Now in

President Taft will win his fight for free or reduced rates of duty on raw materials. Nearly every member of the conference on the tariff bill conceded this. The indications are that when the new tariff bill becomes a law the rates on the articles which the president desired to come in free will be as follows:

Iron ore-free (present rate 40 cents Oil-free (now protected, by coun-

tervailing duty). Hides-7 1-2 per cent ad valorem; present rate 15 per cent).

Coal-45 cents per ton; (present rate 67 cents per ton). Lumber-probably \$1.25 on rough, with senate rates on finished. This would be a material reduction through-

out the lumber schedule, It is expected that the Philippine section as approved by the subordinate committee will be adopted by the conferees on Monday. It provides for the free admission of 300,000 pounds of wrapper tobacco and 1,500,000 pounds of filler tobacco and 300,000

tons of sugar. With the exception of rice and the limitation placed upon tobacco and sugar all articles "the growth, production, or manufacture of the Philip-

pine islands" will be admitted free. There is no longer any question that the corporation tax amendment will be accepted. Attorney-General Wickersham still has it in his custody, but the draft has been seen by some of the conferees and they have found it to be satisfactory. It will tax the net earnings of corporations organized for profit at the rate of 1 enced in working out the deductions or exemptions, but it is understood that all of the objections to those features have been removed.

The Deposed Shah.

Mohamed Ali, the dethroned shah, who is now in the Russian summer legation, has declined to receive a deputation to inform him of his deposition. Sipahadar and Sardarasad, the leaders in the nationalist movement, sent the following telegram to the British and Russian legations: "In accordance with the decision of national council, which met today at Baharistan, it will be necessary for a deputation from the council to seek this aid from the state. The ex-shah replied through the le gation, saying in his message: "His majesty states that having taken refuge in the Russian legation, he has, ipso facto, abdicated; there fore, he does not wish to receive a deputation which comes for the purpose of informing him of the fact." French Like Gompers. The speeches of Samuel Gompers,

president of the American Federation of Labor, delivered before the French labor organizations, are arousing intense interest in labor circles. The extreme Socialists bitterly condemn him as a reactionary and scoff at his big salary, but the moderates have shown much sympathy in his denunciation of the futile political role which the French General Confederation of Labor is essaying in its revolutionary, socialistic and anti-patriotic campaigns.

The moderates express the hope that the French labor organizations will heed Mr. Gompers's words, abandon revolutionary agitation, and devote themselves, like the American organizations, solely to the advancement of professional interests.

To decide the all important question of coffee, whether or not it is really the hidden cause of physical ails and approaching fixed diseases, one should make a test of ten days by leaving off coffee entirely and using

well-made Postum. If relief follows you may know to a certainty that coffee has been your vicious enemy. Of course you can take it back to your heart again, if you like to keep sick.

A lady says: "I had suffered with stomach trouble, nervousness and terrible sick headaches ever since I was a little child, for my people were always great coffee drinkers and let as children have all we wanted. I got so I thought I could not live without coffee, but I would not acknowledge

that it caused my suffering. "Then I read so many articles about Postum that I decided to give it a fair trial. I had not used it two weeks in place of coffee until I began to feel like a different person. The headache and nervousness disappeared and whereas I used to be sick two or three days out of a week while drinking colfee I am now well and strong a sturdy seven days a week, thanks to

Appropriate Salads.

To serve after a fish course or heavy meats the salad should be a crisp vegetable, preferably cucumbers or tomatoes, with French dressing With game, serve chicory, watercress or any kind of lettuce.

With roasts, the best salad is of lettuce with apple or any light fruit. Garlic in potato salad is liked by epicures and a clove of garlic rubbed around the salad bowl is enough to

give it flavor. Heavy meat salads are sometimes served at dinner, but they do not interfere with the delicate salad which accompanies the meat or fish. They must, however, be served first; no salad after the meat.

Dr. Furnivall's Psychometric-Deductive Solution of a Perplexing Case

POTS started have they been with you?" an ominous each other." sound, appar-

ently coming from a point near by, in her own house, had startled her out of her midnight slumber. Occupying the back parlor, the door of which she had left open invitingly for such stray breaths of air as might be enticed that way on the stifling hot night, she had an unobstructed view of the hall as, with wide eyes and pounding pulses, she remained propped rigidly upon her elbow. The sound came again-it was a pistol-There could be no doubt this time. And almost on the instant she saw a shadowy form spring out from the front parlor, wrench open the hall door, and slamming it violently, disappear in the direction of the street.

For a long moment she could not credit her senses. That such actions as this sight and sound implied could occur in her own select boarding house was unbelievable, and effort on her part was required to adjust her bewildered mind to the situation. But she was a woman of executive ability in her way, and with comparatively little less of time she : rang from her. bed, threw on a wrapper and ran along the hall. The door of the front parlor was open, and, the shades being raised, she could discern through the fitful moonlight a shape dimly outlined

"Who is there?" she asked in a strained whisper. No answer came, and she repeated the question. Still the form neither moved nor spoke.

Her face was white, the eyes staring; and Mrs. Philpots, no longer able, try as she might for her house's sake, to restrain her emotion, uttered scream on scream and fled to her room, shutting and locking the door after her. But the sight of the telephone which was installed there directed her energies in some degree, and after a moment of effort at collecting her faculties she hastened to it and summoned the po-

The doctor stood a moment in thought. His face was serious.

"Madam," he said, at length, "let me tell you a short story. Once two very young people, a boy and girl, scarcely done being children, sentimental and high-strung, fell in love see the possibility of this thought in their faces, as you can in the faces of so many young enthusiasts. It was not an uncommon thought. So one night they lay down on their bed and he, putting the revolver to her heart, kissed her passionately, no doubt, and fired. The muzzle of the weapon was so close to the mark that the robe she wore was burned. She died instantly, without pain, a heavenly smile on her pretty, trustful, young face. Then, trembling with terror at what he had done, the boy resolutely missed a vital spot. The shock of the insane, he sprang up, clapped on his Shown by the boarding mistress to hat through force of habit, and dashed from the house.

> "For some reason, perhaps because he saw persons approaching, or suddenly realizing the condition of his dress, or more likely because the open air of the wide world gave him a feeling of desolation greater than ever, now that she was no longer by his side, he turned almost immediately and rushed back to the house where the body of his loved one lay. He had no key, but the night being very hot the window was raised, and easily reaching it from the steps he crawled into his room, mechanically and married each other under difficulties of some kind. Probably the chief difficulty consisted in the fact that the youthful bridegroom's family objected utterly and with finality to the match, and cast him off for consummating it, for it was easily to be seen that the girl was of a social sphere very different from his. There was one relative, perhaps a sister, pitied him, and visited him bringing money, which his would not allow him to accept while his adored wife remained unrecognized, and so the relative, after weeping out her pity and affection in his arms, went away taking the rejected offering with her And they needed it very much. Proud with inherited pride, with no money no profession, no trade, unable to fight the world with any chance of success, through his youthful ignorance and sensitiveness, yet thinking it absolutely necessary to keep up appearances, he finally, after a year of failure, disappointment and perhaps some downright want, having pawned all their valuables, came to the agreement with her that it would be infinitely better for them to die to gether than to attempt to struggle any longer in the cold world with nc happier prospects than theirs. It would be beautiful to die, both of them at the same instant, and remain in peace and great love together thereafter through all eternity. You could closing and fastening the sash behind him, and collapsed on the sofa. One of the boarders had seen him come up the steps, and on account of the looseflowing pajamas had mistaken him for a woman. The same boarder had also in the excitement he was labor ing under, placed the sound of the shots he heard after, instead of be fore the entrance of the person he had observed. The hemorrhage from the boy-husband's wound, being mostly internal, left only a few blood drops here and there, which escaped the eyes of the police: but one investigator discovered them at once by aid of a magnifying lens, on the steps and

Now suppose that a woman were suffering persecution from the police on account of that foolish, very human boy-husband's crime? Would you, knowing the truth, advise that woman to send me to force a confession from him on what might be his death bed, in order to stop that temporary persecution?"

Mrs. Philpots flung her handker chief to the floor with a tragic gesture, her eyes flashed, she sprang erect and stamped her foot.

Demand for Muskrat Fur Has Started Campaign Against These Pests of the South.

"Women's hats are doing much to save the levees along the Mississippi river in Louisiana," said Henry R. Lewis. "This statement sounds fartastic, but of the fashionable fur hats it is certainly true.

"Muskrats, which for years have cost the state no end of trouble and thousands of dollars through their depredations in the levees, are now most eagerly sought by the millinery trade throughout the country, and hunters in Louisiana are hunting them

in lieu of other game. "For years the muskrats have burrowed in the levees, and in nearly every case where there has been a crevasse along the river front the cause was traced to a muskrat hole. The state has tried several means to get rid of the pests, but without suc-

Boycott on Physicians. Something unique in the line of a strike or a boycott was recently reported from a small town in Burgundy. The physicians of the place raised their rates 30 per cent., and a massmeeting of all the ailing folk was called, at which it was decided to dispense with the medical men's services and trust to luck to get well. "The opportunity seems a splendid one for Christian Scientists to step in and make hay while the sun shines," says the London Standard. The doctors of the place are said to be determined on holding out for theirincreased scale of charges, and, of course, no colleagues from neighboring towns will commit so grave a breach of professional etiquette as to turn blacklegs and poach on the other physicians' preserves. But the medical attendants are playing, perhaps, rather a dangerous game. Where will they be if their patients get well without them?"

Field for Women Lawyers.

It is said that a large majority of the women lawyers of the United States are earning comfortable livings in other branches of the profession than active practice. One broad field in which many of them find employment is in analyzing, digesting and classifying the decisions of the federal and state courts which have been handed down during the ten years ended with 1906. Law publishing houses give large salaries to capable women for this work. Another field which it is said is steadily broadening is in the offices of large corporations. COMFORTING WORDS.

Many a Chelsea Household Will Find Them So.

To have the pains and aches of a bad back removed; to be entirely free from annoying, dangerous urinary disorders is enough to make any kidney sufferer grateful. To tell how this great change can be brought about will prove comforting words to hundreds of Chelsea readers.

Mrs. Joseph Glosser, 517 W. Washngton St., Ann Arbor, Mich., says: 'My back ached almost constantly and often it seemed as though it were breaking. To stoop or lift, caused sharp pains in my kidneys and I often felt dizzy and nervous. The kidney secretions were far too frequent in passage, causing me much annoyance and I always felt so tired and worn out that it was quite an effort for me to do anything.
