

FINE VIEW FROM STOFER'S HILL

United States Geological Survey Has Determined Approximate Height As 1,100 Feet.

The United States Geological Survey has practically completed its work in this vicinity, begun about July 1st, and Mr. Jennings and his party of assistants have moved their headquarters to Durand.

Some work remains to be done in the vicinity of Unadilla and North Lake, and north of those points, and several men are still at work in that section of the quadrangle, but the main party has been shifted to the Shiawassee town.

Mr. Jennings says that Stofer hill, Lyndon township, located about 4 1/2 miles northwest of Chelsea, is one of the most notable elevations in this vicinity and from its top a wide expanse of country is revealed as in a bird's-eye view. The elevation in round figures is 1,100 feet above sea-level.

A hill near the O'Connor farm in Lyndon is a few feet higher than the Stofer hill, but high standing timber interferes with the view from its summit. Another hill near Clear Lake is still higher by several feet, but the view from Stofer hill surpasses both in extent and beauty.

In loving remembrance of Emanuel Eschelbach, who departed this life one year ago Sunday, October 19, 1918:
He bade no one his last farewell.
He said goodbye to none.
We little thought when he left home
He would no more return.
Days of sadness still come o'er us.
Years of silence often flow,
For memory keeps him ever near us.
Tho' he died one year ago.
A bitter grief, a shock severe,
To part with one we loved so dear;
Our loss is great, we'll not complain;
But some day we hope to meet him.
When our days are o'er,
On that Beautiful Isle of Somewhere,
Where sorrows know no name,
His loving cousins.

--and no one could tell the difference
Monday night's audience mystified
Tries vainly to detect difference between voice of famous light opera star and RE-CREATION by Edison's New Phonograph
Those present at the Methodist church Monday night saw Glen Ellison walk onto the platform. They saw him take his position next to a beautiful cabinet. They saw his lips give voice to the opening lines of a Scotch song. Then suddenly his lips were still—but the song kept flowing on.
How came this? They were hearing Mr. Ellison's voice yet Mr. Ellison was not singing. The entire audience gasped as it slowly realized that it had been unable to distinguish between Glen Ellison's voice and the RE-CREATION of that voice by the New Edison.
This was the daring test undertaken Monday night at the Methodist church by Thomas A. Edison. He sought to prove that no difference exists between the voice of the living artist and its RE-CREATION by the New Edison. The musically cultured of Chelsea and vicinity were invited to pass judgement. No test could have been more exacting.
Glen Ellison made comparison after comparison. The mystified audience tried vainly to catch a difference between the original rendition and its RE-CREATION by the New Edison. No one could tell one from the other.
It was a triumph whole and complete for the New Edison.
The NEW EDISON
"The Phonograph With A Soul"
The instrument used in Monday night's Tone-Test is the regular model which sells for \$285. It is an exact duplicate of the Laboratory Model which Mr. Edison perfected after spending Three Million Dollars in experiments.
The New Edison alone of all phonographs is capable of sustaining this test. Until Mr. Edison knew it would do so, he regarded his work as unfinished.
Ask some one who was present Monday night. Learn the amazing truth. Then come in and let us prove it personally to you.
