

SIXTEENTH YEAR—NO. 61

CHELSEA, MICHIGAN, FRIDAY, APRIL 20, 1923.

\$1.50 THE YEAR

BILL'S COLUMN

Timely Discussions of various
facts that may interest you.

"BILL"

I've got 'em. Absolutely!

Spring has put the jink on this column. It looks like and what's more poor Bill can't find anyone that seems to want the job very bad these days.

With the big leagues under way and the opening games all played it makes a fellow sit and dream about tennis, golf, fishing, boating and everything.

The "Dancing Fools" are still out working at records that will be hard to beat. Better than three days and nights is the record now. Don't know what you'd call them, but I'd say they were fools and real ones too.

At Finme, Italy, the Fascisti break into apartments, forcing the residents to utter the cry "Hail, Hail, Italy." Whoever refuses has some of their round teeth pulled out. Those victims are lucky. Over here we pay money for it.

Businesses in Chelsea seem to be making several quick changes. Wonder what the next one will be?

Wonder what the poor co-eds at M. A. C. will want to do now that spring has come and they have put the taboo on all "petting parties"?

It is going to be a hard life for some of the more fashionable ones if they live up to the rules.

But rules were and are only made so that is what will happen no doubt.

When the Paris Exposition opens next year, visitors to the Olympic games at Colombes Stadium will be transported the twelve miles from the games by an air railway, whereby the coaches suspended on the gyroscope principle sixty feet above the ground will be propelled at high speed by airplane propellers. This would be an admirable suggestion for Detroit. Nothing like riding right through the traffic when going to a big game.

A Detroit policeman held up traffic yesterday to permit a woman pushing a baby carriage to cross the street. She had been waiting ten minutes when the officer noticed her plight. So the hand that pushes the baby carriage is the hand that rules the world.

A set of marathon dancers down in Fort Worth, Texas has the stop put to their dance by the police. Rather bad luck for the dancers, yet it is not saved them considerable shoe leather and fatigue.

Question: "How long does a pair of silk stockings last the American girl?"

The midinette, or shop girl, of Paris says that she must strike to obtain a wage that will provide her with one hot lunch a week and 2 pair of silk stockings a year.

Wonder how many American girls would make a pair of silk hose last six months.

BILL SAM'S DICTIONARY

By J. L. MARTIN

Are Doellittle, who blows the tuba for the Taterhill brass band, has another bad attack of asthma. As is so often of his own uncle he just had to say on something, so he has bought Jew's harp with which he has delightedly entertained himself until he is got rid of his asthma.

ASTHMA: Human heaven. Bill Sam's Dictionary, page 81.

BW'S HARP: A contraption classed in musical instruments. It is operated by being held tightly against the teeth and struck with the fingers. It produces a sound which the operator can recognize as the operator is trying to play. Bill Sam's Dictionary, page 810.

MAY 4TH WILL BE
ARBOR AND BIRD DAY

Governor Grosbeck has issued the following proclamation declaring the week of April 29 to be set aside as Tree Planting Week, also that Friday May 4th will be Arbor and Bird day.

THE PROCLAMATION

For more than half a century our people have been accustomed to observe in appropriate ways a day proclaimed as Arbor Day. This year we are asked also to name the week which begins on April 29th Tree Planting Week. The purpose of these observances is, of course, to call attention not only to the economic value of our forests, once the pride of the commonwealth though now sadly depleted and to the need of reforestation, but to encourage the individual planting of trees, shade trees, fruit trees, nut trees.

We need a comprehensive, workable forestry program, and our State Department of Conservation is intelligently and steadily working toward that goal.

It is fitting too since birds and trees are intimately associated in our minds that Bird Day should be combined with Arbor Day.

Therefore, by virtue of the authority vested in me as Governor of the State of Michigan, I do hereby designate Friday, May 4th, 1923, to be set apart as Arbor and Bird Day, and I urge it upon the people of Michigan in general and the teachers of our schools in particular that suitable Arbor and Bird Day programs be arranged for that day.

Given under my hand and the Great Seal of the State this seventeenth day of April in the year of our Lord one thousand nine hundred and twenty-three, and of the Commonwealth the eighty-seventh.

Alex J. Grosbeck.

Governor.

RURAL SCHOOLS TO
GIVE PAGEANT

Three Schools will Combine in Presentation

Three Sylvan district schools will give a pageant at the Sylvan Center school house this evening. About thirty children from the schools will participate.

The three schools that are included are Sylvan No. 10 fr., Miss Marie Guinan, instructor; Sylvan No. 6 fr., Miss Florence Palmer, instructor; and Sylvan Center school, Mrs. M. McClure, instructor.

The pageant will be given first dramatizing the Indian life on the continent, followed by the Pioneer period and the last being the Modern life. The history of the county and township will be included in the story.

The teachers and pupils have been working for several weeks on the pageant and it is expected to be a fine presentation.

UNADILLA ACTORS PUT
ON FINE SHOW

The Unadilla Dramatic Club gave an interesting production entitled "The Deacon," a five-act comedy drama, at the town hall Tuesday evening, to a well filled house. The music by the orchestra and the dancing and jokes given between acts, were enjoyed by all present. The play was well presented and received many hearty applauses.

FORMER RESIDENT OF
CHELSEA PASSES AWAY

Miss Susan Cassidy who died Friday, April 13, in Jackson, was born 78 years ago in Lyndon township, and was the daughter of Hugh and Susan Cassidy. After the death of her parents, Miss Cassidy with her sister Lizzie continued to make their home in Lyndon until about 30 years ago when they moved to Jackson. She is survived by one brother, Pierce Cassidy, of Jackson, three sisters, Mrs. M. J. Flynn, of Dexter, Sister Stanislaus of the Immaculate Heart of Mary Convent, Monroe, and Miss Lizzie Cassidy, of Jackson.

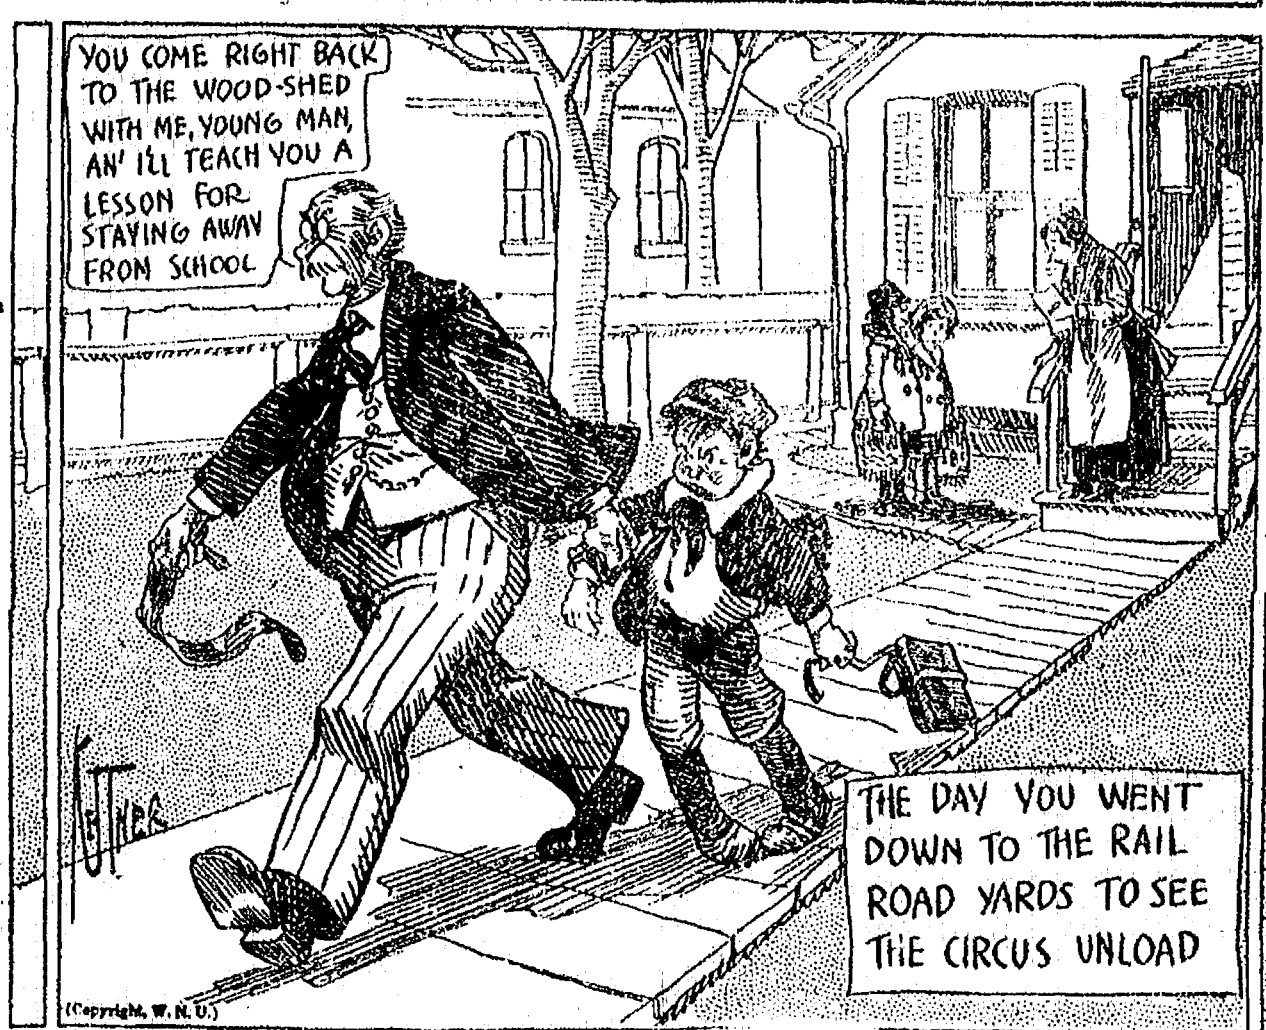

Miss Theresa Winters, Mrs. Edward Shanahan and James Winters, of Chelsea, neices and nephews, attended the funeral which was held Monday morning at St. Mary church, Jackson. Rev. Father Winters officiated and burial was in St. John's cemetery, Jackson.

WILL INSTALL GAS STATION

A gasoline filling station is being installed by the Chelsea Tire and Lumber shop on S. Main street. Chas. Dyerast, manager of the business expects to have the tank and pump in, and ready for use in a few days.

Too many taxi drivers are training to be auto racers.

*Big Events in the Lives of Little Men

LOCAL BAKER TO OPEN
BUSINESS IN YPSI

Within the next week Joe Schnebelt, who conducts the Chelsea Bakery, expects to start a branch bakery in Ypsilanti. Mr. Schnebelt has been in the bakery business many years and with the addition of another bakery expects to keep the Chelsea ovens running continuous. He will employ a day and night shift that will take care of the baking.

Mr. Schnebelt has made a specialty of baking whole wheat bread. In doing this he has found it necessary to have a specially milled flour, which he guarantees to contain all the wheat nutrients. This flour is milled in the local mill and is milled to the special formula of Mr. Schnebelt. There is a demand throughout the entire country for this particular whole wheat flour, and shipments have been from coast to coast.

The whole wheat bread baked here is guaranteed by the baker to be 100 per cent whole wheat, and the demand for his product is increasing every day.

STATE PRESIDENT OF
W. C. T. U. SPOKE HERE

Mrs. E. L. Calkins, State president of the W. C. T. U. gave an interesting address Sunday evening at the Methodist church, on the work, past, present and future, of the society. An organization was begun here with a membership of over 50.

Wears \$250,000 Worth
of Diamonds and Pearls

Quite easy to wear, in fact you can wear a quarter million dollars' worth almost as easily as one solitary.

This is the world-famous "River of Golden Glory" 62-karat diamond made up in the form of a pendant in which 2,000 pearls and hundreds of Russian lapis lazuli beads compose the neck piece.

This famous jewel was once the property of Abdul Hamid and worn by him as a setting in his decoration of the Order of the Garter. He presented it to a Russian princess, who later was forced to sell it in Paris.

Miss Gloria Gray is now wearing the quarter of a million dollars' worth of blazing jewelry in a theatrical production. She wears the jewel every day, and guards are always handy to protect her.

Watch for the Rebekah's roast beef supper.

TRIBUNE SMILES

There would be fewer understandable mothers in law if there were more good sons in law.

The modern spring poet writes his lay—then he dons his hip boots, grabs his snow shovel and goes to work.

If we could only leave the income tax blank that way.

The greatness of an egotist is in his I.

"I speak what I think," says Vov-eridge. If a woman ever steps on his corn he will be arrested.

LOCAL GIRL ELECTED
TREASURER S. S. COUNCIL

Miss Dorothy Pielmeier was elected treasurer of the County Inter-Sunday School Council, at the Young Peoples Convention held in Ann Arbor, April 13 and 14.

MANY ATTEND CONCERT
IN ANN ARBOR

A number of the members of the Thursday Musicals of Chelsea were in Ann Arbor Monday evening, where they attended the Clara Clemens concert at Pottengill auditorium, as the guests of the Matinee Musicals of Ann Arbor.

TO REMODEL M. E. PARSONAGE

Plans are being considered for the re-modeling of the Methodist parsonage. The work will likely begin before a great while.

METROPOLITAN GLEE CLUB
GIVE LAST LYCEUM NUMBER

The Metropolitan Glee Club, will give the final entertainment of the Lyceum course this evening at the Sylvan Town hall. The club is highly recommended and the four men who will give the entertainment will entertain with both vocal and instrumental selections. The Lyceum course has been under the auspices of the Congregational Church Brotherhood and the St. Paul's Young People's League. The concert will start at 8:00 o'clock.

RADIO SERVICE TO
BE ZONED BY U.S.

Detroit Given Wave Frequency of 580 Kilocycles, 517 Meter Wave Length.

An official announcement from the Department of Commerce, received by the Detroit News radio department, allocates different wave lengths and frequencies to all large cities in America.

Detroit has been assigned a wave frequency of 580 kilocycles and a wave length of 517 meters, and it will be necessary for the three stations to be operated here as Class B broadcasters to divide the time between themselves, because programs transmitted at the same time would interfere with each other.

The three stations are WWJ, WWI and WCX. Henry Ford owns WWJ at Dearborn. He is converting it into a powerful station that will be of the same power as WWJ.

Chicago is assigned a wave frequency of 670 kilocycles and a wave length of 448 meters; Toledo and Cleveland together, 770 k. c. and 390 meters; Pittsburg 920 k. c. and 326 meters. New York City is assigned three frequencies because of the multiplicity of stations there.

Three classes of broadcasting station licenses will be issued as follows:

Class A, using power not exceeding 500 watts in the antenna and a wave length between 222 and 288 meters.

Class B, using power not exceeding 1,000 watts nor less than 500 watts in the antenna and a wave length between 300 and 346 meters, and between 375 and 546 meters.

Class C, this class covers renewals only of licenses authorizing the use of the 360 meters wave length. Stations now using 360 meter may continue to do so, or transfer into another class, but other stations will not be permitted to transfer to 360 meters.

The Department of Commerce has divided the country into five zones with allocations as follows for Class B's:

ZONE 1.	
Frequency	Wave length
Kilocycles	Meters
Springfield, Mass., and Wellesley Hills, Mass., 800	387
Schenectady, N. Y., and Troy, N. Y., 700	380
N. Y. City and Newark, N. J., 740	405
660	455
610	492
Philadelphia 500	599
760	395
Washington, D. C., 690	435

ZONE 2.	
Pittsburg 920	326
Chicago 670	448
Davenport, Iowa, and Des Moines, Iowa 620	484
Detroit and Dearborn, Mich., 580	517
Cleveland and Toledo, O., 770	390
Madison, Wis., and Minneapolis 720	417
Reserved—(204, 345, 366).	

ZONE 3.	
Atlanta 700	420
Louisville 750	400
Memphis 600	500
St. Louis 550	546
Reserved—	
300, 316, (353)	375, 402, 333.

ZONE 4.	
Lincoln, Neb., 680	341
Kansas City 730	411
Jefferson City, Mo., 680	441
Dallas and Fort Worth 630	476
San Antonio 780	385
Denver (reserved) 930	323
Omaha 670	527
Reserved (301, (201), 306.	

ZONE 5.	
Seattle 610	492
Portland, Ore., 660	455
Salt Lake City 600	512
San Francisco 550	509
710	423
Los Angeles 700	395
San Diego, Calif., 640	469
Reserved—	
560	536

(297), 330, (349), (370).

The supervision of all stations in the eighth Federal radio district with headquarters at Detroit, will be Samuel W. Edwards, whose rank will be supervisor of radio, senior grade, and his assistant will be A. F. Pankhurst, who will have the rank of U. S. radio inspector.

WEALTHY WIDOW HEALS
MAN'S BROKEN HEART

The wounded heart of J. H. Buckler, traveling salesman of Minneapolis, Minn., was healed to the extent of \$500 when settlement, out of court, was reached in his suit for \$50,000 damages against Mrs. Ellen Lilly, wealthy widow, who, he says, promised to marry him, but balked after he had secured the license.

For the present Mr. Hindelang has made no plans but will remain in Chelsea.

LOCAL BREVITIES
Our Phone No. 190

Mr. and Mrs. Vance Ogden will entertain friends at dinner this evening.

Robert Lawrence, of Detroit, spent Thursday with his parents.

Miss Rhea Budd left the first of this week for Farmington to make her home with her father, L. M. Budd.

Mrs. Peter Merkle and Mrs. Herbert Snyder were in Jackson Wednesday.

Mrs. Max Irwin and daughter Jean who have been spending some time with her parents, Mr. and Mrs. L. D. Lawrence returned to her home in Grass Lake, Wednesday.

Mr. and Mrs. Henry Wolff, of Jackson, spent Wednesday evening at the home of Dr. and Mrs. A. J. Steger.

Mrs. Maynard Knickerbocker was in Ann Arbor, Tuesday.

Frank Miller, of Union City, visited friends in Chelsea the first of this week.

Mrs. James Geddes is spending a few days with her daughter, Mrs. George Rathbun, of Tecumseh.

Mrs. R. B. Waltrous was in Ypsilanti Tuesday afternoon.

Miss Amanda Koch is spending the day in Ann Arbor.

Mrs. Harry H. Oulmon, traveling wholesale representative of the Franco-American Hygienic company of Chicago, is stopping in Chelsea for a few days and can be seen at the Crescent Hotel.

Mrs. C. S. Risley and family were called to Leslie, Mich., Monday, to attend the funeral services of her aunt Mrs. Anna Godfrey.

Frank Staffan returned to his home here for a few days from Erie, Pa.

Ruth Saylor was in Ann Arbor Wednesday.

Mr. and Mrs. L. G. Palmer and Mrs. A. A. Palmer spent Wednesday in Detroit.

Mrs. C. Lehman, Mrs. J. Strieter, and Miss Pauline Girbach were Ann Arbor visitors Wednesday.

J. P. McCarthy was in Kalamazoo on business Thursday.

Mrs. Frank Storms was taken to the hospital in Ann Arbor Thursday morning, where she underwent a serious operation.

Stowell Wood of Lima is reported seriously ill with pneumonia.

Mrs. H. Fletcher and Mrs. Elba Gage were Jackson visitors Wednesday.

Mrs. Frank Quinan, of Detroit, is spending a few days with Chelsea relatives.

Henry Steinbach, of Dexter, spent Tuesday in Chelsea.

Mrs. Peter Wirkner spent Thursday in Ann Arbor.

Ed. Brown spent Tuesday in Detroit.

Mrs. Charles Steinbach returned Wednesday from a two days visit with her son Henry, in Dexter.

How to Forecast the Weather.
A reliable weather indicator may be found on the breakfast table. If you hesitate to call up Forecaster Conger. The bubbles which rise to the surface of a cup of tea after a lump of sugar has been dropped in are influenced by the atmosphere, and their behavior will indicate the weather for the day.
If, when a lump of sugar is dropped into a cup of tea or coffee, the bubbles accumulate in a mass, which in a short while disappears, fine conditions may be expected. When the froth lingers and spreads over the surface of the liquid, settled weather is unlikely. If the bubbles range themselves against the sides of the cup and remain it is probable that there will be rain in a few hours.—Detroit News.

How French Use Skimmed Milk.
It is said that in France 20,000 quarts of skimmed milk a day are used for making substitutes for lard, ivory, rubber and such like things. This casein in the milk is precipitated by chemical process and then mixed with formaline. This produces galathea, or perished milk, a hard, elastic, insoluble substance that is easily worked. The French dairy experts think that the demand for the skimmed milk for this purpose will be great enough to increase the profit to the butter-making business by producing a ready market for the by-product.

OUR POLICIES

Let us all get together for a bigger and better Chelsea.
A sewerage system for Chelsea.
A building program that is bound to build.

FROM A DRUGGIST

A druggist sends this interesting letter: "I challenge the statement that there are more drug fiends, in proportion to the population, than there used to be. Years ago, when I started as a pharmacist in a small town, I had customers who came in daily for their morphine and gum opium. Any one could buy a teaspoon full of drugs for a few cents then, no questions asked, no registration required. Now that the drug traffic is prohibited, the drug addict naturally gets attention, same as the man who manages to get a quart in prohibition.

This druggist is half right, half wrong. But it's a safe bet there aren't as many drug fiends in America as some claim. Conditions and people are never as bad as they are painted.

DID YOU EVER READ IT?

Fred Stone, world's greatest clown, "got religion" while snowbound in a sleeping car in the Dakotas. He pledges a tenth of his income for Christian work, as a result of his Bible reading. The church will profit highly, for Stones' income is said to be around \$125,000 a year.

The person who hasn't read the Bible from cover to cover has missed one of the finest things in life, including the greatest literary work ever written. When you can't find comfort anywhere else, you'll find it in the Good Book. Even those not religiously inclined will enjoy the romance and adventure woven into the Bible. Have you read it?

THEY DIFFERED.

When Prof. Frank Lockwood joined the staff of the University of Arizona, he wandered into the cemetery and noticed that the tombstones indicated most of the early settlers of Tucson had departed this life rather young.

"Must have been a bad epidemic of something in these parts," Lockwood commented to an old man nearby. "What'd they die of?"

"Most of them died of a difference of opinion," the old man answered.

Difference of opinion—stubborn refusal to compromise and meet the other side half way—caused most of the trouble in history. In Europe today, also.

LET IT REST.

A protest against removing King Tut's mummy from its tomb is voted indignantly by New York undertakers. Frank E. Campbell, their president, comments: "It is not pleasant to contemplate the prospect of having the bodies of Washington and Lincoln dug up after a couple hundred or a thousand years and placed on exhibition in a museum."

Now that the scientific grave robbers have looted Tut's tomb let his body rest in peace. Only the morbid care to see it. People curious to see a mummy have a lot in common with the morons who delight in frequenting modern morgues when they haven't identification of the corpses as their motive.

THE WAR TALKERS.

Hindenburg addressing a convention of German cannon fodder, says: "If necessary we will fight even until the last flag is torn to pieces and the last sword blade shattered. It is better to perish in honor than to live in disgrace."

His glib audience cheered, the deep in their hearts they knew that Hindy would keep out of bullet range, the same as he did in the world war. The ones who talk the most about fighting, the ones who rush their country into war, rarely show up on the list of killed or wounded. In Germany—or America.

WHAT IS NORMALCY?

Just what is "normalcy?" It cannot be defined. For we do things on a bigger scale nationally, each year, so what is normal in one year is below normal the next.

A banner prewar year for business was 1913. Yet in making comparisons, we cannot take production figures of that year as normal, since population has increased and living standards have changed. Normalcy is when every one willing to work has a steady job, and income is sufficiently ahead of living costs to permit the laying away of something for a rainy day.

ON WITH THE DANCE.

A queer angle about the turmoil in Russia is that it hasn't interfered with the dancers. The ballet of the Bolshoi theater in Moscow has more dancers in training than in the time of the czar.

Avramova, girl of 20, in the dancing sensation over there. Experts say she'll be the world's greatest dancer. Already she is threatening the laurels of the present Russian leaders, Goltzer and her dancing partner, Tikhonov. About time. Both are past 50. Remember Avramova's name. You'll see it in electric lights in America later.

RAILROAD SHORTAGE.

Railroads report 15,581 locomotives laid up for repairs. This is 22 percent of all the engines owned by all the roads. The figure is a chronic.

We're barking up the wrong tree when we talk of "locomotive shortage" instead of "locomotive maintenance." Motive power is the point of railroad transportation.

WHISPERS

Defend us, Lord, from every ill;
Strengthen our hearts to do thy will;
In all we plan and all we do,
Still keep us to thy service, true.

Thou who are Light, shine on each soul!

Thou who are Truth, each mind control!

Open our eyes, and make us see
The path which leads to heaven and thee.
—John Hay

A man can see beauty in the homeliest woman who makes him believe that she considers him smart.

Poverty would be a thing of the past if every man drew as big a salary as his wife thinks he earns.

A conference is a gathering where every fellow expects the other fellow to make all the concessions.

At times we suspect that the only difference between a primitive man, and a civilized one is a shave.

Too many eight-hour husbands and sixteen-hour wives is one great cause of domestic warfare.

Just a few years ago, men stood around and bragged about the silver buckles on their harness. How times have changed.

The best hair raising fiction is printed on hair tonic labels.

A careful driver can make a car run as long as the mortgage.

The objection to restaurant eggs is not that they are boiled too long, but too late.

The bigger the town, the more people there are who will stand around and watch the sign painter work.

You can't be always sunny.
If there isn't sun.

You can't be always funny.
If there isn't any fun.

But you can be always happy
If you let the clouds go by.

For there is always somewhere,
Little patches of blue sky.

Some fellows sit around home all the evening and pick at a ukelele, while others sit around home and pick at their wives. It is hard to tell which causes the most disturbance.

It is all right to put off till tomorrow the things you should not do at all.

Intellectual attainments would be just as popular as sport cars if you could parade them up and down Main street.

Some men worry for fear their wife's second husband will not be up to the standard of her first one.

You can never tell about styles. In a few years from now the girls may be buying freckles at the corner drug store.

What sort of weather did the people expect from March, anyway?

The ladies used to plan to have their spring hats by Easter. Now they are discarding their spring millinery by that time, and buying summer headgear.

Many a man deceives himself when he thinks he is deceiving his wife.

A wise man worries over a lot of things that a fool never thinks of, which shows that he isn't as wise as he might be, after all.

When you are inclined to pity yourself, think of the Indiana woman who has been teaching geometry for fifty years.

A woman can do almost anything with a hairpin, except to make it stay in place.

TO HATCH YOUNG ONIONS FROM SETS

Small Bulbs, If Planted Early,
Will Produce Abundantly
With Little Effort.

Young onions are a standby of almost every spring vegetable garden, and there is just one way to get them early. That is to plant onion sets. While the seed onions are coming on to give a later crop of young

ONION SETS WILL SPOUT MORE QUICKLY IF PLANTED CAREFULLY IN LIGHT SOIL JUST COVERING THE CROWN AS SHOWN.

—National Garden Bureau.

onions, and through the thinning process to give the plants room to mature the big bulbs to be stored for winter, the set onions are coming along and furnishing the tender young onions for the table.

The onion set is made for the chief purpose of producing young onions. It is better not to try to grow big onions from sets, as the set has completed most of its life work, although an abbreviated and arrested career, when it is put into the ground, and nine cases out of ten if not pulled and eaten in its young and tender growth will shoot up to seed.

Onion sets come in yellow, white, and red, all dependent upon the variety of onion seed which was sown for the sets. The most convenient thing about onion sets for young onions is that they are not so particular about soil conditions and a gardener can harvest young onions from them long before a crop can be gathered from seed.

Gold Output Gains.

Montreal.—Canada was the only country to show a marked improvement in gold production in 1912. The Dominion now ranks second best producer in the empire and third in the world. In 1922 Canada produced gold to the value of \$20,500,000, compared with \$19,400,000 in 1921 and \$15,500,000 in 1920.

FREEMAN'S

LOOSE CHANGE

VERTOWERING the tallest building in the world, The Woolworth, a monument to nickels and dimes, is a phantom structure of 1c pieces which shows the might of pennies, if we will all but pause, think, act.

A great international banker estimates that the United States carries fortunes around in its work pockets every day, year in and year out. The average is \$3.50 each for every soul of our 105 million population.

That means 315 million dollars, idle dollars, which 000,000 pennies, which should be earning \$12,600,000 annually — or 1,260,000 would pile higher than the Woolworth Building.

That great sum represents only the normal 3% earnings of money we car-

ry in our pockets as loose change. Think of the wheels of industry the principal would turn if deposited in banks and put to work.

You owe it to the nation, to your own prosperity, to put all loose change to work.

It will create a reserve fund of surprising strength for you in a very short while, if you make deposits regularly.

Then comes intelligent investment and financial independence.

Lindauer & Faist

AGENTS

SCOT FOR ENGLISH AUTOMOBILES

Famous sketches of a dog in the Daily Sketch is reproduced as a logo and decoration for the English automobiles. This noted dog, which is known the length and breadth of England, is mounted on a pedestal and is the most famous of the car. It was first introduced at the London automobile show in 1911, and now is the most famous of the car.

FINISH HARMED IN WASHING CAR

Proper Methods Are Sometimes Worse for the Finish Than None at All.

TEMPERATURE OF WATER

Solutions Containing Ammonia or Any Kind of Lye Soap Should Be Avoided—Loosen Mud and Dirt Gently.

The purchaser of a motorcar, proud of its splendid luster, is prone to many commendable resolutions relating to its frequent washing and cleaning, and then actually do more harm than good in the zeal with which operations are carried out. One could watch the minute care which the final surface is built up in the factory, where coat after coat of expensive material is deftly and carefully rubbed, the car would be more specific when given instructions to have the car washed.

Do Not Use Brush.

It would make sure that the water is warmer than 60 degrees, for no brush will withstand sudden application of hot water. No matter how much mud or dirt is on the car, it should not be scrubbed off with a brush. Cleaning solutions should be used, especially if they contain ammonia or any kind of lye soap. And practice of removing mud and dirt with a brush water blast is decidedly harmful because the blast drives particles of dust and mud into the pores of the paint.

The integrity of the varnish is impaired by every scratch it receives. These scratches often are so small that they are not apparent to the eye, but they do not lessen their danger to the finish. Examine a car with the aid of an enlarging glass after it has been washed. The "rub" rubbing the apparent glasslike surface is apt to be actually broken up into small cuts and scratches. The paint need be continued only a comparatively few times when these scratches will be worn through the surface of finishing varnish, allowing the bare metal to be exposed. The finish will begin to check, and will disintegrate.

Right Water Pressure.

When running water is used the pressure should be just sufficient to move the water moving six inches from the open hose. Then the mud dirt should be gently loosened with a soft, clean cloth or sponge. If a brush must be used, it should be pure white. When the car is clean it should be showered with cool but not hot water, especially if warm water has been used at the beginning of the wash. If the car is to be run out in cold weather, it is advisable to wash one section at a time, drying it with a good chamois. In using the chamois the motion should be in straight lines rather than circular. Chamois should be kept clean throughout the operation, washing it frequently with soap and water. Wash thoroughly with clean water. Do not rub a varnished surface when it is dry.

Time the car comes in after a trip it should be washed before mud has a chance to set or

TO CLEAN UPHOLSTERY

Automobile Owners Make Mistake by Using Gasoline—Plain Water is Favored.

Automobile owners make the mistake of cleaning leather upholstery with gasoline. This method not only destroys the leather, but also the most leather. Just mix with a little ammonia. Ammonia is recommended by those who have experience in cleaning upholstery. After this has dried, the leather should be rubbed with a soft cloth in order to get a polish. Service men will recommend good prepared dressings.

United States has not always

declared its entrance into war by a declaration, having begun hostilities against Great Britain in 1812 and against Canada and seizing British ships in American ports.

CLIMBING ROSES ADD MUCH BEAUTY

Gay Blossoms of the Rambler Are Among the Earliest of the Season.

Fiction and history are full of allusions to beautiful climbing roses, and replete with word-pictures of rose-covered trellises, porches, lovely rose arbors, hedges and fences, alike delightful in fragrance and delicate color.

Roses are not climbing plants in the same sense as grapevines or morning glories. They have no tendrils and do not support themselves by twining. It is necessary, therefore, to train and tie the canes as they grow. In northern sections, winter protection must be given climbing roses by wrapping them in straw or laying the vines down and covering with a layer of earth, adding straw or manure when the earth is frozen.

The Multiflora roses, usually spoken of as hardy climbers, are useful in the North. They flower in clusters. Roses

Climbing the Porch Column.

of the Noisette climbing group, such as the Marechal Niel, Lammotte and others, and those of the Laevigata group of which the Cherokee is a representative, are suitable for culture only in warm climates where the winter temperature does not fall below ten degrees F. above zero.

The following variety list has been prepared in response to many inquiries. They are satisfactory climbing roses for those parts of the United States where climbing roses succeed. Several others might be included.

Among early pink masses; next early, Zepherine Drouhin, large, double, curvilinear; Paul's Scarlet climber, large, double; Christine Wright, large, double pink; mid-season varieties, Gardenia, small, double, yellow opening white; Silver Moon, large single white; Dr. W. Van Fleet, large, double pink; Alida Lovett, large, double pink; Rose Lovett, large, double, red; medium late variety, American Pillar, large, single, carmine with white eye; late varieties, White Dorothy, small double

white; Minnehaha, small, semi-double, pink; Lady Gay, small, double, pink; Excelsa, small, double, red; Ilawatha, medium, single, red with white eye.

The KITCHEN CABINET

Can you hear the baby breathe? From the Southland's sunny places, softly sighing, gently crying, To the baby that loves them so? Come out, little one, for we miss you, We have waited long to kiss you, Lift your face to the sunshine And forget the winter's snow.

MORE ABOUT ONIONS

Onions, shallots, leeks, chive and garlic all belong to the same family and are principally used to add flavor to foods.

Onions are rich in food value, soothing to the nervous system and healing to inflamed mucous membranes. An onion poultice for a chest cold is invaluable. Leeks are used as onions, cooked as vegetables; the shallot is more often used as flavoring for salads and soups, as is the chive.

Those who value the onion will often not tolerate garlic, though it is one of the choicest of flavor vegetables when used with impunity. The dark-eyed brothers of the south eat garlic as we do fresh vegetables and with very little regard for the comfort of a neighbor. Of all odorous vegetables the garlic, eaten uncooked, leaves the most odorous breath. It should be used as it is intended to be used, as a mere suggestion of flavor, and when so used is perfectly delightful. A clove of cut garlic, cut side rubbed inside the salad bowl, will give just the desired flavor to the salad.

Onion Soup.—Have ready one cupful of onion pulp which has been cooked and put through a sieve. Put into a saucepan one tablespoonful of butter, stir into it two tablespoonfuls of flour and cook until smooth and thick. Add three cupfuls of scalded milk, the onion pulp, seasoning of salt and pepper, let it boil up and serve piping hot.

Glazed Onions.—Peel silver-skinned onions of small, uniform size and cook in boiling salted water for fifteen minutes. Drain and dry well on a cheese cloth. Put into a buttered baking dish, add highly seasoned brown stock to cover the bottom of the dish, sprinkle with sugar and bake until soft, basting often with the stock in the pan.

Onion Sandwiches.—Slice a mild onion or a Bermuda onion in very thin slices, sprinkle with a highly seasoned French dressing, place between slices of bread and serve with a glass of hot milk. This is a good lunch for the sleepless.

The Spirit of Service

In the honest endeavor to manufacture and market American products, there exists an undefinable spirit of co-operation and good fellowship.

That spirit of loyalty, personal interest and pride of service leaves its indelible imprint on the commodity produced.

It is these human elements that are responsible for the super excellence of American Products, Kerosene Gasoline, Oils and Greases.

Their performance is the final test of American Certified Quality.

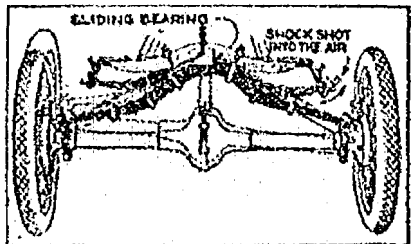

In the conduct of our business, we will be conscientious, honest, diligent, courteous, progressive, to the end that we may continue to merit your good will, which has been the foundation of our success.

23 SERIES STUDEBAKER LIGHT-SIX SEDAN \$1550

Hidden qualities largely determine the value and life of a closed car.

Beauty of line and finish and refinements are surface indications and important ones. But your satisfaction with a closed car depends to a great degree upon factors that are unseen—the in-built qualities that come from correct design, use of highest grade materials and careful workmanship.

The 23 Series Studebaker Light-Six Sedan is a quality car. It is built to endure—to give lasting satisfaction.

The Sedan body is substantially made. It will last for years and retain its beauty and comfort. Evidence of its hidden goodness lies in the fact that down under

the paint and varnish, the pillars, roof rails and supporting members are made from specially selected ash. Good ash is expensive but Studebaker uses it because it best combines the proper strength and weight.

Four wide-opening doors make it easy for all passengers to get in or out without inconvenience to each other. A high-grade heater affords summer warmth on cold, damp days. The wide windows give broad vision in every direction.

When you buy a Light-Six Sedan you are really accepting the judgment of 100,000 owners who have found the Light-Six chassis so satisfactory.

Studebaker quality is traditional.

Terms to Meet Your Convenience

WASHTENAW MOTOR SALES

207 E. Washington Street, ANN ARBOR, MICHIGAN

THIS IS A STUDEBAKER YEAR

poem by UNCLE JOHN

If I was makin' suggestions, which I seldom attempt to do,
I might remark that old friends is giv'g'ly safer'n now. . .
If you feel that Spring is upon us, remember this sage advice:
Be slow to part with yer fuzzies, till you're feelin' the need
of ice.

SPRING If I should admonish my neighbors, which
WARNING I hardly expect to try, I'd start with the
freaks of weather, from now till about July.
— an' I'd sorter dwell on the danger of takin' a blasted cold,
if you peel off the winter fuzzies, because they're a trifle
old.

If I was disposed to orate on matters of health in spring,
I might refer to the changes that April is bound to bring;
an' the crime of clippin' yer whiskers a month and a half
too soon, is as fatal as sheddin' yer fuzzies before it's the
tenth of June.

HOMEY PHILOSOPHY for 1923

Ah, the joy of childhood!—to
romp, to swim, to dash, to play, to
while away the live long day fill-
ing the storehouse of the mind with
memories that last through life.
And youth—the thrill of vision—
life, its possibilities, its potential-
ities, the expanding intellect, the
virility of the hour, the ardor of
sweet companionship, the birth of
love. And middle age—the satis-
faction of accomplishment, the
rounding out, the home, the pride
in recreation, the honor of responsi-
bility, of guidance to the young.
And age—repose, the vision of the
setting sun, reflection of the day
well spent, the task performed, the
kindly word, the deeper understand-
ing of humanity. Tired? Comes
the day of passing, the end of
weariness, the entry into the great
new world.

whole army of scavengers and glean-
ers has passed through his back lane
and ransacked his garbage bins, some
collecting hair, some eggs, some bones.
By eight o'clock in the morning there
is very little left for the regular de-
partment to carry away. Modern sci-
ence has discovered ways of turning
almost every kind of rubbish into
something useful. Rubbish is burned
in specially constructed furnaces and
the heat produced generates steam to
drive the dynamos that produce elec-
tric light. The ashes are used to
make concrete. Soapstone, instead of
flowing away to pollute the streams
and rivers, are strained, mixed with
lime and pressed into fuel bricks
which when burned give out a greater
heat than coal gas would produce. The
carcasses of a horse may be put to al-
most endless uses. The hair is woven
into haircloth or used to stuff mat-
tresses. The hide makes good leather.
Glue and gelatine are obtained from
the tendons. The bones reappear as
knife handles and buttons. Other by-
products are prussiate of potash and
artificial manure. Fish scales are the
material from which some of the most
beautiful artificial pearls are manu-
factured.

How Italians Practice Thrift.
Italian savings deposits indicate the
prosperity of the working classes. Be-
tween June 30, 1918, and June 30, 1922,
deposits in the ordinary savings banks
of Italy increased from 4,933,770,113
lire to 8,071,892,077 lire, while those
in the postal savings banks increased
from 2,019,270,380 lire to 8,391,136,981
lire, making a total of 17,000,000,000
lire. Employment is less restricted
than a year ago, and there have been
few radical reductions in wages. De-
posits show that earnings have been
kept at a sufficiently high level to sup-
port laborers and their families and to
allow a considerable margin for sav-
ings.

How Birds Soar.
How birds soar remains an unsolved
problem. Observation has failed to
detect their method, and theories need
confirming facts. The writer hoped to
get some new light on the matter
when once from the edge of a cliff
near the top of Mt. Fremont he
watched a group of powerful gulls sail
below him, apparently in perfectly
quiet air. He had studied such soar-
ing from below, and had discovered
no movement of the wings. Perhaps,
he thought, something more could be
seen from above a bird, but he failed
to detect a single gull tremble. The
wings were absolutely motionless. Yet
he knew that if he shot a rifle ball
through that eagle's heart it would
tumble to the earth head over heels,
and that its outstretched wings would
little hinder it.

Surely Has "Nerve."
In 1920 a Pole charged with dis-
tributing seditious literature in Ham-
ilton, Ont., and admitted to bail in the
sum of \$1,000, jumped his bail and dis-
appeared. The other day the Polish
interpreter in Hamilton received a let-
ter from the bail jumper from Poland
in which he asked if he could get a re-
fund of his bail money. He is marked
up in police annals as their most
brazen customer.

WHY

Shellfish Beds Should Be Pro- tected From Birds

Complaints that ducks destroy num-
bers of commercially valuable shell-
fish in Massachusetts have been re-
ceived and investigated by the United
States biological survey at Washing-
ton, which reports that all the impor-
tant shellfishing grounds of the state
were visited, testimony was taken, ob-
servations made and specimens collect-
ed. Of the 11 species of wild fowl the
stomachs of which were examined,
none had eaten a significant quantity
of shellfish other than the common
mussel or the scallop. As the mussel
is unimportant, the inquiry resolved it-
self into the study of the relation of
wild fowl to scallops.

"Scoters," or "coots," of two species,
reports the survey, were found to be
the chief offenders. The yellow-billed
coot is not so hardy as the white-
winged and at season when damage to
scallops is said to be greatest, in the
most severe part of the winter, com-
paratively few of this species are pre-
scent. The white-winged scoter, how-
ever, is abundant and makes nearly

GET RICHES FROM RUBBISH

half of its food from scallops. The
bird does no good to offset the dam-
ages which it does and the economic
status is a problem.

"Fishermen want the open season
extended so that they can shoot the
birds, but it is inexpedient and imprac-
ticable to extend the season on a single
specimen of duck. It has been
found that scoter and other wild
ducks are easily driven away from the
scallop beds by running a boat near
them. They feed on the beds only
by day. It would seem, in the opin-
ion of the survey, that scallop fisher-
men should be willing to undertake
the small cost of patrolling the waters
over the scallop beds from which their
income is derived, but for the upkeep
of which they are at no expense."

Why Cities of the Old World Have Revenues Which Are Unknown in America.

This country is looked upon by the
less bountiful and more thrifty coun-
tries of Europe as a land of great ex-
travagance and waste. In Paris, long
before the householder is awake, a

Red Crown

The High-Grade Gasoline Better Than Ever

There is an erroneous idea abroad
You hear it every day. "Gasoline
is not as good as it used to be."
The fact is that the Red Crown
Gasoline you are getting today
is an almost perfect fuel.

Perhaps there is no industry
where progress has made such
rapid strides as the refining
petroleum.

For example, we cite the Burton
Process, developed and perfected
in the laboratories of the Standard
Oil Company (Indiana). The
Burton Process has enabled the
refiner to bring gasoline to a point
of efficiency hitherto un hoped for.

Red Crown Is Made by the Burton Process

Red Crown vaporizes to the last
drop. There is no waste—it pro-
duces instant starting Winter or
Summer—a quick get-away—
smooth running engine—tremen-
dous sustained pulling power and
racing speed if you want it.

EAGLE PENCIL COMPANY, NEW YORK

THE FAILURE

Did we not stand alone in that man's
place
Had we not trod the path whereon he
fell
Had known the error of life that line his
face
And dim his eyes and darken soul as
well
Perhaps then we would wish for caverns
deep
That we might gaze within to silent sleep
If we had seen what snared his feet
What dreams of youth had lurked in
darkness
Had felt the tempter's lure, our reason
away
Or seen life's dearest hopes caught in
the blast
Might we not then, with weakness, sin
and fall
And pray that darkness come and cover
all?

Much better, with kind words, we light
his way
For bidden in that soul perhaps may be
Thoughts that will blossom into life one
day
And fill some lonely heart with melody,
Let's not, with mocking sneers, his hopes
appail
Perhaps he too, along life's way may
fall.

—W. H. O'Neil.

MORE OR LESS IMPORTANT

Scientific Facts Which Some May Con-
sider of Interest, and Others
Will Probably Ignore.

We remain on the surface of the
earth instead of falling off as it turns
round because it exerts a tremen-
dous attractive force, which holds us
safely to the ground.

When you fling a ball into the air
it goes upwards with gradually lessening
speed until the force of gravity
overcomes the energy you put into the
throw. Then it stops, and the earth
pulls it faster and faster downward.

But if the earth attracts the ball
and pulls it down, the ball must also
attract the earth and pull it up, for
every solid pulls other solids. So
the earth actually rises a little to meet
the ball as it comes down!

If the ball weighs one pound, the
earth, which weighs 14,000,000,000,000,
000,000,000 pounds, will move upward
just one 100,000,000,000,000,000,000,
000th of an inch to meet it.

When you jump into the air you
lift the earth rather more, since your
weight is greater than that of a ball.
In fact, if the whole human popula-
tion of the world stood as closely
packed as possible in one spot, and
then all jumped together, the lift
would be about a thousand-millionth
of the thickness of the finest cobweb!

YES, INDEED
Hubby: It takes me feel dizzy
light-headed to swing.
Wife: You used to like it before
we were married.
Hubby: Oh, I was light-headed
anyway.

Marce's Bite Fatal to Bull.
While remodeling his stables, a Con-
necticut farmer found it necessary to
use his Holstein bull to a stall in
his horse stable. It was there a few
days when blood was noticed in its
urine. At first it was thought that the
bull had been hurt by a protruding
piece of wood, but the discovery of a piece of
Marce's tongue in the horse's
stomach led to the belief that the bull
had been licking the horse when the
horse had stepped off a large portion of
the horse's tongue. The animal had to
be killed.

208-14 W. Huron Street Phone 772

In the Realm of Society

Surprise Party.
The members of the S. P. I. club
staged a surprise party Thursday
evening at the home of Mrs. L. Eppler.
The affair was arranged in honor
of her birthday anniversary. The
evening was spent in playing games.
A luncheon brought by the mem-
bers of the club was served in the dining
room, and Mrs. Eppler was presented
with a beautiful plant and a shower
of birthday cards.

Masons Entertain.
The members of the Masonic lodge
of Chelsea entertained about 40 mem-
bers of the Dexter lodge Tuesday
evening. The work of the third de-
gree was conferred by the Dexter of-
ficers and following the initiation a
chicken supper was served. Talks
from the various members tended to-
ward a most friendly and brotherly
feeling and the hope was expressed by
all that more such meetings could be
enjoyed.

Surprise Party.
The following was taken from the
Aurora Daily Beacon News: "Mrs. C.
W. Klansner, who leaves next week
for her new home in Chelsea, Mich.,
was surprised by members of the Fern
club Thursday at the home of Mrs. F.
W. Tomlinson. A luncheon was served
at 1 o'clock followed by cards."
Mr. C. W. Klansner will go to Au-
rora Friday afternoon and will return
with Mrs. Klansner Sunday or Mon-
day.

Cytherian Circle.
Miss Nellie Hall is entertaining the
Cytherian club at her home this after-
noon.

To Entertain Farmers Club
The Western Washtenaw Farmers
club will be entertained at the home
of Mr. and Mrs. A. B. Clark Friday
April 20th. A fine program will be
given.

Scrub Lunch Supper.
The Young Ladies chapter of the
Congregational church will hold a
scrub lunch at the church Thursday
April 26th at 6:30 o'clock. A splendid
program will follow the supper. Every
one invited.

Bake Sale.
The Unity class of the M. E. church
will hold a bake sale at the Chelsea
Hardware store Saturday afternoon,
starting at 3 o'clock.

Epworth League Meeting.

One of the Epworth League group
meetings of the Ann Arbor district
was held Thursday evening, April 19,
at the Methodist church. Mr. T. O.
Huekle, of Ypsilanti, president of the
district, and Rev. Stair, of Ann Arbor,
were the speakers. A large number
from Grass Lake attended. A fine
program was given and supper was
served to about 40 people.

A Daughter.

Mr. and Mrs. Fred Altenburnt, of
Lima Township, are the parents of a
daughter born Friday, April 20.

S. P. I.

The S. P. I. club will meet Monday
evening April 23, with Miss Dorothy
Piclemier.

Surprise Party

Dr. J. T. Woods was surprised by
15 friends and neighbors at his home
Tuesday evening, who came to help
the Doctor celebrate his birthday un-
versary. The evening was spent in
playing cards and other amusements,
after which the well filled baskets,
brought by the guests were served. A
fine time was voted by all present and
wishing the Doctor many more such
happy birthdays departed for their
homes as the "Wee small" hours ap-
proached.

installed from the D. U. R. and
Main street to run west parallel to
the D. U. R. trucks for storm sewer
purposes.
Yeas—All. Carried.
Trustee Chandler excused.
Release

The following Resolution was of-
fered by Palmer and supported by
Schenk:
RESOLVED That the Common
Council of the Village of Chelsea,
Washtenaw County, Michigan, her-
by consents, for and on behalf of
said Municipality, that the Board of
County Road Commissioners of said
County may take over as a part of
the County Road System the follow-
ing described streets and parts of
streets:

Beginning at the intersection of
State Trunk Line Road No. 92 with
State Trunk Line Road No. 17 in the
northeast 1/4 of section 13, T2S,
R3E, Sylvan Twp., Washtenaw Co.;
thence north on State Trunk Line
Road No. 92 to the south end of
pavement in the Village of Chelsea.
Yeas—Hummel, Koebbe, Schenk,
Palmer, Heselshwerdt.
Nays—None.
Resolution adopted.
Approval of Plans by Common Coun-
cil for Project No. 92-2.
The following resolution was of-
fered by Heselshwerdt and support-
ed by Palmer:
Whereas plans and specifications
have been prepared and filed with
the (village) clerk by the State
Highway Department for the im-
provement of the following named
streets in the (village) to-wit: Be-
ginning at the intersection of State
Trunk Line Road No. 92 with State
Trunk Line Road No. 17 in the north-
east 1/4 section of 13, T2S, R3E, Syl-
van Twp., Washtenaw Co.; thence
north on State Trunk Line Road No.
92 to the south end of pavement in
the Village of Chelsea, the same be-
ing known as project No. Trunk Line
No. 92-2.

Whereas the said plans provide
for the improvement of the surface
of said streets by the state to a
width of not to exceed twenty feet
in the center or traveled portion
thereof, together with additional
improvements for the use and bene-
fit of the said (village) which addi-
tional improvements include all nec-
essary drainage structures, and
Whereas it appears that said
plans are in proper form and are
satisfactory to this body, and
Whereas it is understood and
agreed that the (village) is to pay
for all improvements outlined on
said plans and specifications except
the strip which is to be improved by
the state, or as especially noted,
Therefore be it resolved that said
plans be and the same are approved
and the consent of the (village) is
hereby given for the making of said
improvement in accordance here-
with.

Be it further resolved that the
(village) improve its portion of said

streets in accordance with the plans
and specifications as prepared by
the State Highway Department and
that the (village) clerk be instruct-
ed to advertise for bids for such im-
provements, if necessary, said bids
to be received at the same time and
place as the bids to be received by
the State Highway Department.
Be it further resolved that the
Resident Engineer of the State High-
way Department having charge of
the supervision of said work on be-
half of the State is hereby author-
ized to act for and represent the
village in the supervision and in-
spection of that portion of the im-
provement belonging to the village
and that the State Highway Depart-
ment be reimbursed out of the vil-
lage treasury, on bill rendered by
the State Highway Department, for
the actual cost of such supervision
and inspection, said actual cost to be
determined when the work is com-
pleted and to bear the same propor-
tion to the total cost of supervision
and inspection as the cost of the vil-
lage portion of the work bears the
total cost of the work.

Be it further resolved that a copy
of the final estimate to the con-
tractor for the village portion of the
work be sent to the State Highway
Department for the purpose of a
record.

Be it further resolved that the vil-
lage will at no time hereafter, with-
out the written consent and approval
of the State Highway Department,
attach any further or other improve-
ments to the improvement so made
by the said department, or make any
changes from these plans.

Motion adopted by following vote:
Yeas—Hummel, Koebbe, Schenk,
Palmer, Heselshwerdt.
Nays—None.
Motion made and carried to ad-
journ.

G. W. Walworth,
Village Clerk.

The Road to Happiness

You must keep will if you wish to
be happy. When constipated take one
or two of Chamberlain's Tablets im-
mediately after supper. They cause a
