

CO. NEAR EAST RELIEF PLANS COMPLETED

Grain Donated in This Vicinity Will
Be Received at Chelsea Roller
Mill, Thursday, Oct. 20th.

Plans for the Near East Relief campaign in Washtenaw County have been completed. Township Chairmen have been selected by the County Committee and Chairmen in each school district have been chosen by most of the township chairmen. Already some of the districts are getting their grain together. October 20th is the day designated for delivery of grain to the elevators. The grain from Chelsea and vicinity will be received at the Chelsea Roller Mill. Other receiving places in the county have been designated as follows:

Manchester—Hoffer's Mill.
Saline—Saline Merc. Co.
Ann Arbor—Mich. Milling Co.
Milan—Auten Elevator Co.
Ypsilanti—Co-Op. Elevator.
Dexter—Dexter Co-Op. Ass'n.
Whitmore Lake—Mich. Milling Co.

Elevators will give receipts for the grain received. Washtenaw county's quota amounts to three carloads of wheat or its equivalent value in other grains. The Near East Relief committee advises that 95¢ out of every dollar's worth of grain received will reach the Relief District to which it is consigned. Reports being received from the Near East Relief headquarters show that the farmers are responding very well to the plan of assembling grain within the county, and if every person associated with this work will do his share, the drive will be put across in record time. The county committee is very anxious that the campaign be thorough and brief and every farmer does all he can to facilitate the assembling of the grain. The Michigan Mills are grinding the grain into coarse flour for the bran and middlings. The Michigan Milling company has agreed to grind Washtenaw County's quota. They are anxious to start on the order and are planning to do so immediately after the 20th of this month.

The relief table is now 24 miles long; and 20,000 children must die this winter if food does not reach them before snow flies. A bag of wheat per farm or its equivalent value in other grains, will provide Washtenaw county's quota.

HENRY HUEHL

Henry Huehl died suddenly Wednesday morning about eight o'clock while at work on his farm in Freedom township. He was showing his stepson about the plowing of a field at the time, and was holding the plow while the young man drove the team, when a stroke of apoplexy cut him down as he still held the plow handles. He was 64 years of age last month.

Mr. Huehl is survived by a widow, three step-sons and a step-daughter; also by two brothers, John of Freedom and Ben of Lima, and by three sisters, Mrs. Lydia Voegeding of Freedom, Mrs. Mary Koebbe and Mrs. Clara Koebbe of Manchester.

The funeral will be held Saturday morning at 10 o'clock from the house, Rev. O. P. Schleicher conducting the service.

CHARLES HARTSUFF

The death of Charles Hartsuff at his home just north of Unadilla, Monday morning, was a great shock to his many friends in that community, as he had been ill for only a few days, death being due to infantile paralysis. He was 47 years of age. Owing to the nature of his last illness, a private funeral was held Monday afternoon at four o'clock, Rev. Mack conducting the service. Interment at Base Line cemetery.

ANDREWS-PRICE

Miss Carrie Andrews of Grass Lake and Mr. Arthur Price of Akron, Ohio, were quietly married Wednesday, October 12, 1921, at high noon at the M. E. parsonage, Rev. H. R. Beatty officiating. They were attended by Miss Lida Guthrie of this place and Mr. Walendorf of Vicksburg. Following the ceremony the wedding party was served a three-course dinner at the Crescent hotel.

WILL STUDY OUR DRAINAGE BASIN

University Graduate Student to Spend
Year Studying the Huron River
And Its Tributaries.

Elmer W. Campbell, a graduate of Harvard university and of the Boston Institute of Technology, has entered the graduate school of the University of Michigan to pursue work leading to the degree of doctor of public health. A large part of this work will be done in sanitary engineering.

Mill Creek is Tributary.
Mr. Campbell's work will be a study which amounts to a survey of the entire length of the Huron river and its tributaries, including Mill creek in Sylvan township. It will include a study of the flow and characteristics of the river and of the chemical and physical qualities of the water throughout an entire 12 months.

The drainage area of the Huron river extends in a northeasterly direction nearly to Pontiac, and on the north nearly to Howell. On the west it extends a few miles beyond Chelsea and on the south to a line four or five miles south of Ypsilanti. It includes the cities of Ann Arbor and Ypsilanti, and the villages of Dexter, Chelsea, Pittsfield, Whitmore Lake, Hamburg, Lakeland, Pinckney, Stockbridge, Brighton, South Lyon, Milford, Chilton, Belleville, North Boston, Flat Rock and Rockwood. Aside from these it drains a well populated farming country.

It is intended to determine through this survey the suitability of the river water for city water supply purposes, and the amount and characteristics of the color, hardness and turbidity throughout the year, and an acceptable means of removing these qualities.

Where Chelsea Is Most Interested.
It will also include a study of the sewage and industrial waste going into the stream at different points, and the effect of the various wastes upon the water of the stream. Chelsea has several drains emptying into Mill creek.

It will go so far as to cover a study of the self-purifying properties of the stream by which the stream renovates itself, becoming clear and reasonably clean again after the sewage and other waste have been assimilated.

The river has been studied before in the last five years in a fragmentary sort of way, but now Prof. Hoad, head of the sanitary engineering section of the university, under whose guidance Mr. Campbell will do this work, intends to make the study comprehensive and thorough going.

"We need to have studies made which will set up standards by which all the discharges of sewage and industrial waste into all the streams of the state can be regulated and controlled," said Prof. Hoad.

"The Huron river is so typical of all the rivers in the southern peninsula that our studies are made with the idea that standards so developed may be made applicable to all other streams in Michigan."

WATERLOO NEWS.

Mr. and Mrs. Tinker Dewey of Mankit and Mr. and Mrs. George Schenk spent Sunday at Floyd Rowe's.

Mr. and Mrs. Gilmore of Plainfield, and Albert Moeckel, mother, and son, spent Sunday at Florenz Moeckel's.

Mr. and Mrs. Mark Hill of St. Johns spent the week-end with Mrs. Jane Cooper.

Mr. and Mrs. Orson Beeman spent the week-end in Jackson.

The farm home of the late Orville Gorton has been sold to Mr. Sabar of Ann Arbor.

Rev. and Mrs. Rhoades are receiving congratulations on the birth of a son, Friday, October 7, 1921.

Mrs. Mary Runciman returned home Friday after spending the past 73 days in Mercy hospital, Jackson.

Mrs. Floyd Durkee entertained last Saturday evening in honor of her husband's birthday. Games were the diversion of the evening, and popcorn and candy were served.

The young people of the community will give a Halloween social at the home of Ethel Runciman, Monday evening, October 31.

Miss Ruby Bowditch of Detroit is visiting relatives here.

Mr. and Mrs. Walter Vicary, Rev. Rhoades and John Prentice motored to Jackson, Sunday evening, to hear Gypsy Smith speak.

Mr. and Mrs. John Dykemaster, Jr., and Mr. and Mrs. Leich Beeman and baby spent the week-end in Jackson.

Mr. and Mrs. George Fauser and Mr. and Mrs. Ed. Broesamle spent Sunday in Grass Lake.

Mr. and Mrs. Jesse Jones of Jackson have been visiting at George Beeman's.

Henry Lehman and family of near Cavanaugh lake spent Sunday at Victor Moeckel's.

HUNTERS TAKE NOTICE.

Hunting or trapping on our premises is strictly forbidden.
H. A. Prudden

GEORGE H. BOHNE.

George H. Bohné died Sunday, October 9, 1921, at his home in Francisco of dropsy. He was nearly 82 years of age and had been in failing health for several months past.

Mr. Bohné was born in Germany, December 23, 1839, and came to America when only 13 years of age. For several years he resided in New York city and was employed in Delmonico's restaurant in that city for a number of years. In August, 1862, he was united in marriage with Miss Mary Paulman of New York and soon afterwards they came to Michigan and purchased a farm just west of Francisco, where they resided and prospered until about 17 years ago when they retired from active farming and removed to Francisco.

Mr. Bohné leaves a widow, four sons and one daughter, also 18 grandchildren, to mourn their loss.

The funeral was held Tuesday afternoon from the home, Rev. Carl Ertel conducting the service. Interment at Grass Lake.

WHERE IS DETOUR?

A good farm-wife living south of Chelsea had an amusing experience a few days ago when a party of tourists stopped to inquire about the road, and one rather haughty person remarked that they would like to know where they would find the town of Detour.

The main east and west highway through Chelsea has been under construction and blocked for months and a "detour" sign is found on nearly every corner. These particular tourists had evidently followed the signs for miles, supposing the word "detour" to be the name of a town, through which they must pass, and were becoming discouraged because they couldn't find it!

WINFIELD SCOTT HAWKINS.

Winfield Scott Hawkins died Sunday, October 9, 1921, at the home of his daughter, Mrs. Lulu Fauser, on the Hutzel farm just east of town, aged 73 years, two months and 12 days. He had been in failing health since 1898, at which time he suffered a slight stroke of paralysis.

He leaves one son, Daniel of Jackson, a daughter, Mrs. Fauser, nine grandchildren, one brother in Clare, Michigan, and one sister, Miss Abbie Hawkins of Ypsilanti, to mourn their loss.

The funeral was held Wednesday afternoon from the home, Rev. H. R. Beatty conducting the service. Interment at Oak Grove cemetery.

IN THE HIGH SCHOOL.

The football game with Clinton high school, postponed from last Friday on account of rain, was played here Tuesday. Clinton's team is much heavier than Chelsea's and piled up a score of 40 to 6. Today, the high team plays Manchester in the neighboring village.

The student council met Thursday. The following are councilmen: Alice Baldwin, Lois Grable, Emily Weinman, Norman Johnson, Wayne Beatty and Ralph Astell.

A new set of encyclopedias has just been received. A total of \$1,400 library money is available for new books.

Miss Mabel Wegner, principal last year, visited the high school Wednesday and Thursday.

IN THE CHURCHES

METHODIST

Rev. H. R. Beatty, Pastor.
Our goal next Sunday is a 100% attendance at all services. Dr. H. A. Larson, district superintendent, will preach at 10 o'clock. Special music by the choir. Special program of music and readings in the Sunday school. Mrs. Austin Palmer will lead the Epworth League at 6:30. The orchestra will furnish music and Miss Gardner will read. Topic for the evening sermon, "Heart Disease and Its Cure."

ST. PAUL'S

Rev. G. W. Krause, Pastor.
English services at ten o'clock. Rev. C. B. Wilcox of Grass Lake will occupy the pulpit as the pastor is attending the Golden anniversary of his former church in Elyria, Ohio. Sunday school at 11:15.

CONGREGATIONAL

Preaching services at ten o'clock. Rev. F. O. Jones will occupy the pulpit. Sunday school at 11:15. No evening service.

ST. MARY CHURCH

Rev. Henry VanDyke, Rector.
Low Mass at 8 a. m., High Mass at 10 a. m., Baptism at 11 a. m., Mass on week days at 8 a. m.

SALEM GERMAN M. E. CHURCH

Rev. Carl Ertel, Pastor.
Rally day services at 10:30 a. m. Sunday school and church services combined. Epworth league at 7:30. Evening preaching service at 8:00.

OUR NEIGHBORS' DOINGS

What's Happening In Neighboring
Towns and Localities.

HOWELL.—Monday, D. S. Foster, of Jackson, started a bus line between Jackson and Howell by way of Munith, Stockbridge, Gregory and Pinckney, arriving in Howell at 10:15 a. m. and leaving for the return trip at 2:15 p. m. He has a Ree included speed wagon.

MANCHESTER.—Mrs. Geo. Coleman, who was injured in an accident near Adrian, Friday, died Sunday night in the Adrian hospital as the result of her injuries. The body was brought here Monday and the funeral service was held Wednesday afternoon from the Methodist church.

POWELLVILLE.—The band stand on the fair ground was unable to bear the added weight of the crowd that persisted in occupying it with the Curtis band on Thursday afternoon and suddenly collapsed in the middle of a fine selection the band was rendering. Fortunately, no one was injured and the instruments all escaped injury excepting the big bass drum which suffered a scalp wound, one of its heads being caved in.

WANT AND FOR SALE ADS

Five cents the line first time, 2½ cents per line each consecutive time.
Minimum charge 15 cents.

TRY A "LINER" AD
when you have a want, or something for sale, to rent, lost, found, etc. The cost is trifling.

LOST—Webbing strap, 16 feet long by 3 inches wide, probably on road south of Chelsea. George Staftan, phone 201, Chelsea. 101t

LOST—Bunch of small keys, Tuesday October 11th. M. P. Swickerath, or leave at Tribune office. 101t

FOR SALE—Small onions. George Steele, 521 W. Middle St. 101t

GET A RADIATOR COVER for your car; prices \$1.75 to \$12.50. Palmer's Garage. 101t

FOR SALE—McCormick binder, Osborne hay loader, Gale riding plow, Walter A. Wood spreader, all in good repair. R. T. Wheelock, phone 193-F23. 101t

FOR SALE—Car load of cider apples at our cider mill, about Oct. 20th. Get your order in early. Schanz & Holmes, phone 182. 91t

FOR SALE—Winter apples; also two Rambouillet bucks, Harold Spaulding, phone 141-F11. 91t

FOR RENT—House, newly decorated and in good condition. Dr. George W. Palmer. 91t

MEATS—Our market will be open on each Wednesday, Thursday and Saturday, under Miller Sisters store. Good meats cheap. Leach & Downer. 91t

LOST—Long black pocket book containing a few papers and a \$5 bill. Dorothy Notten, phone 191-F14, Chelsea. 91t

FOR SALE—Wizard hand washing machine. 226 South St. 91t

FOR SALE—Winter pears, \$1.50 bu. Wm. Osterle, 313 North St. 91t

FOR SALE—Celery 25¢ doz., furnish your own tub. Julius Barth. 91t

FOR SALE—Cabbage, and Tom Thumb pop corn. Sam Stadel, phone 151-F14. 91t

FOR SALE—Union sewing machine, gas range, 2-burner oil stove good for lake cottages. 2-hole fireless cooker, 8-day clock, good gas lamp (good to sew or read by), 50-gal. gasoline tank, 20-ft. ladder, step-ladder, round oak extension table, and other articles. Call and look them over any day except Saturday. Frank Shaver, Elder's barber shop, West Middle street. 91t

FOR SALE—Acme Triumph steel range, a good baker. Fred Clark, 792 S. Main St. 71t

CIDER MAKING—Beginning Tuesday, September 27th, we will operate our cider mill every Tuesday until further notice. Price for making cider, per gallon, 3¢. Highest market price paid for cider apples the day we take them in. Empty barrels for sale. Schanz & Holmes, Chelsea. 31t

WANTED—Live poultry and farm produce. Chelsea Greenhouse, telephone 180-F21. 101t

MACHINE OPERATORS wanted at Goebel Garment Co. 961t

PAINTING by the day or job, in town or country. Schanz & Slocum, phone 182, box 415. 921t

WANTED—People in this vicinity who have any legal printing required in the settlement of estates, etc., to have it sent to the Chelsea Tribune. The rates are universal in such matters, and to have your notices appear in this paper it is only necessary to ask the probate judge to send them to the Chelsea Tribune.

YOUR LAST MONTH'S SALARY

Suppose you take time to figure out what became of your last month's salary. How much of it was banked and how much of it passed out of your hands for things you could have done without?

All of the "Captains of Industry" we read about today are men who early in life learned to bank their money instead of spending it foolishly.

Saving, like spending, is a habit, and right now is the time for you to trade a bad one for a good one.

TALC IS FOUND IN CANADA

Non-Metallic Mineral Largely Used in Manufacture of Rubber Goods.

Among Canada's more useful non-metallic minerals talc is probably the most adaptable and widely used, entering into the finishing process of some of the most common commodities.

Talc, sometimes designated soapstone, asbestos, French chalk, mineral pulp, talcum and vermiculite, is found in Cape Breton and Inverness counties in Nova Scotia; Frontenac, Hastings, Leeds, Lennox and Renfrew counties and Kenora district in Ontario; Beauce, Brome and Megantic counties in Quebec, and in the Peace River section of the Victoria mining division of British Columbia. In color it ranges from white to grayish green, while to the touch it has a soft and apparently greasy or slippery feeling. It is a non-conductor of heat and electricity and is resistant to most chemical action.

Its chief uses are as a filler in the finishing of a window blind cloth, talc is largely used in the manufacture of rubber goods.

From Africa.

The "Greatest Show on Earth"—one of them—was touring Georgia and having trouble with its small but select manager. Therefore, the management of the show advertised for an assistant animal trainer. A husky black gentleman applied, was accepted and sent to work.

When the time came to feed the animals, though, his nerve faltered, especially when he was obliged to open the lion's cage.

"Oh, Lawd," he prayed, "as yo' was wld in de lion's den, so be wld me now."

Whereupon a voice issued from the king of beasts:

"Seibah ndid de Lord and Dan'l, big boy. Dis free lion's yo' own countryman. Jus' hustle wid dat chow."—American Legion Weekly.

Gland Causes Divorce.

The increased prevalence of divorce in proportion to the growing wealth of the country was attributed by Dr. Ernest E. Tucker of New York at the annual convention of the American Osteopathic association to a change in function of the pituitary body, one of the smaller of the so-called ductless glands, which, he said, is about the size of a pea and is hidden on the underside of the brain.

TAKES CARE OF 5 CHILDREN

Mrs. Taylor's Sickness Ended by Lydia E. Pinkham's Vegetable Compound

Roxbury, Mass.—"I suffered continually with backache and was often despondent, had dizzy spells and at my monthly periods it was almost impossible to keep around at my work. Since my last baby came two years ago my back has been worse and no position I could get in would relieve it, and doctor's medicine did not help me. A friend recommended Lydia E. Pinkham's Vegetable Compound and I have found great relief since using it. My back is much better and I can sleep well. I keep house and have the care of five children so my work is very trying and I am very thankful I have found the Compound such a help. I recommend it to my friends and if you wish to use this letter I am very glad to help any woman suffering as I was until I used Lydia E. Pinkham's Vegetable Compound."—Mrs. MAUDE E. TAYLOR, 6 St. James Place, Roxbury, Mass.

Backache is one of the most common symptoms of a displacement or derangement of the female system. No woman should make the mistake of trying to overcome it by heroic endurance, but profit by Mrs. Taylor's experience and try Lydia E. Pinkham's Vegetable Compound.

MRS. BOWSER'S STORY

And Mr. Bowser's Adventure.

By M. QUAD.

(Copyright 1931 by M. Quad Newspaper Syndicate.)

Dinner was ready at the usual hour, but Mr. Bowser had not appeared.

Mrs. Bowser waited three minutes, and then began to worry.

Why didn't Mr. Bowser come?

Had he gone on a fishing excursion and been wrecked, and perhaps been cast on a lone island, miles and miles at sea? He might have gone up in a flying machine and taken a drop. He might have gone out into the country to buy a piece of land to raise grass-hoppers.

Half-past six, and no Mr. Bowser!

Mrs. Bowser put on her hat and walked up to the car line. She stood on the corner for a quarter of an hour, and no Mr. Bowser. She returned to the house to telephone, but who could she telephone to? Who kept truck and trace of Mr. Bowser?

The cook came up to console her, and she did it by saying:

"Do not worry, Mrs. Bowser. If Mr. Bowser has fallen off the roof of a building and been smashed all to jelly, that's the end of him, and you can't help him any by worrying. He may have climbed a tree and is afraid to come down."

Mrs. Bowser was moving toward the telephone, when it began to ring. She answered very quickly.

"Is this Mrs. Bowser?" was the inquiry.

"Yes—yes!"

"Mrs. Samuel J. Bowser?"

"Yes."

"You live up on Third place, don't you?"

"Yes, I do."

"Well, don't get nervous when I tell you something. This is the police station, in the Sixth precinct."

"Is—my husband dead?" was asked in a trembling voice.

"Oh, no, ma'am. He is very much alive. Now, I will make you understand how the case is. A boy, who is a young thief, was stealing from a grocer. A detective saw him and arrested him. The boy fought back, and the two had quite a scrimmage in the street. Mr. Bowser was riding home on the car. He saw the row and thought the man was abusing the boy. He jumped off the car and mixed it, and as it is against the law to strike an officer while doing his duty, he was arrested and brought in."

"And nothing has happened to him?" asked Mrs. Bowser.

"Well, yes and no, to that. He is a very lively sort of a man, you must know. He thinks he runs the town. He began talking in a loud voice the minute he came into the station, and telling what would happen to us if we did not apologize and turn him loose. That's Mr. Bowser's way, isn't it?"

"Why—why, he has way about him," said Mrs. Bowser with a laugh.

"I should think he had! When I told him that if he didn't shut up we

scratched my nose in reaching for my collar. They will have to pay me a hundred thousand dollars for that scratch. Then he tore my coat collar, as you see. That is another hundred thousand. Then, because I wouldn't stop talking, they hit me with a club, and the brutes shoved me into the cell. Oh, but won't I give them such a law-suit as never was heard of before!"

"Then I can't get you out," said Mrs. Bowser.

"No, ma'am you can't, but you must not worry. I will be home about nine o'clock, headed by a brass band. You can arrange about the band, if you want to."

Mr. Bowser was rather queer all night long. That is, he didn't protest and threaten until once every fifteen minutes. He was brought out of his cell when court opened. He smiled at the judge, but there was no returned smile. The officer told how he saw the boy stealing and he said there was a scuffle, because the boy tried to bite his hand. He told Mr. Bowser's interference, and then Mr. Bowser himself was called to stand up. All he said was:

"He was using the boy in a brutal manner, and I felt called upon to interfere."

"Oh, you did, eh?" remarked the judge. "You are fined \$50, or thirty days in jail!"

There were friends of Mr. Bowser there who lent him the money, and he paid the fine and started for home. When he reached it he had something to say to Mrs. Bowser, and it was:

"I will also sue the judge for a million dollars' damages! Get some breakfast ready for me!"

Cadmium Found in Zinc Ores.

Cadmium, a metallic element discovered in 1817 by Stromeyer, is not found native, but occurs as the sulphide in the mineral greenockite, and in association with zinc ores. Greenockite is found in Bohemia and in Hungary, and also in Lehigh county, Pennsylvania, but in too small quantities to be of commercial importance. Cadmium is a constituent of most zinc ores, and as it is more volatile than zinc it passes over first, in the reduction of such ores, as cadmium oxide. This is collected, mixed with charcoal, and the mixture heated in iron tubes, from which the cadmium distills over in a more or less impure state. In order to purify it, the metal is redistilled and the product dissolved in hydrochloric acid, from which solution metallic cadmium is precipitated with zinc. Most of the cadmium of commerce comes from Siberia, but small quantities are produced in the Joplin (Mo.) district.

First Practical Reaper.

Cyrus H. McCormick made the first successful reaper. He built it as a boy without his father's knowing it and tried it out one fall. It was not entirely a success, but he made some changes and tried it again. Finally in 1831 he made his first successful reaper, says Farm and Fireside. He kept on making improvements and in 1841 had a machine good enough to patent. He offered them for sale for \$20 apiece, but no one would buy. Finally in 1843 he invited a lot of farmers to see it work. It cut two acres an hour. That was really wonderful in those days, but still no one would buy it. The next year, 1840, a man at Egypt, Va., bought the first machine and paid \$36 for it. It worked, and faith in the new invention began to spread.

Indulged in About Fifty Awful Threats.

scratched my nose in reaching for my collar. They will have to pay me a hundred thousand dollars for that scratch. Then he tore my coat collar, as you see. That is another hundred thousand. "No, ma'am you can't, but you must not worry. I will be home about nine o'clock, headed by a brass band. You can arrange about the band, if you want to."

Mr. Bowser was rather queer all night long. That is, he didn't protest and threaten until once every fifteen minutes. He was brought out of his cell when court opened. He smiled at the judge, but there was no returned smile. The officer told how he saw the boy stealing and he said there was a scuffle, because the boy tried to bite his hand. He told Mr. Bowser's interference, and then Mr. Bowser himself was called to stand up. All he said was:

"He was using the boy in a brutal manner, and I felt called upon to interfere."

"Oh, you did, eh?" remarked the judge. "You are fined \$50, or thirty days in jail!"

There were friends of Mr. Bowser there who lent him the money, and he paid the fine and started for home. When he reached it he had something to say to Mrs. Bowser, and it was:

"I will also sue the judge for a million dollars' damages! Get some breakfast ready for me!"

Cadmium Found in Zinc Ores.

Cadmium, a metallic element discovered in 1817 by Stromeyer, is not found native, but occurs as the sulphide in the mineral greenockite, and in association with zinc ores. Greenockite is found in Bohemia and in Hungary, and also in Lehigh county, Pennsylvania, but in too small quantities to be of commercial importance. Cadmium is a constituent of most zinc ores, and as it is more volatile than zinc it passes over first, in the reduction of such ores, as cadmium oxide. This is collected, mixed with charcoal, and the mixture heated in iron tubes, from which the cadmium distills over in a more or less impure state. In order to purify it, the metal is redistilled and the product dissolved in hydrochloric acid, from which solution metallic cadmium is precipitated with zinc. Most of the cadmium of commerce comes from Siberia, but small quantities are produced in the Joplin (Mo.) district.

First Practical Reaper.

Cyrus H. McCormick made the first successful reaper. He built it as a boy without his father's knowing it and tried it out one fall. It was not entirely a success, but he made some changes and tried it again. Finally in 1831 he made his first successful reaper, says Farm and Fireside. He kept on making improvements and in 1841 had a machine good enough to patent. He offered them for sale for \$20 apiece, but no one would buy. Finally in 1843 he invited a lot of farmers to see it work. It cut two acres an hour. That was really wonderful in those days, but still no one would buy it. The next year, 1840, a man at Egypt, Va., bought the first machine and paid \$36 for it. It worked, and faith in the new invention began to spread.

Indulged in About Fifty Awful Threats.

scratched my nose in reaching for my collar. They will have to pay me a hundred thousand dollars for that scratch. Then he tore my coat collar, as you see. That is another hundred thousand. Then, because I wouldn't stop talking, they hit me with a club, and the brutes shoved me into the cell. Oh, but won't I give them such a law-suit as never was heard of before!"

"Then I can't get you out," said Mrs. Bowser.

"No, ma'am you can't, but you must not worry. I will be home about nine o'clock, headed by a brass band. You can arrange about the band, if you want to."

CARE AND ACCURACY DEMANDED IN WEIGHING HAY FOR MARKET

Accurate Weights Can Be Obtained Only If the Wagon Scales Are in Proper Working Order and the Load Is in Proper Position Upon the Scales.

(Prepared by the United States Department of Agriculture.)

A great deal of trouble and monetary loss sustained by producers and shippers in marketing hay has been found by the bureau of markets and crop estimates, United States Department of Agriculture, to be due to careless weighing.

Weighing by the Bale.

In several sections of the country it is the custom to weigh hay by the bale at the time for haling and to note the weight upon a tag made of cardboard or other convenient material attached to the bale beneath one of the bale ties. When weighing by this method great care should be taken to weigh the hay accurately. During the rush of haling operations sufficient time is frequently not allowed for the scales to come to a balance and there may be as much as ten pounds difference between the actual and the catch weight.

Special care should also be taken in writing the correct weight upon the tag, say the bureau's specialists. It is the common practice in some sections to use only numbers ending in 0 or 5 in recording the weight, and to give or take from the actual weight a sufficient amount to make a number with such an ending. For example, the weight of a bale weighing 67 pounds is written as 65 pounds and that of one weighing 68 pounds as 70 pounds. The tendency, however, is "to take" more frequently than "to give," so that it is a better practice to state the actual weight upon the tag.

Another practice which is often charged back to the producer in lower prices or in weight claims, disproportionate to the actual loss, is the use at a much later date of tag weights placed upon the hay at the time of haling. Unless hay has been thoroughly cured and has been in the mow or stack for a considerable time there is likely to be a loss in weight while hay is in storage after haling, due to additional loss of moisture. Each purchaser desires, and has a right to obtain, the actual quantity of hay for which he pays. If bales are short of the weight specified upon the tags there are grounds for a claim, either in the form of a price concession or of a weight claim. In either case the adjustment of the claim is likely to be less economical to the producer than the actual reweighing of the hay. The producer or shipper should be prepared to prove that the weight of the hay at the time of sale

is correct and as indicated upon the tag.

Careless weighing on wagon scales causes as much difficulty as careless weighing by any other method. One of the principal causes of unsatisfactory weights upon wagon scales is lack of proper care of the scales and of the necessary attention to keep them in repair and in good working order. Accurate weights cannot be obtained on scales that are out of repair. Wagon scales should be inspected frequently by a competent inspector and care should be taken to see that they are in proper adjustment and balance before weighing any lot or load of hay.

Care must be taken also to see that the load is in proper position upon the scales. The load should not blind upon the scale box or building, and if the team exerts any effect upon the load it should be unhitched.

When obtaining the tare weight the weigher should be certain that the wagon contains the same equipment as when the gross weight was obtained. A good rule is to remove everything but the necessary equipment from the load before weighing.

Keep Bale Check When Loading.

If the producer or shipper loads the hay directly into the cars care is especially necessary to compute the total weight correctly. Loads are frequently distributed in two or more cars because of the variation in the quality of the

MOTHER! CLEAN

CHILD'S BOWELS WITH
CALIFORNIA FIG SYRUP

Even a sick child loves the "fruity" taste of "California Fig Syrup." If the little tongue is coated, or if your child is listless, cross, feverish, full of cold, or has colic, give a teaspoonful to cleanse the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the constipation poison, sour bile and waste out of the bowels, and you have a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

Quite So.
Speaking of home brew, prohibition may be said to be its raisin d'estre.—Boston Transcript.

DYED HER BABY'S COAT,
A SKIRT AND CURTAINS

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her old, worn, faded things new. Even if she has never dyed before, she can put a new, rich color into shabby skirts, dresses, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything. Buy Diamond Dyes—no other kind—then perfect home dyeing is guaranteed. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade or run.—advertisement.

SOFT ANSWER IN SWEDISH

"Explanation" That More Than Satisfied the Offended Representative of the Law.
A pretty young Swede and an American girl were crossing the Ellipse, regardless of a lettered warning to keep off the grass. A bicycle policeman wheeled up to ask if they couldn't see the sign, whereupon the American whispered to the other to answer him in Swedish. The little foreigner burst forth in excited mystifying language and the other girl clapped in with the few words of her own acquired stock. Realizing the impossibility of enforcing the law on two young and attractive aliens, the officer not only permitted them the right of way but took the trouble to point out the monument, government buildings and like public views.

When she got the chance the American girl asked her friend what she had said to the policeman—and that upholder of the law may be interested in the answer.
"I was so nervous that all I could think was the Lord's Prayer. And I gave him that 'from start to finish.'—Washington Star.

Aunt Susan's Dilemma.
Aunt Susan, an old Maryland darkey, was being registered for the first time. Like many other women who were torn between their desire to vote and retain their youth, Aunt Susan neither relished telling her age nor discussing her private matters.
"What are your affiliations?" asked the registrar.
"Why, boss, I don't have to tell dem, do I?" queried Aunt Susan in dismay.
"Answer the question," commanded the hardhearted registrar.
"Int, boss," protested Aunt Susan, "I don't like to. He's got a wife and five children."—Philadelphia Public Ledger.

Egotism.
Always reflect that, of course, some of the services performed for you are not so well done as you could do them.

The Man Who Said: "The proof of the pudding is in the eating"— was only half through

He started a good pudding-proof, but he didn't finish it.

There's a lot of trouble in the world from puddings that taste good but don't do good.

They "eat" well, but that ends the recommendation.

Sanitariums are full of pudding-eaters who stopped the test at taste and forgot to inquire whether their food gave the body what it needed—until the body rebelled.

Grape-Nuts is a food that tastes good and does good. The proof of Grape-Nuts begins in the eating and goes on through the splendid service which Grape-Nuts renders as a real food. Grape-Nuts is the perfected goodness of wheat and malted barley—delicious to taste, easy to digest, and exceptionally rich in nourishment for body and brain.

"There's a Reason" for Grape-Nuts

Tired and Worn-out

Detroit, Mich.—"Dr. Pierce's Favorite Prescription did me a world of good. I had become all run-down, was weak and extremely nervous. I could not sleep and my appetite was poor. I had a tired and worn-out feeling—no ambition to do anything—in my whole nervous system seemed to be affected. A friend advised me to try Favorite Prescription and by the time I had taken two bottles I felt like a new woman. I had no discomfort of any sort."—MRS. CHAS. CLARK, 133 Porter St. Sold by druggists. No alcohol.

PALMER'S LOTION
A HOUSEHOLD NECESSITY FOR BURNS, BITES, CUTS, ECZEMA AND ITCHING SKIN AND SCALP TROUBLES. ALL DRUGGISTS. GUARANTEED BY SOLON PALMER, NEW YORK.

PALMER'S LOTION
REMOVED ALL MY PIMPLES AND CLEARED MY COMPLEXION

Kidneys Regulate Health
Inactive, sluggish kidneys produce poor health. Backaches, headaches, puffiness under the eyes—these are the warnings of weak kidneys. Stop your kidneys at once—take DODD'S KIDNEY PILLS—the old standard—recommended by good druggists for over two generations.

LADIES
W. N. U., DETROIT, NO. 42-1921.

Higher Ideals.
Oswald Garrison Villard, the New York radical, said the other night at Cooper Union:

"Our young men, chastened by the World War, have higher ideals than those of 1914."

"A notorious war profiteer was talking to a group of young men on a golf club veranda."

"Look at me," the profiteer said, "Twenty years ago a poor boy, working like a dog, and today—"

"He chewed violently on his dollar elgar."

"Look at me!" he repeated. "See what I've made of myself."

"The young men looked at him curiously and then one of them said: 'Your motive's good, of course, but doesn't your family object to your posing as a horrible example in this way?'"

Open and Above Board.
"Johnnie, the stork has brought you a little sister."

"Aw, gwan. Stork nothin'. It was the milkman brought it. Doesn't it say on the wagon, 'Families Supplied Daily?'"—Fort Mason Marking Pot.

Sure.
"You probably won't agree with me, but—"

"But what?"
"Any politician will tell you that factions speak louder than words."—Way side Tales.

CHAPTER XI—Continued.

—17—

I stole as silently as possible across to the door. It was securely locked, of course, and could be forced open, if at all, only by creating considerable alarm. I stood, staring helplessly about, feeling the impossibility of escape. I could only wait for my father to appear, impatient to aid myself in any way—or her. After all, that last thought was the most impelling. That they suspected Marie Gessler of being implicated in both murder and robbery was clearly evident; indeed, they not only suspected, but were convinced that she had done the deed. I was secretly obliged to admit that they even possessed proof which would probably convict her in court of the crime. This gave them a terrible advantage over the girl, once they had her bodily in their possession. Guilty or not guilty, she could not establish her innocence; under torture and threat, such as they would doubtless use in their money hunt, there was no knowing what might happen. Alone, helpless in the grasp of these unscrupulous crooks, her fate might be death, disgrace. Certainly it would be "out insult, and if she failed to stand, he desire for revenge might even drive those towards to a secret denunciation of her to the police. This, however, would be their last resort; they would exhaust all other efforts first. And no one else knew of her danger; no one else was in position to aid her; she must face this going absolutely alone unless I could effect an escape. It was not merely my own life at stake; hers was also in the balance.

And the time in which to act was short. If I escaped at all, it must be accomplished before my father returned, before they dreamed that I had aroused from unconsciousness, or had strength enough to make the attempt. Yet what possible way suggested itself? I felt in my pockets; they were utterly empty, except for a single overlooked bill. There was no means of egress other than the window and that seemed hopeless. Yet in desperation I crossed over once more, and again looked out. Could I dare I—attempt to cling to that slight ledge in my stocking feet, even for the one or two steps necessary to reach the next window? The very conception of such a feat made my head reel giddily and my stomach rise in protest. Besides, even if I made it by some miracle, what if that other window should be closed and locked? How could I ever move backward to regain safety?

Yet wait! there was a way, dangerous enough to be sure, yet possible if I possessed the necessary nerve. There were opened blinds at each window; they would help some as grasping spots for the hands. The one within reach appeared solid enough, firmly anchored to the casement, and secured to the brick wall by means of an iron hook. Between the two the space to be traversed was not wide; a single stride on the ground beneath would bridge the distance. If I had some thing to cling to above—anything that would keep me upright—I might hold my footing on the narrow stone and make the passage slowly. It was a daring, deadly venture, but possible.

But what could I hope to utilize as a support? The bare room offered but a single suggestion—the dirty coverlet which had been thrown over me. Torn apart from corner to corner, and twisted into the form of a rope, it ought to safely sustain my entire weight in case a foot slipped. I started to tear with my teeth, and thus succeeded in ripping the thing from end to end. It was scarcely long enough for the purpose, which compelled me to make the noise correspondingly small. However, with this improvised lasso gripped in my right hand, I took position astride the sill of the window, in an endeavor to project the loosened end over some protuberance of the blind beyond. By holding tight to the frame with my left hand, the right was left free, and I was enabled to lean out far enough to obtain a clear toss. There was little the noise could catch on, and continued failure left me listless and discouraged. I lost hope, yet kept at it, and finally, to my surprise, the ring of the cloth settled over an iron projection of the hinge, and clung there, extending straight across from window to window. I hardly dared breathe as I drew the thing taut and tested the firmness with which it was held at the other end. The noise closed down tightly about the iron staple, and resisted every effort at release. To all seeming it was as safely anchored as though I had placed it there by hand. Somehow the very knowledge that this had been accomplished, that the way was open brought with it a renewal of the feeling of horror with which I had first contemplated the possibility of such an accomplishment. Would I ever dare the attempt? My heart swam as I gazed downward, and then across, and I shrank back absolutely terrified at the very thought.

Yet my nerve returned, and I found myself cool and determined. It was no pleasant job, to be sure, and I was compelled to steel myself to the attempt, yet I no longer held back paralyzed by fear. I easily found a secure fastening for the strip of bed-spread at my own window, and then, satisfied that it was taut and securely held at both ends, lowered my body cautiously over the sill, until my stockinged feet nervously gripped the narrow stone of the coping. I dare not look down or permit my mind to dwell for an instant on what was below. Slowly I straightened up, until my entire weight was upheld by this precarious foot-hold. To advance step by step was impossible; all I could hope to accomplish in stealthy advance one foot a few inches, sliding it along the stone, ever retaining contact, and then, as carefully drawing the other after until they met, toe and heel. It was the slow progress of a snail, yet the slightest effort at hurrying would mean a certain fall.

This was not unduly perilous, however, so long as I retained firm hold on the sill, or even could grip my fingers over the lower frame of the open blind, as I was enabled thus to partially sustain my weight, and, even if a foot slipped, the feel of the solid wood yielded confidence. But finally my hand reached out and grasped only the cloth cord, twisted into some semblance of a rope, and, as it gave sickeningly to the pressure, the old fear swept over me in a torrent of agony. I could never make it—never! I would go swirling, crashing down to that death below. It was but a step, to be sure; a step and I could reach the firmness of the other blind; but oh, the step—the speechless horror of it! Yet there was no going backward. I tried this, only to realize at once its impossibility, and the perspiration burst out from every pore, as the fall horror of my situation suddenly flashed over me. I must go on, trusting to that thin, unstable cord, balancing myself above the gulf. There was no other way, no retreat, no means of escape. I do not know now how the act was accomplished; it is hardly a

memory, except as some wild delirium of sleep haunts me when they awake. Inch by inch I crept, hand encroaching on hand, foot pressing against foot, every slightest movement an inexpressible agony—then I gripped the support of wood once more, and clung to it as with the grasp of death.

The Sleeper Was Marie Gessler!

I clung there until my mind came back, until I felt the return of strength to my body, and I could look down through the moonlight without reeling dizzily. The blind was strong, firmly braced, and I felt safe in its protection. But what about the window beyond? Suppose it should be locked? or the room into which I opened, occupied? I could not continue to cling there in uncertainty; I must learn the truth—assure myself that I had not passed through all this tense agony in vain.

I moved slowly, barely an inch at a time, each advancing foot feeling for support, but more confident now because of the grasp of my fingers on the upper wood. The window was closed, but dark and grimy looking, as though the room within had been long unoccupied. Its very appearance gave me courage. I balanced myself on the precarious footing of the stone, clinging tenaciously with my left hand to the iron hinge of the blind, while my right endeavored to raise the sash. At first I believed the window firmly fastened down—the suspicion leaving me mind with despair. But reckless tugging loosened its hold, and enabled me to shove up the sash little by little, until finally the opening became sufficient for me to squeeze through. I felt as though I had returned from the dead, the nervous reaction so great that I lay for a moment on the floor where I had fallen, unable to move. I knew I was alone, the space unattended, the walls as bare as in that other room from which I

I had fled. I knew this, and in my exhaustion cared to know no more. Then I staggered to my knees, and with opened eyes stared curiously about, gathering my wits together. There was nothing to see but the four walls. I tried the door, and it opened silently, permitting me to glance out into a narrow dark hallway, uncarpeted. I could dimly discern the top of a flight of stairs leading down to the story below. I slipped out, and closed the door softly behind me, being plunged instantly into full-blown darkness.

I groped a way forward toward the stairs, guided by a hand against the wall, until the touch of the upper rail assured me of my position. A narrow strip of carpeting—rag I took it to be from the feeling—extended down the center of the stairs, sufficient to muffle any footsteps, and I paused a moment listening for the slightest noise amid the darkness beneath. Alas! remained still and mysterious; so that I drew forth my shoes from a coat pocket and slipped them on.

Twice the boards creaked ominously under my tread, sounding terrible in that silence, and causing me to hang in suspense over the banister rail holding my breath in fear of discovery. At last I attained the wider space at the bottom, and sought blindly to explore my surroundings. But for the carpet underfoot, and a small sofa encountered in a recess, I would have believed myself in a deserted house. I knew I was on the third floor, yet there was no curve in the banisters showing a way to the next flight of stairs, nor could I locate them by any effort. As the result of blindly groping about, I lost all sense of direction and must have wandered into a side room through an undraped recess, for I suddenly brought up against a table, littered with papers and books.

Startled by this encounter into a realization that I was lost in a strange house at an unholy hour of the morning, and that the slightest misstep in that darkness might result in an alarm to awaken every sleeper, for a few minutes I did not venture to move in any direction. Yet instinctively I could not remain there indefinitely, and so, blindly choosing a course, I set forth, feeling a way cautiously forward until I first ran into a chair, and then struck one hand against a side wall. I followed this latter as best I could, inspired by the thought that if I continued this course long enough I must attain the opening through which I had entered the room. On the way my hands felt the outlines of a closed door, and, in aimlessly groping about, encountered a key in the lock. It was so inserted as to be extracted at the touch of my fingers and instantly a tiny ray of light shot forth through the vacated hole. It was such a relief in the heart of that darkness as to cause me to quickly bend down and endeavor to view the scene within.

It was evidently a chamber of some size, and well furnished, rather dimly illuminated by a single shaded electric globe, a handsome green rug on the floor, and numerous pictures hung about the walls. I could perceive the outlines of a bed at one side, barely within the range of the vision, and opposite this an ornate dresser, with three mirrors. But what my eyes rested upon with greater interest was a luxurious leather couch beside the further wall on which a woman rested, with some sort of covering draped about her. She lay with face toward the wall, motionless, and to all appearances sound asleep.

To arouse her was the last thing I desired, and I would have slipped the key back into the lock, and stolen silently along in the darkness, had she not suddenly stirred, flinging out one hand as though in fear of some dream, and turned partially, so that her face became clearly visible. The sleeper was Marie Gessler! For a moment I could scarcely credit the discovery yet there could be no mistake. I remembered too well every characteristic of the girl to be deceived.

(TO BE CONTINUED.)

Reasonable Excuse.
Dr. Harvey W. Wiley, the noted food expert, and Dr. Samuel Wilson, retired minister, were discussing old times one day last week.

Both the men are graduates of Han over college, near the Ohio river, along which the minister spent his early years.

"I remember the great floods of '82 and '84," said Dr. Wilson. "During one of those floods we had to retire to the second floor, and then to the third floor."

"We had to cook our food over the grate," he recalled. "In the morning we would let down a bucket on a rope to the millinery, who came in a skiff."

Dr. Wiley smiled.
"That would be some excuse for watering the milk," he said.

Cash Dividends Paid to Stockholders in Four Years
Incorporated under the laws of the State of Michigan in 1916, for \$250,000. The Belle Isle Coliseum Company have increased their capital to \$400,000 all Common Stock. This additional issue of \$150,000 is offered to the public at par value \$10.00 per share and is being used to pay for new buildings and improvements.

Assets including land-lease, buildings, etc., over \$1,000,000.
On February 9th, 1921, a disastrous fire destroyed The Pier Ballroom and The Coliseum of Amusements.
The Company immediately started to rebuild, and on September 10th, opened to the public the New Pier Ballroom, said by competent judges to be one of the most beautiful and practical Ballrooms in America.

Write at once for a block of this exceptionally valuable stock that paid 21% cash dividends in 1920, and will undoubtedly pay as well, if not better, in 1922.

Mr. and Mrs. C. Weber spent Sunday with the latter's sister, Mrs. Schenk.

Catarrhal Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. Catarrhal Deafness requires constitutional treatment. **HALE'S CATARRH MEDICINE** is a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed you have a running sound or imperfect hearing, and when it is entirely closed, deafness is the result. Unless the inflammation can be removed, your hearing may be destroyed forever. **HALE'S CATARRH MEDICINE** acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and restoring normal conditions. Circulars free. All Druggists. F. J. Cheney & Co., Toledo, Ohio.

"THERE IT IS AGAIN!"

That fluttering sensation means heart trouble! Short breath; smothering sensations; inability to lie on the left side; pain in the heart, left side or between the shoulders; swollen feet and ankles; are danger signals.

Dr. Miles' Heart Treatment

has been used with wonderful success in all functional heart troubles for more than thirty years. Try a bottle today. Delays are dangerous. Your druggist sells Dr. Miles' Medicine.

A Remarkable Record.

Chamberlain's Cough Remedy has a remarkable record. It has been in use for colds, croup and whooping cough for almost half a century and has constantly grown in favor and popularity as its good qualities became better known. It is the standard and main reliance for these diseases in thousands of homes. The facts that it can always be depended upon and is safe and pleasant to take are greatly in its favor when it is wanted for children. Adv.

LYNDON ITEMS.

Miss Agnes Young is attending the Normal at Ypsilanti.

Mr. and Mrs. Henry Sellers and daughter, of Stockbridge, called at the home of Guy Barton, Sunday.

William J. Howlett is having his barn and garage painted, also a new lighting plant installed.

Mrs. T. Stanfield spent the week-end with Mr. and Mrs. P. Cavender, near Grass Lake.

Miss Connel of Jackson visited Miss Irene Clark, Sunday.

How Better Than Pills?

The question has been asked, in what way are Chamberlain's Tablets superior to the ordinary cathartic and liver pills? Our answer is, they are easier and more pleasant to take and their effect is so gentle that one hardly realizes that it is produced by a medicine. Then, they not only move the bowels but improve digestion. Adv.
