## THE GOOD DEFENSE.

That defense of the young people of today made by the Rev. William E. Gardner, secretary of the department of religious education of the Episcopal church is so good we reproduce it here even at the risk of calling your attention to something you have already heard.

It was at Omaha that the Reverend Mr. Gardner said:  
"I am one of those who stand for the flapper. She is a symbol of the time. As she sweeps down the street she is like nothing so much as a fine, young spirited puppy dog eager for the fray. We do wrong to condemn them, to decry them, to suspect them. Youth is already in the ago which stands emphatically for the doctrine of equality of sexes and is insisting upon being heard in the times ahead.

"With the ordinary boy and girl today there is ceaseless questioning about everything and religion does not escape. Youth knows that a large amount of human education is carried on by stories that are not true in fact, but which contain true morals.

"Some of our boys and girls are tracing down that story of Jonah and the whale to its source and are deeply enjoying the whole process.

"To say that young men and women between 16 and 25 are not interested in religion is to be blind to the ships that carry the finest signal of hope. They may not be interested in your religion, but they are deeply interested in the religion needed by their own age.

"There is no Luther nailing questions to the church door. Instead there is a youth movement in religion. Much truth is still in the methods and thoughts, but the old terminology has ceased to have meaning for these boys and girls with their radio and now books which give them a new idea of the infinity of the universe.

"Shall we stay this inquisitiveness when boys and girls question religion?"

Stay their inquisitiveness? Never. But let them be answered in the home. By father or mother, some good counselor. Not reproach but a common sense explanation is what they are entitled to. Don't be too tired for the effort. It will repay you a thousand fold.

## ENDURANCE OF WOMEN

What is your private opinion of these girls who wear out several orchestras and a half dozen male partners apiece to get the title, "endurance dancing championship of the world?"

It's an interesting but futile pursuit that will take its health toll later in the young dancers' lives. Over exertion always presents its bill. And it always collects—in full.

Mon run marathons, collapse at the end. The crowd cheers. No one thinks the runners are "cuckoo" for over exerting.

Other men over exert, contesting to see which can lift the heaviest weights or bend the thickest iron bar over the chest. Crazy? It's never suggested.

But when the girls come forth to demonstrate endurance, you hear people on all sides grunting and sniffing. Envious, perhaps. But more striking is the demonstration that what's sauce for the goose is not sauce for the gander.

This bit of psychology is evident all thru life in its various ramifications. Man seems entitled to make almost any kind of a jackass of himself, without question. Woman, however, is quickly ridiculed.

There is just as much sense in endurance dancing as there is in long distance running, weight lifting, auto racing—or even baseball, for that matter.

Doctors, interested about the woman dancers "wearing out" partner after partner, disagree as to whether it indicates that woman has more endurance than man. However, she has. When a man and his wife get into a run of bad luck, the wife nearly always is last to "throw the sponge." Often of course, this is because she doesn't realize as thoroly as her mate the extent of the trouble they're facing.

Not one man in 10 could endure the anguish of childbirth without "giving up"—killing himself or getting drunk.

## CLIMBING PRICES.

Steel prices climb up. It's good news for jobbers, for it increases the inventory value of their warehouse stocks. Like finding money. The gain will, to some extent cancel the losses that the jobbers swallowed when they had to "write off" depreciated values after the war boom collapsed.

What's happening in steel is happening in other industries. Alas, the goat, as usual, is the ultimate consumer, the plain family head. He also took his losses during depression. But he hasn't warehouse stocks to help him recover those losses. An exception is the home that's increasing in value.

## MARVELOUS DISCOVERY.

Wasserman, German discoverer of the famous blood test for the dread disease that originated in ancient Egyptian temples, has perfected a similar test for tuberculosis germs in the blood.

It's a marvelous discovery. And it's announced to the world by another marvel, radio.

We live in an age of scientific magic, so much so that it's becoming almost bromidic to comment on it. Each year it becomes increasingly difficult to keep young in thought, up with the parade.

The first sign of spring in San Francisco was when a boy of 11 eloped with a girl of 10.

More would live to the safe and sane age if it weren't for the insane and unsafe age first.

## TASTY GOOD THINGS

There is no dessert or salad so well liked as that prepared from grapefruit.

This may be served either as a salad or dessert.  
Grapefruit Salad.—Cut grapefruit in halves, take out the pulp and mix with chopped pineapple pulp and maraschino cherries with sugar and the maraschino syrup to taste. Garnish with the cherries after filling the shells with the fruit.

Hominy Baked With Cheese.—Put alternate layers of cold boiled hominy and grated cheese in a baking dish, add enough milk to moisten, cover with buttered bread crumbs and bake until well-browned and the crumbs are well-browned.

Chicken Salad.—Mix one pint of diced chicken and one cupful of celery, a little chopped cabbage from the tender white center; mix with highly-seasoned mayonnaise and serve on head lettuce.

Tartar Sandwiches.—Chop three sardines, add a cupful of boiled ham ground, three small cucumber pickles, a little chow-chow with a teaspoonful of catsup and a quarter of a teaspoonful of mustard; add a dash of lemon juice and mix well. Spread on buttered bread.

Walnut and Cress Salad.—Lay the kernels of thirty English walnuts on a layer of sliced oranges. Squeeze lemon juice over them and let them stand for 24 hours. Serve on a bed of fresh crisp water cress with a rich French dressing poured over it.

Peanut and Peanut Salad.—Stew a cupful of fine canned peas in their own liquor until it is absorbed. Cool, add a half-cupful each of celery and chopped peanuts, six sliced and chopped olives and a little grated onion. Serve with a rich mayonnaise or a highly-seasoned boiled dressing. Serve on lettuce.

Bird's Nest Salad.—Color cream cheese with a little green fruit coloring, add cream to make it soft enough to mold, then roll in the size of small eggs. Shred lettuce and form it into nests, arranging three or four of the cheese eggs in each. Serve with any desired dressing.

## Entries in Our 1924 Presidential Derby

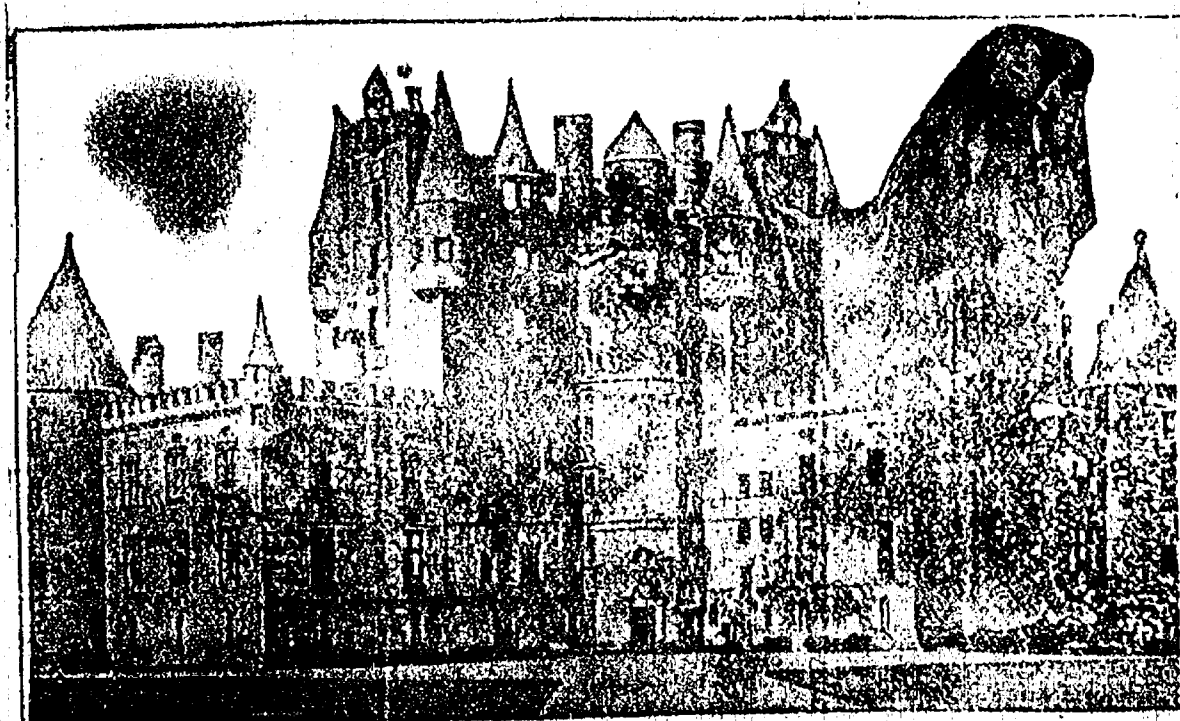

The post bugle has sounded and eight entries for the  
United States four year classic, "The Presidential  
Derby," are already lumbering up and jockeying for  
advantageous positions.

The four wearing "GOP" colors are headed by the  
favorite, President Harding. His opponents in the  
trial heat up to the National convention are Senator  
Hiram Johnson, of California; Senator Borah, of  
Idaho and Secretary of Commerce, Herbert Hoover,  
of California.

Wearers of Democratic colors are going to the post  
with Henry Ford, of Detroit; and William Randolph  
Hearst, of New York, slightly overruling Former  
Secretary of Treasury, William McAdoo, of New York,  
and Senator Oscar Underwood, of Alabama, as favor-  
ite to win in the national convention spirit.

Can you pick the winners—and the winner?

## Royal Murder Scene Once Becomes Scene of Honeymoon

### Does Homicide Run in Families?

Glamis Castle, Scotland, where the Duke of York, second son of King George, and his bride will  
honeymoon. This is the castle referred to in Shakespeare's "Macbeth." Eight hundred years ago  
Macbeth murdered Duncan, King of Scotland, in the room marked by the cross. His lineal descen-  
dant seems to have inherited the family weakness for he is murdering husbands in grand opera  
today with remarkable success. Inset: Florence Macbeth, prima donna soprano of the Chicago  
Opera Company, as Lucia, in the opera, "Lucia di Lammermoor." (PHOTO: UNDERWOOD & UNDERWOOD)

## LIEUTENANT IS HAILED AS HERO

Exploits Give Him Place Along-  
side Sergeant York and Others  
Who Won Undying Fame.

Every reader gets a thrill out  
of stories of heroism in war.  
Doesn't this American's exploits  
make you proud of your citizen-  
ship?

Washington.—The War department  
has unearthed another hero whose ex-  
ploits in the World war compare fa-  
vorably with those of Sergeant York  
and others who won undying fame for  
their bravery on the field of battle.

He is Dwight H. Schaffner, first lieu-  
tenant, Company M, Three Hundredth  
infantry, of the Seventy-seventh divi-  
sion—New York city's division—to  
whom was awarded the Congressional  
Medal of Honor, the highest in the gift  
of the government. He lives now  
at Falls Church, Pa., where he resided  
when he received his commission in  
the army. His citation reads in part:

Tells of His Exploits.  
"For conspicuous gallantry and intrep-  
idity above and beyond the call of  
duty in action against the enemy near  
Saint Hubert's Pavilion, Bourevilles,  
France, September 28, 1918. In com-  
mand of Company B, Three Hundred  
and Sixth Infantry, he led his men in  
an attack on Saint Hubert's Pavilion  
through terrific enemy machine gun,  
rifle and artillery fire and drove the  
enemy from a strongly held entrenched  
position after a hard fighting.

"His bravery and contempt for dan-  
ger inspired his men, enabling them to  
hold fast in the face of three deter-  
mined enemy counterattacks.

"His company's position exposed to  
enemy fire from both flanks, he made  
three efforts to locate an enemy ma-  
chine gun which had caused heavy cas-  
ualties in his company. On this third  
reconnaissance he discovered the gun  
position and personally silenced the  
gun, killing or wounding the crew  
thereof.

"The third counter-attack made by  
the enemy was initiated by the appear-  
ance of a small detachment advanc-  
ing well in advance of the enemy at-  
tacking wave, calling as they advanced  
"Amazed." When almost within reach

of the American front line the enemy  
attacking wave behind them appeared,  
attacking vigorously with pistols, rifles  
and hand grenades, causing heavy cas-  
ualties in the American platoon hold-  
ing the advanced position.

Geta Valuable Information.

"Lieutenant Schaffner mounted the  
parapet of the trench and used his  
pistol and grenades with great gal-  
lantry and effect, killing a number of  
enemy soldiers, finally reaching the  
enemy officer leading the attacking  
forces, a captain, shooting and mortal-  
ly wounding the latter with his pistol  
and dragging the captured officer back  
to the company's trench, securing from  
him valuable information as to the  
enemy's strength and position."

### Crippled Violin Said to Play Without Help

London.—A violin with two strings  
missing thrust open its case and be-  
gan to play about the hour of mid-  
night in the village of Alltwen, near  
Pontardawe, declares the Swansea  
correspondent of The London Daily  
Express.

This is one of two remarkable in-  
cidents vouched for by the villagers.  
They tell also of a neighbor who died  
weeks ago, yet has been seen tilling  
his garden and leaning over the gar-  
den gate as if he were still flesh and  
blood.

"I rated my husband for practicing  
the fiddle at night," said Mrs. Heard,  
in whose home the ghostly nocturne is  
played, "but I soon found that I was  
mistaken. One night he and I went  
downstairs about the hour the fiddle  
usually played.

"Suddenly we saw the case fly open,  
and we heard sounds like those the  
fiddlers make when they tune up. Then  
the fiddle lifted itself sideways and  
played."

The other ghost is said to have  
passed his former charwoman at the  
stairs, and so startled her that she  
fell in a fit. Neighbors swear they  
saw him in the garden.

Except for Sex, She Was  
Fine Specimen for Army

Montgomery, Ala.—Everything went  
along smoothly when Howard Snod-  
grass of Anniston, Ala., and a com-  
panion attempted to enlist in the army  
at the recruiting station here, until  
the companion was told to prepare for  
a physical examination. The companion  
turned out to be the wife of Snodgrass,  
dressed in men's clothing.

Except for her sex, she was a fine  
specimen for the army, the recruiting  
officers said.

### Wants to Call Again Despite Court Order

After a divorce decree sought  
by his wife, Mary, forty-seven  
years old, had been denied,  
James B. Ritzon, fifty-five, of  
Steubenville, O., protested a  
court order prohibiting him from  
calling at his wife's home and  
informed the court that he was  
trying to regain his wife's af-  
fections.

The court held, however, that  
the wife must do all the court-  
ing in the future. James must  
stay at home.

### Find Magellan Hat Lost in Philippines in 1521

New York.—The biographers of  
Ferdinand Magellan have not thought  
it worth while to tell the world how  
he lost his brass helmet.

It was on April 27, 1521, almost 402  
years ago, that this great navigator,  
having written to the folks back home  
that he had just finished discovering  
the Pacific ocean, allied himself with  
Zula, the treacherous king of Cebu, in  
the Philippine Islands. Zula coveted  
the neighboring island of Mactan and  
as Magellan was all dressed up for  
fighting, being possessed of armor and  
a brass helmet, Zula sent him to do  
the rough work.

The king of Mactan objected, and a  
no-rules fight ensued. Ferdinand was  
doing well until someone got inside  
his guard and did him in. In falling  
he lost his brass helmet. Inasmuch  
as he died right there and had no  
further need of the helmet, the na-  
tives kept it as a souvenir.

Now comes the news that the hel-  
met has been found in the Philippines  
by Maj. H. D. Seton.

Vacant pastorates in two Downstate  
churches were filled again last week.  
The Rev. C. E. Pickett comes from  
Cadillac to the local Church of Christ  
succeeding the Rev. C. Melvin Mc-  
Kay who has gone to Clinton, Ky.  
The Rev. R. H. Fairchild, former  
rector of St. Paul's Episcopal Church,  
now at Chicago Heights, Ill., will be  
succeeded by the Rev. Ernest Dy-  
mond, at Huron, Ont.

Bids have been asked by Monroe  
county road commission, for the con-  
struction of the Swan Creek road in  
Burlin and Ash townships, and the  
Yargerville road in Ida and La Salle  
townships. Both roads are to be com-  
pleted with a two-course macadam  
and bituminous dressing. The Swan  
Creek road is 3.66 miles long and  
Yargerville, 7.96 miles. Both will be  
14 feet wide.

## Is All Gasoline the Same?

Often you hear the remark, "All gasoline is alike,"  
that "One brand is as good as another."

With many different refineries producing gasoline,  
with the difference in crude oil and the various  
methods of refining, it is impossible to expect all  
brands of gasoline to be alike.

American Gasoline is distinctively different.

Because of the keen personal interest, vigorous co-  
operation and definite pride of service manifested by  
every individual responsible for the Production of  
American Gasoline, it is possible and certain that  
these human attributes do primarily influence its  
character, and are responsible for the "Certified  
Quality" of American Gasoline.

These individual qualities do not cease with the  
production of the product. Each and every Amer-

The photograph shows a cross between a bob sled and a flivver. The flivver and sleds the past winter throughout the Middle West furnished the incentive for Dr. H. M. ## DON'T WASH CAR TOO FREQUENTLY

Expert on Automobile Finishes Explains Why There Are So Many Shabby Machines.

Here is the opinion of an expert on automobile body finishes: "The idea that a car must be washed every time dust has accumulated on it is a mistake.

"Every time a car is washed the varnish is raised slightly and the enamel is dulled. It would seem necessary on account of heavy road mud to wash a car, but it isn't.

**Mud Gets on Rear.** "Mud generally gets on the rear half of the body and the running gear. Washing the running gear will not materially affect the general appearance of a car if it does lose its luster. It is the body of a car that catches the eye. Sprayed mud on a car can easily be removed by the use of a soft cloth drawn lightly back and forth over the surface until it crumbles away. It is not necessary to use pressure. Light rubbing accomplishes the trick.

"Any white dust left on the finish after this has been done will act as a fine polishing powder when a good polish is used.

"To keep a finish in the best possible condition, it is necessary to use a cleaner once in 60 days to smooth, clean and polish the surface. Cleaners always contain scouring powders, but a preparation of this nature should not be used as a regular treatment, as once the dirt and grime have been removed from finish a cleaner will remove some of the good finish in each application. Therefore, as a general wash and polish in one application, a preparation very light in cleaning element, with preservative properties, should be used. If this treatment is followed, the finish on an automobile will be deep in shine and will not require refinishing for months and sometimes years.

**Keep Enamel Bright.** "The enamel on a car can be kept in bright condition indefinitely, while it is only natural for varnish to keep bright as long as there is life in it.

"Water is not always free from dirt. A bath will cut up varnish. Soap cannot be made without the use of alkali, and no matter how much oil and tallow are used, the alkali stays alive.

"Drawing the enamel skin over an enamel surface dulls it a little in every movement and in the course of three months of washing treatment, the enamel surfaces on a car turn gray. This never happens if a good reliable polish is used instead."

**BRICK WILL HEAT MANIFOLD** Device Adapting Principle of Old-Fashioned Foot Warmer Has Been Put on Market.

A device adapting the principle of the old-fashioned foot warmer has been put on the market for the purpose of supplying heat to the intake manifold, independently of the engine. This consists of a stove-like box which attaches to the manifold and burns a specially prepared fuel brick. The fuel is lighted with a match and supplies, it is said, constant heat for a period of 12 hours.—Motor.

**AVOID SKIDDING** Skidding is probably one of the most common causes of automobile accidents. Yet, if the driver is careful, he should have no trouble.

The only skid that can be controlled is the skid that does not start.

Slow, even turns, and slow, even stops and starts, will avoid skids.

Never apply the brake suddenly.

Never disengage the clutch until you have almost come to a stop.

A self-starter makes less noise when the car is in gear and it is propelling the entire machine.

It is old stuff to say that sprung vehicles pull easier than unsprung ones, but it seems to be generally forgotten, nevertheless.

Alvin Reed Morrison, 62 years old, prominent bridge and marine contractor of Port Huron, died last week at his home.

## COW GOES CALLING IN APARTMENT BUILDING

Man at Door Calls Cop Instead of Inviting Her In.

New York.—Patrick Marino of No. 472 Humboldt street, Brooklyn, was fast asleep early the other morning when a peculiar bumping noise on the sidewalk outside awakened him. He listened, and it sounded like nothing he had ever heard in the way of noise before.

The noise arrived at his apartment door and there was a scrape and a knock. Marino took a baseball bat and answered the door. He was greeted by the friendly moo of a large, socially-inclined cow.

Marino lives on the second floor, and wondered how the visitor had negotiated the 40 steps. He decided it was too hefty a problem for himself, and engaged the cow in conversation while another member of the family sent a call for the nearest policeman, who happened to be Frank McCormick of the Herbert street station.

McCormick viewed the cow and decided she was too big a problem for him to tackle. He telephoned Lieutenant Pile at the Herbert street station. Pile dispatched the reserves, with plenty of rope and a block and tackle to extricate the cow from the hallway.

She proved docile enough and they finally got her out. She was taken to the stables of the Greenpoint avenue police station, and investigation developed she had been one of a herd landed at North Henry street and driven to the slaughter house of Bernstein & Bernstein, No. 232 Johnson avenue. A representative of the company claimed her.

**Lost by U. S. A.—One Island.** Washington.—"Disappearance" of Matador Island, in the Pacific, has been officially authenticated. The naval hydrographic office announced that, according to a recent survey, Matador Island, in the Eastern Caroline group, Pacific ocean, does not exist and is to be expunged from the charts. It was erroneously located in the group in an early survey and has since been omitted on all charts.

George W. Harris, 46 years old, attorney, died in Harper Hospital at Detroit, last week, of injuries suffered when a gas heater exploded in the basement of his home at Parkton.

## Chats With Your Gas Man

You cannot get "something for nothing."

Yet some people still get theirs by getting their domestic water supply free with a coil of the furnace.

The truth is this: If you have a coil in your furnace, your water supply takes one shovelful of coal out of every five you put in the furnace. In other words, a coil uses one-fifth of the fuel generated by the furnace.

A modern gas water heater gives you a more inexpensive water service than the furnace coil. And when you consider gas hot water service puts an end to smoke, ashes, soot, labor, mess, the argument is complete.

There is a type and size of water heater for every need and purpose. Why not visit our office and see a demonstration of instant, dependable, abundant, clean hot water service?

## For Real Service Buy Red Crown

### The High-Grade Gasoline

Gasoline Service is expressed in terms of mileage. When you buy 10 gallons of gasoline, in reality you are buying 150 miles of service, if you get 15 miles to the gallon.

Gasoline becomes a propelling force only when you cause it to vaporize and mix it with air.

The service which you receive is in exact ratio to the manner in which the gasoline vaporizes

## Red Crown Vaporizes to the Last Drop

that's why there is no waste. Red Crown has a Perfect Chain of Boiling Point Fractions, adjusted so as to vaporize at just the correct temperature to produce instant starting Winter or Summer—a quick pickup—smooth acceleration—tremendous sustained pulling power—racing speed if you want it and a maximum of mileage.

All of which is summed up in two words "Real Service."

23 SERIES SPECIAL-SIX TOURING CAR \$1275

You make no mistake when you select the Series 23 Studebaker Special-Six Touring Car. You can determine, in advance, why it is so desirable a car to own by doing four simple things.

Come in and inspect it carefully—from radiator to stop-and-tail light. Note its long graceful lines, the beauty of its finish and upholstery, its sturdy construction, roominess and unusual equipment.

Get behind the wheel yourself. See how conveniently all controls are placed. Notice what a relief it is to have a one-piece, rain-proof windshield, giving unobstructed view of the road ahead. See how easily

it steers—how faithfully it holds the road.

Test its acceleration, power, flexibility. Drive through traffic at low speed in high gear. See how conveniently it can be parked where space is limited.

Then compare any car within \$300 of its price with the Special-Six. Compare the specifications, performance, comfort, appearance and refinements.

And finally talk to some Special owners. Ask them frankly about the round satisfaction with the Special.

The Special-Six possesses every detail for lasting satisfaction.

# In the Realm of Society

**Our Trees.**  
From fair New England's pigmy Yew  
To California's king.  
The various trees are sweet toned keys  
That aid Dame Nature sing.  
Well might the 'Sage of Concord' love  
The whispering Pines among,  
Or Maples praise be weaved in lays  
Our northern neighbors song.  
Wherever points a spire on high,  
Or waves a plume the breeze,  
I love them all—the great and small—  
The noble race of trees.

They give the fine background to art,  
The landscape craves their charms,  
They grace each spot from city lot  
To largest sweep of farms.  
And when the wind and tempest breaks  
The major keys begin  
In crash and groan—discordant tone,  
A fearful warlike din.  
But when the winds are stilled at last  
They change their vocal stress,  
In whispering sighs, like lullabies,  
They speak of gentleness.

From sea—girl Cubas royal Palms  
To Canada's Fir, trees,  
The wandering wind tries for to find  
The sweetest symphonies.

With roots that know the sweetest  
springs,  
With tops that love the sky,  
We'll bless the hand that lets them  
stand  
And grow like you and I.  
—Ulysses Perrine.

**Lumbago.**  
This is a rheumatism of the muscles of the back. It comes on suddenly and is quite painful. Every movement aggravates the disease. Go to bed, keep quiet and have Chamberlain's Liniment applied and a quick recovery may be expected. Mrs. E. J. Dunn, Brockport, N. Y., writes: "I have been cured of lumbago a year ago last summer. When I began using it, I was flat on my back in bed and could not turn to the left or right. I had a bottle of Chamberlain's Liniment in the house and this was applied to my back. It promptly drove away the pains and aches."
