Moterman's Orders Do Not Agree With Train Dispatcher's Slip.

CONFLICTING ORDERS

Monday evening in Ann Arbor Coroner Willis Johnson began his investigation of the wreck on the D., & C. electric line which occurred at Steinbach hill on Monday afternoon, April 15, in which two lost their lives and over 50 passengers were in-

Four witnesses, were sworn and at Prosecuting Attorney George Burke assisted by Andrew Sawyer are lookng after the interests of the people.

Two important witnesses were exmiued, Fred Cain, train dispatcher at Ypsilanti, and Morton Hudnutt, notorman on the eastbound car. Mr cars to meet at Fink switch, and Mr. to meet the westbound car at Bates. No amount of questioning made either of the men the least uncertain.

"Are you positive that you did not the word Bates instead of Fink?" was the question asked the dispatcher. His answer was "I am positive. Just as positive as that I am sitting here, that I said Fink."

"Is there any doubt in your mind about this order? Could you have made a mistake in reading it?" was the question put to Motorman Hud-

"No sir," he answered. "Not a bit of doubt?"

"Not a blt." The order responsible for the wreck

"Train order No. 161, April 15, 1912. Train No. 109, car No. 7295, at Jackson, meet train No. 42, car No. 7769, at Clio, meet train No. 108, car No. 33 at (Fink) (Bates) run second section train No. 109 Ann Arbor to Addison meet train No. 122 car No. unknown at Waterman. Call at Ypsilanti.

(Signed) CLARK, conductor. HUDNUTT, motorman.

"Correct, 3:14 p. m. F. C." This order Dispatcher Cain swore he gave to Conductor Clark when he called him at Jackson, using the word Fink which he claimed is the usual meeting place for the cars when they are late and do not pass at Dexter station, and this is also the order Motorman Hudnutt swore , he read pack to the dispatcher, using the word "Bates" instead of "Fink," and he received the dispatcher's O. K. on

Mr. Cain was the first of the two men to go upon the stand. He testified that he had been employed by the D., J. & C. for four or five years and that he had been working for the road as dispatcher for nearly three years. His shift is the second one and lasts from 2:30 to 9:30 p. m.

The other witnesses sworn were Drs. G. W. Palmer and Andros Gulde Dr. Palmer stated that he was called at 4:30 and arrived at 4:55, and that it was 6:30 when a car arrived to carry the injured away. He saw no stretchers other than house doors being used. Dr. Palmer testified to finding the body of Edward Densmore, of Maple City wedged in between the cars, and of searching his pockets for means of identification thinking at first that he was a Chelsea man. He stated that he was killed instantly, his head and trunk being split open, Dr. Palmer found the body in the front end of the east bound car.

From the testimony the evidence shows that there were what is known among railroad men as an overlap order and the cause seems to have occurred from a lack of assistance in the dispatching office.

Eighth Grade Examinations.

Hundreds of eighth grade pupils in the rural schools of Michigan are preparing for the annual state examinations which will be conducted in the various counties of the state, May 16 and 17. Much depends upon the results of this examination, as those who are successful in securing diplomas may have their tuition paid to one of the three nearest high schools, if their parents or guardians make written applications on or before the fourth Monday in June to the school board in their home district.

Should a contestant fail to pass, and the parents are willing to pay the necessary tuition for the freshman year in high school and the pupil is admitted to the high school and second to year in high school and the pupil is admitted to the high school and passes the ninth grade, and secures a written statement from the superintendent, then application may be made to the primary district board for tuition for the succeeding years, but not, of course, for the ninth grade. The rural board cannot pay more than \$20 a year for each pupil, unless the people at the annual meeting vote to pay more.

Quet was voted a grand success.

Under the able leadership of the president and assistant officers the membership has been nearly doubled the last year.

Waltrous telegraphed to the White Star Line office Hudnutt that he had received orders in New York making an inquiry in regard to Mr. Lingane, but received a reply that there was no such name on the passenger list.

Mr. Lingane has four sons living, read the order to the conductor, using one of them Patrick, resides on the R. P. Chase farm in Sylvan.

ENGAGED TO BARON

Former Chelsea Girl is to Marry Italian Nobleman,

The following from Paris, France, efers to a former Chelsea girl, Mary Hartigan, a sister of Mrs. J. H. Run-

"Mrs. Wylie Reynolds, the beautiful widow of a millionaire banker of Jackson, Mich., is the latest American woman whose engagement to a European nobleman has been announced. Mrs. Reynolds is now with a party of friends, the guest of her fiance, Baron di Francisci, at his palace near Caserta.

The young nobleman is the son of Marchese di Trianara, and is connected with the Bourbons of Parma and the Bourbons of the Two Sicilies, who are themselves branches of the oldest royal house in the world.

Parisian modistes are now busily engaged on Mrs. Reynolds' trousseau, which is reported to be one of the most expensive that has ever been

Friends of Mrs. Wylie at Jackson believe the report of her coming marriage to Baron di Francisci, of taly. Since the death of her husband, about nine years ago, she has spent much of her time abroad and in Washington. She is very wealthy.

Mrs. Emily Hibbard-Chipman.

Mrs. Emily Hibbard-Chipman was born in Ypsilanti, September 27, 1856, and died at St. Mary's hospital in Detroit, Sunday morning, April 21, 1912, aged 55 years, 6 months and 24 days.

Mrs. Chipman was taken to the hospital the latter part of the past week and underwent a surgical operation last Saturday but was unable to withstand the shock. She was married to Emory Dr Chipman in Lansing, September 1, 1910, and they have made their home in Lima, just outside of the village limits, since their marriage. They were attendants at the Chelsea M. E. church.

She is survived by her husband, one brother, William Hibbard, one sister, Miss Lizzie Hibbard, both of Lansing, and James Cooke of this place is a

The funeral was held from the Chelsea M. E. church Tuesday afternoon Rev. J. W. Campbell officiating. Interment in Vermont cemetery.

Epworth League Banquet.

The first annual banquet given by the Epworth League of the Salem German M. E. church was held at the home of Mr. and Mrs. John Miller, Friday evening, April 19. The banquet was given in honor of the men of the League and was a contest between the ladies and men. The men being the victorious party.

president of the society, Mrs. Herman Kruse, acted as toastmistress.

The following responded with toasts: Rev. Geo. Nothdurft, pastor of the church, Mrs. Henry Gieske, Miss Adah Schenk, and Miss Rena Notten gave a kind assistance and floral offerings, recitation. Misses Kathryn Notten

BOY SCOUTS ORGANIZED.

One Patrol Took their First Hike last Saturday to Cedar Lake.

Secretary Young of the Y. M.C. A. and Charles Weber, of Ann Arbor, and County Secretary Rowe, of Jack-

Mr. Weber explained the purpose Frank Storms, Ed. Vogel, O. C. Burkhart, C. R. Webster, L. P. Vogel, A. P. Staffan, Herman Dancer, R. D. Among the names of the second Walker, John Kalmbach, Geo. Wagclass passengers appears the name of ner, C. E. Kantlehner, John Faber, E. P. Steiner was elected as scout commissioner, S. P. Foster was appointed scout master and Herbert Schenk as

Secretary Young explained the purpose of the Men and Religion Forward Movement. Mr. Rowe urged the inauguration of county Y. M. C. A. work in this county.

The boy scouts will hold meetings from time to time to enroll the names of other applicants. They made their first hike to Cedar Lake last Saturday and were accompanied by Mr. Steiner. It is expected that there will be several patrols when the organization is completed.

REQUIREMENTS FOR TENDERFOOT. 1.-Know the scout law, sign, salute,

and significance of the badge. 2.-Know the composition and history of the national flag and the customary forms of respect due to it.

3.-Tie four out of the following knots: Square or reef, sheet-bend, bowline, fisherman's, sheepshank, halter, clove hitch, timber hitch, or two half hitches.

He then takes the scout oath, is enrolled as a tenderfoot, and is entitled to wear the tenderfoot badge.

Decision of the Supreme Court.

The case of Hoopengartner vs. Stipe, n which plaintiff sued for \$1,400 commission for sale of a farm, claiming special contract for commission amounting to all received for sale of the same over \$70 per acre, and defendant denied ever making said contract, and which was decided in favor of plaintiff in the circuit court and reversed by the supreme court, will probably come on for retrial at the May term of court in Ann Arbor.

The supreme court reversed the case because of error in allowing testimony prejudicial to defendant, as to a former agreement with plaintiff other than the one relied on, and to listing the land at a certain price with another party, and as to prices at which defendant had held his farm,

Admitted Honorary Members.

At the meeting of R. P. Carpenter Post, G. A. R., it was decided to admit the sons of veterans and the husbands of the members of the W. R. C. as honorary members of the Post. At the close of the meeting a reception was held in honor of the new members. The matter of the proper observance of memorial day was disussed and the following honorary committee was appointed to act with the Post committee: Geo. P. Staffan, J. N. Dancer and D. H. Wurster. A number of short addresses were delivered. At one time the Post had a membership of 120 but today there are only 20, and of the original charter members but five are living.

Gets Port Huron Church.

Rev. Joseph E. Ryerson of Flint, former Methodist minister in Chelsea and Detroit, who had troubles inthe latter city and went over to the Episcopalians and was given a mission church in Flint, has been promoted to the pulpit of St. Paul's church, Port Huron. He was ordained an Episcopalian minister nine The tables were decorated with the months ago. His mission church in League colors, red and white. The the factory district at Flint has been successful.

THE WRECK OF THE TITANIC 500 DEATHS FROM

Sunday had been a pleasant day on the big ship. In the morning one the clergymen aboard held divine service. In the afternoon the decks were gay with persons taking the sunlight and air. In the evening a con cert given in the ballroom enlisted the aid of the talented passengers. The smoking room was filled with professional and business men, some playing cards, others reading, still others discussing the record run of that day Charles M. Hays and Col. Grace were deploring the competition in speed and size that runs like a mania among the steamship companies. In the cafe, Capt. Smith and J. Bruce Ismay sat dining at a table making plans for speeding the ship up on Tuesday, when for the first time she should be run at her topmost speed. This had been the plan of every day since the ship left Southampton-62 revolutions a minute Wednesday; 70 revolutions Thursday; 72 revolutions Friday; 75 revolutions Saturday; 77 revolutions Water So Thick With Bodies After Ship Sank That Sunday. The owners now say that the ship was not going full speed, and technically they tell the truth, for the Titanic had never gone full speed, which was 80 revolutions, but was gradually working up towards that when on Sunday night she entered the berg-infested seas.

Rescued passengers say that at 11 o'clock the captain and J. Bruce Ismay, the managing director of the owning company, still sat dining in the cafe, although Ismay contends he was asleep in his berth at 11:40 when the ship struck.

The night was clear, cold and starry. The sea was smoothed out-" hadn't seen such a smooth sea in years," says a rescued member of the crew. The lookouts in their crowsnest far us above the decks had received sharp orders to look out for icebergs. The Titanic plowed on under her 77 revolutions a minute and the gayety below was just beginning to lose its zest in weariness when a jangle of bells in the pilot house sounded "danger immediately ahead." The officer's hand was on the button which would stop the engines, when a dull, scraping, crunching sound-half roar, half groanran along the ship's side. In a moment the captain was above issuing his orders. The first was to the ship's carpenter to go below and sound the He never returned. An officer was sent below, but had not gone far before he came running back with a message that only the captain heard. The more than 2,000 passengers were fulled in the delusion that come what may the Titanic might lie helpless in the seas but never could sink, and those who came on deck thought it only a wise precaution the captain was taking when he ordered all on board to don life belts. By this time officers and stewards had quickly gone to their rooms and slipped loaded revolvers into their pockets. On the top deck the wireless operator was sending out he most ominous call ever heard at sea. And then the great steam sirens began to screech through the night. From a high point another officer was the boat crews to stand by ready to cast off. And now the sense of imminent danger possessed some of the passengers, and the terrified steerage passengers were filling stairways and ladders in their attempt to gain the

In the meantime the great "IF", of disaster was sporting on the ocean The Parisian, the one steamship in those waters that could have saved all souls on board, was deaf to the calls of the stricken ship-her wireless operator was asleep in bed! Farther away was the Carpathia, and she, too. would have been deaf had not her wireless man been accidentally detained at his machine. But for one "IF" 1,605 persons might now be alive, and but for another "IF" the Titanic, from managing director to cabin boy and the entire passenger list, might have gone to the bottom or died frozen in life-

"Send out succor"-"S. O. S."-"send out succor," called the stricken ship, and half a dozen vessels turned their noses in the direction of the

On the deck of the Titanic, surprise had given way to consternation, and consternation to bedlam, as the lowering of the lifeboats began. Women were thrown into the boats and their children flung after them. Four brawny immigrants fought their way by main force into a boat, and an officer stepped in after them, shot them dead one after the other, and tumbled their bodies into the sea. One man in the darkness hid himself under a lifeboat seat, and so was saved. Another in his nightgown was mistaken for a woman and pushed into a boat, where he fell in a huddled heap gibbering out his thanks to God. Wives begged that their husbands be allowed to accompany them, and sailors drove the men back. "There's boats on the other side," called an officer to get the crush of men away, and when the men rushed to the other side they found there were no boats. Returning a double guard of seamen kept them back from the rail. The captain and an officer stood on the bridge surveying the scene and giving orders. The wheelhouse was empty, the wheelsman having gone to help man a boat. Early in the panic the owner of the ship came with a bodyguard of seamen and was placed with the women in a lifeboat, while a thousand doomed menlooked down at him. Deny as he does, J. Bruce Ismay cannot ahnul the testimony of those women's eyes.

Back in that crowd were men of might-William T. Stead, Rev. John Stuart Holden, Jacques Futrelle, John Jacob Astor, Charles M. Hays, Mai. Archibald Butt, Isadore Straus, Frank D. Millet, George D. and Harry Widener. John Harper and hundreds of other men of note in their communities These men, from every available piece of testimony, conducted themselves heroically. Maj. Butt wrapped a woman in the boat, lifted his hat and bade her remember him to the folks at home. Col. Astor, thrust back by a seaman, entrusted his sick wife to the boat, waved her adieu, and susied himself getting other women away. Futrelle forced his wife to leave him. Poor Mrs. Straus looked at life with separation from her husband and at death united with him, and chose the latter-life could not be long for them at the very best. But these are noted names-who can tell of the heroism of men who were not known beyond their own circle?

Terrific inefficiency was everywhere. Some of the boats put off with only half their capacity. One boat was oared by the women, the only seamen aboard drunk and incapable.

The Titanic was listing to starboard and settling by the bow. Seamen in the little boats knew that sign, and pulled away with all their might to escape the awful suction expected to accompany the plunge below. The owner of the Titanic looked back once, and after that he did not look back. The women in the boats were hysterical, and to drown from their ears the hrieks from the decks the sailors sang that old hymn of the sea:

> Pull for the shore, saller; Pull for the shore; Heed not the angry wave But bend to the oar; Safe, within the life-boat, sailor, Safe for evermore, Leave the poor old battered wreck And pull for the shore

The forward lights of the Titanic sunk lower and lower. Her band was heard playing, "Nearer, My God, to Thee," and faint voices carrying the hymn floated across the water. Sometimes the small boats grazed a floating block of ice, and sometimes they pushed a body away. Miles down on the horizon the Carpathia was racing on her errand of mercy. The Titanic's bow-was awash, and the captain went over, but finding a baby in the water swam with it to a lifeboat and handed it in. Those who took it saw that it with bodies drowned in shallow water. was dead. The captain went back to his ship, where a cook tried to drag him to a small boat, but he wrenched himself loose with an angry, "Let me Men whose reason was gone, shricked deliriously on the decks. Others nervously smoked and assured each other that the Titanic could not sink before help came. Now and again a man slipped into a darkened corner, and a sharp pistol shot told the story of the death he preferred. "They say drowning isn't so bad," said a young fellow who had kissed his wife goodbye 10 minutes before.

And there were prayers-God, what prayers! Men whose lips had not formed a petition in years called upon the God of their childhood's teaching, Prayers for safety, prayers that the offerer might play the man, prayers making confession and seeking peace before the awful silence should shut in -yes, every rescued passenger testifies to the storm of prayer that went

The great ship settled and stood with her nose in the deep and her tern in the air. There was a rumble like unto thunder as her machinery, torn from its bases, tumbled toward the bow. The Titanic was giving up the shost. A black mass of men were seen rushing toward the stern. Their cries and shrieks were heard by the farthest boat, half a mile away. Black ing the right of the Washington govforms dropped into the water. More revolver shots were heard. And then with a hiss that was half a sigh the Titanic sank to the deepest grave off For hours the survivors rowed in full speed ahead on his starboard pro the Grand Banks. The sea was filled with struggling men. William T iffeboats over a calm sea in bitter peller, simultaneously throwing his Stead, the greatest editor in Europe, and John Jacob Astor, one of the richcold until the Carpathia picked them helm over, to make a rapid turn and est men in America, clung to a floating piece of cork, but the chill of the clear the berg. The maneuver was icy sea sought their limbs and then their hearts and they sank back into

A raft floated by with 30 men aboard, and they were saying the Lord's prayer in unison. Col. Gracie of the United States army was one of them. Here and there a hardy sailor, inured to the wet and the cold, kept himself affoat on a bit of wreckage. Men called for help where there was no help, The speed of the Titanic, estimated and the last despairing cries of hopeless victims sounded over the water

Bearing nearer and nearer, her captain straining his eyes for sign of The Titanic struck an iceberg about berg's spur protruding under the sea the ship, came the Carpathin, and with her came the dawn. A few boats rocking on the sea and a great mass of floating debris were all the captain

There were dead bodies in some of the boats, and other dead bodies were clearly seen floating about. But the living were taken aboard and all that tender sympathy could do was done—but there is not enough on earth to heal the wound the sea had made. Rachels mourned for their children and would not be comforted, for they were not. Brides mourned for Among the hundreds on her decks usual minor sea accident had hap their bridegrooms, children for their parents, and wives of many years for the husbands of their early struggles. Such a mass of misery silences the tongue and stuns the imagination.

The religious solemnity ever induced by the presence of death was laid on that whole shipload. The captain of the Carpathia turned the nose of On that whole ship toward the liceberg that had sent the Titanic to the bottom, and old couple in a hovel with scarcely there the people stood with bared heads and streaming faces while thanksgiving was offered for the saved, and a solemn burial service read for the

With that the Carpathia took up her melancholy way to port, and J. Bruce Ismay, the owner of the Titanic, stayed in his cabin planning how to get back to England unobserved.

FLOODS IN SOUTH

THREE HUNDRED TOWNS INUN-DATED: WATERS ARE STILL SPREADING.

HEAVIEST LOSS OF LIFE AMONG NEGROES.

Many Refused to Leave Homes in Delta District and Were Caught When Levees Broke.

Five hundred persons are now estimated to have been drowned and 300 towns and hamlets have been inundated and partly destroyed by the floods now sweeping the Mississippi valley. These estimates are made from reports received at the offices of the United States army engineers in Memphis, Tenn., who are in charge of the levees along the banks of the Mississippi river.

The heaviest loss of life occurred in the Mississippi delta district. Here hundreds of persons refused to leave feet deep, swept over the delta drowned were negroes. The loss of ite throughout the Mississippi and Louisiana flood districts has been heavy. Many whites are among those who perished,

J. Bruce Ismay Blames Capt. Smith In a statement given outdin New York J. Bruce Ismay replies to various published statements regarding Titanic disaster, particularly those in which his name has prominently figured

He denies that he had anything to do with the navigation of the vessel, and declares that he did not consult with the captain regarding her conduct at sea, and made no suggestion the collision occurred. He had no idea of returning to Europe quickly to, avoid appearing at the senatorial investigation, he adds, and only knew that the investigation was pending when informed of it at the pier on the Carpathia's arrival.

When I appeared before the senare committee I supposed the purpose of the inquiry was to ascertain the cause of the sinking of the Titanic, with a view to determining whether additional legislation was required to prevent the recurrence of so horrible a disaster. "I welcom

to me by the members of the committee to the best of my ability, with complete frankness and without reserve. I did not suppose the question of my personal conduct was the subject of the inquiry, although I was ready to tell everything I did on the night of the collision."

. What Senator Smith Says,

"The investigation of the Titanic disaster as far as it has gone, reveals the most tragic story it has ever been my fortune to listen to. And the most dramatic period in it occurred when the surviving wireless operator of the Titanic came down to the description of the last seven minutes on the ship before she sank '

Sea Will Claim All Victims.

The bodies of the victims of the Titanic are at the bottom of the deep, never to leave it," declared Prof. Robert W. Wood, of the chair of experimental physics of Johns Hopkins university. "It is altogether improbable that any of the corpses will ever return to the surface, as is the case At the depth of two miles the pressure of the water is something like 6,000 pounds to the square inch, which is far too great to be overcome by buoyancy ordinarily given drowned bodies by the gases generated in time. That the bodies sank to the bottom of the sea there is no question," he continued. "The Titanic's victims who were not carried down with the boat followed until the very bottom of the

Mexico replied to the warning note of Acting Secretary of State Hunting. ton Wilson declining to assume renuts, 16@161-2c; Brazlls, 14@16c; Filsponsibility for Orozco's acts. denyberts, 12@121-2c; Pecans, 12@16c per ernment to deliver the admonition contained therein, taking exception to the communication directed to Orozco through Consul Letcher, and deploring the making public of this communication in the same note to which the government was required to make answer.

The central conference of American rabbis in Baltimore, Md., concluded. its twenty-third annual convention with the re-election of Rabbi Samuel Schulmen as president and the rest of the present officers and members of the executivé committee,

Three hundred and fifty workers will begin a religious canvass of Kalamazoo to ascertain the number of church members and the church preference of the residents of the city. Through the death of Isaac Morey.

of Heath, Allegan county, a pitiful case of destitution was brought to light. The superintendents of the county poor, upon going to the home of Morey and his wife, found the any roof, nothing to eat and only rags to wear. They were covered with filth and vermin, and through having had his feet frozen gangrene set in, which caused the death of Morey.

Probably 300 persons are dead from he breaking of levees along the lower Mississippi river and the number will be doubled before the end of the month, unless the unexpected occurs. These are not actual figures but are based on an average given by men in Vicksburg, Jackson and Greenville, Miss.; Tallulah, Lake Providence and Baton Rouge, La., and at other strategic points in the great valley.

The known death list stood at 41 but there are many sections that have not been explored, and where no attempt at rescue has been made. The consensus of opinion among the big planters of the inundated delta section is that the drowned to date there number between 200 and 400.

At one place 15 negroes were drowned. This was near Benoit, Miss., when the levee broke at Beulah. In Mississippi and North Louisiana,

at least 50,000 are homeless. Seven negroes were drowned in Reports of a break near Greenville, Miss., created a small panic in that vicinity and despite repeated denials, the situation was known to be so grave that many residents of the section made all preparations to flee at a moment's notice.

THE GRANGE FOR EDUCATION

Continually Reaching Out Along Pro. gressive Lines Toward Genuine, and Still Better Instruction.

The stand which the Grange has al. ways taken in support of a practical thorough public school education is well known to everybody at all familiar with the order; but it is continually reaching out, along progressive lines, towards genuine and effective leadership for still better education.

The recent annual session of the New Jersey State Grange was noteworthy because of its utterances on the subject of education; which position, so concisely and so sensibly stated, has led to much favorable comment among educators in all parts of the country. A portion of the educational position taken by the Grange Theodore E. Quinby has resigned members in New Jersey was as fol-

"1. Looking upon education as a matter of the home, the school, the any and all systems and institutions

"2. Since the purpose of the public schools, so far at least as the state is concerned, is to make good and desirable citizens, the chief excuse for their enormous public expense must ever be sought in their beneficial effect upon citizenship. We would, therefore, urge the importance of substituting for mere passing fads and frivolities such basic instruction as will best promote that object, and would emphasize the patent fact that in this great work of making good . citizens the efforts of the schools may be and often are neutralized by lack of hearty co-operation in the home and community.

"3. Education means more than drill in the elementary branches, and more than skill in the academic; it means the fixing of habits and the development of character. We would, therefore, impress upon parents, teachers and communities that, however desirable mere learning and technical knowledge may be, good habits are of more importance in life than complex fractions, and that well-grounded honesty is worth more than Latin gerun-

obinson Crusoe To-day Moors

DO NOT tell this story because either the memory or the relation of the events is pleasant to me. Indeed, it is the record of the most distressing and humiliating experience in my life. But I am impelled to relate it as a protest against the prevalent idea that the existence of a castaway on -a tropic island is one of comparative comfort and ease.

In my younger days I was n the employ of a firm of merchants at Apla, Ellice Islands a young man of the name of Symonds, son of a well-known missionary. His headquarters were at Funafuti, and after several successful years he had purchased from the "King" of Vaitupu the small, deserted island of Nuulakita-"Little Land." It lies some one hundred and fifty miles southeast of Funafuti, alone amidst extensive shoals. Symonds' ambition was to people and plant it, but not a native could he induce to make his home there, for the Ellice Islanders firmly believed the place was haunted by evil spirits. Not long after this, Symonds, died suddenly, and I was sent to Funafuti in the company's schooner to install a new manager, with instructions to stop at Nuulakita on the homeward voyage, inspect the little island and set a value on it as an asset of Symonds' estate. We left Funafuti with a southeast tradewind that soon died away, and for days we drifted over a glassy sea in intolerable heat. Finally, on the last day of February, we reached Nuulakita and sailed slowly along its coast, searching for an anchorage and landing. In a short time we came to anchor in seven fathoms of water, in a convenient place on the west side of the island where we could see an

The captain advised me to examine the place hastily, for his barometer warned him of a change that was imminent, and this was the dangerous season in these latitudes.

Above the sand beach, where had formerly been a settlement, a few jackfruit trees were deteriorating, being overgrown with clinging vines and other parasites. Here I discovered some native sepulchers which, beside a well that I found later on, were the only actual signs of man's handiwork upon the island.

Pandanus, which seems to delight in sterile soil and in opposition to the elements, now predominated, stretching forth its weird branches and standing upon its singular stiltlike roots, an omen of desolation. Here and there I penetrated the bush, observing the nature of the soil and noting it in my book.

I must have been nearly opposite where our vessel lay, when I came to a beautiful lagoon, with charming vistas and lovely glades leading in various directions.

I was about to return to the beach and continue my circuit around the island, when I heard a musket shot-a signal for my return, for the sky bad darkened and I felt sure that the glass had gone lower. I started directly for the boat-landing.

Towards the center of the island the trees grew less vigorously, and were fewer in number, and many old trunks lay prone on the earth. The walking became exceedingly difficult, for it was hard to penetrate this broadleafed, stout-stemmed vinery.

I had already had several nasty falls, but had escaped actual injury, until at last I stepped on what appeared a sound tree-trunk crossing a vine-covered chasm and felt myself swiftly descending into space, clutching wildly at the vines as I passed through them.

My head having come into violent contact with a jutting coral, I lay huddled and senseless at the bottom of a deep pit which in former years had been used as a well and now was partly filled by the action of the elements. When I revived all was darkness, and rain

was falling in torrents. In fact, it must have been the cool drenching I had had which brought me to my senses.

I tried to raise my arms and found them fortunately uninjured, but one knee had been severely bruised and my back was badly wrenched, while my head ached as if it were about to split in two, and a great lump explained why I had wasted hours in this situa-

Though it was very dark, with occasional flashes of lightning. I found no great difficulty, except from my own injuries, in getting upward, as these native wells are so constructed that the owners may walk down one side to dip the water with their shells. When I aproached the mouth of the pit and thrust my ead through the sopping vines, it semed as if the world were at an end. I could hear the screaming wind rush through the now leafless branches, and great boughs and missiles of many sorts were flying through the air, making it hazardous to rise above the level.

I thought of our brigantine and hoped she had sot away without losing her anchors. At that noment, though the tempest roared, I did not fear for her safety, for from the direction of the wind I was sure she had not been blown shore. Such a gale would inevitably drive her far away to westward, and her return to this region of frequent calms was quite sure o be slow and tedious. And here I was, all inprovided for, and destined to pass some days n utter loneliness. In time they would come back again, and I must contrive to exist till hey turned up. This would be an adventure to recount to my children as they gathered found me in the evening.

How was I then to know that this raging exclone had utterly destroyed our ship, and hat, while I sat shivering in my hole, my drave companions were in their watery graves? Never a word was ever heard from them again, and no fragment of our poor vessel was discovered to mark her loss.

When the light returned the sun was not sible. It was not safe to make my exit yet, but, thank God! I had my pipe and tobacco with me, and some matches that were not yet spoiled. Fool! Fool! Everlasting fool that I

was, I wasted several of those precious thatched house. matches before I lighted my damp tobacco.

It was well on in the afternoon when the pangs of hunger drove me forth to seek provender of some sort. Though the force of the gale was quite strong enough to impede me greatly, I managed to struggle through the torn shrubbery and tangled vines until I once more gained the open beach, and stood appalled before the ocean's sublime fury. Great seas hurled themselves at the trifling island, and actually threatened to engulf it.

According to my calculation I had now been above forty hours without food. Worn out by the wretched weather, and quite famished, I Samoa, who had established in business in the grasped a stick to aid my injured leg, and set out to discover food and shelter.

After a painful effort I came to the second patch of cocoanuts, and was not disappointed, for most of the fruit lay scattered on the ground, shaken down by the storm. After a bit of hard work in removing the outer husk, I regaled myself upon a ripe cocoanut and its firmer and more matured flesh, and this had to serve me, for I saw nothing else that was eatable at this time.

Night came on while I still painfully wandered in search of shelter, and I would have been glad to occupy the pit again had the difficulty of returning there been less formidable. The night proved a wild one, and I lay stretched out to leeward of a giant tree, whose out-of-ground roots and buttresses gave me just a little protection from the chilling blast. Here in this miserable situation I passed the tedious hours till day appeared.

My injured leg had grown worse and swelled to a considerable size, throbbing and alarming me thoroughly. Hunger and thirst once more assailed me, and painfully I dragged myself forward in the hope of finding some sort of sustenance. If the brigantine had been lost in the hurricane there was very little chance of another vessel's coming to Nuulakita for months and months. Possibly itmight be years before the place was visited. Such despairing thoughts as these produced a sort of sinking of the soul, an apathetic sadness. Why struggle farther? But still I wriggled forward over the soft sands, which seemed barren enough. A soldier crab crossed my path, and I devoured him raw without a qualm.

Even at this early stage of my imprisonment I must have been a bit delirious, for I began to imagine I heard voices calling me, and at length I fancied I saw people quickly flitting about as if to avoid my vision.

The pain in my wounded leg was very great, but I sometimes forgot this because of mental tortures far more acute. Another horrid night, and another boisterous day without the smallest comfort, left me still more helpless. Reason, I believe, was on the verge of collapse, when my remaining physical strength suddenly gave way. Sleep, delirium, or probably prolonged unconsciousness, at length re-

I awakened at last to behold the splendors of a tropic sunrise, the great orb soon shining directly in my face.' My leg was much better for the enforced rest it had had, and, strangest of all. I was not so hungry as I had been.

Melancholy forebodings that perhaps I was fated to die there like a dog and lie unburied, a feast for crabs and noxious vermin, spurred me to further effort. Pride and every primal instinct urged me forward, and at length, exhausted with fatigue and in great pain, I reached the region of the fallen cocoanuts and, after resting sufficiently, food and drink were again my portion, and later in the day I was enabled to stagger along the deserted beach upon a rude crutch which I had im-

Onward, painfuly onward, I went, craving satisfying food and rest. Eventually I passed a sandy place marked all about by turtles' flippers-a depression where eggs had surely been deposited. More than a hundred eggs were in the nest, all closely packed together covered from marauders. Gathering some dry wood and bark, I built a little pile and drew forth my treasured matches.

What an appalling disappointment I was to suffer! The box in which they were contained was crushed quite flat, and the matches themselves were loose in my pocket. Some, being wet, had lost their black heads. I must dry the matches carefully before one of them should be risked. I did not dare to take any chances of failure, and always afterward I would have to keep a smoldering fire or lose this great necessity. A flat coral stone exposed to the sun was selected, and my treasure was spread out in the genial warmth. The ignition papers from the dilapidated box were turned and turned until quite crisp, while each individual match was given careful attention. When all was ready I tried to strike a lighttried and tried again until the whole stock was done, and this with never a glimmer of

Raw turtle eggs are not to be commended as a steady diet, but they will serve a turn. In due course I was able to get to the rookery. but most of the birds were gone, dispersed no doubt by the violence of the gale. None of their eggs that I could find were catable.

I now tried ineffectually to produce fire by rubbing two sticks together as I had often seen the Samoan natives do. No, I could not do the trick.

I began to think of preparing myself some sort of shelter-at least a lodgment where I might sleep in comparative comfort. My earliest effort produced a kind of windbreak only.

Raw turtle eggs when steadily adhered to become absolutely disgusting as a diet, and on the recovery of my leg I sought many expedients that might serve my turn. Raw unsalted meat I could not abide, even when I knew that it was sweet and wholesome. So now when I caught a bird or turtle, I cut the flesh into the strips and hung them in the sun, or placed them on heated rocks until they received a sort of natural cooking.

Dressed in a worn-out suit of thin pajamas, my only other possessions were a pocketknife, a note-book and pencil, and a useless pipe, for the small fragment of tobacco I had been possessed of had been nibbled away as a makeshift stimulant.

A spell of wet weather set before me urgently the problem of constructing a

After many failures I at length owned a weatherproof roof, and was much pleased with my performance. Salt, in small

quantities and

mixed with sand, I found in several spots, and the need of this mineral seemed so great that I set about its manufacture from sea-water, by evaporation. In this work I was fairly successful, but even this could not make me content with the raw food I

Now strongly suspecting the fate of our ship, I might have despaired, but a new idea entered my

was compelled to

brain and for some time claimed my careful attention. Many young gannets were by this time occupying nests by the lagoon shore, and I decided to adopt several of these, bringing thehm up by hand, and afterward employ thehm to carry away letters describing my deplorable situation and praying for relief. But my first efforts were unsuccessful, and all three of my adoptions were dead birds within a few days. This set me to thinking that perhaps the food I was providing was unsuited to their immature digestions-that raw turtle meat, which they ate with avidity, was a dan-

I now enlisted another family of birds, and by stoning up several small basins near the reef at high water, I was enabled to catch a small supply of little fish, when the tides had fallen and the water had drained away into the sea. With a supply of what appeared a suitable food, I was at length able to bring up a brood of promising birds, who were taught by me to rest on the usual sort of perch . provided at the other islands. When my proteges had grown, they were not long in learning to provide for themselves.

The hopelessness of my situation and my constant longing to be with my family often quite unnerved me, and surely left me less thankfu! than I should have been for benefits received and unacknowledged. My mind, at times thoroughly discouraged, recoiled before such an existence. Several months had elapsed and my situation was still unpromising.

The feeding of my pets had provided a certain amount of occupation, and as the birds rapidly approached maturity, I noted approvingly their greater proficiency in flight. At last all of them were able to make extended excursions. I easily taught them to return at the call of the flag. My tattered pajama coat answered as a signal.

One day while experimenting with my own birds. I called from the skies an utter stranger, who calmly perched himself and squawked loudly for attention. With avidity I searched him for communications, but evidently the animal was off on leave, for he bore no letters. I fed him slowly, and between whiles I wrote what I thought would have been anywhere construed as a touching appeal for assistance. Tearing the leaf out of my note-book I fastened the missive so that it laid flatly underneath the feathers of the back.

For several days the new bird continued to resort to my perch, always returning with my message, and it was not until I refused him food continuously that I was able to get rid of Then, some days later, having fastened missives to all three of my birds, I took down the perch and refused to notice them at all-a treatment they could not understand, for from their earliest recollections I had been their

Within a week after the birds had deserted the island, I re-erected the perch, and thenceforth every afternoon I waved my rotting garment, hoping that some intelligible answer would reach me. But days and weeks passed without any sign whatever and I again grew utterly despondent.

The turtle season had come and gone, and the extent of my depredations had so alarmed the island birds that I was now forced to trap those which I would use for provender, or climb the trees at night and secure my victims

One day, observing a troop of newly-hatched turtles painfully dragging themselves towards the salt water, it occurred to me that if I were to place these in the lagoon and feed them, a plentiful brood could be raised, and turtles would ever after be obtainable at all seasons.

Once more I decided to entice the distant birds to a renewed perch, and they returned upon my signals of a welcome. At last I found a bird with a letter written in the Samoan tongue and addressed to one of the teachers. Though I could not write grammatically and with precision in the native language, I was able to read sufficiently well. After divesting the missive of its religious commonplaces, which begin and end every-native communication in these latitudes. I saw that the writer, living on a distant island, had no knowledge or care for me, for he addressed a fellow worker in the mission field on topics of mutual in-

Detaining the bird for some time by such entertainment as was sure to please him and his comrades, I now prepared several messages in such Samoan as I could muster, and then, having neglected the animals to induce them to set out, I once more resumed work upon a construction somewhat resembling a monstrous top, which I proposed should spin continuously in a groove of soft dry wood until ignition would follow. It must not be supplied that this was my first effort in this line, for 5 can recoilect at least four other constructions which were wholly useless. By my repeated faltares

I had at least acquired some experience. This time success crowned my efforts.

From this moment I date a comfortable change of diet, and I may say that in the com- list, as one surely will when you have pletion of this labor and a contemplation of its such a chart before you for inspiraresults to me I was happier-at any rate calmer | tion. -than I had been since my arrival on the

My misery was soon deepened, aye, made insupportable, by the loss of my precious knife, the one invaluable treasure that yet remained. As I was stooping over my turtle cage to observe the welfare of its occupants it slipped from my pocket and dropped into the water.

For some time I had been of opinion that dishes making just as appetizing and the bad weather would soon have its ending, and that probably a gale of wind would mark pense. its exit. The accuracy of my calculations was justified, for after several days of great heat and unexampled calm, one of those sudden convulsions of tropic violence assailed the island ther and lowers the cost. with cyclonic force. My freil hut was bodily lifted by the blast as if it were a feather's little as possible, but getting the best weight, and no portion of it or its contents ever returns for money spent. met my eye again. Torrential rain in blinding sheets, almost suffocating in its profusion, utterly drenched me, and the great ocean, lashed into a wild fury, seemed bent on submerging the little island, as it had done on previous oc-

From the ending of this storm, my days were spent in searching for food and praying to the flend, and my nights were troubled with such realistic dreams and phantoms-if such | can. they were—as wholly to wreck my reason. Naked and unkempt, I roamed over the limited extent the land afforded; attached now to , no particular place, and heedless of any attempts at rescue, I no longer kept a lookout. Like a wild man that I was, I gleaned such good. The proportions are one and a that nobody goes through life withfood as the place afforded, untroubled by half pounds of carrots, two lemons out disappointments, heartaches and

qualms of any sort. One day while drowsily musing, new sounds | Scrape the carrots and put them | there is nothing more common than assailed my ears-more intelligible, more har- through the meat chopper, add monious they seemed, than the others I had been accustomed to. Though they evidently came from behind, I expected the new breed of infernals to deploy suddenly in front, as thehir predecessors had always done, therefore I did not turn until one of them laid a rough hand on me. This was a new experience, for till now the busy imps had under close inspection seemed intangible.

Turning to the touch, a number of figures in white garb met my astonished gaze, and though their countenances seemed pitying and beneficent, I knew them for their deceitful worth, and cursed their uncalled-for interfer-I would have chased them from the island. Till now all goblins and little inquisitive imps had fled before my rage, but these new-comers closed in around me, seizing my weapon and overpowering my fiercest efforts. until I lay fast in bonds, and quite insensible.

an adventurous and devoted party of Samoan missionaries and their Ellice Island followers. Strange to say, nearly if not all of my messages had safely reached some inhabited island, but unfortunately none could read and quart of boiling milk, add a grated understand the English words.

The end had come. I had been rescued by

Paulo, the teacher on Nanomea, sent message after message through the group, and half a teaspoonful of salt, pepper to these timely explanations came to the southern teachers, enlightening them as to the strain over the yolks of two wellreal meaning of my misspelled and almost un- beaten eggs. Add four tablespoonfuls intelligible Samoan notes which they had of cooked rice and serve very hot. been getting from time to time by bird posta letter-delivery service which was soon actively employed in my behalf.

As soon as the defective system would allow, the teachers consulted, and one bold spirit, an aged man, brave old Alamoa-journeyed from Nicutao to Vaitupu, and on to Funafuti, in an open boat, to give direction to the work of rescue.

As an example of infinite unselfishness, of noble devotion to high convictions of duty, I think that the work of my difficult rescue can be favorably compared with many other shining records of Christian endeavor.

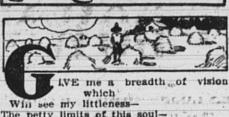

The original party of thirteen adventurers set out from Funafuti in an ordinary open boat, three oars on a side, and using a battered compass as their only guide. After a rest of several days on Nukulailai, and with increased stores of food and water, the perilous journey to Nuulakita was successfully at-

sought to reward the good teachers and the get rich quick." workers who had saved me from a living death at the imminent risk of their own lives, and my good wife and children set down in feeling terms the heavy obligations under which they lay; but I, who more immediately knew the case, felt that a long life of thankfulness to first well for oil near Titusville, Pa. and respect for the good people of the Ellice It was the beginning of the great Group no more than paid my score.

American oil industry.

The petty limits of this soul-And raise me from the stress of self-distrust, of cramping fear, Of somber bitterness -Muriel E. Windram.

HOUSEHOLD RUTS.

The housekeeping rut that is deep enough to engulf many an otherwise successful household, is monotony in menu making. The same old thing in the same old way is repeated until appetite is gone and one loses all interest in food. When the housekeeper is mother, cook, nurse and general manager, there is still greater need to meet conditions with a trained mind.

If the system has never been tried. one can hardly realize what a help to make things run smooth, well organized plans can be.

In a convenient place, on a door or wall, place a tabulated list of dishes, those which are liked by the family, for example. 'Under rice have a list of ten or a dozen ways that it may be served as a vegetable, a dessert and in combination with other foods. Prepare these dishes in turn, and it will not be necessary to inflict them oftener than once in five or six weeks, and by that time they will have forgotten the dish and it will seem like new. This plan can be followed successfully with all the foods, adding to the

Potatoes are a food that is on our table, often twice and many times three times a day. Learn and serve a new dish of potatoes each week, and you will still have a hundred and fifty new ways still to learn.

Meats are our most expensive foods, and they may be pieced out in many nourishing dishes at much less ex-

GREATEST LESSON OF LIFE

The One Thing Above All That a Woman Should Be Quick to Learn and Remember.

The woman who makes good must be blessed with strength and health, and an ambition to learn and take advantage of every opportunity that comes her way. She must work with all her heart and play with all her heart; above all things avoiding indifference.

Hers is the temperament that recognizes that encouragement is all pice and pretty, but if one is going to do the thing that counts one doesn't need it; that refuses to be dismayed by repeated failures and that has a Don't fail to try the new marmalade | certain faith that what has been done by many may be done by another; trouble but that it is the wise ones ground. mine to protect the westerner from Lily and other fortune hunters. Young Blair goes to see Lily; he can talk of nothing and other fortune hunters. Young Blair goes to see Lily: he can talk of nothing but Letty and this angers the Duchess. The westerner finds Letty fil from hard work, but she recovers and Ruggles and Dan invite her to supper. She asks Dan to build a home for disappointed theatrical people. Dan visits Lily, for the time forgetting Letty, and later announces his engagement to the duchess. Letty refuses to sing for an entertainment given by Lily. Galorey tells Dan that all Lily cares for is his money, and it is disclosed that he and the duchess have been mutually in love for years. Letty sings at an aristocratic function, Dan escorting her home. Dan confronts Letty sings at an aristocratic function, Dan escorting her home. Dan confronts Galorey and Lily together. Later he informs Letty that his engagement with Lily is broken, asks the singer to marry him, and they become engaged. Ruggles thinks the westerner should not marry a public singer, and endeavors to induce Letty to give him up. She runs away, fearing she is not good enough for Dan.

CHAPTER XXV .- Continued.

"You say she's gone?" he ques-

"I say," said the boy, "that you've woman I love. I don't know what you have said to her, but it's only your age that keeps me from striking you. Don't you know," he cried, "that you are spoiling my life? Don't you know that?" A torrent of feeling coming to his lips, his eyes suffused, the tears rolled down his face. He walked away into his own room, remained there a few moments, and when he came out again he carried in his hand his valise, which he put down with a bang on the table. More calmly, but still in great anger, he said to his father's friend: "Now, can you tell me what you've

done or not?

"Dan," said Ruggles with difficulty, "if you will sit down a moment we

The boy laughed in his face. "Sit down!" he cried. "Why, I think you must have lost your reason. I have chartered a motor car out there and the damned thing has burst a tire and they are fixing it up for me. It will be ready in about two minutes and then I am going to follow wherever she has gone. She crossed to Paris. but I can get there before she can even with this damned agaident. But, before I go, I want you to tell me what you said."

"Why," said Ruggles quietly, "I fold her you were poor, and she turned you down."

His words were faint.

"God!" said the boy under his breath. "That's the way you think about truth. Lie to a woman to save my precious soul! But I expect," he said: "you think she is so immoral and so bad that she will hurt me. Well," he said, with great emphasis, "she has never done anything in her fe that comes up to what you've vae. Never! And nothing has ever hrt me so

His lips trembled. "I have lost my espect for you, for my father's friend, and as far as she is concerned, I don't care what she marries me for. She has got to marry me, and if she doesn't"-he had no idea, in his passion, what he was saying or how-"why, I think I'll kill you first and then blow my own brains out!" And with these mad words he grabbed up his valise and bolted from the room, and Ruggles could hear his running feet tearing down the corridor.

CHAPTER XXVI.

White and Coral.

Spring in Paris, which comes in a fashion so divine that even the most mined that night should not fall until calloused and indifferent are impressed by its beauty, awakened no did it, though the afternoon wore on answering response in the heart of and Dan, pursuing his old trails, wanthe young man who, from his hotel dered from worldly meeting place to window, looked out on the desecrated worldly meeting place. In the early hours of the morning Dan Blair, the 22-year-old son of the fifty-million-dollar copper king of Blair-town, Mont. is a guest at the English home of Lady Galorey. Dan's father had been courteous to Lord Galorey' during his visit to the United States and the courtesy is now being returned to the young man. The youth has an ideal-girlin. his mind. He mee's Lily, Duchess of Breakwater, a beautiful widow, who is attracted by his immense fortune and takes a liking to her. When Dan was a boy, a girl sang a solo at a church, and he had never forgotten her. The Galoreys Lily and Dan attend a London theater where one Letty Lane is the star. Dan recognizes her as the girk-from his town, and going behind the scenes hitroduces himself and she remembers him. He learns that Prince Peniotowsky is suifor and escort to Letty. Lord Galorey and a friend named Ruggles determine to protect the westerner from Lily and other fortune hunters. Young Blair thought she had flung himself in at the St. James, taken the indifferent room they could give him in the crowded season, and excited as he was he slept and did not waken until noon. Blair thought it would be a matter of a few hours only to find the whereabouts of the celebrated actress, but it was not such an easy job. He had not guessed that she might be traveling incognito, and at none of the hotels could he hear news of her, nor did he pass her in the crowded, noisy, rustling, crying streets, though he searched motors and a friend named Ruggles determine to protect the westerner from Lily and other fortune hunters. he had flung himself in at the St. hear news of her, nor did he pass her for some sign that she loved him, for tors for her with eager eyes, and with: went everywhere that he thought she might be likely to be.

At the end of the third day, unsuccessful and in despair, having hardly slept and scarcely eaten, the unhappy young lover found himself taking a slight luncheon in the little restaurant known as the Perouse down on gone from him, he looked out through I don't want to be tied down." the windows at the Seine, at the

small iron chair and sat himself down, with a long sigh, to rest. While he sat there watching the

end of the allee as it gave out intothe broader road, a beautiful red motor rolled up to the conjunction of the two ways and Letty Lane, in a summer frock, got out alone. She had a flowing white vell around her head and a flowing white scarf around her shoulders. As the day on the Thames. she was all in white-like a dove. But this time her costume was made vivid and picturesque by the coral parasol she carried, a pair of coral-colored kid shoes, around her neck and falling on their long chain, she wore his coral beads. He saw that he observed her face before she did him. All this a quarter of an hour. Dan saw before he dashed into the road, came up to her with something like a cry on his lips, bareheaded, for his hat and his stick and his gloves were by his chair in the woods.

Letty Lane's hands went to her heart and her face took on a deadly pallor. She did not seem glad to see him. Out of his passionate description of the hours that he had been through, of how he had looked for her, of what he thought and wanted and felt, the actress made what she could, listening to him as they both stood there under the shadows of the green trees. Scanning her face it was all he cared for, Dan saw no such indication there. He finished

"You know what Ruggles told you was a lie. Of course, I've got money enough to give you everything you want. He's a lunatic and ought to be shut up.

"It may have been a lie, all right." she said with forced indifference; "I've had time to think it over: You are too young. You don't know what the Quais. His head on his hand, for you want." She stopped his protestathe present moment the joy of life tions: "Well, then, I am too old and

TOP-WORKING OF OLD FRUIT TREES IS CONSIDERED BEST

Method Gives Very Destrable Crops and Brings Quicker Returns Than by Replanting of Young Trees-Practice of Grafting Is Not Mysterious Art - Few Important Points.

(By PROF, O. B. WHITE, Colorado.) 'bark separates from the wood sim-It has been proven by long experi- plifies the work of inserting the bud, ence that if properly done, the graft- but as the growth is more active the ing over of old trees by top-working tissues of the bud and the stock are planting of young trees. In fact, it is not uncommon to see a fairly good crop an the three-year-old top of a top-worked tree.

Teaching Tree How to Grow.

stronger root system than its own, is

The practice of grafting is not a common fruit trees can easily budded or grafted.

The apple and pear may be inter grafted upon each other, and this is pear and apple never take a good

Peach grafts start vigorously upon apricots, and plums upon the peach

Growth in diameter of the tree only takes place in a very small region between the bark and the sap-wood. This part of the stem is called the cambium, and in this thin layer of tissue the cells are still active while the activity of each succeeding layer on each side grows less and less.

The important point in grafting is to see that the cambium layers of the stock and the scion are matched at some point. When the growth is ened, but some foliage is needed to active we say the bark "peels." Bud- protect the stubs and trunk from sunding is done during this period, not scald, as well as to supply nourishonly because the ease with which the ment.

more likely to unite.

It does not pay to graft trees which show poor growth, and it seldom pays to top-work any crab. It is also questionable as to whether it pays to top-Top working, as a means of estab. work stone-fruit trees. While good lishing a weak-growing variety on a tops may be grown on either peach, apricot or almond, it is doubtful whether these crops will bear much quicker returns than young trees set in the place of the old ones

> There are various methods of graftage, the most common in the west being cleft and kerf grafting. These operations are simple and are known to For Fourteen Years. Restored most orchardists.

In cleft grafting, the limb is sawed off squarely, the stub split down about two inches with the grafting chisel, and the clefts wedged open with the scion inserted as a wedge.

The first bud should be teft a little below the top of the wedge, cutting the edge of the wedge opposite the bud a little thinner than the other The scion is then driven firmly into place with the lower bud to the outside, and a little below the top of the

It is important that the inner bark on the outer edge of the wedge should be brought in contact with the inner bark on the stub It is between these parts that the union takes place.

Kerf grafting is almost the same as cleft grafting, only the stub is prepared by saw cuts instead of splitting. These are made on opposite sides of the stub and trimmed to thin V-shaped grooves with a saddler's knife, the scion is then trimmed to fit, driven firmly into place and waxed as in cleft

It is not good practice to remove the whole top of the tree the first year and graft all the stubs. Often this proves too much for the tree and it fails even after the grafts have made a good start. They may linger two or three years and then die. A better plan is to cut away only

enough limbs to set scion for a good

plied to Head of Youngsters Will Be Found Excellent.

(By HELEN JACKSON.) I want to tell how I got rid of the hite diarrhoea in chicks. When they are old enough to take off the nests. say about 20 hours after they are hatched, take lard and coal oil in rub one drop on top of the head and on the vent. Put them in a box and give them

but repeat the treatment described.

rhoea. This is the way I always treat my chicks. .Do not give the chicks any more

to the chicks when I can get it as I think it better than chick feed. When the chicks are first taken off he nests I feed them about every two

hours-just a little mother's oats. For the first week you can give the mother hen some corn or oats but always have some sand in the box so the chicks can get it. Never let the chicks get wet or

chilled as that stunts them.

Chicken Wire.

Mixture of Lard and Coal Oil Ap. If Placed Within Easy Reach They Will Consume Just What They Need and No More.

All farm animals have an instinctive craving for salt. But if it is so placed as to be always within their SMALL PILL, SMALL DOSE, SMALL PRICE reach, they will consume just as much as they need, and no more. It is only when it has been kept from them for equal quantities, mix thoroughly and a long period that there is danger of their eating too much. It is therefore an excellent practice to keep it in a box or boxes where they can have some sand and a little ground oats access to it whenever they desire. and no other feed until they are one When they are salted, as is the pracweek old. The second week they may tice with many farmers, only once a show signs of the white diarrhoea, week, while some may get enough, others may suffer from a deficient I raised 300 chicks last year and supply. Salt promotes an active cirnever lost one with the white diar- culation of the blood, which never becomes thick and sluggish so long as the supply is plentiful; it assists digestion, and is often a preventive of feed than they will eat up clean every disease. It is so cheap that no stocktime. I always feed German millet raiser can really afford to deny to his animals all they want of it.

Value of Stover.

When it is known that three tons of corn stover is practically equal to one ton of mixed clover and timothy hay, any farmer can easily figure out whether it will pay him to save his clover or not.

Coarse Feed for Colts. Stuffing the colt with hay or straw, or any very coarse weed, will spoil Buy chicken wire to use in the gar- its looks. Keep this ration down by instead of stakes wherever possi- the use of some grains end less coarse

HAPPY THO MARRIED?

There are unhappy married lives, but a large percentage of these unhappy homes are due to the illness of the wife, mother or daughter. The feelings of nervousness, the befogged mind, the ill-temper, the pale and wrinkled face, hollow and circled eyes, result most often from those disorders peculiar to women. For the woman to be happy and good-looking she must naturally have good health. Dragging-down feelings, hysteria, hot-flashes or constantly returning pains and aches-are too great a drain upon a woman's vitality and strength. Dr. Pierce's Pavorite Prescription restores weak and sick women to sound health by regulating and correcting the local disorders which are generally responsible for the above distressing symptoms.

MRS. DICKOVER.

"I suffered greatly for a number of years and for the past three years was so bad that life was a misery to me," writes Mrs. B. F. DICK-OVER, of Utica, Ohio, Route 4. "The doctors told me I would have to go to a hospital before I would ever be better. A year ago this winter and spring I was worse than ever before. At each period I suffered like one in torment, I am the mother of six children. I was so bad for five months that I knew something must be done, so I wrote to Dr. R. V. Pierce, telling him as nearly as I could how I suffered. He outlined as course of treatment which I followed to the letter. I took two bottles of 'Favorite Prescription' and one of 'Golden Medical Discovery' and a fifty-cent bottle of 'Smart-Weed,' and have never suffered much since. I wish I could tell every suffering woman the world over what a boon. Dr. Pierce's medicines are. There is no use wasting time and money doctoring with anything else or any one else." The Medical Adviser by R. V. Pierce, M. D., Buffalo,

N. Y., answers hosts of delicate questions about which every woman, single or married ought to know. Sent free on receipt of 31 stamps to pay for wrapping and mailing only.

Mother

Lode

could ever love. NEVADA 6as Come Back S

The State that gave us the "Mother Lode" some fifty years ago is going to be one of the garden spots of America. The hundreds of millions of dollars they took from inside the earth in that Mother Lode will look like a pennybank when they spread the irrigation waters on Nevada's sagebrush plains. Get in on the ground floor, and get in now. Don't wait; don't hesitate.

Union-Southern Pacific

Protected by Automatic Electric Block Safety Signals will take you there. A Low Round-Trip Homeseekers' Excursion Fare will be in effect on the first and third Tuesdays of each month during 1912. Land that has been begging at 25 cents an acre will, under irrigation, be worth

STANDARD ROUTE OF THE WEST

thousands of dollars to you in a few short years. There is no argument; there's no question about it! Idaho, and Utah, and Colorado, and a dozen other states have done it and Nevada will. You have asked for your opportunity? Here it is. You wanted your chance? You've got it. This is the start the beginning. It is the very bull's-eye of opportunity in a state that is comparatively new. It's the chance of little capital and shrewd brains. One dollar now will do

the work of a thousand later on. The lands listed below are owned by the Southern Pacific Company. They offer them to Homeseekers at from \$2 to \$6 per acre, on ten years' time; one-tenth

cash, 6 per cent interest on deferred payments. 50,000 Acres of dry farming lands in Humboldt County, near Winnemucca. 23,600 Acres in Elko County, near Deeth - 90 per cent dry farming lands and the balance grazing lands.

5,000 Acres in Lyon County, near Churchill, which are subject to cultivation under dry-farming methods. Come down to the Union-Southern Pacific today and learn about them and the wonderful irrigation projects under way.

Form a party. Tell your friends. Do it now! Or, don't ever

sayagain that all the chances for fortune lie in the past. **GERRIT FORT** Passenger Traffic Mgr., Union Pacific R. R.
