Every spring before the ground becomes too hard the road should be thoroughly gone over with a grader to clean out the ditches, so that the water may have a free outlet.

Hog Needs Protection. The hog is rather scantily provided with hair and the warmer the country the less hair.

Sowing Slow Seeds. In sowing seeds that start slowly, as parsnips, celery, etc., it is well to sow with them a few strong, quick-germinating seeds to break the crust and mark the rows so that cultivation may begin early.

WHAT ABOUT SEED CORN?

In many parts of Washtenaw county there is a shortage in the supply of seed corn for both silage and grain. Small amounts of seeds have been lent but only enough for local needs. On account of the shortage this season it is requested that if any farmer has more seed than he needs he should not use it for feed but retain it for growers in the communities where seed is scarce.

No corn should be planted this year until it has been tested for germination. All corn of 1917 crop so far tested, that is adapted to Washtenaw county, has shown a very low germination. No grower should risk his crop by using seed that has not been tested. Try your corn now and see if it will grow.

If you have extra seed corn that will grow, even in small quantities, save it and notify the Washtenaw County Farm Bureau Office, Court House, Ann Arbor. Designate the variety and the amount you have and the price desired. The farm bureau is not a purchasing agent but will attempt to locate a purchaser for seed listed at its office. The service of the bureau is free.

A Bilious Attack.

When you have a bilious attack your liver fails to perform its functions. You become constipated. The food you eat ferments in your stomach instead of digesting. This inflames the stomach and causes nausea, vomiting and a terrible headache. Take Chamberlain's Tablets. They will tone up your liver, clean out your stomach and you will soon be as well as ever. They only cost a quarter.—Adv.
