MODEL SCHOOL BUILDING.

While in Howell recently the editor of the Tribune inspected the new public school building now nearing completion in that city, and was free to admit it to be one of the finest buildings of the kind we have ever visited. In addition to the usual assembly and recitation rooms, manual training, domestic science and laboratory rooms, there is an auditorium with a seating capacity for 900 persons and a fine gymnasium equipped with shower baths, etc.

We understand that both the auditorium and the gymnasium will be open to the public, so that Howell's new school building bids fair to become the community center for Central Livingston county, at least. The "gym" is to be open for citizens three evenings each week.

Doctor Cupid

That love sometimes cures disease is a fact that has been called to the attention of the public by a prominent physician. Love is not, however, the cure for all women. Many a woman is nervous and irritable, feels dragged down and worn out for no reason that she can think of.

Doctor Pierce's Favorite Prescription gives new life and new strength to weak, worn-out, run-down women. "Favorite Prescription" makes weak women strong and sick women well. It is now sold by all druggists in the United States in tablets as well as liquid form.

MANKATO, MINN.—"I have three daughters who are all strong and healthy today due, I am sure, to the use of Dr. Pierce's Favorite Prescription. When they were in their teens they were all very delicate. I always gave them this medicine and it never failed to give relief. I am in hopes that this will be the means of aiding some who are suffering."—Mrs. MARY GOODRICH, 218 West Rock Street.

The very first dose opens your clogged-up nostrils and the air passages of the head; stops nose running; relieves the headache, dizziness, feverishness, sneezing, soreness and stiffness. "Pape's Cold Compound" is the quickest, surest relief known and costs only a few cents at drug stores. It acts without assistance, tastes nice, contains no quinine—insist upon Pape's!—Adv.

There could be no better testimony of the value of this remedy for these troubles than the fact that in use for the last fifty-four years has extended into many thousands of households all over the civilized world and no indication of any failure has been obtained in all that time. Very desirable as a gentle laxative. Sold everywhere.—Adv.

Valley of 10,000 Smokes. Alaska Has One of the World's Greatest and Least Known Natural Wonders.

One of the world's greatest and least known of natural wonders is the Valley of Ten Thousand Smokes near Mount Katmai in Alaska, a brief description of which is given in the Century by Andrew J. Stone. The valley is a volcanic depression, from which steaming and smoking gas and lava jets leap into the air by the thousands, some of them no larger than a pencil. Sulphur flowers of every known color and tint have been scattered by the unrest of the internal fires along the valley walls and floors, until looking at it from a distance it seems one vast water of paint from a hundred tubes mixed by a mad artist with only a suggestion of a theme. With care one may walk about and mingle with the pools and spouts, and watch with marvelling eyes streams of boiling water rush into rivulets from one direction, while cold streams carrying floating ice rush in from another, and where the one small body of water carries every degree of heat from freezing up to 212 degrees Fahrenheit.

The Earl of Lonsdale and his brother, Hon. Lancelot Lowther, have always been famous in the fashionable world for wearing "sideboards," but in this hirsute fate fitting they are usually credited with the desire to suggest the "sporting" atmosphere in which they are generally to be found.—New York Sun.

In China, through campaigns of education, the Junior Red Cross is helping to combat widely prevalent blindness and cholera.

Through the Junior Red Cross the boys and girls of the United States are giving a fresh start in life to little war orphans scattered all over Europe. They have set up orphan's homes in France, school colonies in Belgium and Montenegro, and day schools in Albania.

They are sending dozens of young Syrians, Montenegrins, and Albanians to American colleges in Constantinople and Beirut, and maintaining more than a hundred orphans of French soldiers at colleges and trade schools. In orphanages and farm schools up and down the peninsula of Italy there are nearly 500 wards of American Juniors.

Last winter a thousand French children from the inadequate shelters of the devastated regions were sent by the Junior Red Cross to spend the cold

months in warmer parts of France. At the same time five thousand little Belgians were having a hot lunch every day at Junior Red Cross school canteens.

American school children have already raised something like a million dollars for these enterprises, and they are still hard at work.
