

MYSTERIOUS SHOOTING NEAR GREGORY

Allan Hart, Shot Through Body, Said Hold-Up Men Assaulted Him Near Fulmer School.

Allan Hart, about 25 years of age, and until recently employed in the plant of the Lewis Spring & Axle Co. in this place, is the central figure in a series of tragic events and a mysterious shooting which took place near the Fulmer school house, northwest of Gregory, Saturday evening.

Hart first appeared at the home of George Fraser near the school house about nine o'clock Saturday night with a bullet wound in his body and claimed he had been shot by hold-up men. The bullet entered his left side, struck a rib and glanced upward and out near the shoulder blade.

People who are familiar with the circumstances aver that the young man shot himself; and it is said that Hart has admitted as much to Sheriff Miller of Livingston county.

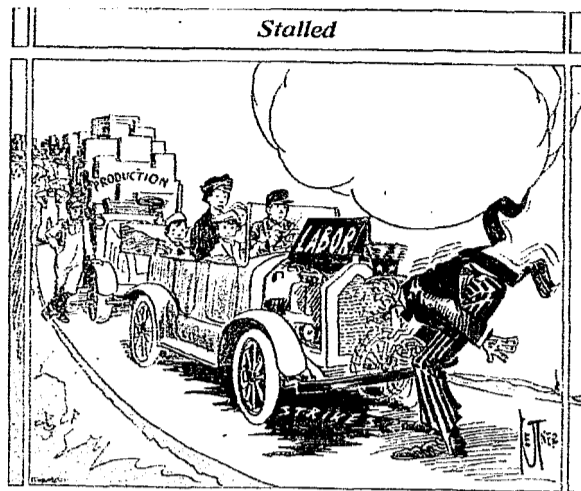

It is said that Hart went to the home of George Judson, also in the

neighborhood of the Fulmer school, and where he had previously worked. He found the family away and so helped himself to a watch, two rings and a revolver. He is said to have confessed that he was dependent over a love affair and shot himself, but many incline to the belief that he accidentally discharged the weapon when slipping it into his pocket, or later, and discredit both the alleged "hold-up" and the "suicide" theories.

THE FARMER'S POSITION

Editorial By Stuart Perry Expresses Our Views on Labor Question.

In a recent issue of the Adrian Telegram, Stuart H. Perry, editor, sounds a warning which we believe will be heartily endorsed by the majority of Tribune readers. Mr. Perry is a keen business man, has traveled extensively in this and foreign countries and is a close student of national and international affairs. He has lived in rural districts as well as small and large cities. The editorial follows:

"When the council of farm bureaus at Indianapolis recently demanded a ten-hour day in all productive industries, they showed a true insight into the situation of the nation and the world today. Nothing more clear-sighted and sane-headed has proceeded from any body of men in the whole period of turmoil. These men see the light. They know that the world's work cannot be done on half-time, and that there will be no prosperity if everybody's aim is simply to grab all he can and see how little work he can do.

"There is another kind of men that are seeing the light also, men whom we must reckon with whether we like them or not. These are the working men of Germany. They too are demanding a ten-hour day. Not all of them are, of course; some are still loafing, agitating, yelling wild stuff about the "proletariat;" but millions of Germans are working hard, and in many of the big German industrial centers these men are not only accepting a ten-hour day, but demanding it. These men, like the farmers at Indianapolis, see the handwriting on the wall. They also see that the world's work cannot be done on half-time. And they see something further—that if Germany works while the rest of the world dawdles and agitates, the great prize will still be hers.

"The resolutions at Indianapolis reflect a full appreciation of two very important truths: First, that short hours tend to check all prosperity and to raise the cost of living to everybody; second, that the present attitude of radical labor is hostile to the interests of the farmers as a class, because it forces the farmer to assume new burdens without sharing any benefits. The labor radical says: 'We propose to work half-time and draw full pay.' The farmer knows that agriculture cannot be conducted on a 30-hour week. He must do a real day's work, and he sees that if he has to work full-time while the factory man works half-time, he has got to pay the cost of the latter's idleness.

"The Telegram would not go so far as to say that a ten-hour day should obtain in all industries. In many situations an eight-hour day is actually more productive, and there are other valid arguments in its favor. But it was not the eight-hour day that these farmers had in mind. The eight-hour day is a conservative notion these days. It is a six-hour day, with two holidays a week, that the radicals are demanding nowadays, and presently it will be a five-hour day, and then a four-hour day. The question of hours is no longer discussed on its merits; it has become simply a game of grab of how much labor shall demand and how far it can carry coercion and intimidation. It is this tendency that alarms all wise heads, and it is against this tendency that the farmers at Indianapolis protested."

WILSON READY TO RUN MINES If Strike Takes Place Nov. 1, Country Will Be Seriously Hit.

Washington.—Industries throughout the United States will be paralyzed a month after the coal strike goes into effect Nov. 1, Government experts estimate. Most of the country will feel the strike seriously long before a month expires, even with good weather. With cold weather two weeks will be the minimum before the public feels the strike.

Figures submitted to the Senate recently show a 10-day supply on hand for railroads. Other figures show a month's supply in reserve.

Because of unequal distribution, many sections will be hit within a week.

The most vigorous steps possible will be taken by the Government, if necessary, to prevent the suffering that cessation of bituminous coal production by the strike of 400,000 workmen would cause. It is predicted by persons whose sources of information are of the best and who are usually correct in their predictions. If the utmost efforts to avoid a strike are unavailing, they say, a Presidential decree, under the Food and Fuel Act, will be forthcoming, by which the Government will take over and operate the mines, protecting them and the workers with United States troops.

This will be only the last resort, however. Every effort possible to bring about negotiations for conciliation or compromise between the men and the owners will be exhausted before this is resorted to. The threat will be made in time to give both sides a last chance, but if everything else fails, the President will sign the decree taking over the mines in the name of the Government.

TROOP GUARD REDUCED AT GARY Removal of Over 500 Federal Soldiers Takes Place Recently.

Chicago.—That the military situation in Gary, Ind., is considered well in hand was indicated by the removal last week of more than 500 of the federal soldiers sent to that city recently when alleged radicals among the striking steel workers staged a monster parade and are said to have threatened to march on the steel mills and "drag non-striking workers" from the plants.

Now less than 800 soldiers are on duty in the strike zone.

The strikers' executive council are emphatic in their denial that the so-called "red" element is influential in their strike movement and are planning to appear before the military authorities and demand that names of alleged radicals among the strikers be made public.

A quantity of "tear bombs" has been ordered shipped to the troops remaining in Gary. These bombs have no permanent ill effect, it was pointed out, but the gas with which they are filled produces copious tears, temporarily blinding their victims. The bombs will be used in case of further disturbances.

PRY HOLE THROUGH BRICK WALL AND CLIMB DOWN FOUR STORIES.

ONE HURT IN FALL, CAPTURED Rope Snaps and Prisoner Hits Ground Two Stories Below, Breaking Ankles.

Detroit.—Eight prisoners, including several known to the police as desperate characters, escaped last Sunday night from the Wayne county jail by prying through the brick and stone wall, and climbing down four stories on a ladder made of roped quilts.

The prisoners picked the mortar from between the bricks and stones with pieces of hard wood ripped from their coats. They had been detained in the hospital ward on the fourth floor.

One of the prisoners was captured. He is Edwin Fahmley, held for federal authorities on a charge of violating the drug act. He was found at Beaumont and Mechanic streets, crawling on hands and knees, by Patrolman Martin Conklin, of First precinct station. At Receiving hospital, it was ascertained that both his ankles were broken. Fahmley said the ladder broke when he was between the second and third stories.

Following are the men still at large: Charles Allen, 27 years of age, held on a charge of robbery; arrested on Jefferson avenue with two pistols in his possession.

Harry Black, 25 years of age, Negro; arrested on robbery charge.

James Dolan, alias Mack, 20 years of age; sentenced Saturday by Judge Wilkins to serve from seven and one-half to 20 years in Marquette prison for robbery. Dolan was the companion of Lenevieve Granger, when she shot and robbed a pedestrian.

Henry Davis, Negro, 34 years of age; held on a charge of breaking and entering.

Charles Foster, 30 years of age, breaking and entering.

Nikola Vitello, 25 years of age, charged with robbery of a Highland Park bank.

Robert White, 23 years of age, charged with grand larceny. White is alleged, stole jewelry and clothing valued at about \$2,000 from the Hotel Cadillac last August.

PRESIDENT SLOWLY RECOVERING

Operation Will Not Be Necessary to Reduce Swelling of the Glands.

Washington.—President Wilson is recovering nicely. No operation will be necessary to relieve the swelling of the prostate gland which has complicated the case and the president is making slow but satisfactory progress toward recovery from his nervous exhaustion.

The program of complete rest from official cares prescribed by Dr. Grayson and his associates will continue to be enforced, it was stated. There is no intention of referring to the president any matter not absolutely requiring the exercise of his official powers.

Dr. Grayson indicated he would not favor referring any bill to the president for signature at present, unless it was one on which he desired to exercise his veto power. Otherwise measures will be allowed to go upon the statute books at the expiration of the 10-day period provided by the constitution.

The prohibition enforcement bill now is awaiting presidential action. The impression prevailed that it would be allowed to become effective without Mr. Wilson's signature.

LUIKART CHILDREN HAVE BIG DAY

Take Auto Ride in Park and Enjoy All Kinds of Sweets and Dainties.

Chicago.—Sunday was a red-letter day for the Luikart babies, Shirley and Edna, who have practically recovered from the poison administered by their demented mother. Both showed so much improvement that Dr. Carter ordered up a big car and took them to Lincoln park rest-cure, where they indulged in ice cream and other dainties. After this the two little girls danced for them.

Thousands of children were in the park and the word spread rapidly that the Luikart babies were in the rest-cure. Children were admitted until the great room was filled, except for the little semicircle where the tiny dancers gave their entertainment.

The recommendations were submitted by Inspector Harry Jackson, of the traffic department; if approved by the superintendent, they will go to Coleman C. Vaughan, secretary of state, for final action.

Uncomplimentary. At one of the famous Lumbis Club gambols, a young and aspiring actor appeared on the program in an imitation of Nat Goodwin.

Goodwin himself was present at the performance. After the gambol was over the young actor, much to his delight, succeeded in getting himself introduced to Nat.

"Were you present at the performance tonight, Mr. Goodwin?" he asked. "Yes," was the answer. "I was there."

"And did you see my imitation of you, Mr. Goodwin?" continued the young man.

"Yes, I saw it," came the reply. "And," persisted the aspiring youth, "may I ask you to give me your verdict on the excellence and fidelity of my art as disclosed in the impersonation of yourself?"

"Well," said Mr. Goodwin, "one of us is rotten."—Everybody's Magazine.

NERVES GAVE OUT Serious Kidney Trouble Had Made Life Miserable, But Doan's Removed All the Trouble. Hasn't Suffered Since.

"I had such severe pains in my back," says Mrs. Albert Akroyd, 304 W. Indiana Avenue, Philadelphia, Pa., "that they almost doubled me up. Many a day I could not do my housework and at every move it seemed as if my back would break in two. My feet and ankles swelled until I had to wear large-sized slippers, and sometimes I couldn't stand up."

"I had dizzy spells and dreadful headaches and I used to get flushed. Doan's Kidney Pills," she says, "restored my eyes. Had a heavy weight been resting on my head, the pain could not have been more distressing. The least noise started me, I was so nervous, I couldn't control the kidney secretions and the pain in passage was awful."

"It began to look as though my case was beyond the reach of medicine until I used Doan's Kidney Pills. The first dose benefited me and four boxes cured all the troubles. I have had no further cause for complaint."

BILIOUSNESS Caused by Acid-Stomach

If people who are bilious are treated according to local custom they seldom get very much better. Whatever relief is obtained is usually temporary. Trace biliousness to its source and remove the cause and the chances are that the patient will remain strong and healthy.

Doctors say that more than 200 common diseases can be traced to an Acid-Stomach. Biliousness is one of them. Indigestion, heartburn, belching, sour stomach, flat and gas are other signs of acid stomach.

Swamp-Root, the marvelous modern stomach remedy, brings quick relief from these stomach ailments which lead to a long train of ailments that make life miserable if not corrected.

Swamp-Root naturally cleanses and carries away the excess acid. Makes the stomach strong, cool and comfortable. Helps digestion; improves the appetite and you then get full strength from your food. Thousands testify that SWAMP-ROOT is the most effective stomach remedy in the world. It is the help YOU need. Try it on your money-back-if-not-satisfied-refund. At all druggists. SENATE VOTES 55 TO 35 AGAINST AMENDMENT TO RESTORE PROVINCE TO CHINA.

DEMOCRATIC ORATORS ELATED

Republicans, However Say Result Has No Possibility of Bearing on Line-up For Ratification.

Washington. — The Shan-Tung Amendment, which provided that the Chinese province of Shan-Tung, taken from Germany by Japan, be restored to China, was defeated, by 55 to 35.

Democratic spokesmen were elated, especially for the reason, they said, that the vote was bigger than opponents of the treaty had expected.

Fourteen Republicans voted with the Democrats against it, while three Democrats voted for it.

Against adoption: Republicans—Cott, Cummins, Hale, Kellogg, Kenyon, Keyes, Leunroth, McCumber, McNary, Smoot, Spencer, Sterling and Townsend—14.

The roll call, in reality swept away six amendments instead of one, each change in the treaty text having been numbered separately by the committee in its decision to strike out the word "Japan" and substitute the word "China" throughout the sections relating to the provision of Shan-Tung.

Only three of the committee's 45 amendments now remain to be acted on by the senate, 36 previously having been rejected. Of these remaining one relates to American representation on the reparations commission and two to equalization of voting power in the League of Nations assembly.

SAYS EUROPE GETS ALL SUGAR

Longshoremen Won't Ask For Raise If Food Embargo Is Enforced.

New York.—Delegates representing more than 40,000 striking longshoremen of the 53 locals in the New York council, international association of longshoremen, assembled at City hall, Sunday, Oct. 19, to meet the "conciliation committee," a committee composed of Mayor Hylan, James L. Hughes, of Philadelphia, and Paul A. Vercarelli, who were appointed by Secretary of Labor Wilson to attempt a settlement of the strike.

John F. Riley, chairman of the strike committee, opened the meeting with a review of the men's grievances which he laid to the national adjustment commission's award of five cents an hour increase. This the men have refused.

"These men load tons upon tons of sugar for Europe every day," declared Mr. Riley, "as well as a multitudinous variety of life's necessities, while they are scarcely able to buy the same things for themselves.

Sugar, he said, was wasted by the carload as a result of broken sacks. "If these men were to take a pocketful of that wasted sugar, they would be arrested," he said. "There should be an embargo of these food products to reduce the high cost of living; and if this is done, we won't ask another cent in wages."

These expressions of appreciation, at times, carried the enthusiastic audience to its feet and, at such times, President De Valera was compelled to step and wait until the demonstrations of approval had subsided.

"FIDDLE-FIT"

Keep Liver and Bowels Clean and Active with "Cascarets"

Sick headache, biliousness, coated tongue, sour, gassy stomach—always trace this to torpid liver; delayed, fermenting food in the bowels.

Poisonous matter clogged in the intestines, instead of being cast out of the system is re-absorbed into the blood. When this poison reaches the delicate brain tissue it causes congestion and that dull, throbbing, sickening headache.

Cascarets immediately cleanse the stomach, remove the sour, undigested food and foul gases, take the excess bile from the liver and carry out all the constipated waste matter and poisons in the bowels.

A Cascaret tonight will have you feeling clear, rosy and as fit as a fiddle by morning. They work while you sleep.—Adv.

What the Railroads Collect.

In 1916, a year of normal conditions, each person in the United States paid \$25 for railroad freight, a bill of \$125 annually for the average family.

Therefore each increase of 25 per cent in freight rates above the 1916 level means an increased per capita tax of \$6.25, or an increased tax for each American family of \$31.25. Freight rates have increased more than 50 per cent since 1916, therefore the freight bill for the average family is now around \$200, all of which is paid indirectly, of course. These figures are worth studying before we again dip into our pockets to help railroad finances.

Worth Remembering.

Here is a good thing to remember: "When you get sore at the world, don't forget that it will not hurt the world at all, while it may do you inconceivable harm." You are but a very small part of this old world and it will wag along just about as well without you as with you, so your complaints are not going to make so very much difference after all. Better keep sweet and do what you can to make conditions better instead of getting grouchy because things do not go to suit you. The cheerful man gets farther than the grouchy.

ACTOR ENDS LIFE; LEAPS 17 STORIES

Charles H. Weston Falls From Wealth to Poverty in Few Years.

"I KNOW I AM CRAZY"

Pathetic Farewell Note Shows Heart Wrung at Leaving Wife and Son —Describes Feelings Just Before Death.

New York. Charles H. Weston, actor, stage manager and moving picture director, who sank from a position of wealth and fame to poverty in the last few years, ended his life by leaping from a window on the seventh floor of the Astoria building.

It developed from letters in the man's pocket and from further investigation that he had applied to George M. Cohan for a job as a "strike breaker" in the actors' strike, and had received a reply the following day that no place was open for him. There was an unmailed letter to Mr. Cohan in his pocket.

The most remarkable document found on the dead man, however, was a letter addressed "to anyone interested," which contained a justification for his suicide and a description of his feelings on the point of leaping.

Leaves Pathetic Note.

The letter bore the following heading: "How one feels just before death by jumping from the eighth-story of a building—by Charles H. Weston, just before jumping from the eighth floor."

"The letter said: "Last night I saw my wife and darling son the last time on this earth. It is a strange feeling to know that it is the last time. Something in your soul seems to cry, 'How wonderful that last kiss is!' What a coward I feel! Still, I know I am not a coward. It is far better to die at once than a lingering death in an insane hospital, as I know I am crazy."

"I find myself in the most unknown places to me. I cannot sleep without the most hideous dreams. "They will be far better off without me. I cannot find employment. I am unable to keep them. I am dragging them down. I cannot live and let it be known that I am the cause of their downfall. All this comes to my mind as I am waiting to jump. People are passing far below. I do not want to fall on anyone. I am

crying like a child. My heart and head ache. Yet I am not nervous. I started to jump a few seconds ago, but a vision of my dear, dead mother came before me just as plain as day.

Prays for Family.

"Say your last prayer—the one I gave you years ago. I am praying now. I pray God to keep my wife, who is the finest woman on earth; my boy, who is my heart's dream. I pray God to keep them from sorrow and darkness. Oh, God! How I love them! My dear wife will give anyone who is interested the most amazing history of me that one could hear."

"Billions of thoughts pass through my brain. What will I see in five minutes? Will I go to another world? Will my soul rest in peace? Five minutes from now will I know what dying is? I have no fear of hell. I cannot suffer any more than I have. My body is in hell. If I am to go to hell, only my soul can go, but I cannot save my soul."

"I feel just like a man waiting to meet his boss when there is something wrong. Good-by, all. May God bless you."

Juror Drinks Evidence.

Atlanta, Ga.—Henry Henken, a juror in the trial of Henry Linee, negro, who was charged with violating the prohibition law, was fined \$25 by Judge Bourke for taking a drink of some of the "evidence" in the case. "It is almost unthinkable that one of the jurors in this case should violate a law while sitting in judgment on a man who is charged with violating the same law."

Clay Output Falls Off.

The quality and value of the clay mined in the United States in 1915 showed a considerable decrease in output but an increase in value compared with 1914. The total quantity of clay mined and marketed as such is estimated at 2,840,000 short tons, valued at \$9,207,094, or \$3.25 a ton. This is a decrease of about 304,000 tons, or 10 per cent, in quantity, but an increase of about \$1,105,000, or 14 per cent, in value. The imports decreased in both quantity and value.

Values of Precious Stones.

Emeralds ranked with rubies and sapphires as the most costly gems of the ancient world. Then diamonds were worn in a rough state. The art of cutting the precious white stone was not discovered until the fifteenth century when the flashing brilliance of the diamond was brought to light. Emeralds are still fashionable. They are rare and good ones are becoming rarer. Carat for carat they are as valuable as diamonds.

The First Cup and Saucer.

The beverages of the sixteenth century were water, mead, sack and ale. In the middle of the next century tea was introduced, and with it came the Chinese or "china" teacup. The handle of the cup came from Mediterranean lands. Originally it was made of thick and strong earthenware and applied to heavy jugs and lamps.

THIS WOMAN SAVED FROM AN OPERATION

By taking Lydia E. Pinkham's Vegetable Compound, One of Thousands of Such Cases.

Black River Falls, Wis.—"As Lydia E. Pinkham's Vegetable Compound saved me from an operation, and I am telling you enough in praise of it, I suffered from organic troubles and my side hurt me so I could hardly be up from my bed, and I was unable to do my housework. I had the best doctors in Eau Claire and they wanted me to have an operation, but Lydia E. Pinkham's Vegetable Compound cured me so I did not need the operation, and I am telling all my friends about it."—Mrs. A. W. BINSER, Black River Falls, Wis.

It is just such experiences as that of Mrs. Binzer that has made this famous root and herb remedy a household word from ocean to ocean. Any woman who suffers from inflammation, ulceration, displacements, backache, nervousness, irregularity or "the blues" should not rest until she has given it a trial, and for special advice write Lydia E. RUSSIANS HIT BY FAMINES

Shortages of Food Date From 1600—8,000,000 Persons Reduced to Starvation in Famine of 1911.

Next to the proletariat of India and China, the Russian peasant feels the pinch of poverty and hunger more keenly and more frequently than any other, says the National Geographic Society. One of the earliest Russian famines on record was that of 1600, with a death toll of 500,000 peasants. Cats, dogs and rats were eaten, and even the strong overcame the weak. Human flesh was sold in the markets. Three Russian famines of recent date were among the most severe in history—in 1891, 1900 and 1911. During the ten years following the first of these, the government allotted nearly \$125,000,000 for relief, but the sums were not always judiciously expended. In 1896 the government gave 40 pounds of flour a month to all persons under eighteen years old and over fifty-nine. Those between these ages received no allowance, and the older and younger shared their pittance with the others.

The famine of 1911 extended over one-third the area of Europe and affected 30,000,000 persons, while 8,000,000 were reduced to starvation. Woods, the bark of trees, and bitter bread made of acorns, constituted the chief diet.

Kissing either wife or child was a punishable offense in England in the seventeenth century.
