

COMMUNITY COUNCIL ORGANIZED THURSDAY

Representatives From Many Local Societies Met With Community Organizer Bassett.

At a meeting Thursday afternoon in the American Legion club rooms, a Community Council was organized with Rev. P. W. Dierberger as president and Prof. McCloskey of the Chelsea schools, secretary.

The meeting was very well attended by the persons representing the several lodges, organizations and business institutions of this community. These present were unanimously in favor of the formation of such a central agency to act as a clearing house for all leisure time activities in a real democratic community spirit.

A great many activities were discussed and the enthusiasm of this first meeting speaks well for real concerted action on the part of the newly formed community council.

Mrs. Brown of Ypsilanti, the women organizer for the county, and Mr. Bassett of Ann Arbor, director for community service, explained in detail what community service meant, the purpose of its organization, and answered many questions with regard to it.

The following persons were invited to attend the meeting, and many responded: Masons, W. C. Boyd; K. of P., J. H. Boyd; O. E. S., Mrs. Charles Martin; Macabees, Mrs. Wm. Campbell, Mrs. Josie Johnson; Woodmen and Township Supervisor, H. J. Dan-

cor; Pethian Sisters, Mrs. J. H. Boyd; Bay View Reading club, Mrs. G. W. Palmer; Catholic women, Mrs. J. E. McKune, Mrs. H. H. Fenn, Mrs. C. E. Whitaker; Lewis Spring & Axle Co., Fred Lewis; Hoover Steel Ball Co., L. T. Freeman; Chelsea Screw Co., M. J. Dunkel; Goebel Garment Co., Mr. Goebel; Chelsea Tribune, Ford Astell; Chelsea Standard, O. T. Hoover; American Legion, Dr. A. A. Palmer, V. Ogden, Clara Fenn; Catholic church, Fr. VanDyke; Methodist church, Rev. Beatty; Congregational church, Ed. Vogel, Frank Storms, Rev. Dierberger; Lutheran church and Chelsea village, P. G. Schaible; Parent-Teacher's Assn., Mrs. Andros Gude; School Board, S. A. Mapes; Chelsea schools, Prof. McCloskey; Red Cross, Mrs. H. D. Witherell, Mrs. D. H. Wurster, Mrs. L. G. Palmer; Business Men's Assn., R. D. Walker.

SLIP WAS SERIOUS.

Mrs. Carrie Schiller slipped on the icy pavement at Main and Middle streets shortly after nine o'clock yesterday morning and broke her left limb, above the ankle. Fortunately only the larger bone was broken and Mrs. Schiller is resting as comfortably as could be expected.

FUEL BAN IS RAISED.

The village council last evening raised the ban on the use of fuel and electric lighting and power current, imposed last week and business places are now free to resume their usual opening and closing hours.

Life's Little Worries

ARE GRADING NEW ROAD

Steam Shovel Started Operations On Friday at Rank's Mill.

Work on the grade for the new federal aid trunk line roadway over the Territorial road started Friday when a steam shovel was put into operation at Rank's mill on the west county line. A number of farmers in that vicinity are at work with their teams hauling the excavated dirt away to the "fills." It is said that at the Mike Rank place a cut of six feet will be made. The eastern end of the Jackson county road was never completed for about 1,300 feet on account of the big cut on the Rank hill, but the present contract includes the finishing of that job so that for a time the shovel will work on the cut and fills both east and west of the county line. It is planned to continue the shovel in operation all winter, weather permitting.

MEETING P. H. N. COMMITTEE.

The monthly meeting of the Washtenaw County Public Health Nursing committee was held last Tuesday in Ann Arbor. Chairmen from Chelsea, Milan, Saline, Ypsilanti, Manchester, and Dexter were present, also Mr. Douglas, chairman of the county chapter; Mrs. Boynton, chairman of the county nursing committee, and the nurses from the several districts in the county.

Reports from all the nurses were read and filed. Miss Havey, the supervising nurse, gave a report of the total work done in the county, which shows a constant increase. School work has begun with all the nurses, and Saline has a part-time school physician.

Mr. Douglas gave his order for the engagement of a nurse for the north-eastern part of the county, with headquarters in Ypsilanti. This will make a total of seven Red Cross Public Health Nurses in this county, not including Ann Arbor, whose nurse is financed entirely by the locality.

VOTED DOWN NEW E. R. SCHOOL.

At a special election in Eaton Rapids, Thursday, the proposition to bond the school district for \$220,000 for a new school building and auditorium was defeated, the vote being 432 no and 60 yes. W. L. Walling, formerly of Chelsea, is superintendent of the Eaton Rapids school. Regarding the election, the Journal of that place said:

"The result of the ballot should not be taken to mean that the taxpayers of the district are not in favor of providing more suitable buildings, for that is not the case, as we learn from general conversation with our people, none of whom will argue that our school buildings are not inadequate. All admit it, and none deny it. The adverse vote was simply an expression of the people against the idea of what they term too elaborate buildings for the town and a lavish expenditure of money."

HOW'S YOUR "YELLER RIBBON."

Ever hear that one-time popular song, "And Round Her Neck She Wore a Yeller Ribbon?" Some song if you like that way. But what we started out to ask is how your own little "yeller ribbon" stands—we mean that little address label in the upper left-hand corner of the first page of the Tribune. Shows your name on it, and also shows when your subscription expires, or is expired.

Thus, if a "yeller ribbon" reads: Truman H. Newberry Jan 20 it means that Mr. Newberry's subscription will expire the first of next month. Some people say that he is already dead politically.

If the label reads: Henry Ford Jan 19 it means that Henry is nearly a year in arrears, but has a fine chance to get square with us before the year's end.

Look at your "yeller ribbon" now and see how you're tagged. Then if you're in arrears better pay up at once before some investigating committee gets busy and prefers 100 indictments against us for "stringing" you all about a "yeller ribbon" song.

DENTER TWP. TAX PAYERS.

I will be at the Kempf Com. & Sav. bank, Chelsea, on Saturday, Jan. 8, 1920, to receive taxes. Wallace Walsh, Township Treasurer. 2712

Shop a little earlier this year!

ALOYSIUS IS BACK.

Aloysius Policht, the young Polish lad who has given the county officials much trouble for several weeks, returned to Chelsea the past week—came in on a midnight freight after running away from the Ann Arbor jail, where he had been held since being picked up in Ypsilanti several weeks ago. Aloysius is a problem; too young to be committed to the reform school and too incorrigible to be handled in school, or by the county transient officer. Meanwhile, Aloysius continues to live up to the claim of the Ann Arbor officers that "he is the worst juvenile offender in the county." He claims Chelsea as his home.

When questioned by a Tribune reporter, Friday, he said he "guessed" he'd go to Jackson and work in the brick yards in a few days. Said he could catch a freight out any time he got ready to go. And there you are!

CHECKER TOURNAMENT SOON

Annual Contest of the State Checker Association In Ypsilanti, Jan. 1.

The annual meeting and tournament of the Michigan State Checker association will be held Thursday, January 1st, 1920, in Ypsilanti. The business meeting will convene at 9:30 a. m. Play will begin in the afternoon at one o'clock and continue until the contest is finished. The meeting will be at the Hawkins house.

W. H. Yeatman of Ypsilanti is the president of the association, Frank Corcoran of Detroit is vice president, and Warren H. Boyd of Chelsea is secretary and treasurer. Chelsea has a number of expert checker players who usually attend the tournament each year and who frequently give good accounts of their playing.

HEALTH NURSE'S REPORT.

The report of the public health nurse, Miss Ruth Howe, for the month of November, follows: Total visits, 203, of which 63 were nursing visits. Fees collected for nursing visits, \$25.50. One school, including 15 children, was examined. There have been three corrections in the schools examined.

The Chat'n Sean club has shown an interest in the work of the nurse and is doing some sewing, which co-operation is very much appreciated. Chelsea has a number of expert checker players who usually attend the tournament each year and who frequently give good accounts of their playing.

WEST. WASH. FARMERS' CLUB.

The Western Washtenaw Farmers' club will be held in I. O. O. F. hall Friday, November 19th. There will be an oyster dinner in charge of the men members, but every one is to bring something for the dinner, also dishes.

Following is the program: Music by the club. Roll call—Christmas quotations. Discussion, "The Care of Poultry." N. W. Laird. Music by the club. Address, "Christmas"—Rev. H. R. Beatty. Closing song.

LO! THE POOR INDIAN.

A friend in Montana recently sent us a copy of the Browning (Montana) Review. Among other items we noticed the following regarding Tom Blackfoot Indians: A marriage license has been issued to Tom Many Guns and Josephine Iron Eater, both of the south side. When the Many Guns and the Iron Eaters begin intermarrying, it is safe to say that their progeny will probably go under the monicker of "Dynamite" or some such similar name. Well, here's hoping.

NEAR ZERO TEMPERATURES.

Since Sunday morning near-zero temperatures have been recorded in Chelsea and vicinity. Yesterday the maximum was about 15° above and the minimum about 6° above. A strong wind tended to increase the resulting discomfort. Continued cold weather is predicted for tomorrow.

FOR SALE—Old newspapers for wrapping, shelves, etc. Large bundle only five cents at the Tribune office.

NEIGHBORHOOD NEWS

Brief Items, of Interest in Chelsea And Vicinity, From Nearby Towns and Localities.

MASON—Mrs. Joseph Dubie, 60, was burned to death in a fire that destroyed the farm home near Aladon Center early Monday. Mr. Dubie was burned about the head and hands.

WEBBERVILLE—Last week while Archie Hawley was digging a drain near this village he ran into a vein of coal. Taking some of the newly discovered coal home and putting it under the cook stove he found it burned with an intense heat and with very little smoke. It undoubtedly is part of the vein which underlies the whole section of that part of the country.

HOWELL—Stephen G. Fishbeck, 79 years old, was found dead in his home Friday morning with his clothing on fire. It is believed he suffered a fainting spell while carrying a kerosene lamp, which was overturned near him. A brother, Leonard, discovered the body upon going to the house when the aged man did not appear for work at the sheemaking shop of Fishbeck brothers.

MANCHESTER—The Welfare association has just announced that the necessary \$5,000 to secure a factory for Manchester has been raised. Several weeks ago a committee representing the Michigan Seating company of Jackson came here and placed before the Welfare association a proposition whereby, if suitable quarters could be found, they would locate a branch unit at this place. The new enterprise is now assured.

INSTALL NEW MANGLE

The Chelsea Steam Laundry is installing a large new mangle for flat work, including sheets, towels, etc. The machine will take a piece up to 100 inches in width and practically unlimited length. It takes four hands to operate it to advantage. The new machine will not be ready for operation until some time next week.

SYLVAN TOWNSHIP TAXES.

Taxes for Sylvan township, including dog taxes, are now due and may be paid at Keusch & Farmers store. The dog tax must be paid on or before January 10, 1919. William Fahrner, Township Treasurer. 241f

DENTER TOWNSHIP DOG TAXES.

I hereby notify all owners of dogs in Dexter township that dog taxes must be paid on or before Jan. 10, 1920. Wallace Walsh, Treas. 2712

WANT AND FOR SALE ADS

Five cents per line first time, 2½ cents per line each consecutive time. Minimum charge 15 cents.

TRY A "LINER" AD when you have a want, or something for sale, to rent, lost, found, etc. The cost is trifling.

FOR SALE—Pigs eight weeks old. Sherman Pierce, phone 155-F21. Chelsea exchange. 2713

FOR SALE—Three new milch cows; 2 Jerseys and 1 Jersey-Holstein. Ed. Whipple. 2711

FOR SALE—Good organ, walnut case, good condition. Mrs. J. G. Wagner, phone 127-W. 2713

WANTED—Will pay cash for good second-hand safe. Inquire Tribune office. 2713

LOST—Pocketbook containing bills and change, Thursday evening, probably at I. O. O. F. hall. C. W. Saunders, phone 102-F31. 2711

FOR RENT—Light housekeeping rooms, 319 Congdon St. 2613

FOR SALE—Pair hunting boots. phone 172. 2513

AMERICAN LEGION will give a dancing party in Macabees hall, Friday evening, Dec. 12th, at 8 o'clock. Music by Matthews or orchestra (who play at Detroit Athletic club). Bill \$1.00: unaccompanied ladies 25¢. You are cordially invited. 2512

FOR CHRISTMAS TREES, all sizes, also landscape work and general nursery stock, farm and garden seeds, cyclone and auto insurance, call on A. Knercher, 15 S. Madison St., Chelsea, or phone 263. 2512

FOR SALE—Jersey cow with calf by side; also several nice R. I. Red cockerels. W. S. Pielemeyer, phone 155-F4. 2513

FOR SALE—Good set heavy harness. Will Wolff, 422 West Middle St. 2513

SALESMAN and distributor—Wanted for Chelsea and vicinity. E. H. Matthias, 207 S. Ingalls St., Ann Arbor, Mich. 2513

FOR SALE—Hard coal stove, base-burner; large size and good as new. C. J. Heelschwendt. 2413

FURNITURE REPAIRING, cabinet work, upholstering, rebuilding and refinishing; go-cart wheels re-tired. E. P. Steiner, Steinbach Bldg., West Middle St. 221f

WANTED—People in this vicinity who have any legal printing required in the settlement of estates, etc., to have it sent to the Chelsea Tribune. The rates are universal in such matters, and to have your notices appear in this paper it is only necessary to ask the probate judge to send them to the Chelsea Tribune.

-In Friendly Touch-

To look upon affiliation with this institution as a mere depositing-and-borrowing connection is to have but the faintest conception of its scope.

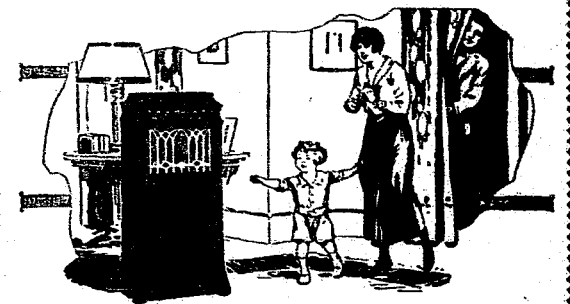

So numerous and varied and individualized are the ways in which we can help you in your business that to really know and appreciate them it is necessary to be identified as one of our patrons coming actively in touch—in friendly touch—with our Officers.

Commercial accounts are invited.

Proprietor.

CONCEALED AMERICAN BATTERY IN PICARDY

The American batteries have been an important factor in stopping the great drive of the Huns on the Picardy front. The picture shows a concealed American battery and members of the gun crew gathering empty shells from the powerful 75's.

TREAT WOUNDED IN FACE OF FOE

Red Cross Workers Refuse to Retreat While There Is Work To Do.

AMERICANS IN HERO ROLE

Incident of Early Spring Offensive of Huns on the Somme That Should Make Americans Proud of Their Men.

Washington.—The story of the part America and Americans played in aiding the British and the French during the early spring offensive of the Germans on the Somme can never be adequately told. The whole picture is too big to paint on one canvas. It is only by describing the work of individuals and particular groups of workers that some idea of the American effort and its effectiveness in this historic battle can be brought home to the people back home—and then only in a small way.

While it is perhaps only a very small incident in the history of that great affair, the story of how a small band of American Red Cross workers "carried on" at one of the evacuation hospitals back of the British front should make Americans proud. When all but a few of the hospital staff had left with the two hundred or more patients and the Germans were advancing only a few miles away, four American Red Cross workers, assigned to the American Red Cross for work at this particular hospital, declared their intention of "sticking till the end" and stayed.

The Americans made their decision not because of sheer bravado, but because the hospital had the opportunity of serving a few wounded soldiers from day to day—and could save their lives. And at this writing these Americans are still there, giving much-needed medical attention to French and British soldiers who are brought back to this hospital because it is the nearest one back of that point of the line.

Stay on the Job.

The big guns of the British and French have been planted in the rear of it—and then moved further back. The Boche armies come over at night. The little group of Americans have seen the troops, guns and transports go by in streams to points in the rear, but as long as the wounded are brought there, these Americans will stay.

A few hours after American Red Cross headquarters in Paris learned of the big German offensive, it dispatched eight trucks and motor cars to this hospital to aid in the evacuation of the patients. Night and day the Red Cross drivers worked bringing the wounded from the hospital to Paris.

When this had been accomplished

RAISE GARDEN STUFF

Red Cross Establishes Truck Farms in France.

Supplies Recreation and Employment to Convalescents and Increases Food Supply.

Paris.—With a view to supplying recreation and employment to convalescents, and incidentally increasing the food supply, the American Red Cross has established ten truck farms in connection with base hospitals in France where, under trained supervision, the convalescents are raising vegetables for consumption in the hospitals. The number of farms will be increased during the year, the American Red Cross supplying seed, implements and trained supervision, as well as money for operating expenses.

At one place, where there are three base hospitals together, a farm of 100 acres is now under cultivation, though

SALT WOODEN SHIPS

Method Used to Lengthen Life of Vessels.

Turns Seepage Into Brine, Which Acts as a Preservative of the Wood.

Seattle, Wash.—C. O. Morrow, president of the Elliott Shipbuilding company, suffered something of a shock the other morning, but at that it was nothing to the shock suffered by several prominent citizens who were taking a stroll through the company's big wooden shipbuilding plant.

The citizens were shocked when they discovered that 20 tons of rock salt is used in building each of the big wooden ships now under construction in Seattle. Mr. Morrow was shocked because his callers didn't know that rock salt is a shipbuilding material. Everybody on the water front knows that, but it seems that there are a lot of prominent business men who didn't. There is now a suspicion that only a very few residents east of Railroad avenue know that a wooden ship has to be salted.

In showing the prominent citizens about his plant Mr. Morrow came to the building in which he stores this rock salt. A railroad car was unloading another shipment.

"This is where we keep the salt for the ships," said Morrow. "How, how?" said one caller, who is something of a humorist. "I suppose you're afraid the ships will get too fresh?"

"That's the exact truth," said Mr. Morrow.

But the citizens wouldn't believe him until they had examined the salt. Some of them tasted it. The storehouses contained 120 tons.

Mr. Morrow explained that the salt is poured between the frames of a wooden ship above the water line and is tamped down solid. Then if any water seeps into the spaces between the frames it is turned to brine and does not damage the wood. Instead, it acts as a preservative.

FIRST CONSOLATION

The wounded soldier's first consolation is a cigarette to soothe his nerves, and his comrades are sympathetically eager to bring him the comfort.

"Flat-Foot" Walks 113 Miles.

Elkins, W. Va.—Tom Huns, twenty-two, a miner, says "mine" is lucky for him. Eight times he tried to get into the United States military service but failed because of flat feet. The ninth time carried him over. He is now a member of the naval reserves. To prove that he was able to hike with the best of them, Huns walked 112 miles.

Prevents Sugar Famine.

Pullman, Wash.—Boys and girls belonging to Washington's juvenile clubs are to be enlisted in the patriotic movement to raise sugar beets this year, to be stored and set out in the spring of 1919, to produce beet seed for the spring of 1920. It is expected in this way that the threatened sugar famine may be averted.

Order Pickled Cabbage.

Pittsburgh, Pa.—The local food administration has decided to make sauerkraut less German by striking out the hyphen. It has been officially placed on the list of patriotic foods and it is believed more would be eaten if given the name "pickled cabbage."

The average farm is about eight acres. Two of the larger farms are equipped with tractors. For the most part, however, the work is hand labor, that the convalescents may profit to the utmost from the outdoor exercise.

Order Pickled Cabbage. Pittsburgh, Pa.—The local food administration has decided to make sauerkraut less German by striking out the hyphen. It has been officially placed on the list of patriotic foods and it is believed more would be eaten if given the name "pickled cabbage."

Through these gardens many French soldiers will have their first taste of the great American delicacy, "corn on the cob." A greater use of a variety of vegetables is made in France than in America and the Red Cross is supplying seed for beans, beets, cabbage, cauliflower, Brussels sprouts, carrots, celery, Swiss chard, chicory, corn, cu-

DAIRY BARN CAN BE KEPT CLEAN

Sanitation Depends Upon Proper Construction Methods.

CONCRETE BEST FOR FLOORS

Plans for Structure Should Be Made With a View to Providing Plenty of Sunlight and Air for the Stock.

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 127 Prairie avenue, Chicago, Ill., and only inclose three-cent stamp for reply.

By WILLIAM A. RADFORD.

The biggest criticism which may be launched against the building of the average farmstead is that it was done in a too makeshift manner. The temporary nature of many of our farm buildings is merely a sign of our agriculture. We are not yet settled to farming permanently—grandson following son and son following father on the same ancestral acres. We are mostly exploiters as yet, soil-miners, or perhaps developers would sound less harsh. There has always been a place "out west" to which we could move when the old place wore out. Now the day when we could move onto pastures new is over and a new era is no longer available. It is time to begin to build our farmsteads to stay. They should be planned to last and built for

permanence. There is little sense in building temporary, tumble-down places which have to be done over in a few seasons.

A dairy barn is usually a rather expensive structure—too expensive to permit of making mistakes in planning or equipping. A dairy barn should first of all be a clean and sanitary place, because here is produced food of first importance. And, strange as it may seem to some people who are familiar only with the usual type of unhandy barn reeking with dirt, dairy barns can be planned in such a way and furnished with such modern equipment as to make them absolutely sanitary and capable of being thoroughly cleaned at no great cost for labor.

Best Interior Arrangement. As soon as you begin to talk about how a man should arrange the inside of his barn you step on his toes. Almost every farmer has his own particular ideas as to the ideal interior arrangement of his barn. But in dairy barns there are two possible ways to dispose of the cows. It is generally recognized that having two rows of them is more economical of both space and labor. The cows may be placed facing the walls, or they may be stood with rows facing each other across the central feed alley. Since there is more work at feeding the cows than in cleaning out the manure, it seems that the plan with the central feed alley and the cows facing it should be preferred as saving somewhat more labor. Then the same arrangement lets the light fall on the cow's hind-parts and the milk can see whether or not the udder is clean. Likewise, it is easier to see when cleaning the stalls, and the drainage is better when running from the center to the outside. Also there is less of a mixup in letting the cows in

or out of their stalls. On the whole it looks as if most of the arguments favor standing the cows in two rows facing each other.

The dairy barn floor must be made of something that can be thoroughly and easily cleaned. Many substances have been tried, but concrete seems to be by far the most enduring in popularity. The biggest kick lodged against it is that it is so cold, but the use of plenty of bedding or of wooden platforms largely obviates the objection.

Sunlight and Air Essential. Plenty of sunlight and air are absolutely essential. No farmer will build a dairy barn until he is sure that he has the lighting and ventilation problems solved in the best way for his particular location and style of barn.

The problem of equipment has been absolutely solved for us by the manufacturer, who should be consulted for ideas and plans as soon as one decides to build. Valuable aid may be secured from these manufacturing specialists and it is given cheerfully.

The old wooden fixtures have been replaced by sanitary, enduring, attractive steel tubing, and the simplicity and effectiveness of the numerous patents on stanchions, feed and litter carriers, and every manner of equipment beggar description. The stalls are not large, cumbersome dust-catchers, but are of attractive design and light. The stanchions, instead of reminding one of the stocks of old Salem town, are of light steel so hung and joined as to give the cow almost as much freedom as when she is outside. They are perfectly comfortable and yet hold the cow just where the owner wants her in the stall. By the use of feed and litter carriers a vast amount of labor is saved, enough to pay for the equipment in a short time.

Help is a shy article on most farms. Therefore anything designed to save labor is twice welcome.

My advice to the man who contemplates a dairy barn would be to take up the matter with his lumber dealer. You will find him a man ready to gladly

render every assistance, even going so far as to plan the entire barn. The value of the suggestions are often great beyond one's greatest expectation, a fact I have seen demonstrated time and again.

Good Type of Basement Barn.

The accompanying design is an exceptionally good example of a high-grade basement barn, planned and built in the approved style and equipped with all sanitary and labor-saving dairy stable conveniences. It was built in Winona county, Minn., where the land is rolling and there are a good many side hills, yet you will notice that the farmer and his building advisers had enough gumption to keep away from the old side hill bank barn style. They set this barn out in the open where the basement could have full-size windows on all four sides. They built a bridge to the haymow floor out of re-enforced concrete. The embankment is back ten feet from the basement wall, and this distance is spanned by a re-enforced concrete slab.

This is the way to build a bridge and a bank barn without a bank. The old way makes a damp, dark basement that is more like a cellar than a sanitary dairy stable.

There are also two stock pens, a large feed-mixing room, a feed room adjacent to the silo, and in the other end of the stable a partitioned-off washroom. The foundation wall is constructed of vitrified hollow tile, eight feet high from the concrete footing to the floor joists. Moisture will not penetrate through this kind of a wall. The cells of the tile interpose several dead-air spaces to break up the wall and prevent the transmission of moisture or cold.

Floor Plan of Basement Barn.

permanence. There is little sense in building temporary, tumble-down places which have to be done over in a few seasons.

A dairy barn is usually a rather expensive structure—too expensive to permit of making mistakes in planning or equipping. The accompanying design is an exceptionally good example of a high-grade basement barn, planned and built in the approved style and equipped with all sanitary and labor-saving dairy stable conveniences. It was built in Winona county, Minn., where the land is rolling and there are a good many side hills, yet you will notice that the farmer and his building advisers had enough gumption to keep away from the old side hill bank barn style. They set this barn out in the open where the basement could have full-size windows on all four sides. They built a bridge to the haymow floor out of re-enforced concrete. The embankment is back ten feet from the basement wall, and this distance is spanned by a re-enforced concrete slab.

This is the way to build a bridge and a bank barn without a bank. The old way makes a damp, dark basement that is more like a cellar than a sanitary dairy stable.

There are also two stock pens, a large feed-mixing room, a feed room adjacent to the silo, and in the other end of the stable a partitioned-off washroom. The foundation wall is constructed of vitrified hollow tile, eight feet high from the concrete footing to the floor joists. Moisture will not penetrate through this kind of a wall. The cells of the tile interpose several dead-air spaces to break up the wall and prevent the transmission of moisture or cold.

LOVE AND LILACS

By MILDRED WHITE.

(Copyright, 1918, by Western Newspaper Union.)

Homer Brant drew his car up suddenly at sight of the lilac bush. To him in the roadway came the sweet haunting odor. Indefinably the perfume brought to mind the girl he had so recently and so quickly learned to love.

Homer had stopped there, on his way to an engineering camp higher up. He had intended to remain over night, but with Justine Jordan's coming, his visit had been prolonged.

During the first day they had visited together, upon the hotel veranda, the second found them roaming the wonderful country in his car; at the end of one short enchanted week, Homer caught the girl in his arms, speaking out his love for her. And that had been the end. Like some startled bird she had escaped and flown from his embrace, and when after a troubled night, he awaited her morning appearance, humble in his apology—she had not appeared at all. Instead the ball boy had handed him a note in peculiarly characteristic handwriting.

"Dear friend," it said, "when this reaches you, I shall be up among the hills, fulfilling a mission which has been postponed just one week. Spring time, and lilac time, tempted me to linger. When I meet you again, I hope it may be in the more prosaic and less romantic atmosphere of the city. With best wishes ever—Justine Jordan."

Whereupon, Homer, inwardly fuming at his admired one's practical coolness, bade the inn good-by, and began a searching tour of the hills.

What could be the delayed mission at which she mysteriously hinted and which brought her to this isolated country?

He alighted and made his way to the lilac bush which grew beside the open window of a vacant log cabin; looking inside, he was surprised to see a reclining camp chair in the center of the room. Entering curiously, he sank into the chair, idly drawing from its side bracket a recent illustrated magazine. Some person evidently made this rude shelter a reading place.

Gazing through the open door across the vista of glorious scenery Homer mentally complimented the reader on his choice of location. Then as he replaced the magazine a pad of writing paper fell from the rack, one glance at the bold and pleasing handwriting brought a quick flush to his face. Surely this and the penmanship of his own hasty note of dismissal were the same. So Justine had found her way to this deserted cabin; then her stopping place must be in a nearby farm house. The heading of the closely written page caught his attention, "Dearest," he read, "Oh, my dearest!"

Homer Brant's heart pounded furiously, as his eyes forcibly followed the lines: "Across the miles I have traveled to our trying place, and you are not here. Instead, I find the loving note you braved danger to leave. Beloved, let not your courageous spirit falter. Without one look into your eyes, without a touch of your dear hand, I could not go back to the world. Some way I shall manage our meeting. Never in my heart can there be room for other than you. I am—Your Own."

The pad slipped from the man's trembling fingers. So this was the secret of the softly brooding eyes; and love after all these years had but found him to make mockery.

Homer sprang to his feet, as a girl came through the doorway, came and stood a moment, surprise and diffidence in her gaze.

"Justine!" he cried out sharply, then still inwardly raging, pointed to the written pages at his feet. "I read your letter through," he said, "I even forgot about scruples and it has showed me why you run away from my love. But I want to know," he straightened before her, "I demand to know, why any man dare to ask a woman to meet him in secret, dare bring her into threatened danger!"

Across the girl's somber eyes flashed her transforming smile. "That man, is a German spy," she replied.

Brant came suddenly close, fiercely he caught her wrists in his grasp. "And you," he breathed, "you—"

For a time she stood, looking steadily into his face. "Let me go," she said at last, "and I will explain."

When he looked her hands, she smiled, and going to the camp chair, brought back an open magazine holding it out before him.

Dazedly he read the title of a story, "In Love and War," and beneath it, "new serial, by Justine Jordan."

"You are more privileged than others," she laughed, "for you have read the beginning of a later installment. That is what I came out here to write. The cabin is my study."

"So," he said slowly, "you are a great author, little Justine."

"Not great," the girl replied, "very simple, love and lilacs—that sort of thing."

"And in your own life, you have no use for love?"

She looked from the lilacs nodding through the cabin window, back to the man's tense face. "Six days were too short a time in which to be sure," she murmured, "the country confuses with its enchantment."

"But now?" his eyes burned into hers the question.

Helplessly she put out her hands, "Never in my heart can there be room for other than you," she quoted, "I am, for your own."

Not for Education. "Jones was educated at Harvard, wasn't he?" "No! he merely went there,"—Boston Transcript.

OLD PRESCRIPTION FOR WEAK KIDNEYS

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfil the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says, "Take for example, Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy that I know of has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact that, so many people claim, it fulfills almost every wish in overcoming kidney, liver and bladder ailments, corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcel Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

and Mr. and Mrs. Orrin Fiske were
the guests of Mr. and Mrs. Charles
West, Sunday afternoon.

BETHLEHEM

Cold was the earth and all the stars,
But Mary Mother smiled
Where in the manger of an inn
Lay warm the Holy Child.

The ox was host upon that night
Unto the King of all;
He gave for incense meadowy breath,
For shelter his rude stall.

Not all the cold of earth and man
Can pierce the heaven mind,
Where warm against her leaping heart
A Mother clasps Her Child.

O miracle of utmost love,
How God grew greater when
He stooped to be a helpless babe
Beside the hearth of men.

Long ages since—and still in joy,
In loneliness and tears
We kneel unto a Little Boy
Who smiles down through the years.

—Wilbur Underwood in Ready's Mirror.

**Do You Enjoy Your Meals?**

If you do not enjoy your meals your
digestion is faulty. Eat moderately,
especially of meats, masticate your
food thoroughly. Let five hours
elapse between meals and take one of
Chamberlain's tablets immediately
after supper and you will soon find
your meals to be a real pleasure. Adv.

DEXTER TOWNSHIP ITEMS.

"Tim" McCarthy has a sick horse.
Shop a little earlier this year!

James Doody spent last week with
his nephews, George Doody, near Una-
dilla.

John P. Walsh is building an addi-
tion on the south end of his barn for
the car of young cattle he recently
purchased and which he will feed this
winter.

Robert Gardner, Jerry Styers and
K. H. Wheeler slipped dogs and sheep
with the "Co-Op" Saturday.

Frank Hinchey has a car load of
cattle ready to ship as soon as he can
get a car.

The wind of Saturday, November
29th, played a mean trick on James
Gregory and Henry Leaman, taking
the roof off Gregory's barn and leav-
ing the sides standing; but at Mr. Le-
man's it struck nearly in the middle,
leaving both ends and taking the roof
and side into the barn-yard. Both
barns were full of tame hay.

George Doody purchased five pigs
from J. J. Doody, Friday.

H. C. Ferris spent a few days last
week at home owing to the "shut-
down" at the Hoover plant in Ann Ar-
bor.

Notice of Chancery Sale.

State of Michigan. In the Circuit
Court for the County of Washtenaw,
in Chancery. Harmon S. Holmes,
Plaintiff, vs. William T. Utley, Grace
C. Utley, and Claude Miller, Defend-
ants.

In pursuance of a decree of the Cir-
cuit Court for the County of Washtenaw,
in Chancery, made and entered on
the eighth day of July, A. D. 1919,
as amended by decree of said court
made and entered on the fifteenth day
of November, A. D. 1919, in the above
entitled cause, I, the subscriber, a Cir-
cuit Court Commissioner of the Coun-
ty of Washtenaw, hereby give notice
that I shall sell at public auction or
vendue to the highest bidder at the
south front door of the Court House in
the City of Ann Arbor, in said County
of Washtenaw, (that being the place
of holding the Circuit Court for said
County of Washtenaw), on Thursday,
the eighth day of January, A. D. 1920,
at 10:00 o'clock in the forenoon of said
day, all those certain lands and pre-
mises described as follows, to-wit:

The east fifty-seven feet and two
inches in width of that tract of land
lying and being situated in the City
of Ann Arbor, County of Washtenaw,
and State of Michigan, and described
as follows: The east one-half of lot
number five in block three south of
Huron street, range number six east,
excepting the east two rods in width
thereof included in Division street, and
also excepting sixty-six feet in width
off from the north side of the said east
one-half of said lot number five ac-
cording to the original plat of the Vil-
lage (now City) of Ann Arbor, ex-
cepting and reserving a right of way
four feet in width over the east side of
the tract intended to be conveyed to
Martha Louise Hinz and Anna Eva
Ludwig, July 2d, 1913, and also grant-
ing a similar right of way over the
west four feet of the land now convey-
ed to party of the second part, which
four feet is hereby excepted and re-
served for such right of way, this
right of way is made for the purpose
of a domestic driveway, for the use of
the owners and tenants of the two prop-
erties above mentioned.

Dated at Ann Arbor, Michigan, Nov-
ember 25th, 1919.

Frank C. Cole,
Circuit Court Commissioner.

H. D. Witherell, Attorney for Plaintiff.

LYONS' SHOE MARKET**Reserves vs. Current Demands**

The calling rate at the telephone switchboard
is enormous these days and the telephone
companies everywhere are pressed for facili-
ties to meet the ever-increasing demand for,
and use of, the service.

In Michigan the customary construction pro-
gram, that is, customary under pre-war con-
ditions, was abandoned during active hostilities
in order that the Bell System might devote
all of its energy, all of its ingenuity and thou-
sands of its trained assistants to the winning
of the war.

The result is that the demand for facilities has
overtaken the supply and today the Michigan
State Telephone Company finds itself living
from hand to mouth, so to speak, in the
matter of facilities.

It is difficult to build up reserve facilities and
at the same time meet current demands.
The unavoidable delays in construction work
have been discouraging, at times, both for
the Telephone Company and the public.
But the turn in the road seems now in sight
and the management feels confident that,
shortly, the Company will be prepared to
respond to all demands for service.
