## Working for Salaries

We often hear teachers, clerks and others who work for salaries say that it is no use for them to open a bank account. If your expenses eat up all your salary it is only one more reason why you should have a bank account. At the end of the manth your checks will show you where every penny went. When you look them over you will see where you could have saved a little here and there. Each month you will save a little more and you will soon have a bank account to be proud of. Our bank always has a warm welcome for young people with their first deposit. We know it means much to them.

ACTION IS TO COLLECT \$20,000 IN PENALTIES FROM ALLECED LAW VIOLATORS.

VIOLATION OF LAW CHARGED AGAINST FOREIGN COS. 新學問之為此

Treasury Will Be Enriched by \$20,000 f Cases Started by Attorney General Fellows Are Successful.

If the state is successful in recovering from the various insurance companies against whom suits were started by Attorney General Fellows in the circuit court of Ingham county, the general fund of the state treasury will be enriched to the extent of \$20,000.

The suits were filed by Attorney General Fellows, although Insurance Commissioner C. A. Palmer prepared the data and furnished the material for the cases, which are the outgrowth an investigation started against a number of foreign fire insurance comganies several months ago.

The corporations are charged with violation of the act which prevents a company from insuring a single risk for more than ten per cent of the amount of capital deposited in this county. For instance, one foreign corcoration whose capital stock was 3200,000, insured one building for \$25,-200, although the law specifically wiates that it should not insure this particular risk for more than \$20,000.

The companies against whom the state is proceeding are all foreign conzerns with branch offices in the United States. ### CASTRO SAILED FOR CUBA Former Dictator Plots Revolt in

News that Cipriano Castro, former lictator of Venezuela, sailed from New York for Cuba recalled the reports that have been reaching Washington with increasing frequency recently, that plans for a revolution in Venezuela are being formed in the island republic.

Ever since Castro arrived in New York and began his fight for admission to the United States, the state department has been hearing rumors of filibustering expeditions being prepared in Cuba against Venezuela.

Havana is the place of residence of a number of Venezuelan exiles who were formerly associated with Castro when the latter was dictator and it has been repeatedly said that Castro would eventually join his friends there for a movement against Venezuela.

Direct Elections O. K. in 25 States. Men of all political parties in Washington are greatly interested in the steady advance of the cause of direct election of United States senators.

Since it was announced that 23 states had ratified the amendment, word has been received that ratification has been completed in New Hampshire. Furthermore, each house of the Ohio legislature has passed a resolution of ratification, though the two resolutions are different. It is expected the two resolutions will be harmonized. Counting New Hampshire and Ohio, 25 states have ratified the amendment.

The states whose legislatures have completed ratification are Massachusetts, Montana, New York, Kansas, California, Michigan, Oregon, Idaho, Minnesota, Wisconsin, Arkansas, North Dakota, Vermont, New Hampshire, North Carolina, Colorado, Wyoming, West Virginia, Nevada, Washington, Texas, Arizona, Iowa, Illinois, and, in effect in Ohio.

Conductor Killed in Wreck.

Chicago, Milwaukee & St. Paul train No. 2, one and one-half hours late, and unning to make up lost time, was wrecked while rounding a curve near Republic. The engine and the two rear sleepers remained on the tracks, but the mail, baggage and express cars and the day coaches, sleeper and diner turned over. The smoker was derailed but remained upright.

Conductor M. E. Bloomer, of Appleton, Wis., was crushed by the safe in the baggage car and died at 2 a. m. A flagman was seriously hurt, two cooks were burned, and several passengers injured. Two women and a child, taken out through the window of a sleeper barefooted and in night clothing, were carried to a house nearby with the thermometer 16 below zero. The lights were extinguished as the cars rolled over, leaving the frightened passengers in darkness to climb through the windows.

### MORE ATLANTIC LINERS REQUIRED

CONGESTION ON EXISTING STEAM. SHIPS ON ACCOUNT OF CANA. DIAN IMMIGRATION.

It is reported that eight new Trans. Atlantic liners are under construction for the exclusive use of the Canadian Trade. These are being built by the White Star, Canadian Pacific and Cunard Companies.

The liners to be built for the White Star are to be of the same type as the Laurentic and Majestic, and will replace the Canada and Teutonic. The Cunard Line's new steamer, Ascania. has already completed successfully her maiden voyage from England to Montreal, and her sister ship will belaunched early next year.

It is predicted that the Canadian Northern will not be slow in following the example of the other big concerns. as it is a matter of common belief that Canada, more than any other in the world, will be the country of the future, and the best field for investment by shipping interests.

An official of one of the companies already building steamers for this trade told the American yesterday that the ideal steamer for this service is the two-cabin boat, having accommodation for second-class and steerage passengers only.

"We do not expect that the \$5,000 cabin de luxe class will travel between Canada and England very extensively," he said, "but the business that is to be obtained there will be. immensely lucrative, and for the next ten years the eyes of the shipping world will be riveted on Canada. The Panama Canal, undoubtedly will receive a lot of attention, but the business in that route will be nothing compared with the Canadian trade for the immediate future. Panama will develop and become bigger in the years to come, but at the present we are most concerned with the tremendous tide of immigration that is being diverted from the United States to the Dominion.

"The farm land of the vast North West is the attraction, and while this flood of immigration is at its height. the Canadian Government exercises a strict censorship over the class of immigrants admitted. In this way they are drawing their future citizens from the Northern countries and have shown an unwelcome face to the people of Southern Europe."-Advertise-

It may be said unqualifiedly that the militant suffragettes, and head of the sun, like every other thing connected with the present order, will finally cease to be what it is today. The time will most surely come when the sun will have ceased to throw off light and heat. Long before that happens, however, the earth and other planets will have become "dead worlds," like the moon-no life of any sort upon them. mentous. It was the beginning of a series of explorations that unlocked a chain of treasure vaults in the Rocky Mountains. The remark of a hunter, the subsequent sinking of a well and the accidental meeting of four men, constituted a chain of events that rerealed the greatest single deposit of ore ever known. The kick of a donkey ancovered a ledge from which millions have been taken.

The man who seeks wealth in the mines, knowing what he is hunting for, stumbles across it at the most unexpected moment. If he recognizes what he is looking for he is in a fair way to become rich.

Sawmill That Opened Up the West. In January, 1848, near Sacramento, California, James Marshall of New Jersey constructed for James Sutter most famous sawmill in history. It

quickened the pulse of the world. It revived the sluggish streams of commerce. It made men fighting mad. It resulted in wiping the buffalo and the Indian from the great plains. It filled the Pacific ocean with ships where previously but few sails had been seen. It caused the building of railroads, and laid the way for future

The mill was built of logs. Marshall carefully selected a point for the tailrace, and because he decided that time could be saved in completing the mill by permitting a flow of water to clear the mill-race of the soft dirt, his name became linked with the adwork. Then Marshall noticed a few shining specks in the banks of the race. He took a step forward, gasped, halted, flushed and laughed at himself uncertainly. The next morning, January 19, 1848, he stepped into the tailrace and picked up a few pieces of brassy-colored metal. He showed them to the men at the mill. They all laughed. He pounded one piece under a hammer. He placed them in his

Then, like a flash, came the news of the finding of Bonanza on Gold Hill, Battle Mountain and Bull

The secret was revealed. The bright, silver-looking ore, that disappeared before the flame of the blowpipe, was gold disguised by tellurium. It was so simple. It all happened because a man left a piece of it on a stove by accident. The slow heat drove off the FATTEN POULTRY tellurium and left the gold in shining specks, peeking through the rock.

The Opening of the Yukon. When the Telegraph Expedition forced its way through the northwest in the middle of the nineteenth century, it found evidences of gold along the Yukon river.

The party was locating a telegraph line that was never built. All that is necessary to start a prospector over the trail is word of rich diggings at another place, the farther away the better. Every year after that miners sought the north. In 1896 the world was electrified by

the discovery of George Carmack, who forced his way up the Yukon, 1860 miles from the sea. He prospected the various rivers in search of the gold which the Telegraph Expedition had reported.

He stumbled into Klondike Creek. Two miles above that he turned into a little stream, where he washed from forty to eighty dollars gold to the pan. His fortune was assured, and his discovery started the rush into the frozen north, for he had turned the key that opened the door to millions, away up in the Arctic Circle.

### The Best Bargain You Ever Made

OW do you measure the value of a bargain? Suppose you bought an engine that did practically all of your hardest work for you, sawing, pump-

ing, grinding, etc., and that saved so much money that it soon paid for itself.

Would you call that a good bargain?

An I H C engine will do all that, and more. Having paid for itself, it works steadily year after year until, like our Clay County friend who has used an I H C engine for six years, you will say, "My I H C engine is the best bargain Fever made."

are thoroughly dependable, and unusually durable. The fine-grained, grey iron cylinders and pistons are worked together to a perfect fit. Ground piston rings insure maximum power from the explosion. The fuel mixer is the most effective known. Bearings are large and carefully fitted. No part is too heavy to be efficient, yet every part is amply strong.

I H C engines are made in all styles -vertical and horizontal; portable and stationary; air and water-cooled; in sizes from 1 to 50horse power, to operate on gas, gasoline, naphtha, distillate, kerosene or alcohol. Oil tractors, 12 to 60-horse power, for plowing, threshing, etc.; grinding, sawing, pumping and spraying outfits, complete the line.

#### SYNOPSIS.

At the beginning of great automobile race the mechanician of the Mewcury, Stanton's machine, drops dead. Strange youth, Jesse Floyd, volunteers, and is ac-cepted.

CHAPTER I. (Continued.)

"Goin' to throw away the race an' wreck your machine, for foolishness?" he inquired. "That's just like you, Ralph Stanton. You'll risk a blow-out an' a smash to save five minutes in a you through with me?" Floyd asked, twenty-four hour race. You can drive, but you won't use common sense."

Something snapped under Stanton's mask. Raging with silent fury, he slowed down his car and swung into the paddock gate as they came oppo- leave." site it, thundering through to his own

"Fix that tire," he commanded, as the swarm of mechanics surrounded them, and descended from his seat to confront the assistant manager. "Have yet? This one won't do."

"Why, no," Mr. Green deprecated. The driver who alternates with you wants to keep his mechanician; be- heel. sides, the man isn't exactly ready to go with you, and he couldn't do both shifts, anyhow. I've telephoned to ger. the company to find a man and rush him here. What," he looked toward the group around the car, where Floyd's bronze head shone in the electric light as he directed proceedings, "what's the matter with this one? Scared?"

"No," conceded Stanton, grudgingly just. "Insolent and interfering."

"Well, if that is all-" Stanton turned his back upon the speaker, recklessly and blindly angry past all reasoning.

When, the brief operation completed, Floyd sprang up beside his driver for the start, Stanton surveyed him through his goggles.

"If you are nervous about my driving and my sense, you had better get off now," was the grim warning. "For I drive as I see fit, and I'm going to make up these laps."

"Why are you wasting time here, then?" countered the mechanician, practically.

The Mercury hurtled viciously down the line of training camps and burst out on the track like a blazing meteor. Stanton shifted into high gear on the curve, and began to drive as he saw

The close-packed witnesses stood during most of the next hour, alternately applauding and shouting dismay, climbing on seats and benches to see. The other racers gave the Mercury room on the turns, after the Alan car tried to steal an inside sweep, and skidding, missed destruction through and with Stanton by the narrow margin of a foot.

There was neither opportunity nor wish for speech between the two who rode the verge of death on the Mercury. Floyd attended steadily to his duties; pumping oil, brushing the yellow trackdust from the pilot's goggles to clear his vision for each turn, watching the tires and the other machines. But he made no protest at the deadly methods of his companion. Near the end of the second hour, the scream of the klaxon sounded its

significant warning of trouble. "It's us-lamps out," called the mechanician, after a comprehensive re-

view of their machine. Stanton shook his head impatiently, and kept on; deliberately passing the paddock gate instead of turning in. As they shot by the grand-stand for the second time, the klaxon sounded again, long and imperiously.

"Goin' to fight the judges?" lisped Floyd, with careful politeness. The driver did not speak or glance

It is a dull period, little, then pushed the vessel so roughly toward his mechanician that some of the liquid splashed over the recipient and trickled down upon them both.

"Here," he offered curtly. "Thanks," Floyd accepted, and frank as they bounded forward, tossing the tin pitcher back over his shoulder, where a reporter gathered it up and sat upon a keg of oil to write pretty account of the volunteer mechanician who had made the Mercury's entry possible and of the conse-

The two men who alternated were waiting to relieve the two who descended from the machine. The workmen swarmed around to fill tanks and give swift inspection, and the fretting car sped back to the track. Left opposite each other in the flick-

ering glare of the swinging electric lamps, driver and mechanician stood for a moment, weary, car-stiff, and still tense. Stanton unclasped his mask with a jerk, took a step toward the tent, then turned toward his assistant. "The three hours are up," he ob-

your money from Mr. Green, and Floyd took off his own mask and bared his white, steadfast face and tired eyes to the other's gaze.

"I entered for the race, or for as much of it as you want me," he corrected. "Until you quit, or find a subyou got me another mechanician, stitute you like better, I'm with you."

They looked at each other. "Go rest, then. There is coffee inside," bade Stanton, and swung on his

The apology veiled a command. Stanton halted.

"Madam?" he responded, astonished and scarcely pleased.

She deliberately stepped down beside him, accompanied by the crisp sound of shaken silk and a drift of faint, rich fragrance. She wore a dark motor-veil, and in the mingling of dense shadows and glaring lights it was not possible to distinguish more than her general effect of youth and well-poised grace.

THE TRUNK LINE ROADS IDEA IS RECEIVING SUPPORT.

A Compromise on the School Text Book Bills Probable-The Initiative and Referendum Bill to Be Reported.

[By Gurd M. Hayes.]

Led by Rep. Charles Flowers, of Detroit, the advocates of equal suffrage railied 72 votes in the house, five more than the required two-thirds majority, and passed the concurrent resolution to submit the constitutional amendment to the voters of Michigan at the April election: There were 21 votes in opposition to the suffrage amendment in the house. Efforts to amend the resolution so as to submit the proposition in 1914 failed.

Supporters of the suffrage amendment claim that they will have the required two-thirds majority when the resolution comes up for consideration in the senate, and then the decision will be left to the people of the state. Although they were defeated last fall by a narrow margin the suffrage workers are confident that they will win in the contest this spring as they are depending upon a large vote in the rural districts.

Governor Ferris is an enthusiastic supporter of equal suffrage and although it is not expected that he will take the stump in behalf of the women's cause, he has informed the leaders that he will do everything in his power to assist them.

In a bill introduced by Rep. Wm. J. Baird, of Bay county, is seen a broad legislative plan to put into operation the plan of Senator Alswede for a system of trunk line highways to be built !

Rep. Baird is one of the most influential members of the house and has taken upon himself the leadership of the plan on that side of the legislature. His bill provides that the state may bond for not exceeding \$3,000,000 for the trunk line highway. Senator Grace, of Kalamazoo, one of the democratic members of the upper house has opened up the fight agains; the Michigan Bonding and Surety company of Detroit, by presenting a bill that will enable any incorporated surety company to supply liquor bands. Under the present statute no corporation with a capitalization of less than \$500,000 may engage in the business of furnishing liquor bonds. It was at this corporation that former Governor Osborn directed his fire in the special

sessions a year ago. Senator Grace is chairman of the liquor committee in the house and his action in starting a fight against the bonding company occasions no little surprise. It is apparent that there will be a fight if the measure comes out of the committee, as the corporation in question is well fortified for a battle and has considerable political strength.

### Cause for Alarm

Loss of appetite or distress after eating—a symptom that should not be disregarded.

It is not what you eat but what you digest and assimilate that does you good. Some of the strongest, healthiest persons are moderate eaters. Nothing will cause more trouble than a disordered stomach, and many people contract serious maladies through disregard or abuse of the stomach.

We urge all who suffer from indi-gestion, or dyspepsia, to try Rexall Dyspepsia Tablets, with the under-standing that we will refund the money paid us without question os formality, if after use you are not perfectly satisfied with results.

We recommend Rexail Dyspepsia
Tablets to customers every day, and
have yet to hear of one who has not
been benefited. We believe them to
be without equal. They give prompt
relief, aiding to neutralise acidity,
stimulate flow of gastric juice,
strengthen the digestive organs, and
thus promote perfect nutrition and
correct unhealthy symptoms. Three
sizes, 25 cents, 50 cents, and \$1.
