We Always Treat You Right.

FIRE DOES LARGE DAMAGE

TO STOCK OF GROCERIES

A fire in the store building on North Main street, occupied by Hinderer Bros., did about \$2,000 damage to their stock of groceries, Wednesday morning.

The fire department was called to the premises at 4:30 o'clock and succeeded in subduing the blaze in a short time. The blaze started in the rear of the salesroom and had gained considerable headway when it was discovered.

The stock of goods and fixtures owned by the firm was badly damaged by smoke and water and the fire was confined to the first floor of the building.

Just what started the fire is unknown. When the members of the firm left for their homes Tuesday night the fire in the stove was out. The loss is well covered by insurance.

The building is owned by the C. Klein estate and the interior of the salesroom is so badly damaged that it will have to be refinished and considerable glass replaced. The estate loss is partly covered by insurance.

The second floor apartments are occupied by Miss Frances Eder and her nephew and niece and their rooms were damaged by smoke. The K. of P. hall in the McKune building was well filled with smoke and will have to be redecorated.

Feldkamp-Koenigster.

A pretty home wedding was solemnized at the home of Mr. and Mrs. Henry Feldkamp of Lodi at 5 o'clock Wednesday afternoon, February 22, when their daughter, Miss Laura, was united in marriage with Mr. Clarence Koenigster, son of Mr. and Mrs. George Koenigster, of Lima, by Rev. Bodamer of Soto, in the presence of the immediate relatives.

The bride was beautifully gowned in silver grey satin, carrying white roses, while the bridesmaid was gowned in blue, carrying sweet peas. They were attended by Miss Esther Koenigster, sister of the groom, and Mr. Walter Feldkamp, brother of the bride. Immediately after the ceremony a delicious wedding dinner was served.

After an extended wedding trip to Niagara Falls and Brooklyn, New York, they will be at home after April 1st to their friends, on their farm in Lima.

Parent-Teacher Meeting.

The Parent-Teacher Club of the McLaren school in Lima held their regular monthly meeting Thursday evening, February 24, 1922. The following program was rendered:

Song—"Mt. Vernon Bells."
Roll call and business.
Reading—Mrs. Carl Schlosser.
Group of songs—School children.
Recitation—Freida Bahnmliller.
Paper—Mrs. Fred Barth.
Song—School children.
Recitation—William Bahnmliller.
Solo—Carl Schlosser.
B. O. Hagerman, county director of boys' and girls' club work and county agent Oster were both present and gave interesting talks which they illustrated by stereopticon views. Following the program a dainty lunch was served.

Held Annual Banquet.

Chelsea Lodge, K. of P., held their annual banquet in Maccabee hall Tuesday evening. The Lady Maccabees served a fine feast and the event was a very enjoyable one for the members of the order. The following program was rendered with H. D. Witherell acting as toastmaster:

Invocation—M. J. Baxter.
Vocal solo—Mrs. M. J. Baxter, Miss Ninabelle Wurster, accompanist.
After Dinner Mints—Rev. E. A. Carnes.
Music—Smith's orchestra.
Balloons—Rev. H. R. Beatty.
So-Low, "Farmer's Favorite"—J. H. Boyd.
Address, "Fraternalism"—Burney E. Bower of Jackson.
Dismissal—M. J. Baxter, prelate.

Change in Tickets.

The two village tickets that will be placed before the electors to be voted on for the various village offices on Monday, March 13, are as follows:

Independent Party.
President—Warren R. Daniels.
Clerk—Clarence O. Bahnmliller.
Treasurer—Roy Harris.
Trustees—Edwin Koebbe, J. Nelson Dancer, George W. Palmer.
Assessor—Albert E. Winans.
People's Party.
President—Dallas H. Wurster.
Clerk—George W. Walworth.
Treasurer—Dorrian L. Rogers.
Trustees—John Heselshwerdt, John W. Schenk, Jacob Hummel.
Assessor—J. Wilbur Vanliper.

Arrested Bootlegger.

An officer from Chelsea came to Jackson Monday afternoon and returned to that city with John Greiza, wanted by authorities there for violating the liquor law. Greiza was arrested here Monday morning by Detectives Piper and Wilensky. Jackson News.

Francisco.

Miss Sarah Benter was home from Eaton Rapids for the week-end. Charles Sibert, of Ann Arbor, called on Francisco friends recently.

Mrs. Henry Bohne and Miss Velma Bohne were Chelsea visitors Friday. Miss Margaret Gieske, of Chelsea, was a recent guest of Miss Ella Benter.

Mrs. Emma Jackson has returned from a two week's absence in Urbana, Indiana.

Mrs. Eva Moore, of Chelsea, was a guest at the Henry Bohne home one day last week.

Godfrey Helle, of Detroit, spent Washington's birthday with his brother, John Helle and family.

Mr. and Mrs. Dell Hammond and daughter, of Ann Arbor, came Friday afternoon to spend the week-end with Morris Hammond and family.

A most spirited Gleaner meeting was held Saturday, February 25, at Salem M. E. church, when Waterloo, Francisco, Sylvan and Lima Arbors met in annual session. A program by the Arbors was thoroughly enjoyed, as well as the sumptuous dinner that was served. The spirit of good fellowship and fraternity prevailed all through the meeting and all are eagerly anticipating the next annual joint meeting which was set for the second Saturday in February, 1923.

Miss Neva Klump and Mrs. Mamie Bahnmliller entertained at a miscellaneous shower Saturday afternoon at the home of Mr. and Mrs. Geo. Klump, for the pleasure of Miss Florence Klump, who became the bride of John Bacon, Saturday evening, February 25. The gifts were beautiful and many, and the hostesses served delectable refreshments. The many friends of Mr. and Mrs. Bacon wish them happiness and long life on their matrimonial cruises. The young couple have gone to Ann Arbor, where the groom had a home in readiness and will begin house-keeping at once. Mr. Bacon is a student in the dental department of the U. of M.

Notten Road.

Albert Schweinfurth spent Sunday at Rives.

Frank Shelley, of Grass Lake, called on Fred Notten Tuesday.

The Standard Bearers will meet with Miss Florence Kilmer Saturday. The Epworth League will meet at the home of Leona McCoy Thursday evening.

Fred Notten and E. J. Notten and wife called on their sister, Mrs. Lina Whitaker, Sunday.
Mrs. Carl Ertel led the Young People's meeting Sunday evening. She gave a good talk on giving one tenth. If a couple of youngsters in the back of the church would have given one tenth of their attention to the rest of the congregation.

The Grange and Ladies' Aid held a joint meeting at the home of James Richards Tuesday. This meeting was given in honor of Mr. and Mrs. C. Weber, it being the 52nd anniversary of their marriage. They have been members of the Grange for nearly 25 years and have been faithful members of the church for over 50 years. With one exception they are the oldest members, that being Mrs. Weber's sister, Mrs. Mary Schenk. Mr. and Mrs. Weber have lived in this vicinity all of this time with the exception of a few years they spent on a farm at Whitmore Lake with their son, Henry. Owing to infirmities, they have not been able to attend the Grange of late but when able they were very attentive to matters pertaining to Grange matters and took a prominent part in pushing ideas that were for the good of the community.

Sugar Loaf Lake.

Dennis Gutman spent Saturday in Ann Arbor.

James Simpson spent Sunday with Will Barber and family.

Mrs. Smith, of Dryden, is visiting at the home of Ed Cooper.

Bernard Beeman, of Jackson, spent the week-end with relatives here.

George Bearbower and family spent Sunday with Vern Evans and family.

Monte Davison is moving this week to the Peckins farm near Manchester.

Walter Berger, of Detroit, spent the week-end at the home of Monte Davison.

Oscar Ulrich is moving from the Peckins farm near Manchester to the M. Harker farm.

Louis Gorton, of Detroit, and Aaron Gorton, of Ann Arbor, spent Sunday at the home of Mary Runciman.

Mr. and Mrs. Floyd Rowe, C. A. Rowe and Mr. and Mrs. G. W. Bee-nan spent Sunday at the home of Dr. B. J. Howlett in Albion.

Save Money.

An easy way to save money is provided by the United States government, by means of postal savings and \$1 treasury stamps. Certificates can be purchased for \$20 that will be worth \$25 in five years time. Postmaster Hoover will be glad to explain the system.

TOWNSHIP BOARDS DISCUSS

VACATING OF NEW DRAIN

A joint meeting of the township boards of Sylvan and Lima was held in the Sylvan town hall last Friday evening. The board was organized by the election of Supervisor Dancer as chairman, and Glen H. Barbour as clerk of the joint board. The following justices of the peace comprised the board: J. S. Cummings and E. A. Lowry of Sylvan, Robert Toney and E. D. Chipman of Lima, and both the Supervisors and Clerks of Sylvan and Lima were in attendance.

The matter of vacating the order establishing the Mill Creek, Goose Lake drain was discussed and motion was made, seconded and carried to have the drain abandoned.

The resolution carried with it the proposition to submit to the electors at the annual meeting of the electors of each township, that \$1,200 in Sylvan and \$800 in Lima be spread at large in the two townships to cover the cost that has been made on the drain and then the matter will be taken up with the Probate Judge, who has authority to issue an order to vacate the proposed drain.

This drain has been very much discussed since 1916, at which time those who signed the petition supposed it was a cleanout job, and the original petition only called for the work to be done on Mill Creek, but later Goose Lake was attached to the Mill Creek proposition.

This drain as laid out at the present time is 14 miles in length of which 11 miles is in Sylvan and 3 miles in Lima. The starting point is at the Bareis bridge in Lima, with a 22-foot bottom which is gradually narrowed down to about 10 feet on the bottom at the outlet of Goose Lake. Almost all of the bridges on the entire length of the drain will have to be rebuilt as would the bridges on the railroads which cross the drain.

Four hundred and forty of the property owners along the drain have signed a petition to the court to have the order establishing the drain vacated. All but ten of the original signers of the petition have signed the recall petition and some who signed in 1916 to have the work done have sold out and moved away.

The estimated cost of the drain as laid out at present would be between \$100,000 and \$150,000 and it would seem better to pay up the costs that have been made and abandon the proposed drain. In doing so it seemed best by the four justices who comprised the board to have the cost spread at large in the two townships in proportion to the miles that is traversed through them.

Chelsea vs. Dexter.

On Saturday evening, February 25, the Chelsea High School Boys lost a basket ball game to Dexter by a score of 15 to 10. This game, even though played on Dexter's floor, was a much better game than the one played on the home floor. The Dexter floor was good, but their hall has three iron brace rods extending across it. These interfered with the making of field goals.

The High School played an excellent game at guard, breaking up Dexter's team play. Mayer, who thought that he wouldn't be able to play a quarter of the game, forgot that he was hurt and played the whole game and played it hard. Brooks played more of a defensive game, which helped hold Dexter down.

The first quarter ended with the High School 3 points in the lead. At half Dexter was two points ahead, and when the game ended they were 5 points in the lead. Buehler was hurt and he left the game for one quarter, Knickerbocker taking his place.

The girls, whose lineup was changed more than usual, had an easy victory. The lineup was as follows:

C—Chandler.
R. C.—Dancer.
F.—Lambert.
F.—Eppler.
G.—Heselshwerdt.
G.—Munn.

The forwards, Lambert and Eppler, when working together, gave Dexter's guards a hard game. Dexter's guards have the name of being rough but it didn't work on the High School's forwards. In spite of the overguarding, Lambert and Eppler rolled up a big score. The centers and also running centers on both teams played rough. The Dexter girls, when they got the ball, were so nervous that generally their shots were not true, where Chelsea was sure of almost every shot. The score was 17 to 8 in favor of Chelsea.

Dexter High School boys' and girls' teams are expected to play St. Mary team, Saturday, March 4.

Card of Thanks.

We wish to thank our friends and neighbors for sympathy and kindness during the illness, and following the death of our dear husband and father, Mrs. Jacob Hinderer and family.

NATIONAL CAPITAL AFFAIRS

The Capital Growing Wicked Yearly

WICKED indeed is the capital
these days—and growing wicked-
er right along. This is the sadder
for the reason that the District of
Columbia is under the government of
congress itself. Anyway, Representa-
tive Tinkham of Massachusetts held
forth at length the other day on this
discouraging situation and here's the
way he began:

Mr. Tinkham. Mr. Chairman, what
I have to say might well be entitled
"The progress in crime, social dis-
integration, or degeneracy of the cap-
ital of a great nation."

The District of Columbia in 1910
had a population of 331,069 people and
in 1920 a population of 437,571, an in-
crease in the 10-year period of 32.2
per cent. It has been estimated that
there has been a decrease in the popu-
lation since the 1920 census of about

40,000 persons up to January 1, 1922.
In the District of Columbia there
are two courts where crimes are re-
corded. One is the police court of
the District of Columbia, which has
two branches, one known as the
United States branch and the other
as the District branch, each having
concurrent jurisdiction. The other
court is the Supreme Court of the Dis-
trict of Columbia, to which reports
are made by a grand jury after in-
dictment. This is the court where
major crimes are recorded.

The official records show that in
1910 the total number of cases re-
corded in both branches of the police
court of the District of Columbia was
22,779, and in 1920, 42,508, or an in-
crease of 85.7 per cent, whereas in
the same period the population had
increased only 32.2 per cent.

The total number of cases recorded
in both branches of the police court
of the District of Columbia in 1921
were 47,736, an increase of 12.9 per
cent over the number in 1920, the pre-
vious year, with an estimated popu-
lation of 40,000 less than in the
previous year, this latter number of
cases being an increase of 100.9 per
cent over the number of cases recorded
in both branches of the police court
of the District of Columbia in 1910.

Work Stopped on Building Battleships

PRESIDENT HARDING is going to
get practical results from the
Washington conference on limitation
of armament at once.

Without waiting for ratification of
the naval limitation treaty, the Presi-
dent already has directed that arrange-
ments be made for stopping all work
and further expenditure of money on
ships which are now under construction
and which are to be scrapped under
the treaty.

This action, it is said by naval ex-
perts, will accomplish a saving to tax-
payers of approximately \$5,000,000 a
month.

The Executive has authority to hold
up the expenditure without legislative
action. He believes the senate will
ratify the naval treaty, and wants to
set an example to other nations by in-
stituting immediately some of the
economies made possible under the
naval convention. The President has
asked Secretary Denby for a report on
the condition of ships under construc-
tion which are doomed under the
treaty and he will issue a definite
order for the cessation of work.

Of course no completed ships can be
scrapped, it was explained, until the
naval treaty has been ratified by all

signatories and been proclaimed in
force.

A saving of about \$200,000,000 for
the United States on the present build-
ing program of the navy will result.
High naval officials, however, claimed
the board's estimates were too high, as
the scrapping of ships now under con-
struction would involve the payment
of claims to the builders which might
offset a considerable portion of the
savings resulting from halting the
building program.

Limitation of armaments will effect
immediately, the board declared, ap-
proximately equal savings in the
United States, England, and Japan.
In France and Italy, however, no in-
crease in naval armaments had been
contemplated.

Definite Moves Toward World Peace

WASHINGTON.—The conference
resulted in definite moves toward
world peace, including these:

A ten year quadruple treaty between
the United States, Great Britain,
France, and Japan, pledging the pow-
ers to respect each others' territory in
the Pacific and calling for a confer-
ence of nations when the peace of the
Pacific region is threatened, this com-
pact to abrogate the long standing
Anglo-Japan alliance.

A five-power treaty by the United
States, Great Britain, France, Italy,
and Japan, limiting the size of their
navies; scrapping all building pro-
grams and nearly 850,000 tons of
battleships, the pact to run for fifteen
years.

A five-power treaty condemning and
forbidding under international law the
use of poison gas in warfare and mak-
ing it illegal and an act of piracy for
a submarine to attack or sink a mer-
chant ship.

A three-power agreement by the
United States, Great Britain, and Ja-
pan, providing for the maintenance
of the status quo in Pacific fortifica-
tions and naval bases.

Settlement between Japan and China
of the long standing and threatening
Shantung controversy, whereby Japan
restores to China the province of
Shantung and China acquires the
Shantung railroad on terms satisfac-
tory to the powers.

An agreement of the nine powers
to adhere to and revitalize the "open
door" policy incorporated into a treaty
with China which makes many pro-
visions for breaking the international
shackles upon that republic.

Modification by Japan of the "twen-
ty-one demands" upon China.

Treaty making allocation of former
German cables in the Pacific.

A creation of an international com-
mission to meet within three months,

Roosevelt-Sequoia Park Bill Amended

THE Barbour bill for the crea-
tion of the Roosevelt-Sequoia Na-
tional park in the Sierras of California
has been amended. Representative
Barbour did it himself after hearing
from his district that the great ma-
jority of his constituents wanted what
President William F. Bado of the
Sierra club happily calls a "power-
proof" park. As amended the bill
provides for a park closed to water-
power projects, as are all the existing
national parks. In this satisfactory
shape the committee favorably re-
ported it. This wholesome outcome of
campaign preliminaries was achieved
by hard work in California, this wise:
Stephen T. Mather, director of the
National Park service, persuaded
local power companies that the claims
of the Kings River valleys for park-
hood were greater than for power.

The Sierra Club of California won the
support of many influential men of the
state, and particularly in Mr. Bar-
bour's district, for a complete-con-
served park.

The people of the country are in
great majority for the complete con-
servation of their national parks. So
it became a matter of bringing this
public sentiment to the attention of
congress. The National Parks associa-

tion, the National Parks committee,
the General Federation of Women's
Clubs, the New England Conference
for the Protection of National Parks,
the Massachusetts Forestry associa-
tion, the Camp Fire Club of America,
the Field Museum of Chicago, the
Camp Fire Club of Chicago, the Ap-
alachian Club of Boston, the Colo-
rado Mountain Club of Denver, and
scores of others submitted statements
in writing or by telegraph.

The only opposition to amending
the bill which appeared at the hearing
came from Representative Addison T.
Smith, of Idaho, a member of the
public lands committee and author of
the Smith bill of the last congress for
an irrigation reservoir in the south-
western corner of Yellowstone Na-
tional park.

GIVE AUTO TIRE GOOD ATTENTION

Very Few Owners Give a Thought
to Its Care, With Exception
of Inflating It.

COTTON FABRIC FOUNDATION

Elimination of Internal Friction Would
Greatly Increase Life of Cover—
Big Difference Between Cords
and Fabrics.

To the average owner, an automo-
bile tire is good only when it travels
many thousands of miles without
breaking down or blowing out. Very
few give a thought to its care, with
the exception of inflating it from time
to time, and a still smaller number
know what it is made of.

A big tire concern has prepared a
treatise on the foundation of one
which should be remembered by every
motorist. It is as follows:

"Cotton fabric is the foundation up-
on which an automobile tire is built.
It is used to give stability and
strength. There are two well-known
classes of tires—the square-woven
fabric and the cord tire.

Cords and Fabrics Differ.

"In the square-woven fabric tire the
threads in each ply run in both di-
rections, alternating over and under as
in a piece of ordinary cloth. In the cord
tire, the threads or cords in each ply
run parallel, with the exception of a
few small cross threads, used simply
to hold the cords together while they
are being impregnated with the rubber
compound.

"The life of a tire would be greatly
increased if internal friction could be
eliminated. The internal friction
caused by intermittent distortion of
the tire in use is the result of the fric-
tion of the threads upon each other
and the strains and stresses set up in
the rubber compounds. Naturally the
fabric which gives the least room for
internal friction will give the longest
life to the tire.

"Since square-woven fabric cannot
be thoroughly impregnated with rubber
at the points where the threads cross,
flexing at these points will cause a
sawing action and the generating of
internal heat. It has been demonstrat-
ed very clearly by experiment that
when the temperature resulting from
internal heat reaches 230 degrees, vul-
canized rubber ceases to function as
an adhesive compound, crumbles into
minute particles which fail to resume
their original condition, causing the
compound to lose its function in the
tire.

Heat Spoils Rubber.

"This causes separation, weakness,
and finally a blowout. It may be in-
teresting to know that 285 degrees is not
an uncommon temperature reached in
a tire when driven at a high speed over
the road; this is particularly true of
large truck tires.

"In the case of cord tires, each
thread is imbedded in the rubber com-
pound and the internal friction is re-
duced to a minimum. A brief sum-
mary of the advantages derived from
the use of cord tires would include
easier riding, due to greater resili-
ency; saving of gasoline and oil; sav-
ing of machinery, and more miles per
dollar."

HANDY CLEANING RECEPTACLE

Convenient Way Outlined for Remov-
ing Dirt and Grease From Small
Machine Parts.

A convenient receptacle to have
around the garage for cleaning bolts,
nuts and other small parts is made
by removing the bottom from a one-
pound coffee tin and soldering in its
place a coarse wire screen. The
parts to be cleaned are then placed
in the tin, the cover put on and the
receptacle is shaken in a larger pan
containing kerosene or gasoline. Dirt
and grease are separated from the
parts by the oil and allowed to fall
through the mesh.—Motor.

LITTLE BUG CAN DO 85 AN HOUR

This small car, perhaps the fastest for its size ever built, has been es-
pecially constructed to hold the honor place in a new motion picture by Walter
Reed, in which a transcontinental race is to be staged.

The machine is of the special build and is about the size of a stripped-down
Ford. It is equipped with all the features of the big racing cars, however.
Including the ignition, special racing carburetor and two-speed axle. The
car is geared three to one and is said to be capable of a speed of 85 miles
an hour.

Eddie Heffernan, expert mechanic and noted racing driver, who was forced
to retire from the racing game because of injuries, spent several weeks getting
the car in shape.

TEN RULES OFFERED TO SAVE BATTERIES

Greater Care Is Necessary Dur-
ing Winter Weather.

Few Simple Instructions, If Faithfully
Followed, Will Add Materially to
Life of Important Electrical
Device

Now that cold weather is here, you
should look your battery over every
two weeks. These few simple instruc-
tions, faithfully followed, will lengthen
the life of a battery:

1. Don't lay tools or anything else
on top of your battery.
2. Don't spin your engine several
minutes at a time.
3. If your engine does not start
promptly, see that the ignition switch
is on and the carburetor mixture suf-
ficiently rich before using starter
again.
4. See that engine is sufficiently
primed in cold weather. Throw your
switch off; push starter to turn en-
gine once or twice; throw switch on;
then start again and your cylinder is
primed.
5. If your car stands idle for a
month or more, take the battery out
and leave it at the service station.
6. Use nothing but distilled water.
7. Let an expert add the acid for
the electrolyte.
8. When the solution sprays of
spills, wipe clean with a moist sponge.
Some batteries make no provision to
keep the solution from splashing, so
this rule is given.
9. Keep metal parts of connection,
which are not lead-coated, covered
with a thin coating of vaseline.
10. Dim lights are sometimes warn-
ing signals of short circuits or im-
proper charging. Let the service sta-
tion make an inspection when you are
confused.

REMOVAL OF STEERING POST

Hardwood Blocks Are Best as They
Furnish Good Brace for Jack
to Exert Pressure.

To remove a steering post without
damaging it with a Sillson wrench,
clamp two pieces of wood, a surface
of each of which has been hollowed
out to fit around the post. Hardwood
blocks would be best. This furnishes
a good brace for a jack to exert pres-
sure in loosening the piece. Work
may be aided by blows on the blocks
by a hammer.

RADIATOR MADE NONFREEZING

Common Winter Ailment Can Be
Eliminated by Keeping Constant
Flow of Water.

Freezing up of radiators on auto-
mobiles is a common ailment in the
winter. Have your car fixed up with
one of these devices in the summer
and next winter you'll be gambling
along while your neighbor is using up
lots of time and labor trying to thaw
out his car so he can go to town. The
nonfreezing part is obtained by having

Nonfreezing Radiator.

a water jacket connected to the upper
part of the radiator, a reservoir which
communicates with both jacket and
lower part of the radiator, and pipes
which keep a constant flow of water
running between them. The water is
drained from the radiator by gravity
when the engine is not running.

YOUNG GIRLS NEED CARE

Mothers, watch your Daughters' Health

Health Is Happiness

From the time a girl reaches the
age of twelve until womanhood is es-
tablished, she needs all the care a
thoughtful mother can give.

The condition that the girl is then
passing through is so critical, and may
have such far-reaching effects upon
her future happiness and health, that
it is almost criminal for a mother or
guardian to withhold counsel or ad-
vice.

Many a woman has suffered years
of prolonged pain and misery through
having been the victim of thought-
lessness or ignorance on the part of
those who should have guided her
through the dangers and difficulties
that beset this period.

Mothers should teach their girls
what danger comes from standing
around with cold or wet feet, from
lifting heavy articles, and from over-
working. Do not let them over-study.
If they complain of headache, pains
in the back and lower limbs, they
need a mother's thoughtful care and
sympathy.

A Household Word in Mother's House
writes Mrs. Lynd, about Lydia E.
Pinkham's Vegetable Compound.

"My mother gave me Lydia E.
Pinkham's Vegetable Compound when
I was 14 years old for troubles
girls often have and for loss of
weight. Then after I married I took
the Vegetable Compound before
each child was born and always when
I felt the least run down. Both my

MOTHER! CLEAN CHILD'S BOWELS WITH CALIFORNIA FIG SYRUP

Even a sick child loves the "fruity"
taste of "California Fig Syrup." If the
little tongue is coated, or if your child
is listless, cross, feverish, full of cold,
or has colic, give a teaspoonful to
cleanse the liver and bowels. In a few
hours you can see for yourself how
thoroughly it works all the constipa-
tion poison, sour bile and waste out
of the bowels, and you have a well, play-
ful child again.

Millions of mothers keep "California
Fig Syrup" handy. They know a tea-
spoonful today saves a sick child to-
morrow. Ask your druggist for genu-
ine "California Fig Syrup" which has
directions for babies and children of
all ages printed on bottle. Mother!
You must say "California" or you may
get an imitation fig syrup.—Advertise-
ment.

The prettiest hood is childhood, the
most expensive is womanhood.

Corduroy Cords

"Tough as the Name Implies"
and
Rut Proof

Corduroy Cords take their name from
an exclusive and distinctive feature—a cor-
rugated sidewall consisting of eight graduated
corrugations of live rubber moulded in the
side wall of the tire.

This gives Corduroy Cords practically
absolute resistance to side wall depreciation
—something which was much needed in the
tire field.

In every other respect Corduroy Cords
are high-grade tires, incorporating all the
qualities which make for long life and free-
dom from tire-trouble.

In addition, they are generally accord-
ed first place for appearance.

Before you make another investment
in tires be sure to examine Corduroy Cords.

SPANISH DOUBLOONS

By CAMILLA KENYON

COPYRIGHT THE BOBBS-MERRILL COMPANY

(CHAPTER XIX—Continued.)

Plans were discussed for transferring the pirates from the cave to the cutter, for they were to be taken to Santa Marina to meet whatever punishment was thought fit for their rather indefinite ill-doing. They had not murdered us, they had robbed us of nothing but the provisions they had eaten; they had, after all, as much right on the island as ourselves. Yet there remained their high-handed conduct in invading our camp and treating us as prisoners, with the threat of darker possibilities. I fancy that Santa Marina justice works mainly by rule of thumb, and that the courts do not embarrass themselves much with precedents. Only I hope they did not shoot the picturesque Tony against a wall.

The power-schooner, manned by a crew from the cutter, was to be taken to Santa Marina also. Senior Gonzales remained with us for the day as our guest, and on the next the boats from the cutter took off the pirates from the cave. We did not see them again. Through the convenient elasticity of Santa Marina procedure, Mr. Tubbs was herded along with the rest, although he might plausibly, if hypocritically, have pleaded that he had complied with the will of the invaders under duress. Aunt Jane wept very much, and handed me Paeanes of Passion with the request that she might never see it again.

We parted from Senior Gonzales not without regrets. It was an impressive leave-taking—indeed, Senior Gonzales in his least word and gesture was impressive. Also, he managed subtly and respectfully to impart to me the knowledge that he shared Titian's tastes in the matter of hair. On his departure he made a pretty little speech, full of compliments and floral specimens, and bestowed upon me as being mine by right, he earnestly protested—the two bags of Spanish doubloons.

Since the above was written, Mr. Shaw has run across Tony on the San Francisco water-front. Tony tells him that they got off with three months' imprisonment. The American consul interested himself and the schooner was restored to her owners, who were Tony's relations and hence did not prosecute. Before the discharged prisoners left the republic Captain Magnus was stabbed over a card game by a native. Mr. Tubbs married a wealthy half-caste woman, the owner of a fine plantation, but a perfectly genuine Mrs. Tubbs from Florida turned up later, and the too much married H. H. was obliged to achieve one of his over-night fittings.

CHAPTER XX.

The Bishop's Chest. We waited nine days for the coming of the Rufus Smith. During that time an episode occurred as a result of which I sat one morning by myself on the rocks beside the sloop, on which such ardent hopes had been centered, only like the derelict itself to be wrecked at last. It was a lonely spot and I wanted to be alone. I felt abused, and sad, and sore. I realized that I was destined to do nothing but harm in the world, and to hurt people. I was fond of, and be misunderstood by everyone, and to live on—if I wasn't lucky enough to meet with a premature and sudden end—into a sour, lonely, crabbed old age, when I would wish to goodness I had married anybody, and might even finish by applying to a Matrimonial Agency.

As I sat nursing these melancholy thoughts I heard a footstep. I did not look up—for I knew the footstep. I should have known it if it had trodden over my grave.

"I take it, you are not wanting company, you have come so far out of the way of it," said Dugald Shaw.

Still I did not look up.

"Nobody seemed to want me," I remarked sulkily, after a pause. He made no reply, but seated himself upon the rocks. For a little there was silence.

"Virginia," he said abruptly, "I'm thinking you have hurt the lad."

"Oh," I burst out, "that is all you think of—the lad, the lad! How about me? Don't you suppose it hurt me, too?"

"No," he made deliberate answer. "I was not sure of that. I thought maybe you liked having men at your feet."

"Liked it? Liked to wound Cuthbert—Cuthbert? Oh, if only it had not happened. If we could have gone on being friends! It was all my fault for going with him into the cave. It was after you had buried the skeleton, and I wanted to see poor Peter's resting-place. And we spoke of Helen, and it was all frightfully melancholy and tender, and all at once he—he said it. And I meant he never should!" In the soreness of my heart I began to weep.

"There, lassie, there, don't cry," he said gently. "The boy didn't speak of it, of course. But I knew how it must be. It hit him hard, I am afraid."

"I suppose," I wept, "you would have had me marry him whether I wanted to or not, just to keep from hurting him?"

"No," he answered quickly. "I did not say that—I did not say that I would have had you marry him. No, no, I did not say that."

"Then why are you scolding me?" I asked in a choked whisper.

"Scolding you? I was not. It was only that—that I love the lad—and I wish you both so well—I thought perhaps there was some mistake, and—I would not matter about me, if I could see you both happy."

"There is a mistake," I said clearly. "It is a great mistake, Dugald Shaw, that you should come to me and court me—for some one else."

"There was silence for a while, the kind of silence when you hear your heartbeats.

When he spoke his voice was unsteady.

"But the boy has everything to offer you—his ancient name, his splendid unstained youth, a heart that is all loyalty. He is strong and brave and beautiful. Virginia, why couldn't you love him?"

"I could not love him," I replied. "Very low, because my love was not mine any more to give. It belongs to—some one else. Is his name ancient? I don't know. It is his, and he ennobles it. Cuthbert has youth, but youth is only promise. In the man I love I find fulfillment. And he is loyal and brave and honest—I am afraid he isn't beautiful, but I love him the better for his scars."

After that I sat quite still, and I knew it depended on the next half minute whether I went all the days of my life crowned and glorious with happiness, or buried my shame and heartbreak under the waters of the cove.

And then Dugald Shaw took me in his arms.

By and by he said huskily:

"Beloved, I had no right to ask you to share such a life as mine must be—the life of a poor sailor."

"At this I raised my head from its nestling-place and laughed.

"Ask me? Silly, I asked you! Of course you could have refused me, but I depended on your not baying the courage."

"And indeed that is a charge I'll not allow—that I am so little of a man as to let my courting be done for me. No, no, it was my love compelling you that made you speak the words you did—the love of a selfish man who should have thought only of shielding you from the hardships of such a wandering, homeless life as mine."

"Well, Heaven reward you for your selfishness," I said earnestly. "I am thankful you were not so noble as to let me throw myself at your head in vain. I have been doing it for ever so long, in fact, but it is such a thick Scotch head that I dare say I made no impression."

"Sweet imp! You'll pay for that—oh, Virginia, if I had only something to offer you!"

"You can offer me something that I want very much, if you will, and at no cost but your strong right arm."

"It is an arm which is at your service for life—but what am I to do with it?"

Dugald Shaw Took Me in His Arms.

It now? And indeed I think it is very well employed at this moment."

"But it must be employed much more strenuously," I remarked, moving a little away. "If you are to get me what I want. Before you came, I was meditating possible ways of getting it for myself. I wanted it for a melancholy relic—a sort of memento in which all my hopes were buried. Now its purpose is quite different; it is to be my bride's chest and hold the dowry which I shall bring to one Dugald Shaw."

"You mean the chest—the chest that held the Spanish doubloons—that lies under the sand in the sloop?"

"Exactly. And now I shall know whether you are the true prince or not, because he always succeeds in the tasks he undertakes to win the princess."

It was low tide, such a tide as had all but buried me to my death in the cave. One could go and come from the beach along the rocks, without climbing the steep path up the cliff.

It was not long before Dugald was back again with spade and pick. He tore off the shrunken, sun-dried boards from the cabin roof, and fell to work.

It was not, after all, a labor of Hercules. The cabin was small and the chest large. I watched with the pride of proprietorship the swift ease with which the steel-showered arms of the Scot made the caked sand fly. Then the spade struck something which sent back a dull metallic sound through the muffling sand.

I gave a little shriek of excitement. Hardly could I have been more thrilled if I had believed the chest still to contain the treasure of which it had been ravished. It was filled to its brass-bound lid with romance, if not with gold.

At length, kneeling before it, I raised with an effort the heavy lid.

"Empty, of course—no more brown bags. But oh, Dugald, had ever a girl such a wonderful bride's chest as this?—oh!"

"What's wrong?"

"Nothing, only there is a crack in the bottom, running all the way along where it joins the side."

"Warped a bit, I suppose. No matter, it can be easily repaired—crack! I say, lassie, look here!"

Under the pressure of Dugald's fingers the floor of the chest was swinging upward on an invisible hinge. Between it and the true bottom was a space of about three inches in depth. It seemed to be filled with a layer of yellowed cotton-wool.

For a long moment we held our breath, gazing at each other with eyes which asked the same question. Then Dugald lifted a corner of the sheet of cotton and plucked it away.

"At once all the hues of the rainbow seemed to be flashing and sparkling before us. Rubies were there like great drops of the blood that the chest and its treasure had wrung from the hearts of men; sapphires, mirroring the blue of the tropic sky; emeralds, green as the island verdure; pearls, white as the milk of the coconuts and softly luminous as the phosphorescent foam which broke on the beach in the darkness. And there were diamonds that caught gleams of all the others' beauty, and then mocked them with a matchless splendor.

There were nine heavy bracelets, all jewel-set: twenty-three rings, eight of them for the hand of a man. Some of these rings contained the finest of the diamonds, except for three splendid unset stones. There were numbers of elaborate old-fashioned earrings, two rope-like chains of gold adorned with jewels at intervals, and several jeweled lockets. There was a solid gold snuff-box, engraved with a coat of arms and ornamented with seventeen fine emeralds. There were, besides the three diamonds, eighty-two unset stones, among them, wrapped by itself in cotton, a ruby of extraordinary size and luster. And there was a sort of coronet or tiara, sewn all over with clear white brilliants.

Ours? Yes, for whether or not there were an infection of piracy in the very air of the island, so that to seize with the high hand, to hold with the iron grasp, seemed the law of life, we decided without a qualm against the surrender of our treasure-trove to its technical owners. Technical only for one felt that, in essence, all talk of ownership by this man or that had long ago become idle. Fate had held the treasure in fee to give or to withhold. Senior Gonzales had had his chance at the chest, and he had missed the secret of the hidden hoard, had left it to lie forgotten under the sand until in some tropic storm it should be engulfed by the waters of the cove. More than this, had he not most specifically made over to me the Island Queen and all that it contained? This was a title clear enough to satisfy the most exacting formalist. And we were not formalists, nor inclined in any quibbling spirit to question the decrees of Fortune. As treasure-hunters, we had been her devotees too long.

So after all it was not my scornful skepticism but the high faith of Miss Higglesby-Browne which was justified by the event, and the Harding-Browne expedition left the island well repaid for its toils and perils. Plus the two bags of doubloons, which were added to the spoils, the treasure brought us a sum so goodly that I dare not name it, for fear of the apparition of Senior Gonzales and the Santa Marina navy looming up to demand restitution. Like true comrades, we divided share and share alike, and be sure that no one grudging Cookie the percentage which each was taxed for his benefit.

And now I come to the purpose of this story—for though well concealed it has had one from the beginning. It is to let Helen, whoever and wherever she may be, if still of this world, know of the fate of Peter, and to tell her that when she asks for them she is to have my most cherished relics of the island, Peter's journal and the silver shoe-buckle which he found in the sand of the treasure-cave and was taking home to her.

Only, she must let me keep Crusoe's penance.

(THE END.)

Ask Your Dealer or Decorator about the ALABASTINE OPALINE PROCESS

Beautiful walls! Harmonies never before imagined! A blending of tints and tones, a magic interweaving of colors which will transform your walls into a rich fabric unsurpassed in its charm and cheerfulness—and at a cost well within your means.

ANY good decorator can do the work—nearly all stores dealing in paints can supply the material—anyone can now afford to have Tifanized walls formerly the exclusive privilege of the very wealthy.

Alabastine

Instead of Kalsomine or Wall Paper

All that is necessary is just Alabastine, the same nationally accepted wall tint which for forty years has been used in homes, apartments, offices and public buildings of all kinds—the same sanitary, durable, economical and artistic wall coating sold by the best stores and used by the best decorators. With Alabastine, regularly applied you get the exact color to match your rugs and draperies. Through the Alabastine-Opaline-Process you obtain a combination of colors most pleasing and satisfactory. Before decorating ask to see samples of the Alabastine-Opaline-Process.

The Alabastine Company

Grand Rapids, Michigan

VIOLET

THE origin of the fragrant and poetic name of Violet is shrouded in mystery. The name *Viola* appeared in the south of France and in the north of Spain and Italy early in history, but there was no clue to its origin and apparently, like *Topaz*, "it just grew." Etymologists with a fanciful turn of mind have identified it with the lovely golden violet which was the prize of troubadours of old in the courts of love; other authorities believe that it may have been a form of some old Latin name such as *Valentine*. The Latin name for the little purple flower that lifts its modest head in the spring is "*Viola*."

Viola was popular as a feminine name in Spain, but France changed her to *Yolande* or *Yollette*. An old English form was *Jolette*. Scotland, however, reached out and appropriated the name, changing it to *Violet*. It is thought that this latest version came through a connection of the Archers of the Royal Guard, or perhaps

through Queen Mary's friend, *Violet Forbes*. Certainly, the name spread in popularity in England and Scotland, where *Violets* were almost as numerous as the *Marys* of the Catholic communities of today.

Perhaps the most famous *Violet* of history was *LaViolette*, the young dancer, so called by *Maria Theresa*, who became the wife of *David Garrick*, the brilliant English tragedian. *Viola* was the form preserved by Italy and it still reigns in undisputed popularity there. It gradually penetrated England and was elevated to favoritism through Shakespeare's lovely heroine of "*A Winter's Tale*."

Violet's flower is of course her fragrant and modest namesake, the violet. It signifies modesty. Her tall, stately gem is the bloodstone, which promises her bodily health, guards her from deception and distressing news, and preserves her faculties. If the stone is given to her by a lover, it will insure lasting and sincere devotion. Thursday is her lucky day and 5 her lucky number. (Copyright.)

The Hope of Eternity. Translucency is stamped on all our possessions, occupations and delights. We have the hunger for eternity in our souls, the thought of eternity in our hearts, the destination for eternity written on our inmost being, and the need to ally ourselves with eternity proclaimed by the most short-lived trifles of time. Either these things will be the blessing or the curse of our lives. Which do you mean that they shall be for you?—Alexander MacLaren.

MOVING. Were you moved too, by her music? Yes, it amounted to that. I think we should have kept the apartment for another year if it hadn't been for her.

To grow old gracefully, a man has to keep as sharp an eye on his clothes as ever.

One woman at a hotel in the interior of Ontario the other night asked the clerk for a key to her room. "Key," said the bold proprietor, as if she had asked for the crown jewels. "Why, we never lock our doors around here. The last man who had a key to that room took it away with him 15 years ago." "Er-r-r," said the persistent woman, "you don't think, perhaps he might come back with it tonight?"

A LINE O' CHEER

By John Kendrick Bangs.

ON THE ROAD

ON THE road may I be steady, For its complications ready—Ready for its hits and misses, For its sorrows and its blisses, And however great my load Glad to be upon the road. (Copyright.)

Seasoned Timber. Experiments made by the United States forest service have demonstrated that thoroughly air-dried timber has about double the strength of green timber. Moreover, in order effectively to apply preservative agents to timber, it must be first seasoned, because it is very difficult to inject antiseptics into the green wood. The loss of weight by seasoned timber is quite surprising. Western pine loses half its weight after three to five months' seasoning.—Washington Star.

FIFTY YEARS AGO

Dr. Pierce's Favorite Prescription became famous and was in consultation in many cities because of his successful treatment of disease. This Dr. Pierce, who finally made up his mind to place some of his medical knowledge before the public, and moving to New York, put up what he called Dr. Pierce's Favorite Prescription, and placed it in the drug stores in every state.

Dr. Pierce's Favorite Prescription has been recognized as a tonic for disordered health, feeling nervous, dizzy, weak, and run-down by weaknesses of women is quickly restored to health by its use. Thousands of women testify that Dr. Pierce's Favorite Prescription has entirely eradicated all distressing ailments.

Dr. Pierce's wonderful discovery, Dr. Pierce's, called An-uric (for uric acid and backache), has been successfully used by many thousands who suffer from their backache, rheumatism, and other symptoms of uric acid in joints or muscles have been completely conquered by its use.

Send 10c to Dr. Pierce, Buffalo, N. Y., for trial pkg. of any of his remedies, or write for free medical advice.

Justifiable.

The unhappy husband was unbearably himself of his tale of woe.

"How did so misnamed a couple happen to meet in the first place?" Bill asked.

"We sang in the same church choir," explained the unhappy husband.

"Ah! You met by chance, eh?" Bill suggested.

Three weeks later, after he had emerged from the hospital, the court ruled that the defendant had acted in self-defense.

SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really cures but pre-eminent as a medicine for kidney ailments of the kidneys, liver, and bladder.

Dr. Kilmor's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmor & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

A Shifty Simoleon.

They're real pals—the kind that borrow money from each other and pay it back by borrowing. For a long time the limit had been a dollar.

"Lend me a dollar," one says.

"Sure, old kid," the other comes back with a full burst of generosity. Then he pays back the dollar he had borrowed the week before. Of course the dollar had to have a name. So now when one needs a dollar he goes to the other and says:

"Gimme the shuttle buck."

DYED HER BABY'S COAT, A SKIRT AND CURTAINS WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her old, worn, faded things new. Even if she has never dyed before, she can put a new, rich color into shabby dresses, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything. Buy Diamond Dyes—no other dye—then perfect home dyeing is guaranteed. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, fade, bleed or run.—advertisement.

Self Ball as Good as a Gun.

On an English golf course, some time ago, the flying ball struck and killed a partridge, and a suit is threatened to determine the ownership of the dead bird. The officers of the club claim it and the member says it belongs to him, each desiring it as a trophy. It is claimed that the member is liable to arrest for not having a license to kill game.

PERSONALS.

Mrs. F. L. Davidson spent Friday in Jackson.

F. L. Davidson spent Wednesday in Ypsilanti.

Mrs. Blanche Sanborn spent Monday in Jackson.

Miss Katherine Hoffman spent the week-end in Detroit.

Miss Amanda Koch spent Thursday with relatives in Jackson.

Albert Steinbach made a business trip to Detroit Tuesday.

Mr. and Mrs. C. O. Bahnmiller spent Wednesday in Detroit.

Rev. and Mrs. E. A. Carnes were in Ann Arbor Sunday afternoon.

Mrs. Floyd VanRiper, of Ann Arbor, spent Tuesday in Chelsea.

Mrs. Clarence H. Collins and son were Ann Arbor visitors Monday.

Ed Brown and son spent the week-end with relatives in Mosherville.

Mr. and Mrs. O. D. Schneider and children spent Sunday in Ann Arbor.

John Miller, of Detroit, spent the week-end at the home of his sisters here.

Miss Georgia Russell is spending some time with relatives in Jonesville.

John Kelly spent the week-end with relatives in Detroit and Saint Clair.

Mr. and Mrs. Stanton Klink and children spent Sunday with relatives in Jackson.

Mr. and Mrs. J. F. Quinlan, of Ann Arbor, spent Sunday at the home of the Miller sisters.

Lewis Miller, of Chicago, spent several days of last week at the home of his sister here.

Mrs. John Schieferstein spent several days of the past week with relatives in Ann Arbor.

R. D. Walker returned home Saturday from Detroit, where he spent the last three weeks.

Mr. and Mrs. John Schieferstein were guests at the home of Mr. and Mrs. David Alber Sunday.

Sidney Smith, of Detroit, spent Wednesday in Chelsea. Mr. Smith was a former resident here.

Mrs. W. H. Benton, of Jackson, spent several days of this week with Chelsea relatives and friends.

Mrs. Estelle Chase went to Ann Arbor Sunday to spend a few days with her sister, Mrs. D. A. Warner.

Chas. Harrington, of Detroit, was a caller at the home of Mr. and Mrs. O. J. Leech the first of the week.

Mr. and Mrs. Geo. Ewing, of Jonesville, spent the week-end at the home of Mr. and Mrs. E. E. Smith.

Mr. and Mrs. Russell Olson, of Detroit, spent the week-end at the home of Mr. and Mrs. T. G. Speer.

Mr. and Mrs. Emmett Sargent, of Jackson, were week-end guests at the home of Mr. and Mrs. Chas. Lambert.

Mr. and Mrs. Wm. Geddes, of Detroit, were week-end guests at the home of Mr. and Mrs. H. R. Schoenhals.

Mr. and Mrs. Henry Page and daughter, of Ypsilanti, spent Sunday at the home of Mr. and Mrs. Allie Page.

Mr. and Mrs. Charles Truesdell, of Ann Arbor, were week-end guests at the home of Mr. and Mrs. Charles Lambert.

Mrs. Carl Braun, of Ann Arbor, spent Friday at the home of her parents, Mr. and Mrs. Geo. Knapp, of McKinley street.

Mr. and Mrs. A. Hilsinger, of Jackson, spent the week-end at the home of Mrs. Hilsinger's mother, Mrs. Elizabeth Wackenhut.

Mr. and Mrs. Wm. Hammond, who have been spending the last five months at Augusta, Georgia, returned to their home here Tuesday.

Mr. and Mrs. I. Belden and Mr. and Mrs. DeForest Belden, of Pontiac, were week-end guests at the home of Mr. and Mrs. C. O. Hewes.

Mrs. Elizabeth Wackenhut, who has been spending several weeks at the home of her daughter in Jackson, has returned to her home here.

Income Tax Facts.

Changes in the revenue law are of material benefit to the average family man. Under the revenue act of 1921 a married person, living with wife or husband, whose net income for 1921 was \$5,000 or less, is allowed a personal exemption of \$2,500. Under the revenue act of 1918 the exemption allowed a married person was \$2,000, regardless of the amount of net income.

The normal tax rate is the same, 4 per cent on the first \$4,000 of net income above the exemptions, and 8 per cent on the remaining net income. Given his personal exemption of \$2,500, plus \$400 for each dependent, a married man with three children—the average American family—will pay this year on a net income of \$4,000 a tax of \$12. On the same income for 1921 he would have paid a tax of \$56.

Every citizen and resident of the United States must determine for himself whether his income for 1921 was sufficient to require that a return be filed. Full instructions for making out a return are contained on the forms, a copy of which will be sent to taxpayers who filed a return last year. Failure to receive a return, however, does not relieve a taxpayer of his obligation to file a return on time, on or before March 15, 1922. Forms may be obtained from collectors of internal revenue and branch offices.

Endorse Forming Calf Clubs.

Members of the Washtenaw Jersey

Breeders' association at a recent

meeting voted unanimously to aid

the county Farm Bureau in every

possible way in organizing Jersey

Calf Clubs in Washtenaw. Members

expressed themselves as willing to

furnish calves if they could not be

secured at reasonable prices in neighboring

counties. The first calf clubs

brought into the county more than

50 head of high class foundation

stock, resulting in the formation of

several pure-bred herds.

Resolutions were adopted recommending

that the Washtenaw county

board of supervisors request that the

state department conduct an anti-

tuberculosis campaign in the county,

as from now on no herds will be

accepted for state and federal supervision

from counties not on the official

list of those where such campaigns

and tests have been made.

Election of officers resulted in

James Welch of Ypsilanti being

elected president, and Robert M. Fee

of Ann Arbor, township, secretary

and treasurer.

Chelsea Village Election.

Notice is hereby given to the qualified electors of the Village of Chelsea, State of Michigan, that the next ensuing Annual Election will be held at the Sylvan Town Hall, within said village, on Monday, March 13, A. D. 1922, at which election the following officers are to be elected, viz.:

One Village President; one Village Clerk; one Village Treasurer; three Village Trustees, for two years; one Village Assessor.

Dated this 27th day of February, A. D. 1922.

G. W. WALWORTH,

Clerk of said Village.

MICKIE SAYS

WHAT HAS BECOME OF TH' OLD-FASHIONED GUY WHO USED TO BRING IN THINGS TO HELP FILL UP TH' PAPER. "WHEN TH' BOSS WUZ RUUNIN' IN CIRCLES, WORRYIN' BECUZ THEY WUZNY ROOM FER WHAT HAD TO GO IN?"

Ramsey Milholland

By Booth Tarkington

This charming tale is no less boy and girl than "Penrod," "Seventeen," and "The Oriole." But it has a more serious significance in its revelation of great events, such as the World war, changing overnight, as it were, boys into men and girls into women—another illustration of the age-old dictum that men must fight and women must weep.

The earlier scenes are of boys and girls in public school, where the plodding Ramsey Milholland learns to hate the traditional bright girl pupil—the teacher's pet.

The plot carries the same characters to the state university. We have a rollicking picture of boys and girls struggling with the rudiments of education and finally of youth getting the finishing touches at college. Up to this point it is mostly humor and care-free action.

Then comes the war, changing everything. The author carefully avoids the tragic and heart-rending. He implies a happy ending with an opportunity for the reader to fill in through imagination, the tragedy if he so desires. It is a delightful Tarkington story, typical of the author's best talent.

It is

Our New Serial

ANCIENT CITY HAD BAR ROOMS

Discoveries in Pompeii Prove That the Serving of Drinks Was a Recognized Occupation.

Three score years after the birth of Christ the busy and beautiful little city of Pompeii, overlooking the Bay of Naples, with its 20,000 inhabitants, was dramatically blotted out of existence by an eruption of the long-dormant Vesuvius, and for 17 centuries lay unknown beneath a thick shroud of volcanic refuse, remarks the Toronto Mail and Empire. About the middle of the Eighteenth century the grave of the dead city was accidentally discovered and subsequent excavations have slowly revealed the rare treasures of a departed civilization. New excavations were begun in 1911, but with the great war of 1914 the world had something more important to think about than Pompeii. Nevertheless, the antiquarians continued quietly digging and discovering fresh wonders. A few weeks ago the London Times correspondent in Rome wrote an interesting description of the latest findings, among them being a great fresco, with painting of the 12 penates (custodians) of the city—Jupiter, Juno, Mars, Minerva, Hercules, Venus, Mercury, Proserpine, Vulcan, Ceres, Apollo and Diana. But to the people of North America the most absorbing discovery will be that of a bar, or thermopolium, where drinks were served out to parched Pompeians. There were many terra cotta amphorae found—and an amphora, gentle reader, is a sort of glorified "schooner". At the end of the bar was a small furnace and a caldron with a lid for mixing what Mr. Dooley termed "hot wans." Within the caldron the excavators found the remains of some of the liquid used.

WORLD'S DEBT TO COLUMBUS

Expansion of Europe and Remaking of the Earth Followed Explorer's Wonderful Voyage.

Few people realize how thin great regions were peopled four centuries ago, or how many Europeans are living outside of Europe today. The United States, Canada and Argentina contain twice as much land as the home continent. When white settlement began, the land now comprised in the United States may have contained 400,000 Indians—that is the highest estimate. Possibly the other two countries contained as many, an average of population of one person to nine square miles. Australia, with 3,000,000 square miles, held not more than 100,000 persons. Today, those four countries support a white population of about 125,000,000. The hot regions between the Rio Grande and La Plata hold several millions more. Europe has spread over half the globe, while Asia has shrunk well within her own borders—and all this change dates from and depends upon that voyage of Columbus.

White men crossed the Atlantic before Columbus, but they left no trace of their voyage on this side. It is passing strange that not even European domestic animals were left here—the Norsemen had cattle, whose bellowing frightened the natives. Not till Columbus pointed the way did the expansion of Europe begin, or the world become truly one world instead of many.

Effective Fog Signals.

In a heavy fog there is danger of collision between ships because the uniform signals used merely indicate their presence, and tell nothing of their course or direction. A sea captain of long experience has now devised a system which overcomes this difficulty, says Popular Mechanics Magazine. Four signal horns of different tones are used, two sirens, a shrill whistle, and a steam gong, all of which are operated by foot levers. Each of these corresponds to one quadrant of the compass, and is operated only when the ship's course lies in that general direction. The four divisions of the quadrant itself are indicated by varying the signals, as, for example, one long blast, a long and short, a long and two short, and two long. A recording mechanism is connected to the signal equipment and serves as evidence in case of subsequent question as to the handling of the ship.

Old Regiment to Be Disbanded.

The Eightieth Carnatics is one of the pre-war units which has been ordered to disband. The regiment was raised at Tanjore in 1777; for the first 40 years of its career it was almost continuous in active service, and among the trophies in the officers' mess is the black marble cup belonging to Tipu, the sultan, from whose palace the Carnatics took the cup at the storming of Seringapatam, in 1799. The cup is being offered by the regiment to the British museum.

Seat of the Trouble.

A Gainsborough youth has been fined for causing a disturbance by imitating a cat at night. He said all would have gone well if somebody had not made a noise like a policeman.—London Tit-Bits.

More Than Likely.

"I wonder what those signals mean that Marconi says we are getting from Mars." "Oh, they are probably trying to get us to join a league of planets."—New York Sun.

Ann Arbor May Festival.

The next Ann Arbor May Festival will take place during the four days beginning May 17, and as usual will consist of four evening and two afternoon concerts. From announcements just made by officials of the University School of Music the event promises to eclipse in brilliancy all of its predecessors which have been given during the past twenty-eight years.

The Chicago Symphony Orchestra, under Frederick Stock, will participate during the entire festival, while the University Choral Union will be heard in several of the programs. The children's chorus of 500 voices will provide one program, the leading work being "Song of Spring" by Carl Busch. This concert will be conducted by George Oscar Bowen, Supervisor of Music in the Ann Arbor public schools. The miscellaneous concerts will be conducted by Frederick Stock, who will also join with Earl V. Moore, Acting-Conductor of the Choral Union, in the conduct of the choral works.

Examine Cotton and Linen.

Now that the "Great White Sales" are on in practically every department store in the county, the thrifty housewife who would buy to the best advantage should send for samples and apply the following simple tests—tests which she can make without paraphernalia of a chemical laboratory.

1. Remove all surface dressing from the sample, unravel out several threads of the material, each way, and break each one in two. Linen being stronger breaks with a snap, and the fibers are shorter and curly; the ends of the cotton are fuzzy.
2. Apply a drop of olive oil or glycerine to the sample and press between pieces of blotting paper. If linen, the spot will look dark and clear when held against a dark background; if cotton, the spot will be opaque; if of a mixture of cotton and linen, the spot will look less clear than of all linen, the linen absorbing the oil more rapidly than the cotton will.
3. Apply a drop of ink to the sample. If the cloth is linen, this ink will be absorbed very quickly and follow the threads in an uneven line; if cotton, the spot will be even around the edges.

In applying these tests, wash the material before using the ink or oil, and apply at the same time to a piece of material known to be cotton, so that the different reactions will at once be noticeable. If a sample, when boiled, loses its gloss and becomes "sleazy," one can be quite sure that it is cotton; as linen retains its gloss and strength after washing.

Samson Price Drop Benefits Farmers.

To assist further in stabilizing industry through these last weeks of readjustment, the Samson Tractor Company announces a further reduction in the price of their famous Model M tractor to \$445.00. This makes the price, including platform and fenders, belt pulley assembly and governor control, \$555.00.

This is by far the lowest price at which the Samson Tractor has ever sold and is especially significant because it includes the many valuable improvements made upon the tractor since it first came upon the market three years ago.

The reduction is considered a temporary one only with the price subject to be raised without notice.

In making this temporary reduction, the Company states further: "As soon as farmers can enter the market again with normal purchasing power based on fundamentally sound profits from their business, all industry can settle down to normal stability and happiness. This condition to be permanent and healthy, cannot be brought about by merely increasing or curtailing production, by inflating market prices, or by the artificial means of legislation. It can be hastened however, by any means that lowers the cost of production thereby increasing the farmers' profits."

"Characteristic of the American farmers' perseverance, he is going to work this spring with courage undaunted and with renewed determination to carry on his business with profit. He knows that from 60 to 80 per cent of the operating expense of his business is composed of man and horse labor costs. He knows that these costs are the most vulnerable points for attack in his endeavors to secure a lower cost of production, and that power farming is the weapon for that attack. But in equipping themselves now for increased profits, many farmers must now buy equipment in the face of recent reverses."

"Implement dealers and implement manufacturers have suffered serious losses as the aftermath of war. But neither the farmer, the dealer nor the manufacturer wants sympathy. They simply want action, and the situation calls for earnest co-operation between the three."

"Regardless of its own tremendous sacrifice by this reduction, the Samson Tractor Company brings the price of its tractor within easy reach of farmers in spite of their past reverses. It enables farmers to secure profit-making units by the use of which their purchasing power can be increased for the stabilizing of all industry and for hastening normal prosperity for the American public of which the farmer composes a large part."—Advertisement.

COUNCIL PROCEEDINGS.

(Official.) Council met in special session, February 6, 1922. Meeting called to order by President D. H. Wurster. Roll called by clerk. Present—Trustees Fahrner, Shaver, Frymuth, Dancer, Klingler, Koebbe. Absent—None. Minutes of the last meeting were read and approved. The following bills were read by the clerk:

General Fund.
Chelsea Standard, their statement of Jan. 3rd \$ 13.55

The President made the following appointments:
Board of Registration—J. N. Dancer.
Election Commissioners—Jacob Hummel, C. H. Lehman, H. D. Withrell.
Motion made and carried to adjourn.
G. W. Walworth, Clerk.

Large Alfalfa Acreage.

Some time ago the Farm Bureau sent out cards to alfalfa growers in Washtenaw county for the purpose of finding out the acreage sown in this county. The result shows that there are 4,804 acres devoted to this crop in the county. Ypsilanti township has the largest acreage, 608 acres; Manchester township, 500 acres. In Ypsilanti township it is grown on 47 farms and in Manchester township there are 39 farms with alfalfa. The reports also show that some fields have been seeded for 10 years, but in the majority of cases the average length of seeding is from three to five years, of which 1,030 acres were sown with common and 3,768 acres with Crimm.

Jackson—Plans for the dairy and alfalfa campaign to be conducted in Jackson county from March 13 to March 24 are nearly completed, according to Roy Decker, county farm agent. During this period 84 barn and 10 night meetings will be held. Speakers from the farm crops and dairy departments of the Michigan Agricultural College will be present.

Not so long ago a household investigation talked to housekeepers in New York's famous Park Avenue residential district. She found that many of the most exclusive families had adopted spread for bread like Brednut.

for Progressive Housekeepers

A new food.

Smiles from your family. Smiles from your pocketbook.

RECENTLY a noted foreign writer paid this high compliment to American women. He said, in effect: "American women are the quickest in the world to adopt new worthy ideas. Their eyes and minds are ever wide open on any subject; social relations, civic improvement, national and international politics."

Our writer should have added that American women are especially quick to adopt any new, worthy food idea. For American women do lead the world in their intelligent reception of food betterments.

The women of Michigan are furnishing an outstanding example of this characteristic. Only a few months ago they were introduced to Brednut, the new spread for bread. Such a hearty welcome did they give this wholesome food that it was hard to keep up with orders.

Delightful Brednut Sandwiches Try Them!

Brednut Toasted Chicken Sandwich

Toast two slices of bread spread with Brednut. Cover one slice with lettuce, the other with sliced chicken and place together. Notice what a delicate flavor Brednut gives to this sandwich.

Brednut, Cream Cheese and Pimiento Sandwich

Spread slices of bread with Brednut. Cream a cake of cream cheese with a fork until it becomes soft enough to spread easily. Add chopped pimientos to taste and spread over one slice of bread and cover with the other. Notice how well your Brednut spreads.

Made from pasteurized milk and rich tropical nuts

Can you imagine a more delightful combination than this: pasteurized milk blended with rich tropical nuts—nuts brought from luxuriant far off islands?

Husbands comment on Brednut as a delicious new addition to the family table—a welcome new subtraction from the family expense.

Brednut is made under careful supervision; made in rooms of spotless white cleanliness. Brednut comes to you fresh from these perfect surroundings—uncolored—a pure white. With wholesome vegetable material which your grocer gives you, you can color your Brednut to a rich golden yellow.

BREDNUT

The delicious new spread for bread

(Made from pasteurized milk and rich tropical nuts)

One Operation of the Lever Opens the Ladder Hinge-Door

A SLIGHT upward pressure with one hand opens it. Strongly secured to the all-steel frame, the doors will not freeze-in, bind, stick or sag.

The perfect fit of the doors and the security of the locks insure an absolutely air tight silo. No other silo built has a Ladder Hinge-Door.

No more lost doors! Each door is always in place and always workable. All danger is eliminated for it's always easy to climb the Ladder Hinge-Door.

Our line comprises both tile and wood stave, and both silos have the famous Ladder Hinge-Door. Ask us for complete details.

Can You Write a Headline for This?

Foley's Honey and Tar is the best known and most successful family cough medicine on the market and the following letter is positively true and genuine.

Says "It Acts Like Magic"

Gilbert Fleming, 3811 Budlong Av., Los Angeles, Cal., writes: "I have much pleasure in testifying to the very great benefit my family and I have derived from the use of Foley's Honey and Tar. It positively acts like magic, and to my mind there is nothing on the market that can compare with it. Whenever there is any of our household suffering from heavy colds or bad coughs or hoarseness, we at once get a bottle from our local drug store, and after one or two doses obtain instant relief. Your company deserves great credit for such a valuable production and from our own experience we cannot do otherwise but recommend it to our friends and this we willingly do and will continue to do so."

Foley's Honey and Tar COMPOUND

CLEARs THE THROAT of phlegm and mucus, stops that tickling, opens the air passages for easier breathing and coats the raw, inflamed surfaces with a healing, soothing medicine.

Coughs that "hang on" after the grip or "flu" are relieved by Foley's Honey and Tar

THOUGHTLAND.

Wandering back in Thoughtland,
It seems but yesterday
We trod the flowery paths of youth,
Pursuing the time away.
Without a thought of the time to go
We glided out to sea,
Drifting along on the flowing tide
To the harbor of Liberty.

Wandering back to Thoughtland,
Through the mist of years,
Life was one long golden dream,
Free from cares and fears.
When hearts were young and tender,
Laughter was our share;
Around us buds and blossoms,
Growing everywhere.

Wandering back to Thoughtland,
The sky was ever blue,
Every cloud was silver-lined,
Every heart-throb true.
Building castles in the air
Every live-long day,
Life was just a fairy dream—
We thought it was for aye.

Wandering again in Thoughtland,
All things tinged with gray,
We tread the daily path of life
Secure, since it's the way;
Love gladdens every step we take,
Helps us bear each load,
Trusting the way we're traveling
Will some day lead to God.
—Toronto Mail and Empire.

EARLY-DAY POSTAL SERVICE

Devices Employed Seem Somewhat Crude Now, but They Served the Purpose Centuries Ago.

Most people regard the post as a modern institution; yet this is not so, for regular postal services have existed for more than two thousand years.

One of the earliest systems for the delivery of letters was established by Persia more than two centuries before the Christian era.

In those days letters were not written on paper. They took the form of short sticks, on which a message was inscribed either by means of paints, or by burning it on with a kind of primitive poker-work outfit. These letters were delivered by regular relays of postmen over thousands of miles of country.

Even the telegraph was in use in a crude form. Messages could be sent in an hour or two over distances of hundreds of miles by means of a system of shuttles, who passed them on from one to the other.

Georges Wears a "He Corset."

Georges Carpentier has adopted the "he corset"—the newest thing in wear for men, according to a Paris dispatch in the New York Sun.

From time immemorial Frenchmen have worn the old-fashioned "galuses." During the war they discovered the advantage of the belt, as worn by Americans. But the manufacturers went the Americans one better, and are making them about four inches wide, in fancy stamped leather or embroidered canvas and advertising them as a "great aid to the manly form."

Maurice Chevallier, the comedian, has also adopted the new style.

Houses Without Chimneys Planned.

In a housing scheme which includes the building of a number of five-roomed houses to be let at 25s a week each, in one of the northern English towns, it is proposed entirely to eliminate chimneys.

The money saved will be spent in installing electric equipment, consisting of fires, kitchen range and the like. The kitchen range will possess an elevated oven, so that no stooping is necessary.

"There is already a 'chimneyless' colony on the outskirts of Glasgow, the houses being occupied chiefly by artisans."

Men Paid for Her Passage.

One Saturday night a few weeks ago, a minister stayed overnight at a farmhouse in Brockville, Ont. The next morning when he was about to leave, he found a hen in his buggy, he put her out, then got his horse and hitched up and drove to Green Bay, about ten miles, and tied his horse in the church shed. After service he got into the buggy and drove to a nearby home for dinner. When he went to get the halter out of the buggy, he was surprised to find Mrs. Hen sitting there with an egg under her.

EXACTLY

"A grinding application of the brakes does a car no good."
"In other words, you've got to handle a car as you would bad news."
"Eh?"
"Break it gently."

Remarkable Leghorn.

A White Leghorn that crowed like a rooster after laying an egg was owned by a Vancouver man. The bird laid two eggs a day, one normal egg in the morning and one, without a shell, in the afternoon. Every third day it didn't lay. So constant and weird was the crowing that the hen had to be killed, as it frightened the other fowls.

Status of Women.

Only four statues of women, with the exception of royal effigies, are to be found in England. They are Sister Dora, in Walsall; Florence Nightingale, in Waterloo place, London; Sarah Siddons, on Paddington Green; and Nurse Cavell, in St. Martin's place, London.

BREVITIES

Manchester—This village has two tickets in the nomination for officers to be voted on at the coming village election.

Dexter—There is but one party ticket placed in nomination for village offices to be voted on at the annual election on March 13.

Ann Arbor—Clarence Heininger, a Belleville youth, has been ordered to pay six dollars a week to Miss Tillie Reynolds of Ypsilanti for the support of her minor child.

Stockbridge—Drain Commissioner Graham, of Mason, was in town Tuesday in the interest of a drain starting near the Peter Kelley farm and connecting with the Lowe Lake Drain.—Brief-Sun.

Brighton—On March first Fred T. Hyne will finish his fiftieth year in his present business and in the same place. No other business man of Brighton remembers the day when Mr. Hyne started, and very few are living who can recall those days.—Argus.

Ann Arbor—Fielding H. Yost, athletic director of the University of Michigan, is hopeful that hockey, golf and wrestling will be recognized as minor sports at the university within the next year, and is working toward this end. At present these sports are classed as informal. If they are recognized as minor, teams from Michigan will compete with others in the Big Ten.

Grass Lake—Rev. F. L. Curry, director of evangelism for the Northern Baptist Convention in Michigan, assisted by Mr. Greenlay, the celebrated colored soloist from Detroit, will begin a series of special services at the Federated church Sunday, March 12. This is a part of the simultaneous campaign that is to be put on in Jackson Baptist Association at that time.—News.

Manchester—A number of years ago some of the boys of the village were experimenting with wireless electricity and it was claimed they were able to pick up messages transmitted at prominent stations through out the country. The government requesting amateurs to desist as it interfered with expert work, etc., caused the boys to take down their apparatus, but we hope now they will resume.—Enterprise.

Jackson—Joe Shafer, of Manchester, whose automobile collided with a Buick car driven by Mr. Berchhoff of Brooklyn, on the Napoleon road Saturday night, endangering the lives of five children in the latter's car and which resulted in considerable damage to both cars, pleaded guilty to a charge of driving an automobile while intoxicated and was fined \$100 in police court Monday morning. Frank Cahill, an occupant of the Shafer car, paid a fine for being drunk.—News.

Ann Arbor—Students of journalism at the University of Michigan, who enroll in the class in advertisement writing this coming semester, will be required to study the advertising problems of local merchants and prepare copy for publication. A careful survey will be made of each business establishment, setting forth its merits and defects, with the purpose in view of suggesting wherein its appointments, merchandising, and advertising policy may be improved. Business men have been quite generally willing to co-operate with the students in their efforts to apply classroom theory to practical trade conditions.

Brooklyn—A steam shovel has been making slow travel this week from the railroad station at Somerset Center to a point of operation in the hills south of Liberty. It will be utilized in cutting down the big grades on the four miles of M-14 that will soon be under construction between Liberty Mills and the county line. This improved road from the north will emerge at a point on the Chicago turnpike which is known as M-23 at a point just east of Somerset Center. Here M-14 doubles east on M-23 to the first turn south, east of Somerset. Contractors on this job are offering day labor only \$2.50 per day and man and team \$5, this for 10 hours work. The contractors state that the bids in close competition figured this price for labor and if local workmen do not respond plenty of labor can be found in the cities.—Exponent.

PROFIT BY THIS

Don't Waste Another Day.
When you are worried by backache; By lameness and urinary disorders—Don't experiment with an untried medicine.
Follow Chelsea people's example. Use Doan's Kidney Pills.
Here's Chelsea testimony.
Verify it if you wish:
O. J. Leech, barber, cor. McKinley and Railroad streets, says: "I know Doan's Kidney Pills can be depended upon for I have used them for a disordered condition of my kidneys and attacks of backache and they have never failed to do me good. I have to be on my feet long hours at a stretch and I blame this for my trouble. I always go to Vogel's Drug Store and get a box of Doan's when I feel any of these symptoms coming on and they soon straighten me out."
Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Leech had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

LOCAL HAPPENINGS.

The bounty on sparrows expired on Tuesday of this week.

Born, on Thursday, February 23, to Mr. and Mrs. Lewis Steinway, of Sylvan, twin sons.

Mrs. James Smith, of North Main street, is confined to her home with a fractured rib.

Miss Ella Finkbeiner, of Lima, is employed as a clerk in O. D. Schneider's store.

Several friends of Mrs. John Farrell met at her home Thursday evening. A six o'clock dinner was served.

A. B. Clark has resigned his position at the Chelsea Roller Mills and is employed at the C. F. Smith Co. store.

E. E. Combs, of Ypsilanti, piano tuner, is again tuning pianos in Chelsea after an absence of several months.

John Walz received two carloads of cattle from Chicago Friday, which he placed on his farm for feeding for the market.

Watch for our next serial story, "Ramsey Millholland," by Booth Tarlington. The first installment will be in next week's issue.

Carl Lehman, who has been employed at Palmer's Garage for some time, has accepted a position with Dean & Co., of Ann Arbor.

Mr. and Mrs. O. C. Burkhardt, Mr. and Mrs. C. E. Bowen and W. K. Guerin attended the funeral of Mrs. David Dixon of Dexter, Monday.

Mr. and Mrs. Adolph Seitz have moved from the Albert Widmayer farm in Lima, to the tenant house on the farm of Guy Kimball at Lima Center.

Howard S. Holmes is having a radio telephone installed in his residence on East Middle street. The work is being done under the supervision of Roy Evans.

Albert Koch, of Lima, is making arrangements to move from the Fred Trinkle estate farm, which was recently sold to Geo. Koenigster, to the farm of Fred Haist.

Mr. and Mrs. D. E. Besch, Mrs. U. H. Townsend, Mrs. Wm. M. Campbell and Homer Townsend were in Dexter Monday, where they attended the funeral of Mrs. David Dixon.

Mr. and Mrs. Fred Riemenschneider entertained at a two o'clock dinner last Saturday, a motor party of relatives and friends from Lansing, and also Mr. and Mrs. G. W. Gage.

Mrs. E. R. Dancer entertained at her home on South street Thursday afternoon, a number of little girls in honor of the ninth anniversary of the birth of her daughter, Jean.

The Chelsea Fishing Club will receive from the State Fish Commission on Saturday, a shipment of 24,000 brook trout fry which will be planted in the spring brooks in this vicinity.

The Parent-Teacher Association will hold a meeting in the high school building at 7:30 o'clock next Monday evening. A program and music will be the principal feature of the evening.

The Washtenaw County Fair Association have awarded the contract for the race track on their grounds to Koch Bros., of Ann Arbor, who will start the work of grading as soon as possible.

A cylinder head of the Corless engine was blown out Sunday evening at the Four Mile Lake plant of the Michigan Portland Cement Co. It will require about two weeks to repair the damaged engine.

The quarantine at the home of Mr. and Mrs. T. G. Speer, of Orchard street, was lifted the last of the week. The children, one of whom had scarlet fever, and two cases of chickenpox, have fully recovered.

E. P. Steiner has several toy boats that are somewhat of a novelty. They are propelled through the water by using clock works that have sufficient power to last for forty-five minutes and the boats are driven at quite a lively speed.

O. C. Burkhardt will spend next Monday in Detroit, where he will represent the Washtenaw County Fair Association in regard to the amount of money they will receive from the state appropriation for premiums awarded at county fairs.

A civil service examination will be held at the Chelsea postoffice on Saturday, March 18, for the position of clerk in the local postoffice. Blanks for the examination can be secured of the secretary of the local board of examiners at the Chelsea postoffice.

A. A. Oesterle, who has been employed as master mechanic for the last two years and a half at the Four Mile Lake plant of the Michigan Portland Cement Company, resigned his position Tuesday. The employees of the plant met Tuesday afternoon and presented Mr. Oesterle with a gold watch as an appreciation of their friendship for him.

Mrs. J. L. Gilbert was in Grass Lake Sunday, where she attended the funeral of her brother-in-law.

E. H. Eisele, who has resided on the E. Silworth farm in Manchester township for some time, has moved to his father's farm in Freedom.

The following pupils of District No. 10, Sylvan, have neither been absent nor tardy during the school year: Ruth Eisele, Florence Laird and Helen Laird. In the Modern Health Crusade, Florence Broesamle, Florence Laird and Vincent Barnes are Squires, Advanced Order; Helen Laird and Eva Eisele, Pages, A. O.; Ruth Eisele and Patrick Lingane, Knight Baserets; Allen Foster, Robert Eisele, Arthur Visel, John Gazley and George Gazley, Knights.

Mrs. Edna Tomlinson died at her home in Owosso Sunday, February 26, 1922, aged about 42 years. She was a granddaughter of Robert Foster and a former resident here. She is survived by her husband, Fred Tomlinson, three sons, a young daughter, her father and mother; Mr. and Mrs. David Hammond, one brother. The funeral was held from the family home at 2 o'clock Wednesday afternoon. The relatives from Chelsea who attended the funeral were S. P. Foster, Mrs. W. K. Guerin, Miss Lillian Foster and Mrs. John Frymuth.

Miss Lucille McDaid and Mr. Merle Barr were married on Tuesday evening, February 23, 1922, at the home of the bride's mother, Mrs. John McDaid, of South street, Rev. E. A. Carnes conducting the services. The couple were attended by a brother and sister of the bride. Following the services a wedding supper was served. The bridegroom is a son of Mr. and Mrs. W. H. Barr, of Saline, and he is employed as a chemist at the cement plant. The bride is a graduate of the Chelsea high school. The couple are spending a few days at the home of the bridegroom's parents.

Mr. and Mrs. Samuel Tucker received word Friday of the death of Hugh McCall, aged 80 years, who died Wednesday evening, February 23, at the home of his daughter, Mrs. Wm. Engelbriht, of River Rouge. Mr. McCall was a former resident of Lyndon and moved to River Rouge several years ago. He served in the civil war and was a member of the G. A. R. Mrs. Allen Tucker, of River Rouge, is a daughter. He is survived by his wife, two sons, and four daughters. Mr. McCall was present the night that President Lincoln was shot, being one of the men that acted as body guards, and witnessed the attack by Booth.

World's Greatest Capital.

The city of Washington, the capital of the United States, since it was first planned in 1791 by Pierre Charles L'Enfant, a French engineer who served in the Revolutionary War, has maintained a steady growth as a more important development as a center of world influences and affairs. Every American who has not done so should visit Washington. It is a patriotic duty. Where not possible to make personal acquaintance with this most famous capital, however, reading will afford more or less familiarity with the city, its institutions and personages. In line with this idea, the Standard publishes each week an interesting department pertaining to Washington and its affairs which gives information not usually contained in the telegraphic news of the day. It will well repay reading each week.

Increase Predicted.

"Many people think that corn is the only crop that is good for silage," says A. W. Smith, local dealer for Lansing Silos. "This is not so," he says, "clover, alfalfa, cow peas, soy beans and sorghum make excellent silage. Corn is, however, the king of silage crops."

Mr. Smith states that there is more silo building anticipated during the coming months than ever before.

"Sooner or later every stock owning farmer will feed silage," he insists. "The man who is keeping 10 to 12 cows and other young stock is losing the price of a silo every twelve months. The silo is no longer an experiment. The silo is an absolute essential in the production of growth, the production of beef and mutton, milk and butterfat at greatest profit. This for the reason that it cheapens the cost of each."

"In this plan of making the most money the silo for the producer of live stock products is a part of the farm equipment which cannot be overlooked."

North Franciscan.

Mr. and Mrs. Alton Muebach spent Sunday at the home of Herbert Harvey.

Emmett Dancer and family, of Lima Center, spent Sunday afternoon at the home of Mr. and Mrs. Leonard Loveland.

Mr. and Mrs. Philip Fauser and daughter, Fern, and Mr. and Mrs. Erie Notten spent Sunday afternoon at the home of Mr. and Mrs. B. Straub.

Mrs. M. T. Hewett and son, Stanley, returned to their home near Milford, Sunday, after spending a few days at the home of her parents, Mr. and Mrs. P. H. Riemenschneider.

Optimistic vs. Pessimist.

Tell an optimistic girl there is a new fellow in town and she'll ask "Where?" Tell a pessimistic girl the same thing and she'll say "I'll bet he's married."

Incomparable Values

We want every family within 50 miles of this store to know of our Incomparable Values in Highest Quality Merchandise. We want them to know that we want their trade; that we are here to serve them; to supply their needs at lowest possible cost.

Travel Hard in Arctic Waters

About North Pole Is One of Most Inaccessible Places in the World.

COVERED WITH FLOES OF ICE

Feet of Explorers Danger in Dash Northward—Gulf Stream Helps by Opening Up Occasional Passages.

Washington.—"The top of the world, the region around the North pole, which is constantly luring adventurous spirits through the frozen Arctic waters and now daring ambitious pilots of airplanes, vies with Mount Everest for being the most inaccessible place in the world," says a bulletin of the National Geographic society from its Washington headquarters.

"Where Siberia, Alaska, northern Canada, Greenland and Arctic Russia border hither and yon on the Arctic circle, they practically inclose a great area of ocean more or less crowded with ice. Greenland's most northern area, Peary Land, and Grant Land, which lies to the west, push themselves out nearest the pole.

Why Polar Travel Is Hard.

"If, from Cape Columbia, on the northern shore of Grant Land, the Arctic ocean would freeze over in a solid, smooth block during the months of dead winter, intrepid explorers could probably push their dog sleds over to the pole with less difficulty and danger. The area of the ocean, instead, is covered with innumerable floes or cakes of ice. These surge back and forth, bucking up and piling upon each other until they form ridges 50 or 60 feet high, which crack and break with the current of the water and the velocity of the winds.

"Though there is always water present, the lanes between the ice blocks are not wide enough for ships to sail through, but they often make it impossible for men walking or making their way by dog sled to get back to safety after they have left their boats. This condition is encountered even in midwinter months when the temperature runs to 50 and 60 degrees below zero. Stefansson says that these strips of open water are more serious than the deepest masses of the softest snow or the most craggy and slippery ice ridges."

Gulf Stream Helps Explorers.

"The Gulf stream, however, whose magic breath brings heat and life to regions which would otherwise be cold and barren, thaws out some of the ice in the northern Atlantic where it merges with the Arctic ocean, thus permitting boats in the waters of Greenland and the Scandinavian countries to penetrate further north than is possible on the Pacific side. Polar explorers have taken advantage of this fact by pushing northward on this side rather than in the vicinity of Bering strait.

"Peary, when he overcame almost insurmountable difficulties in pushing out over this more than six hundred miles of floating icebergs, marked out a route which future explorers can follow, as well as established the fact that determination and enthusiasm, combined with a knowledge of the problems of the undertaking, can conquer most, if not all, of the difficulties attendant upon exploring the world's geographical features.

"In the area through which Peary pushed he found much of interest. From the southern coast of Greenland, where the willow and birch trees grow only from 15 inches to three feet, and

the mosses more than a foot high, he skirted the western coast of this country through Davis strait and Baffin bay to Etah, an Eskimo village on Smith sound in Greenland. He knew, as other explorers knew before him, that a current frequently ran in that series of straits between northwestern Greenland and those great islands of Arctic America known as Ellesmere Land, Grinnell Land and Grant Land, which might enable him to push his vessel northward to Cape Columbia in latitude 83 degrees, the point of land nearest the North pole. Due to the knowledge and skill of the party, their vessel reached its destination, which was the farthest northward that any ship has ever steamed.

What Greely Found.

"To the west along his route lay Grinnell Land, the interior of which Gen. A. W. Greely explored and reported that he found there fertile valleys, a beautiful lake and abundant animal life. Grant Land lies still farther to the north, Robeson channel, the last stretch before he reached the Arctic ocean proper, separating Grant Land from Hall Land on the northern shore of Greenland, is just a few miles longer than the Dardanelles.

"The famous Northeast passage, through which Nansen was able to drift in the Fram to within less than five degrees of the pole, extends from the New Siberian islands, off the northern coast of Siberia, over to the Greenland sea. Whalers have been able to explore every sound and inlet along the western coast of Spitzbergen, and even plant summer colonies there, due to the influence of the Gulf stream, but no polar explorers have attempted to go much farther north in the Arctic ocean from these islands, because of the fact that the main ice pack drifts south just north of Spitzbergen."

Bonin Islands Bird Paradise

Part of Territory Claimed by Japan Is Home of Thousands of Songsters.

LONG WITHOUT INHABITANTS

Political Conditions and Crudeness of Transportation Facilities Delayed Its Settlement—Has Had Many Claimants.

Washington.—Japan's formal definition of her mainland as including the Bonin archipelago, 500 miles to the south of her principal islands, and the discussion of fortifications there, turn the spotlight of world news to these remote bits of land. They are the subject of the following bulletin from the Washington headquarters of the National Geographic society:

"Bonin is a distinct misnomer for the little islands which, until the additions that the World War brought represented Japan's farthest extension southward toward the heart of the Pacific. It means 'without inhabitants' whereas a number of the 20 islands of the group now support among them a population of nearly 5,000. But 'Bonin' now is only a Western term. To the Japanese the islands are Ogasawara Jima, family name of the first Japanese known to have viewed them, who, like Lief Ericson in his discovery of America, was driven to the islands by a storm.

"Political conditions and crudeness of transportation facilities, not lack of value, long doomed the Ogasawaras to remain without inhabitants. Like most lands of volcanic origin they have an exceedingly fertile soil. Because of warm currents their climate is in effect tropical, although they are just north of the Tropic of Cancer. Man could have existed on them without raising his hand in work. Wild beans and a profusion of edible mushrooms grew in the valleys and wild pineapples and other fruits on the hillsides. Palms and tree-ferns furnished shade and greenery. And in other ways the islands were like a Garden of Eden when they were explored by the crew of an American whaler in 1823. There were no quadrupeds and only a few harmless reptiles, and the birds, unmolested by any living thing, were entirely without fear of man and could be caught by hand.

"At the present time the islands produce all the Japanese cereals and many vegetables and fruits, and are stocked with the common domestic animals. There also are wild goats, sheep, pigs and even dogs and cats, descendants of animals left by the first settlers. Of course the production from the islands amounts to little, for those large enough for development have an aggregate area of only about thirty square miles.

Had Many Claimants.

"Although they are closer to Japan than to any other nation, the Ogasawaras came near not being a Japanese territory. There is nothing to show that the Japanese knew of their existence before Prince Sadayari Ogasawara was driven to their shores about the end of the sixteenth century, whereas the Spanish explorer, Villalobos first sighted them in 1543. The Ogasawara family made the islands theoretically a part of their feudal land holdings, but they did not settle them, and when Japan drew more securely into its shell in 1635 by forbidding its subjects to construct seagoing vessels, all touch with the islands was lost for nearly a hundred years, and again from 1723 to 1801. Abel Tasman, Dutch explorer, surveyed some of the islands early in the Seventeenth century and American whalers explored them in 1823 and 1824. In 1827 a British admiral claimed the islands for his country.

"The Ogasawaras received their first settlers in 1830. They consisted of a few British subjects from Hawaii, who seem to have led the expedition, a few Americans, Portuguese and a handful of Polynesians. They considered themselves a British colony. As late as 1875 these settlers and a few others who had been added lived on the islands without any government or organization and without educational facilities of any kind, trading with the whalers who by that time frequented the waters. In 1861 Great Britain renounced all claims to the islands in favor of Japan, and that year an unsuccessful effort was made to plant a Japanese colony. Later efforts were successful and the population now is almost entirely Japanese."

MARY TEACHES RADIO

Miss Mary Texana Loomis is the only woman in the world who owns and manages a college of radio engineering. Her school is located in Washington. She is shown in the picture testing a 1,000-mile range radio telephone transmitter which she has designed and built with the assistance of some of her students.

Barber, Hair, Keeps at Work.

Wilkes-Barre, Pa.—Lee Cabot, twenty years old, who works long hours in the barber shop of F. P. Reap at Pittston, stopped long enough one day recently to read a letter from lawyers in Italy. When he had finished he said, "Next" and went on with his work. The letter informed him that his father had left an estate of 500,000 lire, worth \$20,000 in American money.

"I'll be glad to get the money," he said, "but I am not going to give up my job in the barber shop. It will come to me all right."

SPRING HATS NOW APPEAR; NEW AND VARIED BLOUSES

SINGLY and in little groups, spring hats have been venturing out of their boxes and into the chill but bright and promising days of late winter in the northern states. In warmer climates sport hats for spring, and some others of different character have flourished under summer skies, and they have set the pace for spring modes—revealing that there is to be a great diversity in styles, especially in the matter of size.

This point is apparent in the group of hats shown here. The earliest hats, as usual, are made of fabrics, or fabrics and braid combined, and there is much hand work on them. The group pictured includes the range in size and the shapes are popular. The wide

are all ingenious, it seems, with the most engaging airs of simplicity and youthfulness, but how varied they are! We recognize in the types and styles some old favorites, like the handmade, tailored blouses of fine voile or batiste, or dainty and those of crepe de chine and other crepes, but they are hand-in-hand with beautiful strangers, and have themselves a new countenance. There are linens in pastel colorings and checked taffetas that make entire waists or merely add their freshening new touch, in trimmings and accessories, on crepe de chine blouses. There are natural colored linens in collar and cuff sets that invite comparison with sets in Irish crochet lace on silk blouses—and

SOME OF THE EARLIER HATS

brimmed hat at the top, of silk-fiber braid, is faced with crepe de chine and trimmed with a series of bows graduated in size, with loops of false ribbon that stand up about the crown and others that lie flat on the brim. It is a becoming shape and a practical hat developed in the softest colors of a colorful season. Below it is a model that will look particularly well with the new plain tailored suits of homespun and tweed in spring colors. It is a body hat of straw with sash of crepe having a heavy rib. The brim edge is bound with this crepe.

The small hat with a bee-hive crown in two tiers, is among the most wearable of many becoming shapes. It is made of a lustrous braid and its narrow drooping brim is faced with crepe.

There are dainty gingham waists and those of esponge that made an earlier entry.

The tuck-in and short, over-the-skirt styles almost monopolize the displays. A few longer blouses are suggestive of the midday, from all of which it may be gathered that blouses are merely an obligate to the spring song of suits. Many of them are quite strictly tailored and among the most pleasing are the pastel-colored linens with white bindings and sequences of white pearl or fabric-covered buttons. This button decoration appears on silk blouses also.

Two silk crepe blouses are shown here, one of them at the left combining crepe de chine in the body of the blouse with georgette sleeves. Nan

TWO TASTY BLOUSES

Knotted ribbon lies about the brim, and small blossoms and fruit, set in velvet foliage make a delightful adornment for it. Off-the-face shapes are in demand and are offered in great variety in all displays. One of them covered with false silk has a novel trimming of narrow false ribbon, in a series of short ends, each end finished with beads. These ends are arranged in rows across the up-turned brim and this is another hat which will find itself in the company of tailored suits to their mutual advantage.

Consider the blouses that are now tramping in and crowding toward the center of fashion's stage. They

row silk braid in a contrasting color outlines the square neck and shoulder yoke and is set about the waist which is adjusted by an elastic band. A heavier crepe makes the pretty tuck-in blouse with collar band and lower part of the sleeve of Persian silk. The full sleeve is gathered into a band forming a cuff tied with narrow silk ribbon.

It is said that the mode will not call for blouses matching the suit in color but leans toward pleasing contrasts.

Consider the blouses that are now tramping in and crowding toward the center of fashion's stage. They

LEGION MAN, STURDY HIKER

Minneapolis Soldier on Way Back From Washington, is Completing 2300-Mile Jaunt.

Romance still lies along the broad highway, according to H. H. Rufus, "Harding's messenger boy," now on his way back to Danville, Ill., from Washington, D. C., completing a 2300-mile jaunt. After hanging by his hands from rail-way trestles and facing starvation in the mountains of Kentucky, the sturdy hiker found a climax to his adventures in Clarksville, W. Va., in the form of "the only girl."

Rufus, who is forty-four years old, an ex-soldier, and a native of Danville, started out last November, bearing four, sealed messages from the Danville chamber of commerce, which he was to "deliver in person" to the President. Stalking out of the White House six weeks later, he said: "I was all eyes and ears, looked straight ahead, and got what I went after."

The hiker is dropping in at American Legion posts when he wants to darn his socks or shave, and his stories have become well known. He started from his home town with one cent and the instructions neither to beg, borrow, nor steal. He carried a 14-pound pack which, among other things, contained a cigar for "Uncle Joe" Cannon.

SENDS 'NOTES' FROM ALASKA

Historian of Ketchikan Legion Post Writes in Answer to Letters of Sympathy.

"Please note following," the long-suffering historian of the Ketchikan post of the American Legion in Alaska has written in answer to many letters of sympathy from buddies back in the States:

1. There isn't a gold miner in the post.
2. The thermometer has never dropped lower than five below.
3. The deepest snow in recent years was three inches.
4. Some winters pass with practically no snow.
5. Overcoats are often a nuisance in January and February.
6. Raincoats and umbrellas are common work.
7. No one has even worn furs or snowshoes to a post meeting.
8. "Gold-fishing" is the principal industry.
9. No one reads by the northern lights or the midnight sun.

The fact that people in Ketchikan ride in automobiles, and that the only dog sleds there are hot-dog sleds is hard to get across, according to the historian.

FINDS HIS LONG-LOST BOY

Father, by Chance, Discovers Soldier Son, Missing From Infancy, in Washington Hospital.

The "long-lost-boy" theme of the movie thriller has been discovered in real life by the American Legion post at Flint, Mich., where a reunion has taken place between E. G. Morrison and his son, George, who is now a war veteran.

More than nineteen years ago in New London, Conn., the elder Morrison and the boy's mother separated. The child of six months was given to the mother. She remarried and the boy lived with her until he was fifteen years old, when he ran away. He joined the navy, served overseas with the aviation forces, and was wounded.

Last summer Mr. Morrison, Sr., was motoring in the East. A chance conversation with a passing acquaintance led to the discovery that his son was at that time lying ill in a hospital in Washington, D. C. The reunion was effected, and George is now in business with his father in Flint.

DAIRY THE DAIRY

GAIN OF BULL ASSOCIATIONS

Increase Attributed to Fact That Farmers Are Beginning to Realize Value of Quality.

(Prepared by the United States Department of Agriculture)

A gain of 85 co-operative bull associations during the past fiscal year indicates that dairy farmers are beginning to appreciate the value of such organizations. According to the dairy division of the United States Department of Agriculture there were 158 of such associations, as compared with 123 a year ago. This is an increase of 28 per cent, a very satisfactory gain in view of the comparative newness of the plan.

This increase is attributed by the department to the fact that farmers are beginning to become acquainted with the benefits which other farmers have derived from this form of co-operative breeding. Both federal and state workers have found that mem-

Use of Purebred Sires as Improvers of Productive Capacity of Cows is Rapidly Gaining Favor.

bers are being benefited by such co-operative associations even more than the organizers had anticipated.

Some form of co-operative breeding is essential to the proper growth of the dairy industry in many sections of the country, for the reason that the average herd at present is so small that the owner cannot afford to buy a good purebred bull, and it is certain that the herds of the future will not be large enough to change this condition materially. The movement to get more people living on farms and in villages to keep family cows tends to diminish the average size of the herd, for the one or two cows kept by each family are really a herd in themselves, but owners of small herds cannot afford to keep a bull. They, therefore, depend upon neighboring bulls, and the co-operative association is one means of providing for such cows the service of high-class bulls.

The dairy extension men in South Carolina, for example, realizing the importance of the co-operative bull association, have made it a part of their campaign for "two cows to each rural family," and they have set as a goal the organization in their state of 114 co-operative bull associations.

BEST PACKAGES FOR CHEESE

Boxes Are Subjected to Rough Treatment in Handling and Should Be Good and Strong.

Certain characteristics of American cheese, most valuable for export purposes, in addition to good flavor, include firm, close-bodied texture, clean and sound find, and strong, well-made packages. The favored export style is the large so-called "cheddar," weighing from 60 to 80 pounds, although of later years a good many "twins" have been exported. "Twins" weigh about 35 pounds each, and are packed two in a box.

The matter of the package is very important, as the boxes are subjected to rough handling in loading and unloading. The most satisfactory boxes are sufficiently large for the entire cheese, for with a cheese higher than the box, the pressure of other boxes piled on top destroys the shape of the cheese and injures the find.

It is common in the United States to paraffin most of the cheese marketed a week or ten days after the cheese is made, which permits free moisture to escape and allows for the usual shrinkage. During the spring, summer, and autumn, the use of refrigerator cars, where a temperature of 35 degrees to 40 degrees F. may be maintained, is important in shipping. It has been found as a result of experiments conducted by the United States Department of Agriculture.

Feed Balanced Ration.

It is extremely difficult to feed a ration which will cause a starved cow to increase her milk flow. The safest rule is to feed a balanced ration from the beginning, and to provide adequate feed to meet her requirements.

Satisfactory Flow of Milk.

Where no effort is made to give cows good care, it is difficult to make them pay their way. They may give a satisfactory flow of milk for a few weeks; but later on they fail to keep the pails filled.

Going on a Long Research Cruise

U.S. Navy's Guppy Girl, recently launched at Los Angeles, is soon to start her first cruise that will last for years. Her first destination will be the North Pacific. The boat is here shown, with her skipper, Cap-

The Disease That Killed Pope Benedict XV

Thursday Health Talk, No. 6,
by H. H. Beatty, Chiropractor

Health
turns the
Clock
Backward

It started as a cold and developed into pneumonia. The Pope refused to give up and rest and this failure to appreciate the seriousness of a so-called "mere cold" gave the disease its chance to develop.

Air is the most important of life elements. If it is withheld for five minutes death ensues. A cold that settles on the lungs starts in to do that very thing—shut out the air from the lungs. In pneumonia, the congestion or filling up of lung cells, unless checked, gradually spreads until the lungs cease to function and death results.

The newspapers said "all that science could do had been done." In Italy the science of chiropractic is comparatively unknown. There are less than a dozen chiropractors there. The record of chiropractic in influenza and pneumonia is the best of any health method. It is quite possible that chiropractic might have turned the Pope toward health had an administration of this efficient new method been possible.

PNEUMONIA IS CONQUERED

"I feel that I have given chiropractic a thorough test. Not only have I been cured of sciatic rheumatism, but my little girl was cured of a severe case of pneumonia. Her fever was running 103 and 104 and she was having hemorrhages. There was a terrible congestion in her throat and lungs. On the second day after chiropractic spinal adjustments were started, the fever was reduced. In four days she was out of danger. In a week she was able to go to the chiropractor's office and after a course of adjustments she is now as sound and well as ever."—H. C. Money, sworn statement before J. B. Atkinson, Chiropractic Research bureau statement No. 1301L.

SYLVAN.

Mrs. Mary Fehner is very ill at this writing.

Mr. and Mrs. Reuben Koontz will move into the Merker house soon.

Charles Stevenson is painting and hanging paper for John Merker this week.

Miss Hattie Phelps, of Howell, is spending a few days with friends at Cavanaugh Lake.

The pupils of Sylvan school gave a Washington birthday entertainment on Tuesday afternoon.

Louis Haselschwerdt moved his family from the James Burch farm to the Will Horning farm last week.

Mr. and Mrs. L. Wingate and family are moving from the farm formerly owned by M. Wackenhut, in Sylvan, to the farm in Lyndon known as the Martin Howe place.

Monday evening Mr. and Mrs. Peter Osterle entertained about 40 of their neighbors at a pedro party at their home. The first honors were awarded to Mrs. Chas. Messner and John Haselschwerdt.

Mr. and Mrs. A. V. Hatt entertained between 60 and 70 guests at their home last Friday evening. The evening was spent in dancing and playing pedro. The first honors were awarded Miss Zita Merkel and Reuben Grieb.

UNADILLA.

Mr. and Mrs. J. Livermore spent Sunday with Mr. and Mrs. Vet Bullis.

Miss Lucille Barnum spent the week-end with Miss Lillian Hathaway of Chelsea.

Mr. and Mrs. Neil Bailey and Mrs. Kittie Bullis, of Jackson, spent the week-end with Mrs. Mimi Watson. It will be remembered that Mrs. Bailey was formerly Miss Dorothy Budd of Gregory.

Too late for last week.

Mrs. F. Montague, of Gregory, spent Saturday with Mrs. Mima Watson.

Mr. and Mrs. John Falls and son spent Sunday with Mr. and Mrs. Roy Shillart.

Mr. and Mrs. Clyde Dixon spent the past week with the latter's parents near Dexter.

Mrs. Jeanette Webb, who has been visiting relatives in Detroit, returned home Sunday.

Miss Ella Corser, who has been visiting in Lansing the past few weeks, returned to her home here Saturday. George Meabon, of Pinckney, was at W. Secor's Tuesday and bought the racoon that Mr. Secor recently had on exhibition in Chelsea, for the sum of \$10. George is sure some buyer.

WATERLOO.

Geo. Archenbronn spent Friday in Grass Lake.

Mr. and Mrs. W. Vicary spent Friday in Jackson.

Mr. and Mrs. Fred Durkee spent Sunday in Stockbridge.

The farmers are drawing their popcorn to Stockbridge.

Rev. Rhoads and son, Stanley, spent Monday in Jackson.

Victor Moeckel spent Sunday with Ed Smith near Roots Station.

Mr. and Mrs. Floyd Riethmiller spent Sunday with Mrs. Mary Runci-

man.

Democratic Caucus will be held in the town hall, Saturday, March 11, at 2 p. m.

Mr. and Mrs. Raymond Coulter and children spent over Sunday with L. L. Gorton.

Mr. and Mrs. John Dykemaster spent Sunday with relatives near Roots Station.

Chas. Schaffer and family, of Jackson, spent Sunday with Mr. and Mrs. August Koelz.

Fred Gorton, of Ypsilanti, spent Friday night and Saturday with his father, Henry Gorton.

Milton Riethmiller and son spent Sunday in Jackson. His daughter, Evelyn, is getting along fine.

Mr. and Mrs. Elmer Marsh and children spent the latter part of last week with the former's sister, Mrs. Lammers.

The church sheds are completed, and the chairman in charge wishes to thank all who in any way helped in replacing the old ones.

Mr. and Mrs. Geo. Rentschler and son and Mr. and Mrs. Geo. Beeman and daughter and Mr. and Mrs. Leigh Beeman and son attended the Gleaner doings at the German M. E. church Saturday.

Too late for last week.

Rev. E. E. Rhoads and family visited Rudolph Mollenkoph on Sunday.

The Ladies' Aid at the home of Will Bott was attended by about 60.

Mrs. W. Vicary spent from Friday to Monday with Mrs. Adna Burnett, in Plymouth.

Mr. and Mrs. Bert Leach spent some time with their grandfather, Geo. Archenbronn.

Mr. and Mrs. Fred Durkee spent Sunday with his brother, Mr. and Mrs. Floyd Durkee.

Mr. and Mrs. Ezra Moeckel spent Sunday with the latter's parents, Mr. and Mrs. C. A. Barber.

The Mt. Hope cemetery meeting will be held at the town hall on Saturday afternoon, March 4, at 2 p. m., sun time.

The children of Waterloo school and teacher, Miss Lola Katz, had a Washington birthday party at the school on Wednesday.

SHARON.

Wm. Uphaus and family spent Sunday at the home of Wm. Troits.

Several people from here attended church at Grass Lake Sunday evening.

Miss Emily Higgins was the guest of her parents near Macon Saturday and Sunday.

Mrs. Geo. Lehman, of Royal Oak, spent part of last week at the home of Mrs. Fred Lehman.

A. Wilson, of Jackson, is spending some time at the home of his daughter, Mrs. Albert Gardner.

Mrs. Albert Cook, of Ann Arbor, spent several days of the past week at the home of Mrs. R. Cook.

The Young People's Society was entertained Friday evening, February 24, at the home of Miss Ruth Strahle.

Mr. and Mrs. Roy Davidson and little sons spent last week at the home of Roy Raymond at Grass Lake.

B. F. Washburne has redrawn a number of his best cartoons and has placed them on exhibition in Detroit.

Mr. and Mrs. Edward Taylor, of Traverse City, have been spending the past week at the home of the former's brother, Wm. Troits.

Mrs. Ivy Wolfe and little daughter, Marietta, spent part of last week at the home of Mr. and Mrs. Alfred Eschelbach, of Lima.

Mrs. John Breustle and Mrs. Albert Bahnmiller attended a shower given in honor of Miss Florence Klump at the home of her parents near Francisco.

Monday, April 3, will be the annual election for township officers. There will not be any state officers to be voted on at this election.

NORTH LAKE.

Mrs. Mary Gilbert is reported as being ill for several days.

Mr. and Mrs. D. A. Frasier were Detroit visitors over the week-end.

Claude Marshall, of Unadilla, spent Sunday at the home of Mr. and Mrs. H. A. Hudson.

Miss Mildred Hayes, of Sylvan, spent Sunday at the home of Mr. and Mrs. Homer Stofer.

Mr. and Mrs. Albert Horton and children, of Chelsea, visited Sunday at the home of Mr. and Mrs. Floyd Boyce.

Mr. and Mrs. Alonzo Crane and Leon Hunsicker, of Detroit, were Sunday visitors at the home of Mr. and Mrs. P. E. Noah.

Mrs. Clara Isham, who has been spending the past two weeks with Mrs. Floyd Boyce, returned to her home in Chelsea Sunday.

Too late for last week.

Miss Mildred Daniels, of Detroit, spent the week-end at her home here.

Mr. and Mrs. Homer Stofer and daughter, Irene, spent Sunday at the home of Mrs. F. G. Widmayer of Sylvan.

Mr. and Mrs. Ozro Flemming, of Shelby, spent the latter part of last week at the home of Mr. and Mrs. E. W. Daniels.

Mr. and Mrs. W. R. Daniels and son, Jamse, of Chelsea, were Sunday visitors at the home of the former's parents, Mr. and Mrs. E. W. Daniels.

Messrs. Goodband and Green, of Grass Lake, who purchased the Geo. Doody farm, have moved several loads of goods to their new home.

The L. A. S. of the North Lake church will give a dinner at the home of Mr. and Mrs. Homer Stofer, Saturday, February 25, beginning at one o'clock, until all are served.

Hupmobile Dealer Wanted in This Town

Here is a splendid opportunity for some live-wire in this community.

You may be a motor car dealer, a garage proprietor, or you may be in some business having nothing to do with automobiles.

Whatever your line,—if you are a hustler and a sound business man, we want to hear from you.

Our proposition practically assures exceptional profits to such a dealer.

We have a definite, specific plan of co-operation which helps you locate, and sell, prospects.

Why We Make This Offer

Until this year, the entire Hupmobile production has been absorbed by the metropolitan centers.

Greatly increased factory production now enables us to supply the great potential demand for this outstanding car in every town in Michigan.

There are many prospects in your territory. They want such a car as the Hupmobile—a really fine car that sells for \$1250 f. o. b. factory—but they have never been approached.

This is your opportunity. Your sales territory is beautifully fallow.

Our discount rate is much more liberal than that ordinarily offered. No back-breaking requirements—nothing but what will enhance your bank standing.

In addition you will have the advantage of dealing with one of the largest motor car distributors in Michigan.

Send in a letter or post card now, at once, and find out all about our proposition without the slightest obligation.

Reasonable bank credit and moderate initial investment required.
