CHELSEA, MICHIGAN, THURSDAY, JULY 27, 1911.

VOLUME 40, NO. 51

How Much Will You Take for Your Hair?

Human hair is valuable. A good head of hair brings a good price, besides if you don't realize how much your hair is really worth, just try to imagine how you would look without any. Some people don't have to draw on their imagination very much in order to know how they would look without any hair, but these people have never used

Nyal's Hirsutone.

Wise people use Nyal's Hirsutone. It destroys dandruff, prevents falling out, cleanses and invigorates the scalp.

Grocery Department

Tea. Tea. Tea. Tea.

There is no better Tea in town for 50c than the Japan or Mixed we are selling at that price.

Our customers back us up in this assertion. They say it's simply immense and touches the spot every time.

Successful Picnic.

Tuesday was not a very favorable day for the picnic which was held in the Wilkinson orchard for the benefit of St. Mary's school. The rain at noon interfered considerably with the dinner, and a number of our citizens who had planned to partake of the bountiful meal which the ladies of the Church of Our Lady of the Sacred Heart always serve on that occasion, had to forego that pleasure.

About two o'clock the sun came out bright and the afternoon was enjoyed by all present. The Chelsea Cornet Band furnished instrumental music for the day.

Short addresses were delivered by Rev. Fr. Hallassey, of Hudson, Rev. Fr. Comerford, of Pinckney, Rev. Fr. Fisher, of Manchester and Rt. Rev. Monsignor DeBever, of Dexter. Rev. Fr. Hallassey acting as presiding officer.

The ball game between the Chelsea Cardinals and the Pinckney team was well attended and resulted in a victory for Cardinals by a score of 4 to 3 in a ten innings game.

From a financial standpoint the picnic was a decided success notwithstanding the dampness in the atmosphere.

Severe Wind Storm.

The wind storm of Sunday night and Monday did a considerable amount of damage in the fruit orchards and to the shade trees in this part of the county. There was some rain during the storm but not enough to more than lay the dust. North, south and east of here is reported to have been the scenes of heavy rain falls.

There was not force enough to the wind to do any particular damage to the fruit trees, but it was strong enough to whip off enough apples to cover the ground in many of the orchards, and it did a pretty good job of thinning out the plums, peaches and peaches, too. However, there is enough fruit left on the trees to insure a good harvest, unless some more wind comes along later on and puts the fruit trees through another thinning-out process. Early harvest and fall apples suffered much more than the winter fruit.

The corn fields were considerably damaged but not enough to destroy the growing crop to any great extent.

A Musical.

The campers at Cavanaugh Lake gave a musical in the pavilion last Saturday evening. The Welfare Orchestra, of Chelsea, furnished the instrumental music. The following was the program:

Open Your Eyes.....Two Step
Just Like the Rose.....Waltz
Hula-Hula.....Two Step
Twilight.....Waltz
Song—On Mobile Bay.....Mr. Anderson
I'd Like to be Soldier Boy in Blue.....Two Step
The Call of Love.....Waltz
Song—I'd Love to Live in Love-land with a Girl Like You.....Mr. Anderson
Summer Days.....Two Step
Dreams Just Dreams.....Waltz
The Bird Man.....Two Step
Seven Days.....Waltz
Cotton Time.....Two Step
Song—Selection.....Mr. Anderson
Home Sweet Home.....Waltz

Tree Planters of America.

"The Tree Planters of America" is a name which probably will be much heard of in the near future. It is a proposed organization originating with the National Business League of America and being promoted by it. The plan is to organize the farmer boys and young men from 12 to 20 years of age in every part of the United States into an association with the above name. The purpose is the reforestation of the farms, tree culture and the conservation of timber supplies. The Governor of the state will be president of the group of planters in that state. The plan includes systematic tree planting in profitless pastures, nooks, ravines, on hillsides and house lawns; on useless or worn out spots, or partly denuded forest areas on the farm.

An Auto Trip.

An auto party consisting of Mr. and Mrs. D. C. McLaren, Mr. and Mrs. W. S. McLaren and daughter, Mr. and Mrs. L. T. Freeman and son, Mr. and Mrs. A. L. Lovejoy, Mr. and Mrs. O. T. Hoover and son Claire made a trip to Monroe Sunday. At Manchester Mr. and Mrs. T. B. Bailey of that place joined the party going with Mr. and Mrs. Freeman and Harlan Depew of Ann Arbor accompanied Mr. and Mrs. Hoover. The trip was made via Manchester, Union and Tecumseh. The party returned to Chelsea and Monroe and was a most successful one.

The New Fish Laws.

Fisherman will be interested in receiving authentic information regarding the latest fish laws as enacted and changed by the legislature of 1911, and which go into effect on August 1, 1911. The following is a brief synopsis as secured from Secretary of State Martindale:

Trout—Open season from May 1 to September 1. Unlawful to have in possession under seven inches in length. Unlawful to take from stocked streams for four years after stocking. Unlawful to sell brook trout or grayling.

Sturgeon—Unlawful to take from inland waters, except with hook and line. Unlawful to take more than fifty of above mentioned fish in any one day or to have more than 100 in possession at any one time.

Bass (all kinds)—Unlawful to sell. Unlawful to take from inland waters except with hook and line. Unlawful to take from any waters in any manner from February 1 to June 15 inclusive.

Small Mouth and Big Black Bass—Unlawful to take more than ten in any one day or have in possession more than ten any one time. Unlawful to take less than ten inches in length.

Strawberry, White, Silver or Calico Bass—Unlawful to take more than twenty in any one day, or have in possession more than twenty at any one time. Unlawful to take any less than seven inches in length.

The 1909 laws are still in force and guided the catching of bass this year. The 1909 law fixed the opening of the season at June 15, which maintains under the new law.

The new general act repeals the special act governing Indian and Magician lakes.

Received Ten Days Each.

Michael Callaghan and Ella Callaghan, claiming to be husband and wife, landed in Chelsea Tuesday afternoon, on a pedestrian trip from the north and being somewhat thirsty proceeded to quench the same with firewater. Early in the evening they had acquired a good sized jag and at the residence of James Taylor on Railroad street, they tried to make a bed of the lawn. The authorities were notified and the couple were given choice rooms in the village lock-up for the night. Wednesday morning the couple were taken before Justice Witherell, who gave them a ten days sentence in the county jail at Ann Arbor on the charge of being drunk and disorderly. When Deputy Sheriff McKune presented the sheriff with the commitment papers the couple was recognized as having been confined in the jail before on a similar charge.

To Meet at Hague Park.

O. M. Robertson, secretary and treasurer, of the organization, announces that the twenty-fifth annual meeting of the State Improved Black-Top Delaine Merino Sheep Breeders' Association will be held at Hague Park, Vandercook Lake, on Wednesday, August 16th.

A fine program is in the course of preparation for the gathering, and, in addition to a big banquet and literary feature, there will be a lot of good talk of interest to sheep breeders in a general way.

Invitations to the meeting will be sent out by Mr. Robertson the last of this week.

There is always a large attendance at these annual gatherings and the members of the association who reside in this vicinity are making arrangements to be present.

Fruit Growing.

The interest in fruit growing in Michigan, and especially apple raising, has increased wonderfully during the past two years. Several associations are in existence whose object is to advertise the advantages of the Wolverine state as a producer of fine flavored apples. Through the influence of these associations a great many people have bought lands, during the past year, on the shores of Lake Michigan, where the superiority of the lands for fruit growing is unquestioned.

County Truant Officer.

The new school law places the appointment of the county truant officer under the supervision of the county school commissioner instead of the sheriff, and requires that the officer work under the direction of the county school commissioner. This law goes into effect August 22, but those truant officers now serving will continue in office until January 1, 1912.

State Fire Marshal Law.

This new law authorizes any fire chief or assistant, upon complaint of any person having an interest in any building or property adjacent, and without any complaint shall have a right at all reasonable hours for the purpose of examination to enter into and upon all buildings and premises within their jurisdiction.

The chief of the fire department of every city or village in which a fire department is established, and the president of each incorporated village or town in which no fire department exists, shall report to the state fire marshal every fire occurring in such city or village by which property has been destroyed or damaged. Such report shall be made within two days, not including Sunday, of the occurrence of such fire. Every fire insurance company doing business in this state shall send a report giving the date of fire, the amount of probable loss, the character of property destroyed, and the supposed cause of the fire, and the amount of loss as adjusted. Such report shall be mailed to the state fire marshal within three days after notice of loss as adjusted on each fire after adjustment is made.

Violation of this law is punishable by a fine of not to exceed \$100, and in default of the payment thereof shall be imprisoned not to exceed thirty days.

A New Hotel.

As stated in The Standard some months ago the stone office building on Main street formerly occupied by the Glazier Stove Co., and owned by the Flanders Manufacturing Company is being fitted up as a first-class modern hotel.

The basement will be used for the dining room, kitchen and laundry. The second floor will have seventeen sleeping rooms, two bath and toilet rooms—one for ladies and the other for gentlemen. The first floor will be used as an office and the remainder will be converted into sleeping rooms. Lavatories will also be located on this floor.

The workmen commenced making the alterations Monday and the work will be pushed forward as rapidly as possible. This will be a decided help to the crowded condition of the hotels in Chelsea, and will be the finest structure of the kind in Washtenaw county.

A Costly Fire.

Fire starting from an engine's spark destroyed one of the barns on the Lewis Meade farm in Northfield about five o'clock Friday evening.

The house and one barn across the road were saved. Most of Mr. Mead's recently threshed wheat crop was in the barn which was destroyed and the loss will amount to between \$3,000 and \$4,000, amply covered by insurance.

A spark from the northbound 5 o'clock passenger train on the Ann Arbor is alleged to have set fire to the stubble in a wheat field between the railroad track and the barn. The fire ran through the field faster than a man could run and immediately set fire to the straw stack and barn. One horse which happened to be in his stall was burned, as there was no time to get anything out.

The insurance is carried in the Washtenaw Mutual, amounting to \$3,000 on the personal property and \$625 on the barn.

Farmers To Gun For Stray Dogs.

Ann Arbor Times News: Fair warning is to be given owners of dogs that if the dogs stray outside the city limits unaccompanied they will be promptly shot, for during the past week or so a great many farmers, particularly in Ann Arbor township, have had their flocks of sheep attacked by stray dogs, and a number of the sheep killed or hurt.

Among those in Ann Arbor township who have suffered are Adolph Waters, George Schenck, Robert Benz, Fred Staebler and Fred Kearns. A. W. Cochran, special policeman at the reservoir, has taken the matter in hand and he will keep his weather eye peeled for any stray canines. Mr. Cochran has had a lot of trouble lately with people who have brought dead horses out his way and left them. The officer is not partial to dead horses, and he is giving notice that all such animals shall be disposed of in the proper way and not left on top of the ground just outside the city limits.

Notice.

The sixth volume of the Improved Black-Top Delaine Merino Association is now out, and all members entitled to copy, will please call at The Standard office.

AT Freeman's

JOCKO KNEW HIS BUSINESS

No Chance for Man With Basket of Provisions to Get It Away From Guardian.

"How is this for a bunco game?" said the man who markets. "On my way home with a basket of provisions I met a man who buttonholed me with an interesting political story. While we talked I set the basket down on the doorstep of a plumber's shop that is built level with the sidewalk. In our excitement I walked on half a dozen steps. When I turned back a big brindle bulldog that had been sunning himself on the cellar steps was standing guard over my basket. I tried to pick it up; he wouldn't let me. I couldn't even get near enough to the door to ring the bell. For about ten minutes the dog and I sparred for possession of that basket. Then the door was opened suddenly from within, a red-headed woman took up my basket with one hand, patted the dog with the other hand, said, 'Good old boy, ain't 'ims'?' and shut the door.

"With the disappearance of the basket the dog ceased to regard me as an enemy and allowed me to ring the bell. The red-headed woman answered, 'That was my basket you took in,' I said.

"Impossible," said she. "Fortunately there was a street full of amused witnesses to swear that it was not impossible, but even then she wouldn't give up the basket until she had looked through the accompanying bills.

"The boy who does my marketing often sets the basket down and leaves Jocko to watch it till I get ready to come to the door," she said. "Maybe that was the explanation of Jocko's vigilance, maybe it wasn't; anyhow, I shall not set another basket down when Jocko is on the job."

Water Purified by Ozone. The city of Nice, France, now purifies its drinking water, heretofore considered unwholesome, by means of ozone. There is an electric power plant, worked by turbines, the force produced being 110 volts, 600 periods per second, which is transformed into an alternating current with a power of 17,000 volts. A system consisting of vertical copper plates, with spaces between them in which are glass plates between which the electric sparks decompose the air as it is forced through. The air becomes ozone and azotic acid. The acid is retained and the ozone made available by passing the decomposed air through charcoal dust and particles of cement. The water then flows through earthen tubes which are in a space filled with ozone, which the water absorbs. After this the ozone is extracted by having the water fall on stone steps.

Safe for Detectives. "Do you know," began the barber as he laid the latter thickly over his client's head, "that we're the only fellows I know of that could commit a crime and not be detected through the Bertillon system or whatever it is that pinches people by comparing thumb-prints?"

The victim moved uneasily in his chair, but circumstances over which he had no control sealed his lips. He grunted interrogatively and politely.

"Yes, sir! The reason is simple. We ain't got no thumbprints. We get 'em all worn off rubbing our thumbs over you fellers' chins. Fact! I'll show you when I let you out of the chair. My thumbs are pretty near as ironed-out-looking as your face will be when I get through with you."—New York Press.

How He Sought Fame. With a vaulting ambition by which he hoped to place himself at a single bound in a class with George Washington, Abraham Lincoln, Benjamin Franklin, William McKinley and other celebrities, a citizen of Memphis, Tenn., has written Postmaster General Hitchcock, with a lead pencil, asking what the department would charge him to make some postcards and stamps with his own physiognomy engraved thereon. He wants to know what they would cost a hundred and what would be the smallest amount he could have "run off."

The postmaster general, in his most gracious manner, informed the Tennesseean what the "smallest amount" would be, although this reply was not made public.

The Urgent Need. She (stammering with eyes and voice)—Arthur, dear, I find that we still need a few things to make our little household more serviceable. "What one thing, perhaps?" "She—Well, for instance, we need a new hat for me.—Harper's Bazar.

Grew Suddenly Worse. "You're not looking very well," said the head of the firm addressing the office boy. "I think you had better take a day off."

"I can't earn it. My mother needs all I can save every week."

"Oh, never mind that. You will get your full pay, just the same. I would think of docking you for being away on account of illness."

"Oh, but I feel bad. I'm almost sure I won't be able to come to work tomorrow either."

NEWS FROM ALL OVER MICHIGAN

THE BEET SUGAR INDUSTRY HAS MORE THAN DOUBLED IN FIVE YEARS.

STATE INSPECTION OF OIL PAYS GOOD RETURNS.

Farmers of Genesee County Start Hot Fight on Phone Company. The K. O. T. M. M. to Adjust Rates.

Beet Sugar Industry Grows.

The sugar beet industry, as a proposition from the farmers' standpoint, has grown to such proportions that the sugar companies will, by next year, have to double the capacity of the factories now in operation or build new factories to care for the acreage that will be offered.

This year thousands of acres of contracts have been refused. Five years ago the beet companies were the ones that were begging for the farmers to raise the beets.

Another phase of the situation is that of the railroads. The Pere Marquette lands the lion's share of the vast hauling business of the Michigan Sugar company. Last year the beet season extended into February. The Pere Marquette made thousands of dollars. Railroad tracks and side tracks for miles and miles were stagnated with cars of beets. This season additional switches and yard capacity is being installed, high power locomotives have been purchased and the road hopes to be able to keep up with the beet offerings.

Governor Ties Russell's Hands.

Gov. Osborn took action at a meeting with the board of control of Marquette state prison to block Warden Jim Russell from ever beating up any more prisoners on his own responsibility.

The governor suggested to the board that it pass a resolution taking away from the warden the right to administer any kind of corporal punishment through his own and sole responsibility, the resolution to provide that if any corporal punishment is administered it must be approved by the board before it is administered in each and every particular case.

The board passed the resolution. This prevents the warden from flogging any prisoners simply for personal spite or in bad temper. In the future if the warden wishes to have a prisoner whipped, he will have to have a meeting of the board of control and have the board by majority vote authorize him to go ahead with that particular case of punishment.

Gov. Osborn Warns War Department.

Acting on the result of an inquiry by the state board of health, Gov. Osborn has written to the secretary of war protesting against the work of the government in dumping into the St. Clair river sludge from Black River. The latter stream is being dredged by the government for the third or fourth time, and as heretofore the water of St. Clair river is being contaminated, in the view of the Michigan health board, the danger of a typhoid fever epidemic ensuing in the towns below Port Huron is pointed out by the governor.

Michigan Develops Fern Business.

Picking wild ferns for decorating purposes is being carried on on an extensive scale in some of the northern Michigan counties. The fern is shipped to Chicago, Detroit and other large cities. Men and boys are employed in gathering the ferns, and girls in sorting, counting and putting them in bunches.

Fruit Damaged in Leelanau County.

High winds and rain wrought hundreds of dollars of damage to fruit in Leelanau county. Frank Smith's orchard estimated \$700 damage to apples. Others in like proportion. Twenty per cent of the corn crop in Leelanau county is ruined. Trees were blown down and uprooted all through the county. There were no disasters in Grand Traverse bay.

\$2,500 for Fire Relief.

Gov. Osborn received \$2,500 from the Red Cross organization of Minnesota for the fire sufferers of Oscoda and Au Sable. Capt. Beckwith, in a report from Oscoda, states that more supplies of certain kinds are required and adds that the relief work for some of the people will have to be carried on for some time yet.

Flint Destroys Public Drinking Cups.

The board of health took the bull by the horns in regard to the regulation of the public drinking cup in Flint, when it issued an order that all cups in public places would be confiscated and destroyed after August 1. The order applies to public fountains, public buildings, factories, railroads and other places of the kind. The board is acting under the authority conferred upon it by the statute in which it is given power to protect the public health. The order of the board declares the public drinking cup to be a menace to the people.

Over 100 business men and manufacturers of Port Huron are making a trip through the thumb district. When James McGuire, a Bear Lake merchant, president of the village, found out that he could not sell cement for the corporation for its sidewalk or hotel gravel, he promptly resigned his office, and as a result a fight is on. Mr. McGuire operates a general store, runs the livery barn and until recently has carried the mail to the trains. He lost the mail contract to a lower bidder. However, at the last election he was selected president of the village.

MICHIGAN NEWS IN BRIEF

Erna C. Carleton, of Port Huron, 73, ex-congressman, is dead.

Pioneers of Arenac county plan a big reunion at Au Gres, August 26. The Standard Food Co., at Owosso, whose plant was destroyed by fire a few months ago, will be rebuilt.

Louis Dobeas of Ingalls, pioneer, says vegetables and grain crops throughout the state have never looked better.

The July quarterly term of the Luce county circuit court has established a record by having no cases on the docket.

About 100 striking furniture workers of the Fancy Furniture Co. of Grand Rapids, resumed operations Monday morning.

While Major C. H. Hanks was talking over his phone at Owosso the instrument was set on fire by lightning. A lightning safety device on the apparatus saved him.

Martha Reason, 13, of Morenci, was shot and killed with a rifle by her six-year-old brother, who didn't know the gun was loaded. An older brother had left the rifle in the kitchen.

Prosecuting Attorney Collins's semi-annual report shows that the number of arrests for drunkenness in Owosso during six months is 50 per cent less than under the liquor regime.

When Keeper McElroy, of the Kalamazoo poor farm, went through the clothes of Henry Odell, 80, who claimed he had no money, he found several hundred dollars wrapped in an old bootleg.

Mrs. James Goodell, of Grand Rapids, asks that her marriage be annulled. She is 19 and her husband 50. She claims she was drugged into marriage and has never lived with him at any time.

Removal of adenoids from a boy's nose will not always cure him of tendency towards crime, as shown in the case of Paul Bischoff, 11, of Grand Rapids, arrested for stealing \$2 from a woman's pocketbook in a store.

It is expected two more of the large Grand Rapids furniture factories will make a compromise with the strikers before the week end. The strikers are much encouraged, for since April 19 seven of the large factories have signed up.

By a deal just closed the Marshall Lumber Company has taken over the timber holdings of the Calumet & Hecla Copper Mining Company in the vicinity of Sheldrake, which is a town on Whitefish bay, just across from the Soo. The consideration was in the neighborhood of \$1,000,000, the land involved comprising some 40,000 acres in Whitefish township, Chippewa county.

It is understood that Lansing will have another evening paper. A representative of Congressman Cox, of Dayton, O., has been in the city several days and has been soliciting stock among local business men. It is stated. Since the first of the year the city has had but one paper, the State Journal. It is understood that the new paper will be started within the next two weeks.

Capt. Trudo, of the little boat Durkee, who was arrested by Sheriff Hadwin, of Leeco county on the charge of selling liquor in Arenac and Iosco, "dry" counties, at the ports of Au Gres, the Tawas, Alabaster and other points, waived examination and was bound over to the next term of the circuit court at Tawas City. Petitions are already being circulated to submit the question of selling liquor in Arenac county to the board of supervisors at the October session to be voted on at the election next spring.

Oscoda Relief Work Needs \$5,000 Yet.

About \$5,000 more is required to care for the sufferers in the fire district of the north and the citizens' committee, which has charge of the relief locally has sent out another call for funds. About \$9,000 has already been expended by the committee in relieving suffering among the people made homeless by the fire.

Rebuilding Oscoda and Au Sable.

In the fire which destroyed Oscoda and Au Sable, W. McGillivray, publisher of the Press, lost his entire printing plant. He will resume publication in about a month, and the news is encouraging for the rebuilding of the towns. The fishing business will amount to about \$3,000 per year. A logging railroad runs out of the town about 60 miles, which will convey supplies for the construction of a big dam. The Cook Site dam is nearly completed and another will be started at once. The Loud Company will begin operations in the lumber business as soon as their insurance is adjusted. It is not expected that they will operate on as large a scale as formerly, and they will employ about 60 men. A large canning factory, which had just started operation, will be rebuilt. The future of the town is not blasted by the fire, as it is the center of supplies for a dozen little hamlets in the Au Sable valley. The summer resort business is quite an item of income to the people, and has been increasing. The first reports were that the towns would not be rebuilt, but surrounded as they are by a good farming country they will certainly become active and enterprising places again.

Oil Inspection Pays Well.

The quarterly report of State Oil Inspector Neal for the term ending June 30, 1911, shows the inspection of 4,780,000 gallons, 100 of which was condemned as dangerous and returned to the refineries. The total fees collected were \$9,637.07; interest, \$92.28. There was paid out for salaries, office and traveling expenses, \$7,399.18, leaving a net balance to turn into the state treasury of \$2,430.17. This makes a total balance for the first six months of \$8,525.81.

Farmers Start Phone Rate Fight.

The farmers of Genesee county are stirred by the intimation from the Bell Telephone company that a uniform rate of \$18 will be charged for county telephones after August 1. They have been aroused to such an extent that arrangements have been made for a canvass throughout the county with petitions for the purpose of getting all the farmers to stand by a discontinuance of the telephone service unless the rate is maintained at \$15 a year.

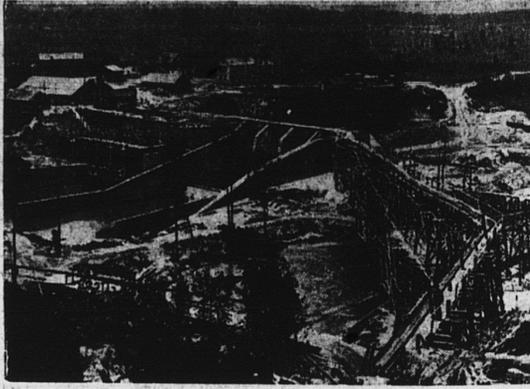

Cloudbursts Filled Canyons with Debris.

Cloudbursts that filled canyons with debris and turned nine buildings into house boats, marked the climax of a hot wave which sent the mercury up to 140 degrees in the Death Valley sink, California, during the week.

Work on the Demolition of Alumni Hall at Yale University Has Begun.

The historic building will be replaced by the Wright memorial dormitory, the money for which was raised by thousands of small subscriptions from former pupils of Dean Wright. The new dormitory will be occupied by members of the freshmen class each year.

LARGEST POWER DAM IN THE WORLD ON AU SABLE RIVER

Birdseye View of Power Dam on the Au Sable River.

FIFTEEN DAMS TO BE BUILT.

No. 1 dam of the Au Sable power corporation is already 80 per cent completed. It will back the water up the Au Sable river for eight miles measured along the river, five miles in an air line. The headwaters of this dam will be the tall race of the next dam, and for this next dam the machinery is already being made. It will be begun before the year is ended. And in all 15 dams, with an average horsepower of 10,000 each, will be built and each headwater will be the tailwater of the preceding structure.

No. 1 dam of the Au Sable company is 700 feet long, 50 feet high, and the top of the dam, except for the power pits, or stalls, and the spillway, will be 20 feet across. There will be three stalls, each equipped with four turbines, working on a horizontal shaft over openings in the cement floors. The openings will carry off the water as it presses through the turbines, the power coming from the weight of the water exerted upon the curved wings of the turbines. The "head" or height of the water will be kept at 40 feet. The openings under the turbines are nine feet in diameter, so that each of the four turbines in each of the three stalls will be driven by the weight of a circular column of water nine feet in diameter and 40 feet high.

To each of the three horizontal shafts will be direct connected a 4,500 horsepower dynamo, or expressing it in electrical pressure output, 5,000 volts.

Twenty-one thousand barrels of cement have been used in the construction of the portion of the dam connected with the power-producing plant and spillway. The remainder will consist of a concrete core wall with sand on either side, and here again an unusual method of operation is being pursued. Making use of the ideas developed in hydraulic mining in the west, powerful pumps have been installed and 125 feet above the river, on the crest of the bluff, men are now "slushing" the crest away to furnish the sand and clay for the dirt supports of the core wall. A trestle 400 feet long carries a steel flume from the crest of the hill over the bluff, and under 100 pounds pressure, three streams, with 2 1/2-inch nozzles, wash away 2,200 cubic yards of dirt every eight hours. The water carries the sand through the flume and at regular intervals openings permit it to drop along the core wall.

The company will use the new high tension transmission gear to carry its current south. Bay City is the first point, 84 miles from the dam. The current will be stepped up to 140,000 volts, and just outside the city limits a transforming station, costing \$140,000, in which the apparatus is now being placed, will step the current down to 110,000 and 500-volt pressures. This station will transform for both Bay City and Saginaw. The cables will be carried on steel towers, each 80 feet high, six to the mile. They are built upon solid concrete bases and the line is now under construction near Omer, Arenac county.

ment has been used in the construction of the portion of the dam connected with the power-producing plant and spillway.

The remainder will consist of a concrete core wall with sand on either side, and here again an unusual method of operation is being pursued. Making use of the ideas developed in hydraulic mining in the west, powerful pumps have been installed and 125 feet above the river, on the crest of the bluff, men are now "slushing" the crest away to furnish the sand and clay for the dirt supports of the core wall. A trestle 400 feet long carries a steel flume from the crest of the hill over the bluff, and under 100 pounds pressure, three streams, with 2 1/2-inch nozzles, wash away 2,200 cubic yards of dirt every eight hours. The water carries the sand through the flume and at regular intervals openings permit it to drop along the core wall.

The company will use the new high tension transmission gear to carry its current south. Bay City is the first point, 84 miles from the dam. The current will be stepped up to 140,000 volts, and just outside the city limits a transforming station, costing \$140,000, in which the apparatus is now being placed, will step the current down to 110,000 and 500-volt pressures. This station will transform for both Bay City and Saginaw. The cables will be carried on steel towers, each 80 feet high, six to the mile. They are built upon solid concrete bases and the line is now under construction near Omer, Arenac county.

K. O. T. M. M. to Adjust Rates Sept. 12.

"It is important that the 100,000 members of the Knights of the Modern Maccabees in Michigan understand the necessity of re-adjusting our rates at the convention to be held Sept. 12 at Port Huron," says Great Commander George S. Lovelace.

The K. O. T. M. M. is a Michigan institution, organized in this state, with headquarters in Port Huron, and nearly all its business done in Michigan. We have paid out in benefits the past 30 years more than \$17,500,000, and nearly every dollar has been paid to the wife or child of a Michigan resident.

Niles Gets Michigan Central Division.

Arrangements are being made for the Michigan Central railroad to make Niles a division point, and the population will thereby be increased 1,000.

Michigan City, Ind., is to be eliminated as a division point and the shops, yards and offices in that city will be transferred to Niles with 30 days.

Niles has been a passenger division point on the Michigan Central for 35 years, but the freight headquarters have remained at Michigan City. Preparations for the change, it is reported, were started three years ago, with the purchase of considerable property in the vicinity of the Niles station and the correction of grades there.

Frank M. Halstead Has Been Appointed Chief of the Customs Division of the Treasury.

He succeeds Charles P. Montgomery, who left to take charge of the customs affairs of the American Sugar Refining company.

The British sloop of war Algerine sailed for Bering sea, where she will join the United States revenue cutters there in guarding the seal rookeries.

The Algerine will watch the Canadian poachers, leaving the American fleet to guard against poaching American and Japanese schooners.

Alarming predictions of riot and dangerous life and property in Haiti unless the revolutionary interests are pacified, reached the state department.

This increased the anxiety of Washington officials and added to their fear that conditions in the little republic rapidly are approaching chaos.

The convention of the Western Federation of Miners after an all-day discussion of the subject approved the action of President Meyer and the executive board in rejecting the charter of the union at Jerome, Ariz.

The charter was taken from the union because it was charged that W. A. Clark's United Verde company had got control of the union.

Edmund Cooper, secretary to President Andrew Johnson, is dead at the age of ninety at his home in Shelbyville, Tenn.

The Wickwire Steel Company of Buffalo is buying extensively on the Menominee range with the intention of developing important mines.

By grafting the shin bone of a dead man on a woman suffering from cancer, this practically giving her a whole new lower leg, the surgeons of the New York hospital for deformities have completed an operation which is a success. Up to now operations of this sort have been confined to experimental work done on dogs.

RECIPROcity GOES THROUGH WITH EASE

SENATE PASSES THE CANADIAN RECIPROcity AGREEMENT BY VOTE OF 53 TO 27.

CANADA'S ACTION IS NOW AWAITED.

When Accepted by Ottawa's Parliament, Measure Will Be Proclaimed Law and Become Effective.

The Canadian reciprocity trade agreement was passed by a vote of 53 to 27, after every amendment to it had been voted down. Thus the purpose of President Taft in calling the special session of the congress was attained.

The striking feature of the vote is that a majority of the Republican senators were against the measure as were the Republicans in the house, 24 Republican senators opposing the pact while 21 voted for it. Had the pact been in the form of a treaty it would have failed in that it carried by less than a two thirds vote. Being in the form of a bill only a majority was necessary.

The Canadian parliament has not yet acted on the agreement and with one exception the provisions of the bill as passed by congress will not become effective until the president issues a proclamation that Canada has ratified the pact. The exception to this procedure is in the paper and pulp section of the bill, which it is announced will become immediately effective when the president signs the law.

From the White House President Taft followed the votes on the various amendments and on the final passage of the bill with the keenest interest. "I am very much gratified and delighted that the bill is passed," he said. "It indicates the increase in mutually beneficial relations between Canada and this country."

Senator Penrose ventured the prediction that congress would adjourn not later than August 9 or 10.

Ortie McManigal Near Collapse.

Ortie McManigal, the self-confessed dynamite, whose statements implicated John J. McNamara, secretary of the Ironworkers' union, and his brother, James B. McNamara, as co-conspirators in the dynamiting of the Los Angeles Times plant and the Lileway iron works of Los Angeles, and numerous other outrages throughout the country, in a union labor war may never tell his story on the witness stand.

McManigal, whose wife was recently freed by court from the necessity of giving testimony of her knowledge of the alleged dynamiting conspiracy, on the verge of a collapse, and his mind is said to be unable to fasten itself on the dynamiting case in any particular, it is declared.

If McManigal fails to recover his memory insofar as it relates to the conspiracy to which he confessed, the case of the prosecution will be knocked out, say labor counsel.

Other Nations to Join Peace Pact.

President Taft faced an audience at Manassas, Va., made up largely of veterans who wore the blue and the gray, within a few miles of the scene of the first great conflict of the civil war, and was applauded and cheered when he made a plea for international peace. He was covered with mud after a strenuous trip by auto from Washington.

The president declared that a general arbitration treaty both with Great Britain and with France probably would be signed within the next ten days. He added that he hoped within the next few days to announce that three other great powers would enter into similar agreements with the United States. He did not go so far as to indicate the nations that he had in mind, but it was generally believed that he referred to Germany, Italy and The Netherlands. Japan ultimately may come into the far-reaching peace pact, but the negotiations with that empire as yet are said to be merely tentative.

Poison Bottle Stoppers.

The new law requiring pharmacists to provide all poison bottles with a distinctive stopper that shall give warning of the nature of the contents of the bottle also requires the state board of health to pass on such inventions or appliances as may be submitted for its approval. The board has thus far approved two. The inventor, having the board's approval, is privileged under the law to bring in circulars describing his patent, and this, under the law, the board mails to pharmacists. A Lansing alderman is the inventor of one of the devices. The law was fathered during the last session by Rep. D. H. Hinkley, a well-to-do lumberman in Emmet county.

Cholera in Boston.

Asiatic cholera has reached Boston and caused one death, while two foreign sailors who are believed to have brought the dread disease to Boston, after being taken ill, disappeared and their whereabouts is unknown, according to a statement given out officially by Chairman Samuel H. Burging of the Boston board of health.

Forest fires have been raging in the vicinity of Haines, Alaska.

Abram Blum, a Jewish rabbi, took office as a chaplain in the New York police department. He is the first Hebrew to be appointed to such a position.

Eight firemen were painfully injured in a fire Sunday which totally destroyed the four buildings of the B. A. Stevens Co., Toledo, manufacturer of billiard and pool fixtures and barroom supplies, and eight dwellings and frame store rooms.

The total damage is estimated at \$325,000.

HOUSE OF COMMONS GOVERNMENT

Constitutional Reform in England Accomplished, Fact.

The constitutional revolution in Great Britain in the future will be governed practically by the house of commons, with its hereditary upper house possessing only a veto with a time limit of two years. The prediction that the next conservative government will overturn Asquith's revolution and restore the old constitution, but the radicals are confident that in such matters the hands of the clock will never turn back.

Simon May Join Diaz.

President Simon of Haiti appears doomed to follow President Diaz of Mexico and to give way to a revolutionary government, according to advices reaching Washington. In the opinion of Captain Dismukes, of the gun boat Petrel, which is at Port au Prince watching the operations of the revolutionists at Gonayes, the revolutionists are ready practically victorious and all the towns of importance except the capital are in their possession.

THE MARKETS

LIVE STOCK.

DETROIT—Cattle: Active and higher for all kinds; outlook strong; choice steers averaging from 1,000 to 1,100 lbs. at \$15.50; good to choice handy killers, \$14.50 to \$15.00; light to good butchers, \$13.50 to \$14.00; hogs, \$12.50 to \$13.00; common killers and fat cows, \$12.00 to \$12.50; common cows, \$11.50 to \$12.00; prime shipping bulls, \$13.50; light butchers and heavy sausage bulls, \$12.50 to \$13.00; stock of calves, \$12.00 to \$12.50; milk cows, active, \$12.00 to \$12.50; calves, lower at \$4.50 to \$5.00 per cwt. Sheep and lambs: Dull and \$10.00 to \$11.00; medium to heavy, \$11.00 to \$12.00; common choice lambs, \$6.50 to \$7.00; light to fair, \$5.00 to \$6.25; common to prime sheep, \$2.00 to \$2.50; common to prime, \$1.50 to \$2.00; common killers, \$2.75 to \$3.25; cut, \$2.25 to \$2.50 per cwt. Hogs: Active and steady; quality common prime medium and light, \$6.80 to \$7.85; light Yorkers and pigs, \$4.40 to \$5.00 per cwt. Receipts: Cattle, 847; calves, 1,125; sheep, 2,614; hogs, 2,659.

EAST BUFFALO, N. Y.—Cattle: Market steady; best 1,350 to 1,400 lb steers, \$10.00 to \$10.50; good to choice handy killers, 1,350 lb steers, \$11.50 to \$12.00; 1,200 lb shipping steers, \$10.50 to \$11.00; good to choice handy killers, \$11.50 to \$12.00; light butchers steers, \$4.00 to \$5.15; best fat cows, \$4.75 to \$5.25; good to choice handy killers, \$4.75 to \$5.25; common to medium fat cows, \$3.50 to \$4.00; trimmers, \$1.50 to \$2.75; best fat heifers, \$5.50 to \$7.75; good fat heifers, \$4.10 to \$4.75; good fat cows, \$3.50 to \$4.00; stock heifers, \$3.25 to \$3.50; best feeding steers, \$4.00 to \$4.25; common to medium fat cows, \$3.50 to \$4.00; best butcher and export bulls, \$4.50 to \$5.00; best milkers and springers, \$10.00 to \$12.00; good milkers, \$8.00 to \$9.00; springers, \$20.00 to \$25.00. Hogs: Receipts, 15 cars; strong; heavy, \$7.50; Yorkers, \$7.40 to \$7.50; pig, \$6.50 to \$7.00. Sheep and lambs: Receipts, 10 cars; market steady; top lambs, \$12.50 to \$13.00; good to choice handy killers, \$11.50 to \$12.00; common to medium fat cows, \$3.50 to \$4.00; trimmers, \$1.50 to \$2.75; best fat heifers, \$5.50 to \$7.75; good fat heifers, \$4.10 to \$4.75; good fat cows, \$3.50 to \$4.00; stock heifers, \$3.25 to \$3.50; best feeding steers, \$4.00 to \$4.25; common to medium fat cows, \$3.50 to \$4.00; best butcher and export bulls, \$4.50 to \$5.00; best milkers and springers, \$10.00 to \$12.00; good milkers, \$8.00 to \$9.00; springers, \$20.00 to \$25.00. Calves: \$4.50 to \$5.00.

GRAIN, ETC.

WHEAT—Cash and July, No. 1 red, 83 1/2c asked; on track, 1 car at 84c; September opened without change at 84c and closed at 84c; December, 84c; OATS—Standard, 2 cars at 44c; August, 43c asked; September, 43c; No. 3, 42c; November, 42c; December, 41c. RYE—Cash No. 1, 77c. BEANS—Immediate, prompt and July shipments, \$2.30; August, \$2.27; October

SERIAL STORY The Girl of My Dreams

A Novelization of the Play by Wilbur D. Nesbit and Otto E. Haverbach. Revised by WILBUR D. NESBIT. Copyright by W.D. Nesbit.

Harry Swift is expecting a visit from his fiancée, Lucy Medders, a Quakeress who has just returned from a tour of the world.

CHAPTER VII.—(Continued.) "And art thee a teacher of German?" Lucy asked, artlessly, of the Count.

"Yes, he's a German teacher of German," Harry replied, ha, ha! Good joke, dear teacher!

"What was thy last lesson about, Harry?" asked Mr. Medders. "Was it some passage from the German masters, or a chapter of history, perchance?"

"What was our last lesson about?" Harry asked the Count. "It was reading writing," the Count said.

"Reading and writing, you mean?" Lucy asked. "No, no. Reading writing. I am writing der reading und den he iss reading der writing."

"Verily, thy tutor must be a learned man." "He reads nothing but the classics," Harry replied. "You'll always find him in the library. He's dying to get back here now, I expect."

"And no doubt that is a classic he hath in his hand even at this moment," Medders said. "I've no doubt," said Harry, taking the book from the Count's hand and glancing at the title, which was "Three Weeks."

"I think thee art doing a great work," Lucy said to the Count, "to teach Harry German. It is fine that he hath thee for a tutor. How did these happen to be engaged by him?"

"Yes," Harry added, "through a mere accident."

CHAPTER VIII. Harry felt that there was nothing he could do which would sufficiently show his gratitude to the Count. Everything was straightening out nicely. To get rid of the Count would be simple. As his German tutor, what could be more natural than for the Count to put on his hat and walk away?

With a quiet wink to the Count, Harry said to Lucy and her father: "I want to take you around the grounds a bit, now. Count von Fitz will excuse us, I know."

"Most certainly," the Count replied, grandly. "Und I vill pursue my studies."

"What can it be?" Lucy asked in alarm. "Let us go and see," Medders said. They were saved the effort, for Carolyn came running in, her eyes big with alarm, and her face white with fright. She rushed to Harry and clung to him.

"Oh, Harry!" she cried. "That terrible old General!" "Gott!" the Count exclaimed, turning toward the library. "He has discovered me!"

as a crane—I mean crazy as a loon. I want my wife, I tell you. Where is she?" "Well, General," Harry replied stiffly, "I'm not running a guessing contest, you know."

"None of you nam nonsense! You know where my wife is." Mr. Medders stepped forward with his hand raised to calm the General, and, speaking to Harry, asked: "Knowest thou aught of his wife, Harry?"

"I don't know what can be the matter with him," Harry evaded. The Count sidled toward the door into the hall, saying meekly: "I think I am going, now."

"What is it the man sayeth of thee, Harry?" she asked. Before Harry could reply to her the General demanded: "Has my wife been here today?"

"Well, my boy, your time will come," sagely promised the General. "I trust the ladies will pardon me, and you gentlemen, also."

"What does this mean?" Harry asked. "I'm guessing, just as much as anybody else." "These would not let me look in there!" Lucy said, accusingly.

"Oh, Harry!" Carolyn wept. The Count chewed his mustache and trembled. The General's eyes were now blazing. He awaited the denouement. Harry looked at them all. Save Carolyn he could find no sympathy.

"Where is she?" he shouted. "Where is she? I want my wife, I tell you!" He stormed into the den and confronted them. He stalked up to Harry, brandishing his cane.

"Where is my wife?" he clamored. "You scoundrel! Where is my wife?" Harry waited until the General had run out of breath; this procedure also allowing him to collect his wits. Then he asked: "Why, General, what in the world is wrong?"

STATE ATTORNEYS END CONVENTION

Excellent Addresses Made at Closing Session.

1912 MEETING TO PORT HURON W. Glenn Cowell of Coldwater Condemns "Sweating" of Prisoners. Sheriff William F. Wagenseil is Elected President.

Lansing—Port Huron will be the 1912 meeting place of the Michigan Association of Prosecuting Attorneys, Sheriffs and Chiefs of Police, the invitation of that city having been accepted at the closing session of the convention at Kalamazoo.

Several excellent addresses were made on the final day. W. Glenn Cowell, prosecuting attorney of Coldwater, discussed "Confessions," in which he excoriated the "sweating" process sometimes used to extort statements from prisoners accused of crimes.

"Officers frequently start with the wrongful impression that a man suspected of crime must be guilty. In dealing with a case, do so with an unbiased mind. To do otherwise tends to make the public lose faith in officers. The endeavor should be made to convince the people that a prisoner has been fairly dealt with."

He was followed by the Rev. Caroline Bartlett Crane of this city, who was a guest at the session. She stated that there should be a more rigid enforcement of the laws against wife and child abandonment, which were violated with impunity in many parts of the state.

Complaints Made on Assessments. Between 40 and 50 complaints relative to assessments have been filed with the state tax commission and about the first of August the commission will send out field workers to begin the examination of valuations.

All Persons Must Carry Own Cups. That the state board of health was sure of the ground on which it stood when it issued the order for the abolition of public drinking cups from all public places was the assurance given from the office of Secretary Robert Dixon at Lansing.

Michigan Pensions. The following Michigan pensions have been granted: Bennett Bartlett, \$15; Arthur L. Chappell, \$6; Lucina R. Clapper, \$12; Alvin B. Dunbar, \$24; Samuel M. Holton, \$20; Alex. Lash-way, \$15; Charles R. Leonard, \$17; William Martin, \$15; Robert Payne, \$15; James E. Potter, \$20; Napoleon Trombley, \$20; Orlando D. Wheeler, \$8; Thomas Biddle, \$17; Candace Brown, \$12; Charles A. Button, \$20; John A. Daisel, \$15; Charles W. Fry, \$15; Ephraim Moore, \$15; Daniel W. Sias, \$24; Ella L. Smith, \$12.

Favors Free Cure for Babies' Eyes.

"That the state of Michigan ought to maintain a free dispensary for the two per cent solution of nitrate of silver for the prevention of blindness in children from the disease ophthalmia neonatorum, was argued by Dr. W. R. Parker, of Detroit, in a lecture on the summer program of the U. of M. at Ann Arbor.

"There is absolutely no excuse for the deplorable number of children, doomed to a life of blindness through the accused carelessness or ignorance of these physicians or midwives," said Dr. Parker, who is a U. of M. teacher.

"Where the prescribed treatment so difficult and delicate that the skill of a specialist could alone cope with it, the matter would be different, but it is not; it is the most simple thing to do, and people the world over should be taught, as they are now being taught, how to care for their tubercular cases and to prevent the spread of that disease."

Rejuvenating Old Orchards. President T. A. Farrand of the State Horticultural society, returned to his home here after having spent several days looking over the apple prospects in Ingham county.

Complaints Made on Assessments. Between 40 and 50 complaints relative to assessments have been filed with the state tax commission and about the first of August the commission will send out field workers to begin the examination of valuations.

All Persons Must Carry Own Cups. That the state board of health was sure of the ground on which it stood when it issued the order for the abolition of public drinking cups from all public places was the assurance given from the office of Secretary Robert Dixon at Lansing.

Lash-way, \$15; Charles R. Leonard, \$17; William Martin, \$15; Robert Payne, \$15; James E. Potter, \$20; Napoleon Trombley, \$20; Orlando D. Wheeler, \$8; Thomas Biddle, \$17; Candace Brown, \$12; Charles A. Button, \$20; John A. Daisel, \$15; Charles W. Fry, \$15; Ephraim Moore, \$15; Daniel W. Sias, \$24; Ella L. Smith, \$12.

The National Grange

CO-OPERATION IN PRACTICE

Instances of Its Success in the United States, in Canada and in England. During the past season the Grange Exchange of Connecticut has handled and distributed many carloads of potatoes shipped by Grange members in Aroostock county, Maine.

The Scottish co-operator is now buying his wheat from the Canadian farmer, taking it into his own elevators, shipping it to his own mills in Scotland, baking it in his own bakeries and distributing it in his own co-operative stores.

The Rochdale (England) system of co-operation, first started by a few poor weavers long ago, has extended until Great Britain now has 2,500,000 members, with 5,000 stores, shops, factories, banks, mills, etc., \$200,000,000 in capital, \$500,000,000 annual business and returns about \$70,000,000 annually to their members as their savings through co-operation.

Platform in West Virginia. Principles in Legislation Which Are Enlisting the Efforts of the Grange There. Some idea of what the Grange in West Virginia stands for may be gained from this "Platform of Principles" in legislation, towards which the efforts of the order in that state are being exerted:

- 1. Just and equitable tax laws, without discrimination against any class or interest. 2. Better roads under an effective road law that will not be needlessly burdensome upon the taxpayers. 3. Appropriations for College of Agriculture building at Morgantown. 4. The establishment of an agricultural high school at some suitable point in the state. 5. Adequate appropriations for the work of the state board of agriculture. 6. The establishment of an efficient state forestry department. 7. A law providing for the conservation of West Virginia's natural resources. 8. The submission of a constitutional prohibition amendment to a vote of the people. 9. An anti-cigarette law. 10. A law providing for the analysis and branding of feed stuffs. 11. Fuller provision for instruction in agriculture in the public schools. 12. The teaching of elementary agriculture in each of the six normal schools in the state. 13. Enactment of an efficient primary election law. 14. Enactment of a fair and adequate registration law. 15. Creation of a public service commission. 16. Ratification of the income tax amendment to the federal constitution. 17. A revision of the state game laws. 18. Economy in the general administration of the affairs of the state.

Neighbors' Nights. One of the big Grange events, in every state, is the neighbors' night visitation, which brings together great gatherings of patrons from a wide area. The usual plan is for the visiting members to provide the evening's entertainment, while they, in turn, are furnished a good supper. These visits often mean long rides over rough, country roads, late hours and altogether a tired, weary trip; yet the members go enthusiastically and return cheerily, always feeling well repaid for making the trip.

Important to Mothers. Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of J. C. FLETCHER in Use For Over 30 Years. Children Cry for Fletcher's Castoria.

MORE EXCELLENT REPORTS FROM WESTERN CANADA

Grains Are Heading Out Rapidly and Harvest Is Now Approaching With a Great Demand for Harvest Help.

Last week it was pointed out in these columns that there would be a yield of about 200,000,000 bushels of wheat throughout Western Canada, an increase of about 100,000,000 over the previous year, and that the demand for farm help was very great.

The Canadian authorities are hopeful that the friends of the 400,000 or 500,000 Americans who have gone to Canada during the last few years will come to the help of these people and induce as many able-bodied men as they possibly can to take advantage of the low rate which is being offered from all points on the Canadian Boundary, and particulars of which can be had from any of the following Agents of the Canadian Government: M. V. Moines, 176 Jefferson Avenue, Detroit, Mich.; C. A. Laurier, Marquette, Mich.; J. S. Crawford, Syracuse, N. Y.; Thos. Hetherington, Room 202, 73 Tremont Street, Boston, Mass.; H. M. Williams, 413 Gardner Bldg., Toledo, Ohio; Geo. Aird, 216 Traction Terminal Bldg., Indianapolis, Indiana; C. J. Broughton, Room 412, M. L. & T. Bldg., Chicago, Ill.; Geo. A. Hall, 2nd Floor, 125 Second Street, Milwaukee, Wis.; E. T. Holmes, 315 Jackson Street, St. Paul, Minn.; Chas. Pilling, Clifford Block, Grand Forks, N. D.; J. B. Carboneau, Jr., 217 Main Street, Biddeford, Me.; J. M. MacLachlan, Box 197, Watertown, S. D.; W. V. Bennett, Room 4, Bee Bldg., Omaha, Neb.; W. H. Rogers, 25 West 9th Street, Kansas City, Mo.; Benj. Davies, Room 6, Dunn Block, Great Falls, Montana; J. N. Grieve, Auditorium Building, Spokane, Wash.

Every facility will be afforded men of the right stamp to secure advantage of these low rates. To those who propose to go, it may be said that they will have this splendid opportunity of securing first hand information as to the excellent producing character of the lands in Manitoba, Saskatchewan and Alberta. They will have the opportunity of seeing some of the greatest wheat fields in the world and probably the largest yield of wheat, oats, and barley that has ever been grown on the Continent. And all this on land some of which cost the settler only the \$10.00 necessary to enter for his homestead, or, if he purchased, in some cases, costing him from \$7.00 to \$10.00 per acre, but which is now worth from \$15.00 to \$20.00 per acre. Even at these prices the land is remarkably cheap as will be realized when the statement is made that from 20 to 25 bushels per acre and over of wheat are grown, netting the farmer from \$8.00 to \$10.00 per acre; and this on land that he got for nothing or paid merely a nominal price. In fact the production shows that \$18.00 to \$20.00 per acre would be a nominal price for land that would produce as these lands produce.

Gray Matter. "I used to think I could hire all the brains I wanted for \$25 a week," Mr. Pushum said. "Well, couldn't you?" "Yes, but it wasn't long before I had to call in a \$100,000 lawyer to straighten out the kinks they put into my affairs."

CURE THAT SORE THROAT. Sore throat is inflammation of the mucous membrane of the throat, and if this membrane happens to be at all sensitive a predisposition to sore throat will exist. Paxtine Toilet Antiseptic is both a preventative and a cure for sore throat because it possesses extraordinary cleansing, healing and germicidal qualities. Just a little in a glass of water, used as a gargle, will quickly relieve all soreness and strengthen the mucous membrane of the throat, and thus overcome all tendency to sore throat. Paxtine is far superior to liquid antiseptics or Peroxide for all toilet and hygienic uses. Paxtine may be obtained at any drug store, 25 and 50c a box, or sent postpaid upon receipt of price by The Paxton Toilet Co., Boston, Mass. Send for a free sample.

Government Regulation. "You've got poison in your system," said the doctor to the patient who thought he had malaria. "Maybe I have," he admitted, "maybe I have. I don't eat anything but what is guaranteed under the pure food law."—Judge.

"He Has a Lot to Learn Yet."

"My Wife is in There."

The Chelsea Standard

An independent local newspaper published every Thursday afternoon from its office in the Standard building, East Middle street, Chelsea, Michigan.

O. T. HOOVER

Terms—\$1.00 per year; six months, fifty cents; three months, twenty-five cents. To foreign countries \$1.50 per year.

Entered as second-class matter, March 5, 1906, at the postoffice at Chelsea, Michigan, under the Act of Congress of March 3, 1879.

PERSONAL MENTION.

Mr. and Mrs. Jabez Bacon were in Jackson Sunday.

Miss Anna Mast visited her sister in Jackson Sunday.

Mrs. Foster spent Sunday with relatives in Jackson.

J. S. Cummings was in Detroit Saturday on business.

Miss Kathryn Hooker is visiting relatives in Detroit.

Howard Boyd was in Detroit on business Wednesday.

Roy Quinn, of Dexter, was a Chelsea visitor Tuesday.

Miss Marie Hindelang was a Grass Lake visitor Sunday.

Miss Mary McIntee, of Detroit, is visiting friends here.

Miss Zita Foster, of Grass Lake, was in town Tuesday.

Boys' Clothes.

HERE'S some Clothes talk—you're probably interested if you can boast of a real live American Boy in your home.

It's a good thing in more ways than one to dress your boy right. His future depends on your training—his appearance breeds self-respect—his clothes reflect on you—so see that his clothes fit. Don't buy just "a suit of clothes" for him. Buy a GOOD suit of Clothes—with the proper style (permanent style.)

You don't need to pay any more—you don't need to shop. You can come in our boys' department any day and see every size—every shade—and every material in the standard American Boy's Suit—"Best-Ever" Clothes. You'll be interested in knowing that above everything they are all-wool and Rain-Proof.

Shoes for Men and Boys.

In this department we have a complete stock of the leading makes and styles, in all leathers, for men and boys. Fit and quality guaranteed. Call and examine or line of footwear.

DANCER BROTHERS.

CLOTHING FOR THE MAN WHO CARES.

Save your appetite for the "Feast of the Seven Tables" to be given by the B. Y. P. U. of Chelsea on the beautiful lawn of Mr. and Mrs. R. D. Gates Wednesday, August 2nd. Supper from 5 until all are served. Price 21 cents. If weather is unfavorable, supper will be served in the dining room of the Baptist church.

The following dispatch from Pontiac was taken from the Detroit Free Press of Wednesday: "While A. R. Welch and family were absent two weeks from their home on Franklin boulevard thieves entered the house and stole money and silverware. Despite the fact that a maid was at home all the time, the robbery was not discovered until the return of the family."

Dr. A. L. Steger is attending a session of the National Dental Association this week in Cleveland, Ohio. According to a preliminary program there will be 303 dentists from the various states of the union lecturing and doing different form of dentistry for the benefit of those attending that meeting. It will certainly be a grand opportunity to gather a good many ideas for the benefit of his patient.

The Saturday night show at the Princess will run almost entirely to comedy. The feature picture is the only drama on the bill. Its a Kalem, entitled "In Old Florida" a scenic and dramatic picture combined. It is a beautiful love story taken in Florida's prettiest country. "The Two Heroes" a comedy of the Civil War, and "The Wooing of Winifred" a real and able comedy complete the bill.

Born, Sunday, July 23, 1911, to Mr. and Mrs. Herman Dancer, a son.

Born, Friday, July 21, 1911, to Mr. and Mrs. George Seitz, a daughter.

Born, Saturday, July 22, 1911, to Mr. and Mrs. Glenn Bårbour, a daughter.

Miss Margaret Eppler has received word of the death of her grandmother, Mrs. Roths, who resided in Switzerland.

Another Vitaphone Comedy.

To see it is to laugh

MAIL ORDER BUSINESS

There is lots of mail order business being transacted just at present. Our merchants are large sufferers because of this, and it is only to be expected, we presume, that banking should come in for its share of lost business which rightfully belongs to it. Several large banks in eastern cities have secured, through advertising, millions of dollars in deposits from people all over the country. Perhaps your deposit may have been solicited. Before you send your money away from your home better ask yourself what is to be gained by it for you or anyone else. This bank offers as great a degree of safety and as-high a rate of interest as any of these Banking by Mail banks and on that basis alone should have your deposit. Suppose for instance we all buy our goods in some distant city and do our banking by mail. What becomes of this town and surrounding country? It is always best to think before you act otherwise thinking may be done too late. Banking by mail may mean digging your own business grave.

UP-TO-DATE METHODS OF HANDLING THE CORN CROP.

HERE is no branch of agricultural activity in the United States where the past few years has witnessed greater improvement in methods of cultivation and harvesting than in the sphere of corn growing. This is as it should be for corn is easily one of our most important crops. Indeed, although the fact is not generally recognized, it is a greater wealth producer—considered in the broad sense—than is the wheat crop.

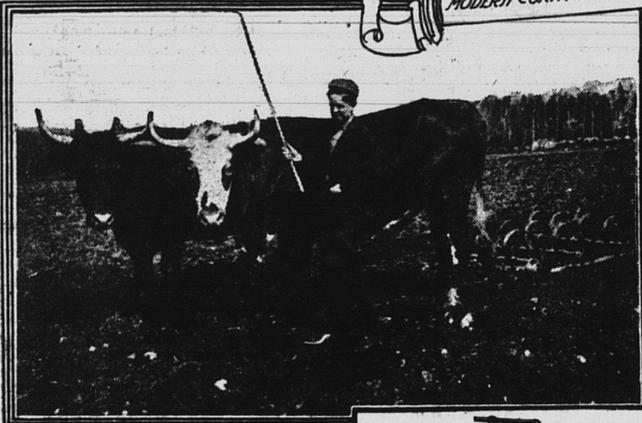

The advance which has been made concerns not only the methods employed in nurturing and handling the corn crop but also the means employed, that is the machinery which is doing so much to aid human brawn in caring for the golden kernels.

Whereas progressive farmers have in many instances worked out their own salvation as regards the improved methods of corn cultivation, it is perhaps only fair to give the major portion of the credit to the United States department of agriculture, which has worked in co-operation with the State Agricultural colleges and experiment stations to bring about a better understanding of the requirements of the corn crop. Many an old-fashioned farmer has been wont to assume that every tiller of the soil knew from his boyhood apprenticeship on the farm all that there is to know about growing corn and yet the experts of the agriculture department found that in reality there

MODERN CORN HARVESTER

PLANTING CORN

A FAMILIAR SCENE IN THE "CORN BELT"

A MODERN CORN HARVESTER

was more widespread misconception regarding the needs of corn than about any other leading farm commodity.

For the purpose of putting our farmers on the right track in their corn growing Uncle Sam during the past few years had field agents or demonstrators traveling about the country all the while to give advice and assistance to the corn growers who do not appear to be doing the thing the best way. At first there was a disposition to regard with distrust if not with suspicion the advice of these "book farmers," but gradually as they proved that they could double and triple corn yields with scarcely a cent of extra expense, they won over to their side a considerable portion of the farming community and this "missionary work" is now being extended until in time it will embrace the "corn belt" where strange as it may seem the farmers are not getting nearly all that they should out of the land—that is if you let these government sharps tell it.

The first boost that was given to the American corn crop came through improvement by seed selection. The experts have induced the farmers to select their seed corn with great care in the field instead of merely making use of what happens to remain in the crib at planting time and the improvement from this cause alone has approximated at least twenty per cent. Most of the progressive corn growers have also awakened to the wisdom of properly preserving seed corn by keeping it dry during the winter in a special seed house instead of merely entrusting it to the corn crib in the old haphazard way. It has now come to the pass where the best quality of corn is worth \$25 per bushel more for seed purposes than unselected corn.

A second effective method of improving our corn crop has as its purpose the improvement of the condition of the soil in accordance with the studied requirements of corn cultivation. Modern science is teaching the farmer that it simply will not pay to attempt corn growing on poor land until it is brought into a fertile condition by the growing and plowing under of

MODERN CORN SHOCKER

leguminous crops, the application of manure, etc. In not a few instances corn farms have been rendered more profitable by rearranging the fields in order to make them more uniform as regards moisture and soil fertility. Soil washing, that is, the washing away of the surface soil—one of the bugbears of corn growing—is being prevented by systematic means such as were almost unheard of a few years ago.

The big problem of fertilizers is one which touches the very heart of the corn-growing industry and the experts in and out of the government service have prepared very explicit directions for enabling the corn grower to add to his soil nitrogen or whatever other ingredients are most needed to produce the longed-for prize ears of corn. It has been found upon investigation that many farmers have had very different ideas as to how corn should be planted and cultivated but at the same time it has been discovered that no hard and fast rules can be laid down as applicable to the whole country. The corn grower who is cultivating a deep soil in a section where there is prolonged dry weather will obviously have to proceed on a different theory from the man whose land is low and wet. The point that is being driven home is that each farmer must study his own particular needs.

An odd circumstance in connection with this phase of the crusade for better methods of handling the corn crop was the discovery by Uncle Sam's investigators that corn growers as a class are very conservative, altogether too conservative, indeed, for their own good. The implements and methods employed in Iowa are entirely different from those of Connecticut and the latter, in turn, are dissimilar to those in use in Georgia. No section has a monopoly of all the good things in methods and machinery and in many instances a practice in vogue in one locality could be profitably used in another district which had remained in ignorance of it. All this bids fair to be changed, however, under the present awakening. Wide-awake corn growers are paying visits to other corn-producing states than their own and the result is likely to be a general discarding of poor and adopting of improved methods.

The depth of planting, the distances between rows and hills and the depth and frequency of cultivation are all corn problems that are being solved along dependable scientific lines after a century or more of discussion and dispute. Meanwhile the improvement of corn cultivating and harvesting machinery has worked wonders in bringing about the new era in the corn fields. Mechanical corn harvesters have developed more slowly than the machines for wheat and other cereals, attempts to solve the problem of mechanically handling the corn crop dating from 1820, whereas it was not until 1831 that Cyrus McCormick made the first reaping machine.

Despite the fact that there was almost continuous experiment in the sphere of corn harvesting machinery from the date above mentioned it was not until 1892 that success crowned the efforts of the inventors. The principle in corn harvesters and binders which was destined to prevail appeared in the year mentioned, the invention of an Illinois man. In its elementary form it consisted of a corn harvester with the two dividers passing, one on each side of a row of corn, which was cut and carried back

in a vertical position to the binder attachment by means of chains and gathering arms. Later various improvements and modifications of the design have been made and new inventions along the same line have been introduced. In some of the machines the binder is in almost horizontal position instead of vertical.

Naturally, badly tangled fields make the progress of a corn harvester somewhat slow, but it is remarkable with what precision the machine will right the stalks. Owing to the great variation in the height of the corn, even in the same field, the binding attachments are given great range of operation and in some machines they are placed as high as 32 inches. The machines weigh from 1,400 to 1,500 pounds each and cost, on an average, \$125. The average number of acres cut per day by such a corn binder is upward of eight and the total cost per acre of harvesting the corn by this method (allowing for cost of machine, wages of driver, outlay for twine, etc.) averages about \$1.50. Corn shockers cost about as much as corn binders and weigh approximately the same. These are the ideal machines for owners of small farms who do most of their own work. A man with three horses and a corn shocker can cut about five acres of corn per day at a total expense of \$1.04 per acre as against \$1.50 per acre with the machine previously described.

The fundamental features of the corn shocker are the circular rotating cutters which cut the corn as the machine advances and the circular rotating table upon which the corn is collected vertically to form a shock. A loading device for handling the shocks adds greatly to the efficiency of the modern improved type of machines. Corn pickers, machines which remove the ears from the stalks (which latter are left in the field) cost \$250 each and are operated at an expense of \$1.81 per acre. Combined huskers and shredders are the latest additions to corn handling machinery and on up-to-date farms these are in many instances operated by gasoline engines.

POST WITH A HISTORY

MONUMENT TO STUDENT'S VAIN EFFORTS TO GET EDUCATION.

Russian's Heroic Attempts to Work His Way Through Cornell University Told by Former Ambassador Andrew D. White.

Andrew D. White, former ambassador to Russia and Germany, points out a stone post on the university campus as a monument to a student who tried to work his way through the university soon after Ezra Cornell sent out a call for students in all parts of the world who were willing to work to obtain useful knowledge.

"I shall always think of that stone post before Sage college as Pelechin's monument," said Mr. White to a professor recently. "Pelechin had come all the way from Kiev, Russia, in response to the call to a university where poor men could work their way. It was Mr. Cornell's idea that all the students should be at least partly self-supporting.

"The Russian had little money left on his arrival and came to me to apply for work. I reported the matter to Mr. Cornell, and when a few days later Mr. Cornell bought this post from the stone cutters and had it unloaded before the south building, Pelechin got the task of putting it in position. The poor fellow was unacquainted with the use of tools and was very awkward. It was several weeks before he got a hole dug which would accommodate the post in its proper position. His strange methods of work attracted the attention of many of his fellow students, and they named it Pelechin's monument, a name by which it was known for many years afterward.

"It soon turned out that a monument was needed. Pelechin soon became not only deficient in funds, but deficient in scholarship. He made heroic struggles to master his studies without avail, and I finally succeeded in persuading him that the best thing he could do was to return to his home in Russia.

"Imagine my surprise when he turned up a few years later. He came to my office and told me he had saved \$500 and proposed to complete his course. I congratulated him on his thrift and his determination to succeed, but with mental reservations. In a few days he came to my office again. He told me he had invested a large part of his capital. I asked him what investment he had made, and he told me he had purchased a horse and carriage. I was astonished, and asked why he thought a horse and carriage would be a good investment.

"Pelechin told me that there was a constant demand on the part of a considerable number of the students for a horse and carriage, and he expected to make a great deal of money by hiring them out. Poor Pelechin! He turned up again in a few days crestfallen. He had a sad story to tell. He had rented the horse and carriage to a party of students, and the animal had run away, badly injuring itself and wrecking the carriage. Soon afterward he left Cornell for good. His address in the 1908 Ten-Year Book of the university was still Kiev, Russia."

Forms of Oath.

A Chinaman has been sworn in: On entering the box the witness immediately knelt down, and a china saucer having been placed in his hand he broke it. The officer of the court through an interpreter then addressed him thus: "You shall tell the truth and the whole truth, and if you do not tell the truth your soul will be cracked like the saucer." A Mohammedan witness first placed his right hand on the Koran, put the other hand to his forehead and brought the top of his forehead down to the book and looked it with his head. He then looked for some time upon it, and being asked what effect that ceremony was to produce answered that he was bound by it to speak the truth. The deposition of a Gentoos has been received who touched with his hand the foot of a Brahmin. Buddhists have been sworn by—the three holy existences—Buddha, Dhamma and Pro Sangha—and the devotees of the 22 firmaments, and a Parsee on the Zend Avesta, or by binding a "holy cord" round his body.—Law Times.

DISFIGURED WITH CRUSTS

"Some time ago I was taken with eczema from the top of my head to my waist. It began with scales on my body. I suffered untold itching and burning, and could not sleep. I was greatly disfigured with scales and crusts. My ears looked as if they had been most cut off with a razor, and my neck was perfectly raw. I suffered untold agony and pain. I tried two doctors who said I had eczema in its fullest stage, and that it could not be cured. I then tried other remedies to no avail. At last, I tried a set of the genuine Cuticura Remedies, which cured me of eczema when all else had failed, therefore I cannot praise them too highly.

"I suffered with eczema about ten months, but am now entirely cured, and I believe Cuticura Remedies are the best skin cure there is." (Signed) Miss Mattie J. Shaffer, R. F. D. 1, Box 8, Daney, Miss., Oct. 27, 1910.

"I had suffered from eczema about four years when boils began to break out on different parts of my body. It started with a fine red rash. My back was affected first, when it also spread over my face. The itching was almost unbearable at times. I tried different soaps and salves, but nothing seemed to help me until I began to use the Cuticura Soap and Ointment. One box of them cured me entirely. I recommended them to my sister for her baby who was troubled with tooth eczema, and they completely cured her baby." (Signed) Mrs. E. L. Marberger, Drexelsville, Pa., Sept. 6, 1910.

Although Cuticura Soap and Ointment are sold everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. 4 L, Boston.

DECIDED NOT TO OPEN IT.

Caller—I was thinking about opening a drug store in this neighborhood. Do you think one is needed around here?

Resident—Great idea. There's no place within ten blocks where a man can buy stamps or see the city directory.

Honors More Than Even. Mrs. Patrick Campbell is not kindly inclined to criticism of her work. At a rehearsal of a new play, one morning, her manager, Charles Frohman, stopped Mrs. Campbell and said: "Mrs. Campbell, it seems to me that those lines should be delivered thus," repeating the lines in question. Mrs. Campbell drew herself up and said: "Mr. Frohman, I am an artist." That is all right, Mrs. Campbell, replied the urbane manager. "I assure you I will never reveal your secret."

Quarters and Halves. George Ade, at the recent Lamb's Gambol in New York, objected to the extravagance of the modern wife. "It is true that the married men of today," he ended, "have better halves, but bachelors have better quarters."

A Triumph Of Cookery—

Post Toasties

Many delicious dishes have been made from Indian Corn by the skill and ingenuity of the expert cook.

But none of these creations excels Post Toasties in tempting the palate.

"Post Toasties" are a luxury that make a delightful hot-weather economy.

The first package tells its own story.

Nervousness--A Lack of Control

How often we meet women who complain of being nervous. What they really mean is that they have not control of their nerves, but let them run away. A woman may be of a nervous temperament and yet have such good control of her nerves that she never complains of being nervous.

This lack of nerve control manifests itself in various ways. Sometimes it is only a tendency to cry at trivial things or an inclination to despondency—to have "the blues," or to worry over real or fancied ills. Many women waste so much time thinking over things that are past and gone. A visit with a friend loses its joy in the afterthought, for this victim of the nerves lives over again every moment of the visit. She recalls everything that has been said and wonders if a different meaning was meant. Things that were said as a joke and originally taken that way are now brought up for criticism and pondered over until the woman guesses herself of the presence of a hidden meaning. She is not satisfied until she has bent and

shaped the original thoughtless sentence into an ugly sting.

These nervous women are the ones who are continually tormented with the demon of jealousy. If one of them should suddenly meet her husband on the street walking with another woman, what a certain lecture he receives that evening; or if not that, he finds his wife wearing the air of one who considers herself much abused. The real facts of the case may be that her husband met the other woman quite accidentally and, as they were going in the same direction, he could not avoid walking with her without being positively rude. In this age men must of necessity have business transactions with women. It is a common occurrence for two men to lunch together in order to make a chance to talk over some important business matter without fear of interruption. There is no reason why a man and woman might not do the same, and yet how impossible it would be to convince the jealous woman that this was the case. To be jealous is

to acknowledge the superior charms of the other woman. "If I cannot hold you against all women, then I do not want you," is the right thought. If you think some other woman is attracting your husband, wake up and beat her at her own game. Do not sit idly in the corner and complain.

A woman who is nervous does not usually realize what is the cause of her condition. When excitable and irritable and suffering from a nervous headache, she takes various remedies to deaden the symptoms instead of looking the matter squarely in the face and going after the cause. Many women need a hobby to take up their spare time. If their minds were occupied and their bodies kept in a good condition by proper care, they would soon gain control of their nerves.

Accepted at Last. Post—My epic on the coming coronation has been taken. Wife—Oh, darling, I'm so glad! Who's taken it? Post—Mary took it this morning to fight the study fire with!—London Opinion.

To Raize Old Paris Fortress

Fortifications Now Useless—Undesirable Persons Rent Space From Government and Attack Pedestrians.

There is talk, as there has been for years, of leveling the fortifications of Paris, which are perfectly useless now in the improved conditions of modern warfare, and of building houses on the large tract of ground which would be set free right round Paris. At present the fortifications are not only useless as a protection to the city in time of war, but they are absolutely dangerous to the citizens in time of peace. According to the law a large space around the fortifications is kept free of all stone buildings. This military zone, as it is called, has no houses upon it, but little one-story huts are allowed to be built there and are rented at tiny rentals by the military authorities. Their cheapness and discomfort attract undesirable tenants, and the Paris apache has for years made a bustling ground of the fortifications.

Only a few days ago a rich Russian, M. Ivanoff, had gone for a drive in a taxicab. The motor broke down near the fortifications, and while it was being put right M. Ivanoff went for a stroll. He was not more than a couple of hundred yards away from his cab when two men and two women attacked him, stabbed him in seven places, robbed him of all his money and his watch and chain and a valuable scarfpin, and left him for dead. The two women have been arrested, but their companions are still at large. The incident is being used as another argument for the leveling of the fortifications. Another argument still is, of course, the great value of the land for building purposes.

A Suggestion.

"If the sea had a milky way as well as the sky wouldn't it be convenient for the sailors?" "In what way?" "They could have floating dairies when their boats skimmed the waves."

DEEP DRAINAGE INCREASES ROOT SPACE

By R. J. BALDWIN, Michigan Farm School.

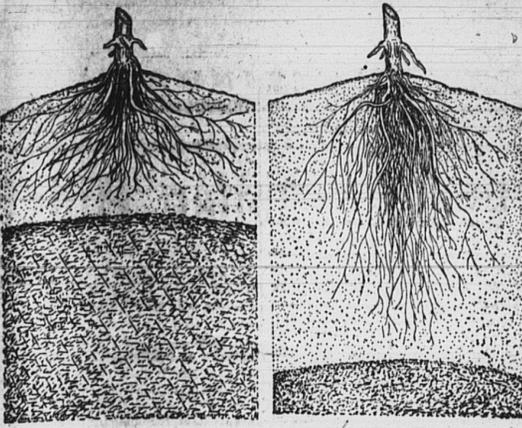

Fig. 1—In wet soil the roots grow near the surface and are left without water supply during drought. Fig. 2—Roots grow deep in well drained soil and are not so much affected by drought.

Roots, as well as all plant tissues, require air, warmth, moisture in order to live and grow. The part of the soil which contains these things in the proper amounts will induce most rapid growth and soon become permeated with an interlacing system of rootlets. Unless soil is naturally underdrained by a porous subsoil, or artificially by tile, the lower strata will contain an excess of water, filling up the air spaces and making the soil cold and unfit for root growth. As a result the roots will grow as in Fig. 1, near the surface, where there is air and warmth. In case of drought later in the season, this will result seriously because the top layer of soil, where the roots are, will dry

out and the plant, lacking deep roots, will suffer for the water it cannot reach. On the other hand, a plant growing in well drained soil, as Fig. 2, will develop a deep root system little affected by changes in weather. An additional advantage of a deep-rooted system is that the feeder roots have access to a food supply several feet below the surface, thus not depending entirely on the fertility of the surface soil. Heavy rains and spring thaws wash much plant food into the subsoil and unless soil conditions are suitable for root growth this fertility is lost. In this way deep drainage makes soils longer lived by increasing their depth, and thus bringing a greater supply of food within reach of plant roots.

Lime for Agricultural Purposes

By A. J. FAYEN, Experiment Station Chemist

Just at this time a great interest is being taken by farmers all over Michigan in the subject of lime for agricultural purposes. The practice of using lime is almost as old as agriculture itself. The Chinese were probably the first to use lime on the soil; it was also used by the Romans and by them the practice was introduced into England and France. In England the practice of marling the soil has been followed for centuries and often with very marked results. The first mention of lime in connection with American agriculture is found in the contributions of Rufus in the American Farmer, in 1818. Although lime has been used more or less extensively by the farmers of the United States for the past century its action upon the soil is not generally understood. Lime should never be considered as a fertilizer, in the same way that barnyard manure or commercial fertilizers are. It can never take the place of these materials, but should be used in connection with them. Generally speaking, all soils contain a sufficient amount of lime to meet the plant food requirements of crops for all time; consequently the benefits from lime are shown in another way and it is usually spoken of as an amendment or modifier because it is capable of correcting conditions that may be inimical to the best growth of plants.

Lime may act upon the soil in three ways, viz., chemically, physically and biologically.

Chemical Action.—Lime acts upon the insoluble potash compounds in the soil and changes them into forms available as plant food. This action should not be depended upon, however, as a means of supplying the crops with available potash to the exclusion of commercial fertilizers, for unless the soil contains an almost unlimited supply of potash we are only hastening the time when the soil will be depleted of this form of plant food. Whether or not lime effects the availability of the insoluble phosphoric acid compounds is a disputed question. The most important chemical action of lime upon the soils is to correct acidity. Soils that have been cultivated for a great many years may become acid, due to the accumulation of organic acids produced by the decomposition of organic matter. Many crops are affected by an acid condition of the soil and in such cases are greatly benefited by the addition of some form of lime or material containing lime, such as marl or hard wood ashes.

Physical Action.—Heavy clay soils that puddle and bake after a rain are benefited by the addition of lime. It acts beneficially upon a soil in this condition by binding the fine particles together, thus making the soil more friable and easy of cultivation. It also makes it more open and porous, thus facilitating the movement of air and water in the soil. The action of lime on sandy soils is quite the reverse of that on clay soils, since it binds together the loose particles of sand and makes the soil more retentive of moisture.

Biological Action.—The decomposition of organic matter added to the soil in the form of barnyard manure, green manure, straw, etc., is brought about by the action of soil bacteria. The

of the soil bacteria living in connection with the roots of legumes, such as the clovers, vetches, alfalfas, beans and peas, are able to take nitrogen from the air and change it into a form that is available to plants. In order for these bacteria to accomplish the most good the soil condition must be favorable for their best development, and this condition is brought about by the addition of some form of lime.

There are several forms of lime that may be used for agricultural purposes and the choice of the form should depend upon the purpose for which it is to be used and also upon the price.

Burned Lime.—Burned lime is known also as stone lime, lump lime, quick lime and caustic lime. This form of lime is produced from the raw lime rock by burning. This is the most active form of lime and may be used at the rate of 700 to 1,000 pounds per acre. Much larger quantities are sometimes used, but the above amount should be sufficient in most cases. This form is usually obtained in large lumps and must be slaked before being applied to the soil.

Hydrated Lime.—When burned lime is treated with water it forms what is known as hydrated lime. This form is somewhat less caustic than burned lime and is always in a powdery form and may be readily applied to the soil. Seventy-four pounds of this form of lime are equivalent to 56 pounds of burned lime, consequently it should be used at the rate of about 900 to 1,200 pounds per acre.

Air Slaked Lime.—When burned lime is left to the action of the air it takes up moisture and carbon dioxide and gradually breaks down into a fine powder. This form of lime should be applied in about the same quantities as the hydrated lime.

Ground Limestone.—When ground limestone is used it should be pulverized so that at least 75 per cent will pass through a sieve of 80 meshes to the inch. The value of the ground limestone depends quite largely upon its fineness. This form of lime is not caustic and it may be applied to the soil in almost any quantity without fear of causing harm. However, the usual application would be 1,500 to 2,000 pounds per acre. One hundred pounds of ground limestone are equivalent to 56 pounds of burned lime or 74 pounds of hydrated lime.

Refuse Lime From Sugar Factories.—This form of lime, when it can be obtained dry and in powder form, is a good source of lime. It is partly hydrated and partly carbonated, and is consequently very similar to air-slaked lime and should be used in about the same amounts. This lime also contains a small amount of nitrogen, phosphoric acid and potash absorbed from the beet juices.

Marl is found quite extensively throughout the state and many of the deposits are very pure calcium carbonate. In a dry, powdery form marl may be used as a substitute for lime and in the proportions recommended for ground limestone.

The burned lime, hydrated lime and air-slaked lime are caustic; diminishing in degree, however, in the order named.

When the lime is to be applied to heavy clay soils to correct the physical condition, the burned lime or hydrated lime are recommended, as these forms act more rapidly than the other forms. However, where ground limestone

is to be used for correcting the acidity the ground limestone is recommended, providing it can be bought at a reasonable rate. It should be laid down at the nearest railroad station, not more than half a mile from the farm, and should be applied per ton as the burned lime.

The KITCHEN CABINET

THE human family are more in need of sound, wholesome advice as to what they should eat and drink than ever before.

HOUSEHOLD HINTS.

There has been much said about the lost flavor of grape juice after it has been bottled and bottled. The agricultural bulletins tell us that it is unnecessary to boil grape juice in order to preserve it. Heat to 165 or 175 Fahrenheit, and the juice will not lose its delicate flavor and aroma, but will keep indefinitely. The bottles into which the juice is put should be carefully sterilized and as carefully sealed. If cotton batting is tied over the corks, mold cannot enter. Another thing to remember is that the bottles should be filled to overflowing.

Rinse all dishes that have contained egg or dough with cold water, as hot water has a tendency to cook the substance and makes it harder to remove. Remember if you want a good running egg beater, never to allow the eggs to become wet.

If grease is spilled on the floor, pour a little cold water on it at once. This causes it to harden, and it can much of it be scraped off with a knife. Sprinkle a little soda over the spots and let it absorb the rest.

A long-handled crocheting hook is a good utensil to keep in the bathroom to remove lint from the washbowl and bathtub drains.

Remember to wipe the milk bottle carefully before pouring out the milk.

When traveling, carry a few far-seed in the bag, and if one is unfortunate enough to acquire a cinder in the eye, drop in a moistened seed, and it will soon gather it up. If it has penetrated the eye sometimes a piece of chewing gum rolled into a needle-like point will fish it out.

Mosquito netting makes a fine double cloth. Take a large piece and double it, quilting the folds together. It is soft, easily wrung, very absorbent and so inexpensive that they may be thrown away when gray and discolored.

Elevate the feet for ten or fifteen minutes when they are tired and swollen from walking, and they will be greatly rested.

HERE'S to the task we love, For the work seems light and the gaudium bright. If to heart and hand 'tis a sure delight. —L. M. Thornton.

DAINTY MEXICAN DISHES.

This manner of serving spaghetti is typically Mexican: Fry two large pork chops brown, then remove them and cook until brown three minced onions and two cloves of garlic. Put into a kettle with the chops and onions two cans or a quart of tomatoes, two green peppers with the seeds removed, a tablespoonful of Worcestershire sauce, celery salt and table salt to taste. Simmer until the chops fall to pieces; strain through a coarse colander. The sauce should be of the consistency of thick cream. Boil a package of spaghetti in a large kettle of boiling salted water. Do not break, but add carefully to the water and add water as it boils out. Do not cover, cook forty-five minutes, drain in a colander and pour over cold water to blanch it. Put the spaghetti into the tomato sauce and set on the stove where it will keep hot, but not boil, for fifteen minutes.

Arrange in a deep dish and sprinkle the top with grated parmesan cheese. Serve with grated cheese and stuffed olives.

Mexican Ice Cream.—Put two cups of granulated sugar in a saucepan over the fire, and stir constantly until melted, add two cups of walnut meats and pour into a pan to harden. When perfectly cold, roll or chop fine. Crumble two dozen macarons into fine crumbs and brown in the oven. Make a rich custard of the yolks of four eggs, one-half cup of sugar and two cups of cream. Cook until thick, then pour over the beaten whites of two eggs and let cool. To a quart of cream add a third of a cup of sugar and beat until well mixed. Add to the custard and flavor with vanilla; then freeze. When half frozen add the macaron crumbs and half of the walnut mixture. Let ripen two or three hours and sprinkle the remaining walnuts over the mixture when serving.

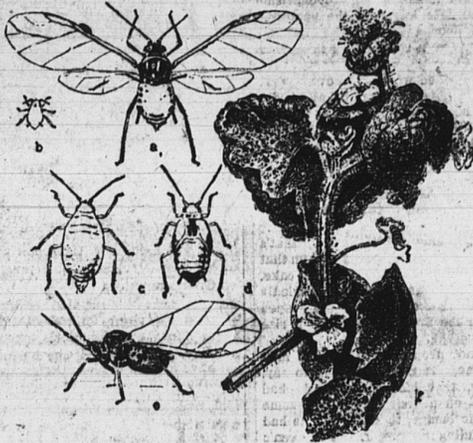

English Postage Stamps. The English postoffice authorities have recently made an innovation which is said to have been received very heartily. It is now possible to purchase stamps in moderate-sized numbers, or in large quantities, in the form of a tape, and protected in a small circular case, from which the end is drawn as desired and the stamps pulled off. It is claimed that this is even more convenient than the books which have proven so popular in the United States.

MOST GENERALLY INJURIOUS INSECT PEST OF MELON PLANT

Aphis or Plant Louse Attacks Cucumber Vines as Well and Loss to Crops Will Amount to Thousands of Dollars in Almost Every State of the Union—It Also Feeds on Common Weeds.

The Melon Aphis or Plant Louse.

a, winged female aphid of usual color; b, newly produced young aphid; c, adult wingless female aphid; d, last stage of nymph of winged female aphid; e, dark colored winged female aphid sucking juice from the surface of the leaf; f, melon showing aphids clustered on lower surface and the characteristic curling caused by them. All greatly enlarged except f which is reduced. (Rearranged after Chittenden, Circular 80, Bureau of Entomology, U. S. Department of Agriculture.)

(By M. H. SWENK, University of Nebraska Agricultural Experiment Station.)

Without question the most generally injurious insect pest of the cucumber and melon plants, is the aphid or plant louse, which attacks and destroys these vines. For many years past this insect has greatly curtailed the crop of melons and pickles in various sections of the United States, where these vegetables are much grown. The loss of crops from this aphid in many states aggregates thousands of dollars annually. The same aphid is a common pest of cotton in the southern states and occurs in the West Indies, Mexico, Brazil, South Africa and Australia. Most probably it is an insect of tropical origin.

In addition to melons and cucumbers, and to a lesser extent, squashes, pumpkins and gourds, along with cotton in the south, the melon aphid feeds upon an exceedingly large variety of other plants, including several common garden vegetables, such as beets, tomatoes, asparagus, etc., a large number of ornamental plants and a long list of common weeds.

The melon aphid has a large number of natural enemies, including principally internal hymenopterous parasites and predaceous ladybird beetles and larvae, syrphid fly larvae and lacewing fly larvae. These find a generous food supply when the aphid increases in number, and sometimes gain at least a partial control of the aphids and save a part of the crop. Of them all the ladybird beetles and their larvae are probably the most valuable and effective, while the small hymenopterous parasites are also exceedingly valuable and sometimes rapidly reduce an abundance of these aphids until they are practically exterminated in that particular infestation.

As to artificial control of this insect there is no avoiding the fact that we have here a pest hard to deal with and one which requires a great deal of vigilance and careful work to master. Methods of treatment include both spraying and fumigation, but spraying seems to be the most practical and successful method, at least in our experience. It is important that the spraying be done at the first indication of an abundance of wingless aphids on the vines, before the insects have had time to cause any noticeable wilting or curling up of the leaves. In order to do this the vines must be gone over frequently and the lower side of the leaves examined thoroughly. The spraying must be repeated whenever it is noted that the aphids are reappearing upon the plants. In spraying, the application of the wash should be made with an undersprayer, or, if the vines are still small, by very carefully lifting them back and spraying the under surface of the leaves and then replacing them to their original position. Badly curled leaves should be opened by hand and the under surface, drenched with the wash.

As an undersprayer, a piece of gas pipe with one end bent at the proper angle or provided with an elbow attachment and a Vermorel nozzle attached to this end will be found quite satisfactory, and a bucket pump operated by two men, one to work the pump and one to direct the spray, will be found advantageous in applying the wash. Care should be taken not to apply with too great force, lest the leaves be injured.

In selecting a wash, avoid kerosene emulsion or other strong oily washes, since we have found that in order to kill these hardy and resistant aphids the emulsion or oil must be used so strong that the exceedingly tender cucurbit leaves are invariably badly burned, thereby killing the plant outright or greatly injuring it. We have found the commercial tobacco extract "Black Leaf" diluted one part to fifty parts of water to form a highly effective insecticide against this aphid, destroying all with which it comes in contact and being very easy to prepare and apply. Very satisfactory results may also be obtained by using a soap-and-tobacco wash by dissolving one and one-half pounds of soap in one-half gallon of water, adding one-half gallon of strong tobacco decoction and diluting to make five gallons of the wash. The tobacco decoction is made by steeping tobacco stems in water until the decoction becomes the color of strong coffee. Neither of these washes injures the foliage to a serious extent and both kill the aphids they come in contact with, but the "Black Leaf" wash seems to be considerably the cheaper of the two.

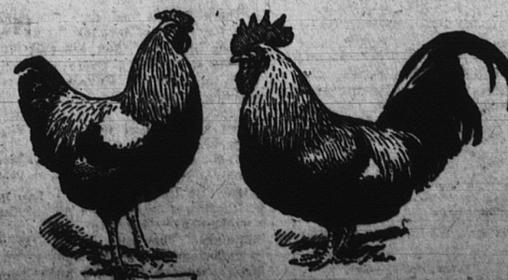

Turkey Production in United States. The census of 1900 shows that with a little over 5,000,000 farms in the United States, not much over 6,500,000 turkeys were produced. Among the states Texas leads, having produced almost 650,000 turkeys. Following came Missouri, Illinois, Iowa and Indiana in the order named. It may be remarked that Rhode Island produces 5,000 turkeys, and of such good quality that the returns were nearly double the amount of other states.

Cleaning Brooder and Coop. Keep your brooders and coops clean. Disinfect at least once a week by spraying or dusting with some louse powder. Pure fresh air is essential to the life of the chicks. Be sure that you have a properly constructed brooder.

Almost any kind of an incubator, if given the proper care, will hatch chicks, but you must have a good brooder to raise them.

Horses of World. The horse population of the world is estimated as more than 111,000,000, of which 48,000,000 are in Europe, 38,000,000 in North America, 11,000,000 in Asia.

CHICKENS OF GOOD QUALITY

The egg breeds of fowls indicate the smaller breeds—Leghorns, Minorcas, Hamburgs, etc. The most breeds indicate the Brahmas, Cochins, Langshans. The general purpose breeds mean the breeds which can be counted on to lay and make good table fowl as well. The Plymouth Rocks, Wyandottes, Dorkings and Rhode Island Reds are general purpose breeds, and lately the Orpingtons as well.

The illustration gives the contrast in length of legs and outline of body of the Wyandotte and Dorking.

Small Boat to Sail Far.
The yawl yacht Recluta, 36-ton, has set out on a voyage of 6,000 miles, from Gosport to Buenos Aires, the headquarters of her new owner. The little vessel carries a crew of four, and is commanded by Capt. Harry Williams, who recently took the 20-ton cutter Moyana to Odessa. All the members of the Recluta's crew are Hampshire men. She will go to Madeira, Cape Verde, Pernambuco and Montevideo. The longest sea run will be a distance of about 2,000 miles, between Cape Verde and Pernambuco.—London Standard.

AT THE BOARDING HOUSE.

"Who is that man," asked the new boarder, "who is making such a fuss because he has swallowed a fish-bone?"

"That's the sword swallower at the dime museum around the corner."

FALSE HUNGER

A Symptom of Stomach Trouble Corrected by Good Food.

There is, with some forms of stomach trouble, an abnormal craving for food which is frequently mistaken for a "good appetite." A lady teacher writes from Carthage, Mo., to explain how with good food she dealt with this sort of hurtful hunger.

"I have taught school for fifteen years, and up to nine years ago had good, average health. Nine years ago, however, my health began to fail, and continued to grow worse steadily, in spite of doctor's prescriptions, and everything I could do. During all this time my appetite continued good, only the more I ate the more I wanted to eat—I was always hungry.

"The first symptoms of my breakdown were a distressing nervousness and a loss of flesh. The nervousness grew so bad that finally it amounted to actual prostration. Then came stomach troubles, which were very painful, constipation which brought on piles, dyspepsia and severe nervous headaches.

"The doctors seemed powerless to help me, said I was overworked, and at last urged me to give up teaching. If I wished to save my life.

"But this I could not do. I kept on at it as well as I could, each day growing more wretched, my will-power alone keeping me up, till at last a good angel suggested that I try a diet of Grape-Nuts food, and from that day to this I have found it delicious always appetizing and satisfying.

"I owe my restoration to health to Grape-Nuts. My weight has returned and for more than two years I have been free from the nervousness, constipation, piles, headaches, and all the ailments that used to punish me so, and have been able to work freely and easily." Name given by Postum Co., Battle Creek, Mich.

Read the little book, "The Road to Wellville," in plain, "There's a Reason." Ever read the above letter? A sure cure comes from Grape-Nuts. They are good for the stomach, bowels and all of the ailments.

Wanted Finding.
Farmer—I'll give you a good job and three meals a day.
Tramp—Hub-uh, what kind of a job is it?
Farmer—Digging potatoes.
Tramp (stretching himself)—Well, get the man that planted them. He knows where they are.

BREVITIES

WEBSTER—Rev. A. W. Mumford has accepted his pastorate in Webster for another year.

UNADILLA—Unadilla Arbor, of A. O. O. G. will hold their annual picnic at Joslin Lake on Tuesday, August 9. Everyone cordially invited.

DEXTER—William Cunningham has rented the farm in Scio formerly owned by Peter McGinn and now the property of the Water Power Company.—Leader.

STOCKBRIDGE—LaRue Shaver and John Reason are quoted as saying Ford autos are good hill climbers but a squirrel can beat them climbing trees. Honk! Honk!—Brief-Sun.

DEXTER—Prompt assistance by neighbors armed with fire extinguishers was all that saved the residence of Mrs. Ella Stockford from destruction Monday morning. The fire broke out at 11:30, probably originating from a bad chimney.

BUNKER HILL—On Tuesday, August 8, the Catholics of Bunker Hill go to Artz Bros.' woods for their annual picnic. The picknickers are planning for a great day with a chicken pie dinner, ball game and program of sports which will interest young and old alike.

PLYMOUTH—The date for the firemen's gala day has been changed from August 10th to August 17th. The boys expect to have a great program—balloon ascension, wire-rope walker, water battle, two ball games, dancing afternoon and evening, oration and other minor sports.—Mail.

DEXTER—Mrs. Bridget Harris, aged 73 years, died Monday morning at the home of her daughter, Mrs. Frank Sharpey, following a long illness. She is survived by three sons and one daughter, all of whom live near here. The funeral was held Wednesday at St. Joseph's church; interment in St. Joseph's cemetery.

ANN ARBOR—John Janogas, a Greek from this city, borrowed \$20 from Patrick Sloan, of Dexter, here Saturday night to purchase some bananas. Then instead of setting up in the fruit business John invested in a ticket for Atlanta, Ga., and Patrick swore out a warrant for him before Justice Ritchie. Sheriff Stark nabbed the Greek at the Michigan Central station.

JACKSON—Wm. E. Hollenrake, deputy warden at the prison, has resigned his position to take something more remunerative in the near future. His place will be filled by ex-Sheriff Kline of Ingham county, when Mr. Hollenrake gives up his place, which will be about August 1. The retiring officer leaves of his own accord, and the best wishes of the prison staff goes with him.

ANN ARBOR—A Mr. Winslow of Webster, called at the jail Tuesday afternoon complaining that a man answering the description of a laborer employed by James Moran, of Lyndon, was hanging around the place and acting strangely. The man is supposed to be weak-minded as he has a habit of wandering off the farm. Mr. Winslow was instructed to put him on the road back to Lyndon and start him going.

BRIGHTON—Adam Weber went huckleberrying one day not long ago and when he came back he was surprised to find his horse gone and his buggy up a tree. It didn't need "Sherlocke the-monk" to tell how it happened. The sapling to which he tied his horse was pushed over by the animal which got uneasy and the horse got free from the buggy. The latter was raised into the air when the bent tree returned to its position.—Argus.

GRASS LAKE—At a special meeting of the board of the Congregational church last Thursday evening, Rev. Wellwood tendered his resignation to take effect the last of July. Rev. Wellwood has accepted a flattering offer from the Mayflower Congregational church at Lansing, and will enter upon his work there the first Sunday in August, closing a successful pastorate of about two and one-half years, the last Sunday in July. Mr. Wellwood will not move his family to the Capitol city until some time later.—News.

JACKSON—The real estate men and the merchants of the city are jubilant over the news that the Michigan Central shops will stay in Jackson. For a time there was fear that the rumor would prove true, and that the shops were to go to another city, and the news is welcome to everybody. It has also been decided that Niles is to be the division point instead of Michigan City, and this will increase the population of the Michigan town at least 1,000. The shops have been in Indiana for thirty-five years, and the change has been talked of for years. The new schedule will hasten the freight from Detroit to Chicago, by running through Jackson to Niles and direct to the windy city. The change will be effected in about thirty days.—Patriot.

BLISSFIELD—The Wilcox drain will not be deepened and cleaned this season, as Palmyra township board voted against the improvement at the joint meeting of the Blissfield and Palmyra township boards recently. The Palmyra board went on record as solidly against the proposition.—Advance.

GRASS LAKE—Wolf lake was a tossing sea during the storm of Monday afternoon. More than one boat was swamped during the time the wind blew, and two couples were in great danger for some time on the lake. They had gone out for a sail, and the sudden storm made it hard for them to return to land.

YPSILANTI—Miss Florence Smith, the 16 year old daughter of George Smith, was bitten by a rattlesnake on his father's farm, one mile east of this city. The prompt attention of a physician saved her life. The snake was lying coiled in the grass near the fence and Miss Smith, in crossing the fence, jumped upon it.

BLISSFIELD—Mail Carrier Templeton has grown to be such an epicure that he takes a hen out with him on his route to supply him with fresh egg for his lunch. He objects, however, to biddy advertising the fact for when she tried to do so the other day he tied her feet and brought her back an unwilling captive.—Advance.

MILAN—The residence on east Main street owned and occupied for many years by Dr. A. G. Mesic and family, has been bought by the village of Milan for park purposes. The lot runs south nearly to the river, and in connection with the ground in front of the water power house will make a fine park. The price paid for the place was \$2,400.—Leader.

WEBSTER—The following teachers have been hired so far for the various districts: Miss Amber Gordinier for Pratt's; Miss May Hoffmeyer, of Dexter, for fractional Scio and Webster; Miss Rodman of Delhi, for No. 1; Miss Lois McColl, of Homer, for No. 2, second year; Miss Agnes Harris for Rogers, second year; and Miss Lois Jedele, of Dexter, for the Merrill district.

MONROE—Roy Parks about 25 years old, giving Detroit as his residence, is held in the local jail under \$1,500 bail, his examination being set for next Friday. It is alleged that Parks attempted to pry open a contribution box in St. Mary's church, but was detected in the act by a parishioner who notified Sheriff Bennen. The man in the meantime left the edifice by a side door and was arrested by the sheriff's force in Frenchtown, after several miles' chase. When searched at the jail he had \$50 in money and six cartridges in his pockets. Later the sheriff found a revolver in a nearby woods; this is the second time within two months that an attempt has been made to rob St. Mary's church of contributions of money.

BROOKLYN—Judson Freeman is sure that some hoodo is hanging around his farm north-west of town occupied by Chas. Hildinger. The latest of a series of occurrences that started with the burning of the house last year was the finding of a calf attached to a stone boat by the nose. Early Sunday morning Mr. Hildinger was surprised by seeing an eight months old Jersey calf leading the stone boat across the barnyard. The farm animals were surprised too and the cows and pigs and chickens were circled around the strange sight staring with all their might. The boat had stood on its side against one of the buildings and how the calf could get the draught hook caught in its nose is not easily explained. After some trouble the animal was released and will probably hereafter keep its inquiring nose out of the stone boat business.—Exponent.

Send to Insane Asylum. Judge Kline, acting in place of the probate judge, Wednesday morning ordered Mrs. Augusta Alber, of Ann Arbor, who attempted to shoot Probate Judge Leland last Thursday, to be committed to the Northern Insane Asylum at Traverse City. Mrs. Alber was in the court house, but not in the court room during the hearing, as it was decided that she was too flighty to be allowed to take the stand to testify. Attorney Jacob Fahrner, who was appointed guardian ad litem, Monday, represented her, but in view of the positive testimony of the medical examiners confined his efforts to a few questions in cross examination.

The medical witnesses were the first examined, both Dr. J. F. Breakey and Dr. E. K. Herdman testifying that Mrs. Alber was undoubtedly insane and would become worse rather than better. "For years I suffered unspeakable torture from indigestion, constipation and liver trouble," wrote A. K. Smith, a war veteran at Erie, Pa., "but Dr. King's New Life Pills fixed me all right. They're simply great." Try them for any stomach, liver or kidney trouble. Only 25 cents at L. P. Vogel, H. H. Penn Co. and L. Z. Freeman Co.

Smith, a war veteran at Erie, Pa., "but Dr. King's New Life Pills fixed me all right. They're simply great." Try them for any stomach, liver or kidney trouble. Only 25 cents at L. P. Vogel, H. H. Penn Co. and L. Z. Freeman Co.

WHILE WIFE WAS AWAY

LONE MAN'S EXPERIENCE WITH BAKING OF A CAKE.

Recipe in the Women's Home Guide Was Simple Enough, but the Result Was Far From Satisfactory.

"I think it said a slow oven," said the man. He knelt on the spattered kitchen floor and peeped into the oven. "What'n thunder's a slow oven, anyway?"

As he looked within, the oven began a curious movement, and he watched it fascinated. Something in a square pan had been ballooning out several inches, and even as he looked it began to recede, even as a bubble grows smaller when a child cautiously removes a finger from the spoon with which it is blown.

"Huh!" said the man; "that's funny." Then it occurred to him that a draft of cold air had struck his cake, causing it to fall, and he hurriedly slammed the oven door and heaped wood on the fire in order that it rise again.

It is not necessary to say the man was alone. It might be well to say, however, that his womankind had gone off on a visit, and lest some think him insane, to state that he had been reading recipes in the Women's Home Guide until his tongue hung out.

The Home Guide was explicit in saying that such a cake was easy to make, and the man, searching the kitchen, found all the ingredients. The temptatin was too great, and he began making a cake.

It should have been a good cake, for he had been very careful. True, he couldn't remember the difference between a tablespoon and a teaspoonful until he had put three tablespoonfuls—but, as everybody knows, that should make the cake lighter.

One of the eggs looked a bit pale and washed out, and he rejected that, using only two, and he had added a little sugar to the quantity, because he liked cake sweet. But, generally speaking, he had made the cake according to directions.

He cautiously opened the open again, and with a cloth jerked the cake out and slammed it on the table. Then he stood back and looked at it. Something was wrong, that was certain.

It was of a curious dun color, and had a great bulge in the middle, while all about the bulge was a dip like a surrounding valley. Also the edges were not dun color, but black. The bottom also was black, though much of the black stuck to the pan.

Then the man tasted his cake. Yes, something was wrong. It was soft as library paste and gummy beyond belief.

The man did not hesitate. He opened the back door and cast the cake into outer darkness, and with diligence began washing up the dishes, for there were dishes that seemed to indicate that he had been trying to make a cake, and the folks would be back in the morning.

And, when all was clean, he lighted his pipe and took up a magazine. Cake? Not much. He never wanted to see a cake again.

The Magazine was not the Women's Home Guide.—Yalveston News.

Teacher's Aim in Life. To help a child to become unselfish, self-reliant, kind, thoughtful, considerate, honest and independent; to train to habits of usefulness; to promote purity of thought and life; to have even some small part in awakening loftier purposes and higher aspirations; to arouse in the minds of boys and girls an honest and sincere hope to be able to some extent to make happier the school, the home, the community, the state, the nation, and the world—should be the greatest ambition of every teacher.—Richard C. Barrett.

DO IT NOW

Chelsea People Should Not Wait Until It Is Too Late.

The appalling death-rate from kidney disease is due in most cases to the fact that the little kidney troubles are usually neglected until they become serious. The slight symptoms give place to chronic disorders and the sufferer goes gradually into the grasp of diabetes, dropsy, Bright's disease, gravel or some other serious form of kidney complaint.

If you suffer from backache, headaches, dizzy spells; if the kidney secretions are irregular of passage and unnatural in appearance, do not delay. Help the kidneys at once.

Doan's Kidney Pills are especially for kidney disorders—they cure where others fail. Over one hundred thousand people have recommended them. Here's a case at home:

John Schieferstein, S. Main St., Chelsea, Mich., says: "I have used Doan's Kidney Pills for lame back and pains through my kidneys and have received great benefit. I can recommend this remedy highly, judging its merit from personal experience."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

Obituary.

Fred W. Canfield was born on Harrison street, Chelsea, January 31, 1865. His early boyhood was spent in and around Chelsea. He was united in marriage to Georgia A. Vosburg, July 27, 1884. To this union seven children were born, three died in infancy, and four, Mabel, Leota, Ralph and Merrill, with his wife, survive him.

In the fall of 1895 he moved to Detroit and engaged in the grocery business with his brother. The following year he united with the North Woodward Avenue Methodist church of that city.

In the year of 1899 he moved to Imlay City where he resided on a farm for six years. In 1905 he was taken to Pontiac Asylum for mental treatment and remained there until the time of his death, which occurred July 11, 1911. Deceased was a member of the K. O. T. M. M.

His remains were brought to the home of his parents from which the funeral was held, Rev. Campbell conducting the services. Interment in Oak Grove cemetery.

MANCHESTER—The grangers will have a picnic at Wampler's lake on Thursday, August 3 and the business men have agreed to close their places of business that day and join with them.—Enterprise.

Probate Order STATE OF MICHIGAN, County of Washtenaw, ss. At a session of the probate court for said county of Washtenaw, held at the probate office, in the city of Ann Arbor, on the 18th day of July, in the year one thousand nine hundred and eleven. Present, Emory E. Leland, Judge of Probate. In the matter of the estate of Daniel McLaughlin, deceased. Executor of said estate, having filed in this court her final account, and praying that the same may be heard and allowed. It is ordered, that the 18th day of August next, at ten o'clock in the forenoon, said probate office be appointed for hearing said account. And it is further ordered, that a copy of this order be published three successive weeks previous to said time of hearing, in The Chelsea Standard a newspaper printed and circulating in said county of Washtenaw. EMORY E. LELAND, Judge of Probate. (A true copy.) DORCAS C. DONOHAN, Register. 1

Probate Order STATE OF MICHIGAN, County of Washtenaw, ss. At a session of the Probate Court for said county of Washtenaw, held at the Probate Office in the city of Ann Arbor, on the 11th day of July, in the year one thousand nine hundred and eleven. Present, Emory E. Leland, Judge of Probate. In the matter of the estate of Arlington Guerin, deceased. On reading and filing the duly verified petition of Estella Guerin, executrix, praying that a certain letter in writing, and now on file in this court, purporting to be the last will and testament of Arlington Guerin be admitted to probate and that Estella Guerin, the executrix named in said will, or some other suitable person be appointed executor thereof and that appraisers and commissioners be appointed. It is ordered, that the 31st day of August next, at ten o'clock in the forenoon, at said Probate Office be appointed for hearing said petition. And it is further ordered, that a copy of this order be published three successive weeks previous to said time of hearing, in The Chelsea Standard a newspaper printed and circulating in said county of Washtenaw. EMORY E. LELAND, Judge of Probate. (A true copy.) DORCAS C. DONOHAN, Register. 2

Probate Order STATE OF MICHIGAN, County of Washtenaw, ss. At a session of the probate court for said county of Washtenaw, held at the probate office in the city of Ann Arbor, on the 23rd day of July, in the year one thousand nine hundred and eleven. Present, Emory E. Leland, Judge of Probate. In the matter of the estate of Glessner Whitaker, incompetent. D. Edward Beach, guardian of said incompetent, having filed in this court his annual account, and praying that the same may be heard and allowed. It is ordered, that the 31st day of August next, at ten o'clock in the forenoon, at said probate office be appointed for hearing said account. And it is further ordered, that a copy of this order be published three successive weeks previous to said time of hearing, in The Chelsea Standard a newspaper printed and circulating in said county of Washtenaw. Mortgage Sale. Default having been made in the payment of principal and interest due and payable under the terms and conditions of a certain mortgage made and executed by Henry S. Dodge of Wilmore Lake, Washtenaw County, Michigan, of the first part to Herbert W. Wheeler then of Saline in said County and State of Michigan, on the 14th day of June, A. D. 1906, in Liber 112 of Mortgages at Page 223. And which said mortgage was duly assigned by said Herbert W. Wheeler to the State Savings Bank of Unionville in the State of Michigan, on the 24th day of November, A. D. 1907, the deed of assignment thereof having been duly recorded in the office of the Register of Deeds of said County of Washtenaw on the 13th day of April, 1908, in Liber 3 of Assignments of Mortgages at Page 43. By reason of which default in the payment of the amount due upon the said mortgage the power of sale contained therein has become operative; and no suit or proceedings at law having been instituted to recover the debt secured thereby or any part thereof, and there is now claimed to be due and owing upon the said mortgage debt for principal and interest the sum of seven hundred and forty-seven dollars and six cents (\$747.06) and the further sum of twenty-five dollars and 50 cents as an attorney's fee as provided by law and stipulated in said mortgage. Now, therefore, notice is hereby given that by virtue of the power of sale contained in said mortgage and provided, said mortgage will be foreclosed by a certain order of the court to be described as Public Auction to the highest bidder at the East front door of the Court House at the City of Ann Arbor, in said County of Washtenaw, (that being the place where the Circuit Court for said County of Washtenaw is held) on Monday the 31st day of October, A. D. 1911, at nine o'clock in the forenoon of said day. Which said premises are described in said mortgage as follows: All that certain piece or parcel of land situate and being in the Township of Northfield, in the County of Washtenaw and State of Michigan, and described as follows, to-wit: That certain piece of land containing about 14 acres off from the north-east corner of the east half of the south-west quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of Range Six east, in the County of Washtenaw aforesaid, and being the north-west corner of the lot containing about one-fifth of an acre of land heretofore owned by Frank Rogers and also one-half of an acre of land heretofore owned by Frederick Koper and also, excepting and reserving about two acres of land in the south-east quarter of Section Number 6, in town One, south of
