ELEVENTH YEAR-NO. 59

CHELSEA, MICHIGAN, TUESDAY, APRIL 2, 1918

\$1.00 THE YEAR

ANNOUNCING

THE

Third Liberty Loan!

On Saturday, April 6th, the United States Government will offer for public subscription \$3,000,000,000 41/4 per cent bonds, constituting the third Liberty Loan. These bonds will be exempt from all taxes, except the tax on incomes in excess of \$5,000.00 par value of the bonds.

The amount allotted to Chelsea village, Lima, Sylvan, Lyndon and the northern half of Sharon and Freedom townships is \$150,000. It is expected that every individual will buy of these bonds in proportion to his income and ability to do so, as it is the desire of the Government to bring every man, woman and child into partnership with the nation in financing this war.

These bonds must be purchased out of current earnings or future savings to be most effective, as every dollar in the banks should be held liquid and available for the aid of industry in carrying out its program of war production.

h.

only,

m.,

The drive for the sale of these bonds by our local organization will begin promptly on Monday morning, April 8. Be prepared to place your subscription at once. Every day saved by Chelsea in reaching its quota will act as an added inspiration to the nation and place Chelsea's star one degree higher before the world.

We know your action will be prompted by your loyalty and a full appreciation of the position this nation occupies. The appeal from this committee, therefore, is for promptness in making your subscription.

TOWNSHIP ELECTION

Their Entire Ticket.

Following the precedent of last year, Sylvan Republicans yesterday elected their entire ticket with sweeping majorities. A total of 625 votes were cast, 380 Republican and 211 Democratic. There were 32 "hoodoo" ballots and two ballots were thrown out by the election board. The vote follows, Republican and candidates being first named:

seven copies of each issue to the days.

C. A. for distribution among

The several chairmen in charge of

near Battle Creek, the Tribune has sent seven copies of each issue to the Y. M. C. A. for distribution among the seven "Y" huts in the camp. Under date of March 28th, we recived the following letter of appreciation:

We are writing this letter to thank you for the courtesy you have shown the Army Y. M. C. A. and the soldiers at Camp Custer in sending copies of your newspapers into camp. Next to letters from home the men here enjoy the home newspaper and in many instances they appear to enjoy the paper more than the letters. Therefore you can see that you are rendering a great service to the soldiers by keeping them supplied with the newspapers from their home communities. The Y. M. C. A. greatly appreciates the co-operation on the part of the publishers and editors of Michigan and Wisconsin in making possible this services for the men. The papers received are district will be sold within three days.

Since the opening of the big military training camp at Camp Custer, near Battle Creek, the Tribune has sent seven copies of each issue to the

ON UNIVERSITY LIST vice chairmen, Mrs. L. T. Freeman, Mrs. Jabez Bacon, Mrs. William Graduates Will Be Admitted to University Without Examination.

Recommendations Made.

The Chelsea schools have been reaccredited as a "diploma school" for another two years by the educational department of the University of Athense Recommendations of the University of Athense Recommendations Mrs. Jabez Bacon, Mrs. William Campbell; treasurer, Mrs. Howard Holmes; secretary, Mrs. Howard Holmes; secreta sity without entrance examinations upon the presentation of their diplomas,
The university authorities made several recommendations, which are briefly summafized as follows:
First, that ventilation be improved. Second, that work in the manual arts be introduced.
Third, that a higher avented the several recommendations of the manual arts are introduced.
Twelve Twelve Tagen, R. B. Koons, Evelyn Russell rea Boyd, G. H. Stimpson, H. J. Fulford, S. A. Mapes, A. L. Steger, Walter Kantlehner, J. E. McKune, Fred Broesamle, William Kress, Roy Harris, and Misses Jessie Everett and Nellie Hall.

TWELVE CARS TRACTORS
Twelve

chased through the war preparedness board were shipped from the Ford plant Saturday morning to various

Michigan points.

Two carloads went to Jackson and one carload went to each of the fol-

one carload went to each of the fol-lowing places: Owosso, Mason, St. Johns, Hillsdale, Stockbridge, Lake-view, Caro, Flint, Lansing, Ionia. The following Washtenaw county farmers have ordered tractors: E. F. Lohr, Route 6, Ann Arbor; Olin A. Tatt, Route 8, Ann Arbor; F. H. Ticknor, Route 6, Ann Arbor; W. E. Undardown Huren Farms, Co. Ann Underdown, Huron Farms Co., Ann Arbor; Fred H. Swift, Ypsilanti; F. R. Clements, Saline.

NORTH SYLVAN GRANGE.

The next meeting of North Sylvan grange will be held at the home of Mr. and Mrs. Chris. Kalmbach, Fri-day, April 5th. Initiation and pro-gram as follows:

gram as tollows:
Music; recitation, Mrs. J. Walz;
"Is Woman's Work Appreciated,"
Mrs. C. Kalmbach; discussion; music;
"Pigs and Pasture," Edwin Weiss; discussion; music.

Occasionally we still note an auto-mobile carrying a 1917 license plate and so far as we know the local officials are not making ony objections. The 1917 licenses expired over three months ago and there is no good excuse for any automobile owner not having a 1918 license by this time.

WHY 1917 AUTO LICENSES?

\$200,000 FOR WATER. Ann Arbor voted overwhelmingly in favor of a \$200,000 bond issue to develop the Steere farm water sup-ply for the city in the election Mon-day. The city water has been un-satisfactory for some time.

ANNUAL TOWN MEETING

Appropriations Voted for the Ensuing Year.

The annual meeting of Sylvan township was held yesterday after-noon in the town hall. Supervisor Herman J. Dancer called the meeting to order at 1:45 o'clock and Clerk Fred G. Broesamle read the annual financial report and the minutes of the last meeting, which were both

approved.

It was then voted to raise the fol-

lewing amounts for the several funds for the ensuing year:

Contingent Fund \$1,800

Highway Improvement Fund 2,000

Highway Repair Fund 1,500

The town board recommended that \$1,500 be raised for the contingent fund, but an additional \$300 was voted for the use of the War Preparedness board in paying the expenses incurred in advertising and holding special patriotic mass meetings, and similiar expenses.

A resolution was offered and adopted to the effect that in the future all gravel used on the roads be approved by the town board and that it be screened. Subsequently, it was moved and supported that the town board be empawered to purtown board be empowered to pur-chase a gravel loading and screening

machine.
The annual report showed an over draft of \$371.18 in the town hall fund and \$500 was voted the town hall fund for the ensuing year. Motions were then made, support-

ed and carried to expend \$500 in gravelling the main roads leading into the village of Chelsen, and \$300 for improvement of the read between Philip Schweinfurth's and George

The meeting then adjourned.

ELEMENTARY SCHOOLS OF FIRST IMPORTANCE

Foundations of An Education Are Laid in Primary Grades.

A chain is only as strong as its weakest link; in the public schools the success or failure of the student depends entirely upon thoroughness of instruction in elementary grades. The foundations of an education are laid in the primary grades and neglected or slight-ed work in elementary studies invar-ibly results in poor work in the high

The Tribune understands that the recent action of the school board in recent action of the school board in dispensing with music and drawing in the schools next year is the result of a desire to cut expense of operating the schools, but we are not sure that it is a wise economy. The question is: Is it necessary? Do the people of Chelsea and vicinity, included within the confines of this school district, actually want to economize on their children's schooling? We think not and we believe that a majority of the people will favor an majority of the people will favor an increased expenditure for school purposes rather than any curtailment of the school itself.

But if economy must be practiced and the school work must be curtail-ed, we believe that some part of the high school work can be better sacrihigh school work can be better sacri-ficed than any part of the kinder-garten or grade work. Let's make the work in the primary grades just as thorough as possible and build for strength from the bottom up. If we can only afford to have a ten grade school, let's dispense with the ele-venth and twelfth grades and use the money so sayed in increasing the effectiveness of the work in the first ten grades.

ALLIES FINALLY CHECK SWEEPING DRIVE OF GERMANS

TEUTON ADVANCE SLOWED UP-FRENCH, IN ONE SECTOR, FORCE FOE OUT OF NEWLY CAPTURED POSITIONS.

BERLIN CLAIMS TO HAVE TAKEN 70.000 PRISONERS, 1,100 GUNS

Americans in Battle Line-Presence of U. S. Auxiliary Troops in Thickest of Fighting Helps to Cheer French.

London-After eight days, during which it has swept forward over the rolling hills of Picardy, at times like a tidal wave, the German offensive has slowed. Instead of a sweeping adrance, its progress has been checkedthis fact is even admitted by the German war office.

The Germans claim that since the beginning of the great battle now in progress, they have taken 70,000 prisoners and 1,100 big guns. This claim is being discounted by allled observers as exaggerated.

Battle Line is Widened.

London-Out of the confusion of the battle and the contrary claims of the contesting armies, two new features stand out. The first is the French, over a front of six miles, have driven into the German lines along the south ern side of the salient established by the Teutenic drive. The other is the Germans have begun a new operation to the east of Arras, which may be the inception of a widening area of battle to the northward.

The German report says that troops under command of the crown prince have penetrated to a depth of 37 miles from St. Quentin.

The German lesses have been kept within normal limits, says the communication, although they have been heavier at vital points on the front The slightly wounded are estimated at 60 to 70 per cent.

South of the Somme the Germans broke through at many points and drove back the British and French into territory which had remained untouched by war since 1914, says the statement.

French Drive Germans Back.

Paris-On the front from Lassigny to Noyon our troops have advanced over a line about 10 kilometers long to a depth of two kilometers says the war office statement issued March 28. The repulse of Germans in villages further west also is announced.

Americans Make Good Showing.

Paris-"Entirely new in this warfare, the Americans worked like the best veterans in the battle of the Somme," says a wounded French captain who has been brought back from the front according to La Liberte.

with the French captain, a member of centroversy. the Dragoons. Each American wore a French war cross, conferred on tht must receive the same compensation battlefield.

ops on the againg time in the battle was the subject of much favorable comment and when it became generally known wounded American officers and men are being brough back with the French wounded from the region of St. Quentla, American stock rose high. The moral effect was considerable, even though the supposition was the number of the American troops in line was not con siderable.

SENATE PASSES NEW DRAFT BILL

Youths Who Reached 21 Since June 5, 1917, Required to Register.

Washington-The resolution extending the selective draft to men reaching the age of 21 years since June 5, 1917-the first registration day-was passed on March 29 by the senate without a record vote after a futile attempt had been made to add to it a provision for training youths from 19

It is estimated that about 700 000 men will be added to the registration this year by the resolution which is one of the pieces of legislation on which the war department is waiting before announcing complete plans for for the next draft.

The bill was at once sent to the house for consideration there, with the bill to base draft quotas on the number of registrants in Class One instead of on population, another of the administration measures already passed

General Wood May Go to Front.

Washington-Major General Leonard Wood has passed his physical examination for active service at the front and will be returned to command his division at Camp Funston, Kas. Unless he is selected for some more important post, General Wood probably retain command of the Eighty-ninth division when it is sent to France. In his fifty-eighth year, the former chief of staff enjoys robust health and is not bothered by the shell fragment wound in the left arm.

NO MORE STRIKES IN U.S. DURING WAR

REPRESENTATIVES OF CAPITAL AND LABOR AGREE TO BURY HATCHET.

PERMANENT BOARD TO MEDIATE

Both Sides Will Abide By Decisions of Arbitration Board-Right of Labor to Organize Conceded.

Washington-An agreement that there shall be no strikes or lockouts during the war, and a recommendation that all industrial disputes be body, are the principal provisions of a national war labor program projected by representatives of capital and la- 000 bushels, as compared with 3,000, bor and made public by William B. Wilson, secretary of labor.

The program was drawn up by epresentatives of capital, six of labor and two men representing the public, after conferences lasting for more than a month.

Workers and employers practically agree to bury the hatchet until the war is won.

The aribitration body, to be known as the national war labor board, will sit in Washington until peace is declared, to hear and adjust disputes along principles accompanying the recommendations. Working through local boards, to be appointed by it, the central body will attempt to bring to gether conflicting parties when all

other conciliation efforts have failed. Chief among principles outlined is recognition of the right of labor to or ganize. In deliberations of the tribunal during any dispute, however, present conditions regarding "open" and "closed" shops shall be maintained,

If the "sincere and determined effort" of the national board fails to bring about a voluntary settlement, and members of the board are unable Two of the Americans, officers to grant a decision, an umpire selectwho were wounded, were brought back ed by the board finally shall decide the

ALIEN PROPERTY SALE BILL LAW

President Signs Bill Authorizing Sale of Foe Holdings in U.S.

Washington-President Wilson ha signed the bill which paves the way for the sale of great German proper. ties in America and permits the government to acquire title to the great German steamship plers and docks at Hoboken, N. J.

Under the new law, the alien property custodian does not intend to in terfere with the property of mere in dividuals, but all the great corporate holdings, which practically were adjuncts of the German foreign office.

U. S. Buys and Charters Jap Ships.

Washington-The sale of 12 Japa nese merchant ships, deadweight capacity 100,000 tons, to the United States is the first of a series of concessions expected to deliver approximately 300,000 tons of Japanese ships for use by America in the war. A planes have been made in France by dispatch from Tokio says Japan has American mechanics and with Ameri chartered 150,000 tons of merchant can material, only about 25 Ameri ships and intimates that these ships are to go to the United States. The 150,000 tons is in addition to the 100, the original program it was proposed 000 tons purchased.

FRANCE'S FOOD SUPPLY LOW

Recent Retreat of Armies Made It Necessary to Destroy Stores.

Washington-The German drive in Picardy has compelled the destruction or abandonment of much of the food supply in the Ofse and Aisne regions, adding to the difficulties of the food situation in France.

The attention of the American government had been called to the need for additional food in France, where before the present battle the bread allowances were low. The influx of refugees from the battle zone, and needs of workers from whom additional efforts is demanded during the critical period of the battle, have increased the need for food.

The food administration's appeal to loyal American farmers to market their wheat, now, while the greatest settled by a government mediation difficulty is being met in feeding the Allies, had only slight effect last week when mill receipts increased to 3,250, 000 bushels of the previous week Normal receipts are 7,600,000 bushels

U. S. MAY RUN PACKING HOUSES

Committee Now Probing Meat Business With View of Seizing Plants.

Washington-Determination of a na ional policy governing meat produc tion, sale and distribution during the war, which may include virtually price fixing and definite control or actual federal operation of the big packing houses, has been entrusted by Presi dent Wilson to a special commission of five prominent government offf cials.

This step was taken at the recom ment's present course is "almost in tolerate in criticism from both pro ducer and consumer."

"WHEATLESS" RULE MODIFIED

Households Exempt But Restaurants Must Still Observe Order.

Washington-"Wheatless days," far as households are concerned, have been abolished by order of the food administration. The restrictions with regard to public eating places, restau rants and hotels, however, will be con tinued in effect.

Wheatless meals and days are op tional in private homes, but admin Washingtin-Official information has istration officials expect a whole terial, provided consumption here i diminished sufficiently to allow the opposing the Germans, a step which shipment to fighting forces abroad the American and French military of the bare amounts needed to tide

CALL OF CLASS 1 MEN DELAYED

May Be End of Year Before Entire Class Is Taken.

Detroit-Classification in Class No does not mean immediate service and physical acceptance of members in Class No. 1, after the examination does not mean an immediate call to camp life, E. Fred Thornton, govern ment inspector, wishes to impress upon all who are so classed.

That it is impossible to send all the men passed in class No. 1 is those in class No. 1 have already been examined. Some of these men may not be called before the end of the present year. The examination is simply to get this part of the work out of the way.

Only 25 Planes Built by U. S.

Washington-Army officers have told the senate military affairs committee investigating airplane produc tion, according to various senators that while training machines have been going over and many fighting can-made fighting airplanes will be delivered in France by July 1. Under to send 12,000 by that time.

YOUR LOYALTY TO COUNTRY'S CAUSE

ARE YOU MAKING SACRIFICES EQUIVALENT TO THOSE OF OUR SOLDIERS?

ALL CAN FIND WAY TO HELP

Make No Ridiculous Reservations; Hold Back Nothing; Share Your Money, Your Food and Your Cloth-Ing to Aid the Great War.

(By VIRGINIA TERHUNE VAN DE WATER of the Vigilantes-)

A good woman was discussing the rules of the food administration.

"I am doing a lot for my country," she said, "but there are certain trifles that I do not intend to give up. Such as white brend and bacon."

"No," she said in response to my astonished look, "I mean to have white bread when I want it. Why should I eat corn bread and other substitutes? I like white brend just as much as the soldiers and sallers do. And, anyway, what difference can it make if I use a little white flour and a few slices of bacon every day? I am only one person."

Only one of millions! Suppose they all took that attitude!

"I am no slacker," she added. "I work at the Red Cross four afternoons of each week, and I have made dozens of kultted things for the soldiers. But I draw the line at bacon and white bread and rolls"

Is this patriotism? I remembered the text: "These things ought ye to have done, and not to have left the other undone."

Another good woman was talking of the next Liberty Loan drive.

"Well," she declared, "they need not come to me for help! I am a business woman, and I have lost money on heatless Mondays, and since the government has made me do that I do not propose to help with their Liberty loan. I love my country, and I am a Red Cross worker, and all that-but there is a limit."

Should Be No Limit.

A limit! Is there may limit to what she would do if her nearest and dearest were fighting for his life? Would she stop to argue that she had given the suffered expensive woolen underwear, but that she drew the line at the renunciation of certain comforts so that he might have them? Would she be considered a good wife or mother or daughter if she held this attitude towards husband, child or parent?

Let us stop all these ridiculous res ervations, these talks of what we will do and won't do. Let us hold back nothing. Do the women who are sendmendation of Food Administrator ing their sons abroad hold back any-Hoover, who advised the president thing? Do these sons grudge risking that he found himself powerless it their beautiful youth, their lives, for protect properly all branches of the their country? Yet some people hestcattle industry and that the govern tate at white bread and bacon, and refuse to buy Liberty bonds!

The last-named hesitation is not only unpatriotic, but it is absurd. Later we will know the meaning of the expression, "What I give I have." money we invest in Liberty bonds will be ours when other money that we now have is gone.

All such talk as I have quoted is our sons give-ungrudgingly, proudly. because we are counted sade against evil that the world has after being taken to a hospital. ever known.

Make It An Honorable Service.

What would the Son of Rightcons invuries? He died for his cause. We women are not called upon to do that, (Some of us may wish that we were,) But we are called to sacrifice our selfishness for It.

I am not making light of the wondertoil at Red Cross stations; I am not forgetting the noble and vast army of wives, mothers, sisters and sweet, hearts who stop at nothing in their desire to help end the war honorably.

But I hope that such sentences as of the tongue. If they do, shame to the speakers. And shame to us who let such speech pass unreproved.

"His very living-such was Christ's dving."

We women "have not yet resisted unto blood." But some of our men have, and-God help us!-many more may have to. Can we then endure the our inner hearts we have paused to consider what delicacies we may use? Shall we not-in the language of our dear fighting boys-"cut out" all doubtful articles? And let us make of shown by the fact that 90 per cent of the trifling duty an honorable service. The cause ennobles all that it touches.

> True Respectability, Having the courage to live within one's means is respectability.

Build Character Firmly. The character which you are con structing is not your own. It is the generations will quarry stones for the temple of life. See to it, therefore,

that it be granite and not shale, Famous Writer Poor Physician. Schiller, the author of "William Tell," was medical officer in the Prussian guard before he found his profession irksome. He proved to be a very incompetent physician and was expelled from his regiment.

STATE NEWS

Ann Arbor.-Applications in the ordnance training course again are open as the result of an order from

Charlotte.—Isaiah Kimmel, 74 years old, only local Confederate army veteran of the Civil war, died at the home of his daughter in Grand Rapids.

Ann Arbor.-Engineering students in the University of Michigan have proposed to shorten the summer vacation four weeks to haster their enlistment in active service

Detroit.-Detroit and Michigan coat Prudden, that they would go out of mangled. business rather than accept the \$2.25 profit margin per ton allowed.

Harbor Beach.-This city is to have a lake shore park. A large piece of land on the shore of the lake has been set aside for the purpose and will be made ready for use this spring.

Lapeer.-Charles W. Smith, former speaker of the state house of representatives, has announced that he will not ned to send to France soon. be a candidate for lieutenant-governor because of the press of other duties. Monroe.-An automobile belonging

to George McLaughlin, in which Carleton postoffice safe blowers escaped, has been found in Toledo, where the men. same gang is believed to have blown a safe.

DETAILS OF FIRST WEEK OF THE GREAT BATTLE TELL OF BRITISH HEROISM.

OVERWHELMED BY NUMBERS

Fiercely Contesting Each Position, Haig's Men Fell Back in Good Order, Mowing Down the Advancing Foe and Often Counter-Attacking.

London.-Details of the first week

of the great battle in France show that, while the fighting has been more severe than in any previous offensive, there has been no cause for pessimism. The German losses have been terrific, probably 250,000 casualties having been suffered by the kniser's hosts.

At such cost they won less than one-third of the ground on which they had counted. The morale of the British troops has been perfect throughout and they have fought magnificently.

Million Germans in Action.

These facts stand out:

It is known that at least 1,000,000 Germans were engaged on the whole front of attack. In the Somme area not less than 52 army divisions were identified. The British line suffered mation they came on, offering excelits most severe buffeting in this lent targets. Ground was yielded by stretch, but was firm everywhere.

The Germans believed that a loss overwhelming numbers. of 500,000 would be a cheap price for success in the west, but with a loss already of 250,000 there is no prospect of their attaining the victory they

They regained all the ground lost in the Cambral battle and have taken back sections of the territory taken from them in the Somme offensive of last year.

The fighting was not by any means continual German advance. The British counter-attacked heavily and fought for every foot of ground.

Details of the Fighting.

In one battle on the extreme left the Germans employed not less than tempt was frustrated. nine divisions in an effort to break through. For three days the three British divisions held them at bay. Finally, under weight of numbers, the British retired behind the line marked by the ruined villages of Bullecourt, East Nogueil and Croiselles.

The next morning the Germans renewed the attack, striking northward from Fontainelles and Croiselles and westward from Cherissy. They drove in mass formation, wave after wave, toward the heights between Henin-sur-Cojeul to Henin hill.

Two hours of drum fire, in which gas and high-explosive shells were mingled, preceded the infantry attack. From eight o'clock in the morning until noon continuous waves of gray-clad

troops stormed the heights. British machine guns posted on the ridge swept down line after line of Germans. By three o'clock in the afternoon the Temons had succeeded in pressing past Henin bill on both sides and threatened to cut off the machine gunners posted on the crests. Not until then did the latter retire and rejoin the main British force,

Similar fighting was going on at the same time on the right wing. Tremendous pressure was brought to bear British finally yielded the ruins, after around St. Leger, Vauly and Vrau-

At-times under the German blows the British line sagged heavily, but at von Hindenburg in Peronne surveying no point did it give way.

Desperate Defense of Vaula.

A bitter buttle was fought for possession of Vaulx, but British machine jubilation throughout the empire, gunners posted in the ruins of the village held the Germans at bay. A ruined factory served as a fortress despite the shelling to which it was subjected.

Not until late in the afternoon was it impossible for the British to hold the town longer. Even then the retreat only went for a thousand yards The British rear guard fought every step of the way, and, returning to the main body, a counter-attack was launched against the Germans in possession of Vanlx and the village was

regained. The fighting continued all night, Finally Vaulx had to be abandoned before heavy night attacks, but only because German forces had pushed past further up the line and were driving to the attack of Mory.

Another bitter struggle was fought around Croiselles. At Mory Scottish and English troops inflicted tremen-

dous losses on the Germans. Sunday Battle South of Peronne,

War Is Bringing It Return of Old-Time Popularity.

EARLY AMBER IS THE BEST

is Early Maturing Variety and So Is Most Suited to Michigan Climatic Conditions.

From Department of Farm Crops Michigan Agricultural College,

East Lansing, Mich.-One of the many interesting minor effects of the war upon Michigan agriculture which in the southern and central counties of the state appears to be quite general, is a growing demand among farmers for sorghum seed. This demand has already assumed such unprecedented proportions that many seedmen are forecasting that if it continues, as now seems not unlikely, the visible (April) supply will all of it be melted away long before the planting season arrives.

Sorghum, as a crop both for forage and sirup-making is, however, by no means a new one in Michigan. There was a time not so long ago in fact when the sorghum press, where the juice was squeezed out of the cane, was just as common a feature in Mich-Igan's rural communities as the elder mill-and for that matter there are still some sections where farmers raise sorghum to supply sweets for the family table.

But there will be many more forms upon which this will be done this senson, for with sugar daily growing scarcer and commanding a price which compels the utmost economy, corn sorghum sirup will find a welcome place on the family table, and a ready sale on the market.

The seed corn shortage is at the same time causing many other farmers to consider the advisability of parting In sorghum as a forage crop-though the dearth of sorghum seed is almost as prenounced, if not more so, than is the seed corn shortage.

What and When to Plant.

Sorghums are planted from ten days to two weeks after corn, for the seeds are small, and if the ground is cold they do not germinate well and a poor stand results. Early amber, an early maturing variety, is probably the best adapted to Michigan conditions,

farm and around it, but in the farm The land is prepared for sorghum in itself the Leicesters held out, fighting much the same way as for corn. The and refusing to surrender until every crop makes a slow growth at first and It is essential to get rid of as many weeds as possible before planting. For man was killed or so severely wounded sirup the rows are drilled 36 to 42 inches apart with a corn planter, using 6 to 8 pounds of seed per acre. strength between Bapaume and Pe-Arras. The Germans, however, con-

The method of cultivation is the same as for corn. The first cultivation can be given with spike tooth harrow, and is quite effective in killing young weeds. The next cultivation should be with shovels or sweeps, deeply the first time with two or three shallow cultivations following.

Harvesting For Sirup.

drew. The emperor ordered a general son. Canes may be cut by hand, or

with the corn binder. In warm weather canes should not he ent more than two days before using as there is danger of fermentation. When a heavy frost occurs the sorghum should be cut and placed in large shocks at once. A heavy freeze will do but little damage provided the canes can be worked up at once upon thawing but after thawing they will spoil in a very short time. A ton of canes will yield 500 to 1,000 pounds of juice which will make 8 to 25 gallons of slrup. Four to eight tons of canes per acre is a good yield. .

Making Sirup. The sirup manufacturing process abnormal one. In average years spring consists of three main stages-(1) Ex- wheat is not dependable, and does not traction of juice; (2) clarification of give satisfactory yields in southern raw juice and (3) evaporation of juice. and central Michigan. Other spring The extraction is done by passing the cane between rollers. Two-roller and three-roller mills can be purchased, of food material per acre, and in the Seventy to 80 per cent of the canes opinion of the department it is not to are water, but it is not possible to ob-Germans endeavored to force a cross- labor requiring the highest degree of tain all of this as juice. With a threeroller mill 50 per cent of the weight of the cane should be obtained unless | tioned parts of the state. North-centhe cane is very hard and dry. The tral and northern Michigan are better canes after being passed through the adapted to it. Individuals desiring to mill can be used for roughage. Often- grow this crop, should plant the Martime they are put in the silo either quis, an early variety, and prepare with corn or alone. The juice as it their seed beds as early as possible in comes from the mill should be run April. The use of about 250 pounds through a strainer made of fine wire of acid phosphate per acre will inmilk) into a settling tank or barrel. The need for wheat is such that ever also used for storage. There should yields unprofitable to the individual be three tanks, one being filled, while may help at the present time, but we one is being emptied and the third set- must not lose sight of the fact that tling. Raw juice holds in solutions a the grain crops which will produce the number of impurities, which on stand- most pounds of food stuffs per acre ing slowly settle out. These are good will accomplish the most. On soils hog feed. Some makers provide spe-cial tanks and cladfy by heating. lowed to stand for a short time. The clear layer is then drawn off for evaporation. This process to to be preerred since heat hastens clarification

Evaporation.

A patent pan evaporator can be bought on the market. Do not put too much strup in the evaporator at once is a thin layer (about two inches) makes a quicker evaporation and alows the impurities to reach the sur face more easily and less volor is developed. If an ordinary gutter is placed alongside the pan when install ed, the seum can be raked off into this In starting a patent evaporator have water in all parts and heat this until the juice enters. The finished strup upon cooling should have a moisture content of not over 30 per cent. One gallon should weigh not less than 111/4 pounds. As the liquid thickens the boiling point is raised. Water at ordinary pressure bolls at 212 degrees Fahrenhelt, while a sugar solution containing not more than 30 per cent of water bolls at about 224 degrees Fahrenheit. When the boiling point changes from 212 degrees to 224 de grees the product is ready to remove from the fire. If an accurate thermometer is placed in the boiling sirup a rough estimate of the density of the product can be made. In taking the temperature do not allow the bulb of the thermometer to touch the bottom or sides of the evaporator or be exposed above the surface of the liquid. When the sirup has reached the proper density it should be removed from the fire and rapidly cooled. If cooled it makes a lighter sirup and a better grade. The sirup can be placed in tin, glass or wooden containers but these should be well scalded before using.

Sorghum for Forage. Since the foliage of sorghums remains green until the heads are mature, a fair quality of coarse forage is secured. The time of planting is the same as for sirup, that is, ten days to two weeks after corn planting time. Sorghum for forage is either sown thick in drill rows about 3 feet 6 inches apart at rate of 15 pounds seed per acre and cultivated, or sown with the grain drill or broadcast at the rate of one bushel per acre. When cultivated in rows the best method of harvesting is with a corn binder and the bundles set up in small shocks may be set together in a large shock and tied near the top. When sown broadcast the crop is cut with a mower or grain binder and handled as coarse hay. When cut with a mower a stubble of six inches should be left as this facilitates drying and gathering the heavy fodder with a hay rake. Heavy sorghum hay dries very slowly and should be left for one or two weeks in swath before raking and cocking and should be thoroughly cured in cocks before stacking. The average yield carries from 4 to ! tons per acre.

COUNTRY PASTORS TO MEET

Annual Conference Will Be Conducted at M. A. C .- Take Up War Problems.

East Lansing, Mich.-Country pastors of the state—and there are many hundred of them—will assemble at the Michigan Agricultural college on July 8 to 15 for their annual conference, it is announced by Prof. E. H. Ryder.

Harvesting For Sirup.

Sorghum increases in percentage of sugar as well as in total dry matter until it is mature. From the early dough stage until the hard dough stage is the right time for sirup making. If the seeds become hard there is danger of frost before all of the canes are made up, while if the seeds are in the milk stage an acld sirup with an unripe taste is produced. For best results the leaves are stripped while cames are stripped eral theme of the conference will be "The Church in Time of Peace and

A new feature of the conference this year will be a short course for rural ministers, running from July 8 to 20.

Win the War by Preparing the Land Sowing the Seed and Producing Bigger Crops

Work in Joint Effort the Soil of the United States and Canada CO-OPERATIVE PARMING IN MAN POWER NECESSARY TO WIN THE BATTLE FOR LIBERTY The Food Controllers of the United States and Canada are asking for

greater food production. Scarcely 190,000,000 bushels of wheat are available to be sent to the allies overseas before the crop harvest. Upon the efforts of the United States and Canada rests the burden of supply.

Every Available Tillable Acre Must Contribute; Every Available Farmer and Farm Hand Must Assist

Western Canada has an enormous acreage to be seeded, but man power is short, and an appeal to the United States allies is for more men for seed-

Canada's Wheat Production Last Year was 225,000,000 Bushels; the Demand From Canada Alone for 1918 is 400,000,000 Bushels

To secure this she must have assistance. She has the land but needs the men. The Government of the United States wants every man who can effectively help, to do farm work this year. It wants the land in the United States developed first of course; but it also wants to help Canada. Whenever we find a man we can spare to Canada's fields after ours are supplied, we want to direct him there.

Apply to our Employment Service, and we will tell you where you can best serve the combined interests.

Western Canada's help will be required not later than April 5th. Wages to competent help, \$50.00 a month and up, board and lodging.

Those who respond to this appeal will get a warm welcome, good wages, good board and find comfortable homes. They will get a rate of one cent a mile from Canadian boundary points to destination and return.

For particulars as to routes and places where employment may be had apply to U. S. EMPLOYMENT SERVICE, DEPARTMENT OF LABOR DETROIT, MICH.; GRAND RAPIDS, MICH.; SAULT STE. MARIE, MICH.; PORT HURON, MICH.

Every laying hen sold from the farms before the 1st of May means a loss of about 30 eggs to the food supply of the nation. These eggs are valuable food, manufactured largely from insects, weeds and grass, garbage and waste. The eggs, therefore, are almost wholly a net gain in human food, Moreover, the hen is just as good meat after she has laid Phone 201 CHELSEA, Mich are almost wholly a net gain human food. Moreover, the hen is just as good meat after she has laid these eggs as before.

GERMAN SHOULD BE TAUGHT IN SCHOOLS

But University Professor Says That Only American Instructors Should Be Employed.

In the closing session of the modern language conference, a section of the Michigan Schoolmasters' club, in Ann Arbor the past week, Prof. J. W. Scholl made a plea for the retention of German in the schools and colleges, but stipulated that the language should be taught by an American minded teacher. Dr. Scholl contended that when taught by a loyal American teacher, German did not inoculate the children of Uncle. Sam. In the closing session of the mod-

by a loyal American teacher, German did not inoculate the children of Uncle Sam very powerfully with "kultur," nor did it hinder Americanization. In part, Dr. Scholl said: "The language itself does not carry with it the civilization of the people of whom it is the mother tongue. Even an appreciative understanding of that type of civilization, its art of that type of civilization, its art,

of that type of civilization, its art, literature, political organization, industrial and scientific achievements, does not carry with it admiration. It may quite readily carry disgust and hatred. That all depends upon the teacher and manner of presentation.

"If properly taught by Americans, to Americans, for Americans, German remains a subject which has legitimate claims upon the attention of the college student everywhere, and the college student everywhere, and upon the high school student whether he is preparing for college, of for a professional career.

professional career.

"But the German language can no longer be taught as the vehicle of German kultur. The spirit of German teaching is going to be wholly changed. The textbook, with its glorification of everything German, is going into the limbo of museums of curios. The German minded teachers is going to perform a mixed eacher is going to perform a mixed teachers. er is going to perform a miracle, or he will follow the text-book. Teaching of German is going to be Americanized, or eliminated."

The Chelsea Hardware company has been achibiting a whole trainload oods in its show window for a few days—not a real, honest-to-good-ness train of course, but a mighty good imitation constructed from arti-cles of hardware, A. B. Clark was the designer and chief engineer.

the designer and chief engineer.

The parent who believes every word the son or daughter tells them in regard to the conduct of the teacher, is very likely to think ill of the teacher and without just reason. It is natural for youth to be prejudiced and to resent punishment even if it is just. Many a good school is spoiled by the parents upholding pupils when the proper treatment would be to up-end them and use the coal shovel.
