Address all communications to the Tribune, Chelsea, Michigan

The Chelsea Tribune is mailed to any address in the United States at \$1.50 the year, 75 cents for six months and 40 cents for three months.

OUR POLICIES

Let us all get together for a bigger and better Chelsea.
A sewerage system for Chelsea.
A building program that is bound to build.

GETTING A START

It took Henry Ford 12 years to sell his first million cars. It took him only six months to sell his eighth million.

Here you have a clear cut illustration of a principle that regulates success in nearly every field of endeavor. It is so universal a principle that it is almost a natural law.

This is the principle: Getting started is nine-tenth of the battle for success. Once we are "on our feet"—definitely progressing toward our goal our progress increasingly becomes easier.

Every self made rich man looking back over his career, knows that it is more difficult to accumulate the first \$1,000 than any \$10,000 that follows. Hence, the expression: "Money breeds money."

The fastest locomotive has a lot of preliminary work devoted to mechanical tests, inspection and getting up steam, during which period the locomotive doesn't travel at all. It stands still until ready to make its fast run to destination.

The championship prize fight lasts only a matter of minutes. But it is won or lost in the years of training beforehand.

It took the allied armies more than four years to develop the strength and momentum for the comparatively short campaign that knocked out Germany. At many times during those long years, and right up to within a few months of the German surrender, it looked as if the allied preliminary work had been largely wasted. But it wasn't. The tables were turned, and success came virtually overnight.

Once you get an army on the run, victory comes fast. So does success, after we get firmly on our feet.

After the seeds sprout in the garden, comes a period in which the outlook seems almost hopeless except to the experienced gardener. The fight against weeds and cuts worms and insects is a hack and neck contest. And then, almost overnight, the garden wins the fight. There after it requires comparatively little care. The harvest is won or lost in the discouraging period early in the game.

Why, then, ever allow ourselves to become discouraged, no matter what we are attempting or how great our setback?

Night is blackest just before dawn. And the average career is bluest just before we win.

Most of us are nearer success than we realize. Success may even be right around the corner. Trouble is, the majority of people get discouraged and slow down their efforts at the critical moment when they are on the verge of "getting across."

The leaders of men are the ones who hang on in the crisis when the others lose heart and let go.

BUNK IN FIGURES

Half the families in the United States have an income of less than \$1,500 a year, comments M. J. Stickle, eastern Y. M. C. A. official. For contrast, he refers to the national industrial conference board's estimate, of some months ago, that the amount needed for a decent standard of living for a family of five is \$1,698 a year.

There is something wrong with the figures, for it's tommyrot to claim that half the families in the United States are unable to maintain a decent standard of living. We have the highest average standard of living in the world, and it's at least a half higher than it was 10 years ago.

OUR SPENDING CHILDREN.

High school girls spend an average of \$4.15 a week apiece, boys \$2.53, according to a check up in Boston.

This may rile old timers who recall when many a high school lad wore pa's old suit made over by ma. In fairness to the youngsters, tho: The decreased buying power of the dollar makes it necessary to divide spendings by two or three to make a just comparison with the former generation's youthful pin money.

The Boston average budget disclosed that boys spend 14 cents a week apiece for cigarettes.

How long since you've seen a boy mowing a lawn or collecting junk?

OUR INCREASED LIVING STANDARDS.

Cost of living now is about three-fifths higher than it was when the war started in 1914, according to the national industrial conference board. This is, of course, an average figure for the whole country and varies with locality—higher in some places and lower in others. Most of us will agree that we live in one of the "higher" localities.

However, the three-fifths higher estimate is logical, since it covers actual cost of living (necessities, including necessary recreation) for a wage earner with five in family. Our real increase in cost of living is largely in our increased demand for luxuries—what Jim Hill called "the cost of high living."

OUR BILL FOR DIAMONDS

Americans are importing diamonds at the rate of 65 million dollars worth a year. But that's only about 60 cents a year for each of us—5 cents a month—which certainly isn't extravagance in the modern sense. Making allowances for increased prices, the nation doesn't seem to be buying more diamonds than before the war.

The figures quoted are wholesale prices, not what the consumer pays. But, even at that, the price of several movies, matches our diamond bill. We throw diamond money several times over into the garbage pail.

Marconi invented the wireless 21 years ago, and it is going a way to be so young.

WHISPERS

The taxi driver who once heard his engine missing now listens only to passengers kissing.

Des Moines, Ia., safe blowers made 3,000 in a few minutes, but it isn't steady work.

Teachers want the minut dance back. It will never do. They dance hours, not minutes.

Oshkosh, Wis., man raises about a million frogs a year; not however, to get the hops.

These are the days when it is time to go home just before you get settled down to work.

Yes, if we have no bananas we have no banana skins to step on.

American women use 10,000 tons of talcum powder every year, but less gun powder.

Who remembers last winter when the ice man was a total stranger.

Frenchman says radio is the devil in a halo. Ours sounds like the devil in a boiler shop.

Berlin carpenters are knocking off instead of knocking on.

Is there no other synonymous expression for immediateness of proximity but sardines in a box? Notice frankfurters in a carton, or California packed cherries.

Science may be able to land the germ that causes auto accidents since it is about the most fatal disease that the human race is subjected to.

A reformed poet, now making an honest living, tells us his poetic license just expired.

Why say candidates hurt their hats into the ring, when they slip them in so gently?

On returning from a fishing trip the fish are divided while their weight is multiplied.

The grocery bill may be reduced easily by feeding the family candy before every meal.

Remember when it was so cool you stuck to the chair without sticking.

It doesn't matter, but Pilsudsky, who has fought a duel, sounds as if he was named for beer.

Vacationist writing he sleeps under blankets may have them on the roof to keep the rain out.

A telephone strike in Boston made even wrong numbers scarce.

Darn this hot weather! Even the milk seems to be getting thin.

Wouldn't this be a fine day to be buffeted by an icy sea?

Marconi invented the wireless 21 years ago, and it is going a long way to be so young.

Kansas farmer is suing his son for failure to find him a wife, instead of for finding him one.

MacMillan plans to spend 15 months in the arctic regions, but all of us can't do that.

Huge reservoir will inundate American Falls, Ia., making it as wet as New York, almost.

Florida man who tried to smoke out mosquitos hasn't any mosquitos or house either, now.

Entirely too many people are going down to the movies to talk about something.

PEGGY'S CORNER

Address all communications to Peggy, care of the Tribune.

Sour Cream Fudge: Two cups sugar two tablespoons cocoa or one square chocolate, one-half cup milk, two tablespoons sour cream, put meats if desired. Cook until it forms soft ball. Then let cool before beating.

Bows for Hats—Not in many seasons has the ribbon or velvet bow been so popular for hat trimmings. These are large and small, high and flat, but they give a decidedly youthful and trim appearance to street millinery.

Renovate shabby leather by whipping the white of an egg and anearing this gently over the surface with a piece of soft linen.

Good Form—Simplicity is the keynote of good manners. Avoid all forms of affectation, stilted words, introductions and elaborate phrases, are out of date. In making introductions say, "Mrs. A., allow me to present Mrs. B." or simply, "Mrs. A., Mrs. B." A man is always presented to a woman and a young woman to her elders.

Home made Vases—A young wife who had two pretty plain colored vases in her living room, one dark green and one light blue, explained how she had made them. They were merely wide mouthed bottles of pleasing shape, which had been treated to a coat or two of ordinary paint. The idea might easily be elaborated by tracing in lead pencil a simple outline, perhaps a flower or conventional design, to be filled in with contrasting colors. Such vaseomaybe made to harmonize with any furnishings.

HELPFUL HINTS

By A. Leda

Mrs. Householder: This newspaper will publish "Helpful Hints" in this form at regular intervals. We suggest you clip this column and paste it in your recipe book.

In a Sewing Basket—Tie a little bow of bright ribbon on the handle of your sewing box and they will be much easier to find.

Salad—In fixing a lettuce salad a leaf of mint and grating of onion is a pleasant addition to some tastes. Try it.

Mice—If one wishes to catch mice, put some pumpkin seeds in the traps. It is very attractive bait.

Scorch Spots—A scorch spot may be removed from a very delicate fabric by wetting with clear water and sprinkling with Borax.

Ice Cream Spot—A very ordinary stain which few people know how to remove is an ice cream stain. Take the spotted material and lay on a clean folded cloth and rub lightly with lukewarm water. This will take the piece (sweet) out of the stain. Then take some ether or benzine and rub lightly but firmly. The latter to remove the grease.

Lemonade—If the whole lemon is put through the food chopper for lemonade, instead of just squeezing the fruit, you will find it to have a much better flavor and have twice as much.

Singeing Feathers—When singeing chickens, hold over an oil or gas stove and the skin will not blacken, as where a burning paper is used. Also use a pair of tweezers to remove pin feathers. They will take hold of the very small ones.

Canisole Straps—If underneath the plain ribbon used for shoulder straps a piece of narrow elastic is sewed, there will be no trouble about "straps slipping."

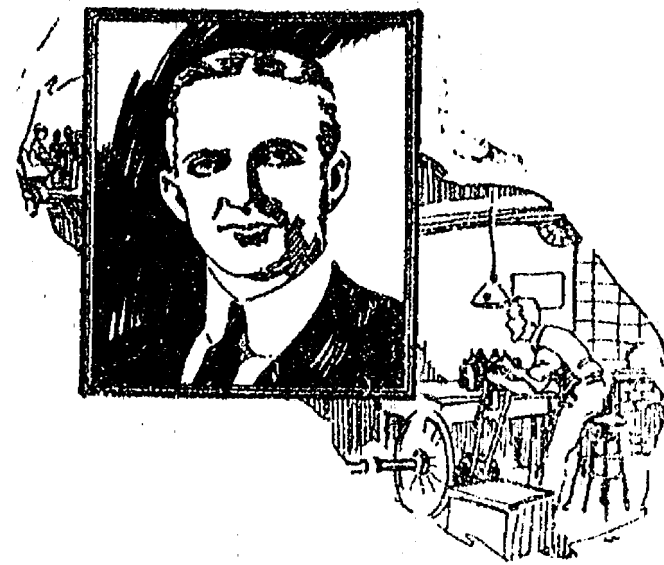

Fine Linens—Fine lincens and embroidery will have a longer life if they are washed in cold water with white soap and a little dissolved Borax.

Snappers on Curtains—If one wishes to save laundry bills, trouble, and have curtains stay clean, sew a snapper at each side on the lower part of the curtains. Then sew the corresponding fastener about eight inches from the top of the curtains. At night just snap them up and they will not be soiled blowing against screens, etc.

Quiet Cemetery at Station Where President's Body was Received

Following Mrs. Harding's wish the President's body was received at quiet cemetery upon its arrival in Marion, Ohio. Above: Picture of cemetery with inset showing Mrs. Harding and the late President's sister, Mrs. M. C. Remsburg, who accompanied body on special train.

Henry Ford

The automotive industry was young and undeveloped when Henry Ford worked nights around a crude machine bench he had built in his barn. He was working out an idea—and in carrying it through he was forced to economize at every turn—if he was to succeed.

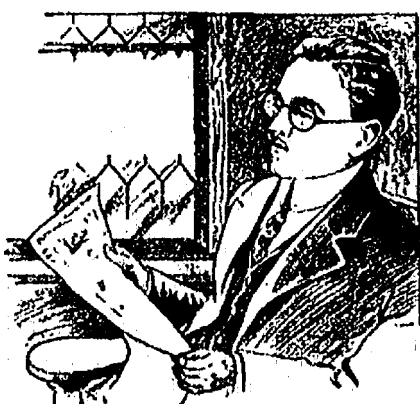

Today the world's greatest motor manufacturer—and mentioned as a Presidential possibility, his words of encouragement to those who want to succeed are:

"Study intelligent spending. Therein lies the secret of successful saving. The buyer who studies the value received for the dollar handed out is the thrifty citizen who always owns a saving account. His dollars are available for wise investment. He is in position to grasp opportunity whenever it appears—all of which leads to financial success and independence."

To form connection with this established banking organization puts you in position to take advantage of unusual and sound investment opportunities.

Kempf Commercial and Savings Bank

Founded 1876

Comfortable as an Old Slipper

Whether or not you approve of shell spectacles for other occasions you will certainly find them mighty comfortable to slip on evenings in the seclusion of your own home. The frames are light and smooth and the broad surfaces give adequate protection to nose and ears.

You will find here an excellent assortment of styles and sizes. There are styles with straight sides that are particularly popular with ladies, as it is not necessary to disarrange the hair in slipping them on or off.

Your present lenses can be duplicated for insertion in a pair of these shell frames.

EAGLE PENCIL COMPANY, NEW YORK

SUCCESS SECRET IS PLAN OF TOUR

Car Should Be Thoroughly
Cleaned and Careful Inspec-
tion Made of the Brakes.

By ERWIN GRUBER, President Greer
College of Automotive Engineering,
Chicago, Illinois.

The secret of success is to plan your
tour—not only where you are going,
but what you need to insure that you
go at all. First of all, there is the
car to be gone all over, and if you are
to do any real touring you need a real
car to do it in.

Naturally, the car should be thor-
oughly cleaned before going on a tour;
this means not only the parts which
show, but the working parts under-
neath, particularly the foot and hand
brakes. The transmission and differ-
ential gear cases should be drained,
washed out with kerosene and have
fresh lubricant. Grease cups and lub-
ricators need refilling, steering gear the
same, cleaning needed and every work-
ing part should be inspected for wear
while being lubricated. Clean the
crankcase and run kerosene through
the lubricating system, draining this
off and put in fresh oil.

Make sure that your fire extinguish-
er—a real one—is filled and in work-
ing order. It is good to empty them
once in a while and test by filling with
water and pumping it through, drying
and refilling with the carbon tetrach-
loride preparation. You will not
need the extinguisher often; when you
do it is worth the price of the car.

Needed for Emergency.
Some of the things you need to take
along for emergency, in addition to
what has been previously suggested,
are:

- Set of ignition brushes, boxed and in-
boxed.
- Tow rope.
- Jack and handle and two blocks of
wood to rest jack on.
- Box of plungers for tube valves.
- Three-in-one valve tool.
- Pressure gauge.
- Wrench for interrupter points.
- File for cleaning the points.
- Hydrometer or voltmeter for testing
storage battery.
- Oil squirt can filled.
- Box of assorted nuts, assorted con-
sorews, lock washers and cotter pins.
- Spool of copper and one of soft
wire.
- Extra set of electric light bulbs.
- Glass waste or sump.
- Set of fuses, if used on car.
- Folding canvas pad.
- Full set of tire chains and chain tool.
- Extra cross links.

Regular Tools for Car.

Most of these things should be
boxed and labeled, as they will be so-
lomon used. Naturally pliers of one or
two sizes, a small hammer, wrenches
to fit car nuts, a cold chisel or two,
tools for tire removing and engine
valve removing and the regular tools
used about the car should be in the
tool box and your particular fancy may
suggest other equipment.

Always carry an extra gallon of oil,
and unless there is a reserve gasoline
tank on the car, take a gallon can of
gasoline.

This will get you to a gas station.
Remember that morning and evening
in high altitudes, especially, or stormy
days, call for added wraps. Carry
sweaters, raincoats and rubbers. It
might be necessary to change tires in
the mud, if nothing else.

REMOVE LITTLE TAR SPECKS

Immediate Washing Will Do Much to
Eliminate Spots From Body
Surface of Car.

If a car is driven at a rapid rate on
a freshly tarred road tiny particles of
tarry road oil are thrown forward by
the front wheels and caught by the body
as the car moves ahead. Immediate
washing will do much to eliminate
these little specks of tar from the
body surface, but where this does not
suffice it is worth remembering that
there are some excellent tar-remov-
ing compounds on the market, and
your garage or accessory dealer should
have one which he can honestly recom-
mend.

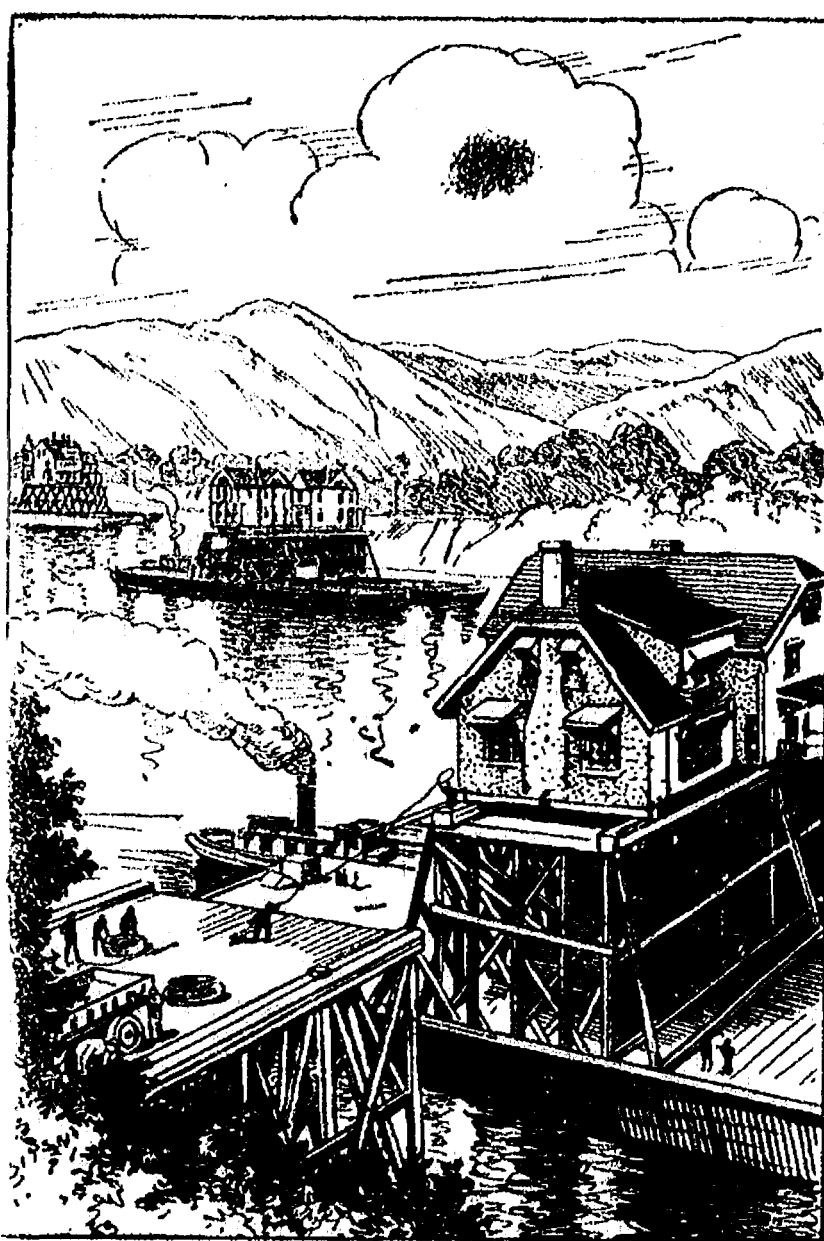

If Amundsen got lost in the Arctic
he could show a bottle and all his
friends would be right there.

A good cook should look on the
bright side and make the best of
things.

A salesman has plenty of wind. It
is the trade wind.

What the World Is Doing

AS SEEN BY POPULAR MECHANICS MAGAZINE

HOUSES MOVED OVER RIVER MOUNTED ON BARGES

A making room for a new state capital, 12 houses were moved across the Kanawha
river at Charleston, West Virginia. Each with the alternative of wrecking their homes
or rebuilding somewhere else, or of transporting them to sites on the opposite side of
a river, the owners chose the latter. Lashed securely to heavy timber frames, 40 feet high,
to avoid the necessity of lifting them up an embankment, the dwellings, some of which
were large, two-story structures, were safely carried on great barges and finally set down
on their new locations.

Sow Hawaiian Fig Grove in Airplanes

Sowing seeds is one of the latest
tricks that United States army fliers
have been asked to perform. When the
Department of Agriculture recently was
asked to plant a number of barren air-
planes with fig trees, it was found
that the work would require months of
time in places that were almost im-
possible. Two planes with four air-
men each, assigned the task and planted the
seeds in less than three hours.

Kind Rare U.S. Stamp in It

One of the rarest of early United States
stamps recently was discovered in a
letter which has been hidden for more than
75 years. It is valued at \$7,500. Mar-
tinsburg in 1845, when James
Buchanan was postmaster, it pre-
sented government issues of 5 and 10-cent stamps.
So far as known, there are only six spec-
imens of this issue in existence, and at
Paris last year one of these stamps
was bought for \$5,000 by an American.
The stamp found in Italy is said to be dis-
tinguished from all other known ones
because it shows all of the four outer
border lines.

Lubricating Tight Windows

A better method than planing down the
guide strips to make tight-fitting windows
open and close easily, is to use a suitable
lubricant on the guides. An excellent solu-
tion for the purpose is a mixture of
paraffin and turpentine. Dissolve a
much paraffin in turpentine as possible
by shaking the paraffin and allowing the
mixture to stand for a few days. Apply
the solution liberally to the window guide
with a brush, going over them two or
three times. The turpentine will evapo-
rate and leave a colorless film of paraffin
on the guides. After this treatment the win-
dows will slide freely, regardless of weather
conditions.

A kerosene heater of the common type
can readily be converted into a "servant's"
gas heater. Remove the oil receptacle at
the back, and fasten a circular stove-
burner in position with wire. The
burner can be purchased at small cost, and
furnishes considerable heat.

COASTING TURN IS BEST

The advice that the safest
way to turn a corner when the
streets are wet and slippery is
to throw out the clutch and
coast is frequently given, but
seldom explained.

When the rear wheels are un-
der power and turning a corner,
the outer one receives the bulk
of the power from the engine
and travels faster. This offers
a tendency to swing the back of
the car in the direction of the
faster moving wheels—or a ten-
dency to skid.

The brakes should not be used
in turning a corner, as any un-
even adjustment encourages the
wheels to skid, particularly as
the wheels are revolving at vary-
ing speeds. Use the brakes to
slow up before starting the turn,
and then coast.

Two aviators, who hopped off from
Milwaukee in the first attempt to fly
across Lake Michigan in a land plane,
successfully completed the trip, ac-
cording to reports issued. The aero-
plane landed at Holland, 57 minutes
after it had left Milwaukee.

Petitions in the village and town-
ship of Erie for the purpose of rais-
ing funds with which to purchase fire
equipment, have been circulated. As
soon as sufficient funds have been
obtained a permanent organization
will be formed.

A building box of at least 100 Amer-
ican Legion men of the eighth and
tenth districts of Saginaw will join
in the erection of a big bunk house
at the legion camp, Higgins Lake.

Charles J. Doland, Secretary of
State, has suspended the licenses of
20 Detroit motorists. Licenses of 11
drivers from other sections of the
state were also suspended.

About 200 delegates attended the
annual state convention of the An-
cient order of Hibernians and its
auxiliary at Grand Rapids.

Announcement has been made at
Detroit that the Interstate Commerce
commission has been asked by Penn-
sylvania railroad company for author-
ity to lease the railroad and property
of the Pennsylvania-Detroit railroad
company for a period of 999 years.

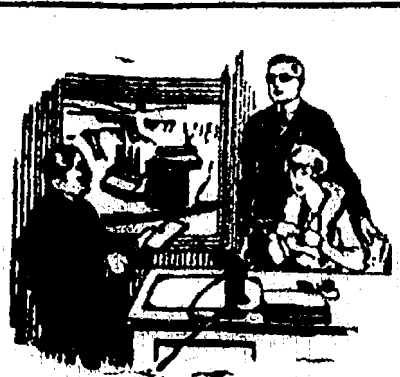

Three thousand youths, between
the ages of 16 and 24 years, from
Michigan, Wisconsin and Illinois,
have arrived at Camp Custer, where
they will remain until September 1,
receiving military training.

More than a mile of joint state, city
and county paving has been opened
here, affording pavement through
Traverse City from every entrance.
The paving is at the west approach
to the city from M-22.

Emmett Dalton, the last of "The
Dalton Boys," train robbers and al-
l-around desperadoes who terrorized
the Southwest 30 years ago or more,
has come to Battle Creek to complete
his reformation by having surgeons
remove from his body the bullets he
has been carrying as souvenirs of his
last stand against law and order in
1892.

Nineteen members of the 8th Mich-
igan Infantry was all that attended
their 53d annual reunion at Lansing.
There are only 60 men living of the
1,200 who enlisted for the Civil War
in 1861. The average age of those
attending the reunion is 80½ years.
The oldest is William R. Gollier, of
Hart, who is 86.

Chats With Your Gas Man

A gas bill containing only the nec-
essary readings and the total of the
amount due, doesn't tell half the
story of service rendered. One of
our customers suggested the other
day that his bill for last month
should have mentioned the fol-
lowing items:

- "To carrying out ashes for one
month.
- "To carrying in coal and kindling
for one month.
- "To curtain washing, cleaning of
woodwork and upholstery for
one month.
- "To eliminating several thousand
useless steps in the kitchen.
- "To saving baby's life when she
became suddenly ill in the night
and it was necessary to heat
water quickly.
- "To all services rendered as above
\$8.00."

If it were possible for this com-
pany to render individual bills
based on definite services per-
formed, we would be the most
popular company in the world.

Punchettes

CRADLE OF RED

The Reds are all evolutionists.
Evolution has given them their
program and method. They got their
incentive of practical evolution from
Karl Marx, who got it from Haeckel,
who got it from Spinoza, who got it
from the Greek philosophers, who
got it from the Egyptian priestcraft,
who got it from the Babylonian
priestcraft, who taught the trans-
migration of souls and the transmu-
tation of specie.

The Reds believe that all who
preach and teach evolution are
working for the world wide cause
of the Reds. They laugh at the
rich and watch them pay. They
know if evolution, and collectivism
are taught in all grades of our
schools that the masses will become
Reds and will rise up and take pos-
session of all property and natural
resources. The end of a road tells
you where it ends.

Whenever you proclaim that the
state is everything and the indi-
vidual is nothing you have deter-
mined on a program of collec-
tion.

When you say that man's origin
is in the lower elements of life,
you thereby repudiate the sover-
eignty of God and His creative
hand, and you have licensed the
world to do as it pleases. If man
is not the creature of the creative
hand of Almighty God, then, re-
sponsibility and accountability are
gone. If you destroy man's account-
ability to God, you destroy disci-
pline in government, wreck society,
and perpetuate an orgy of crime
and death.

The rationalist in the church and
the red radical in the economic
world are twin brothers. They had
their origin in the same bed of in-
famous paganism and their com-
mon destiny is hell.

George Drake, 48 years old, a car-
penter, was killed instantly when he
fell on his head from the roof of the
new barn on the Smith Guy farm
near Blanchard.

Miss Virsel Roe, of Franklin, Ind.,
has been appointed assistant pro-
fessor of economics at Hilldale col-
lege. Miss Roe received the degree
bachelor of arts from Franklin col-
lege in 1919, being graduated with
honors in her major subject, mathe-
matics, and "cum laude" in course.

We Want to Talk to Every Prospect Who Plans to Pay More Than \$500 for a Car

We want to tell you something
about the Studebaker Light-Six
Touring Car. Want you to examine
it—and to drive it.

Stop in and let us prove what a
vast difference there is between the
Light-Six and other cars at about the
same price—or between the Light-
Six and cars of other makes costing
several hundred dollars more.

To be able to buy a Six, practically
free from vibration, for less than
\$1,000 is an opportunity not dupli-
cated anywhere in the world. Elim-
ination of vibration adds immeasur-
ably to the life of the motor. It is
one of the reasons for the universal
high resale value of the Light-Six.

The Touring Car body is all-steel,
—even to its framework. Seat cush-
ions—of genuine leather—are ten-

inches deep and are placed at the
most restful angle.

The one-piece windshield is hand-
some and practical because it gives
unobstructed view of the road ahead
and is rain-proof. The quick-action
cowl ventilator and the parking lights
are but indications of the quality and
completeness of the appointments.

No other make of car ever built,
by anyone, at any price, represents
so great a dollar-for-dollar value as
the Light-Six Touring Car. The sav-
ings resulting from large volume,
complete manufacture and the fact
that Studebaker's overhead is shared
by three distinct models make pos-
sible its low price and high value.

The Light-Six upholds Stude-
baker's 71-year reputation for honest
value.

Power to satisfy the most exacting owner

In the Realm of Society

Wagner—Acker
Announcement of the marriage of Miss Evelyn M. Acker and Reuben A. Wagner has been made recently. The couple were quietly married in Ann Arbor, May, 25. Mrs. Wagner is the daughter of Mr. and Mrs. John Acker of Port Huron, formerly of Chelsea. Mr. Wagner is the son of Mrs. George Wagner of Ann Arbor.

Kyle Reunion
The Kyle family reunion was held Sunday, August 12th at the home of Mr. and Mrs. Raymond Kyle in McKinley street. Those present were Mr. and Mrs. Frank Harwood and Mr. and Mrs. Walter Gross of Saline, Mr. and Mrs. Charles Foster and children and Mr. and Mrs. Joseph Sibley. A picnic dinner was served and a social time enjoyed.

Bake Sale
The Young Ladies Chapter of the Congregational church will hold a bake sale, Saturday, August 18th at the Holmes and Walker Hardware store, at 2 o'clock.

Attend Reunion
Mr. Robert Foster and daughter Lillian left Sunday for Owosso and Wednesday they attended the Hoover family reunion held at Banister. From there they went to Mt. Pleasant to visit relatives for some time.

Entertains at Five Hundred.
Mrs. H. W. Schmidt entertained several of her friends Tuesday afternoon. The afternoon was spent in playing five hundred. Delicious refreshments were served by the hostess.

Young Ladies Chapter
The Young Ladies Chapter of the First Congregational church was entertained Tuesday evening, August 7 at the home of Mrs. H. Knickerbocker. Mrs. Knickerbocker was assisted by Mrs. E. Freymouth. A delicious basket supper was served at 7 o'clock. It was decided to have a bake sale Saturday, August 11th, at the Holmes & Walker store. The evening was pleasantly spent in needlework.

Frank Staffan returned the last of the week from a three weeks visit at Sistraville, W. Va.

Hot Weather Diseases.
Disorders of the bowels are extremely dangerous, particularly during the hot weather of the summer months, and in order to protect yourself and family against a sudden attack, get a bottle of Chamberlain's Colic and Diarrhoea Remedy. It can be depended upon. Many have testified to its usefulness.

Entertains Friends
Mrs. Elizabeth Wackonhut pleasantly entertained a group of friends and former neighbors from Jackson at her home Wednesday. The following guests partook of the delicious dinner that was served at noon. Mrs. D. O. Stringham and daughter, Dorothy, Mrs. M. Rowley, Mrs. W. Killigan, Mrs. G. Sillor and daughters, Pauline and Janet, Mrs. E. Bigalko and Miss Carlene Evans. The day quickly passed in taking pictures and in visiting with so many of the old friends.

W. R. C. Meeting
Regular meeting of the W. R. C. will be held Tuesday afternoon at 3 o'clock. Initiation will take place. A large attendance is requested.

A Daughter.
Mr. and Mrs. George Bacon of Albany, New York, are the parents of a son, George Samuel, born Saturday, August 11, 1923.

Trolz Reunion.
The third Trolz family reunion was held at Snider's Grove, Pleasant Lake, Wednesday, August 15, with about forty people in attendance. Guests were present from Jackson, Grass Lake, Iron Creek, Manchester and Chelsea. A delicious dinner was served in the grove. A pleasing program and a pleasant social time made the day memorable. A business meeting was held later which resulted in the following being elected: President, Irving Kuhl of Iron Creek; vice pres., Mrs. Irving Kuhl of Iron Creek; secretary, Mrs. Will Dresselhaus of Iron Creek; treasurer, Mrs. George Alber of Sharon.

S. P. I. Party

Prof. Clark and wife spent Thursday in Ann Arbor.

Mr. and Mrs. Rose were Ann Arbor visitors Thursday.

Miss Helena Steinbach of Cleveland, Ohio, is spending the weekend at the home of her mother, Mrs. Charles Steinbach.

Same Old Story But a Good One.
Mrs. Mahala Burns, Savanna, Mo., relates an experience, the like of which has happened in almost every neighborhood in this country, and has been told and related by thousands of others, as follows: "I used a bottle of Chamberlain's Colic and Diarrhoea Remedy about nine years ago and it cured me of flux (dysentery). I had another attack of the same complaint three or four years ago and a few doses of this remedy cured me. I have recommended it to dozens of people since I first used it and shall continue to do so for I know it is a quick and positive cure for bowel troubles."

Forty people saw a man rob a Los Angeles bank, so they may have thought it was the landlord collecting the rent.

In spite of the fact that 1923 has 53 of those blue Mondays, so far it has not been so bad.

Everybody thinks everybody is getting worse, but everybody always has thought that.

Aviation has its ups and downs.

"COLD IN THE HEAD"

Is an acute attack of Nasal Catarrh. Those subject to frequent "colds in the head" will find that the use of HALL'S CATARRH MEDICINE will build up the system and render them less liable to colds. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh. HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions. All Druggists. Circulars free. E. J. Cheney & Co., Toledo, Ohio.

Puts Seed and Fertilizer at Bottom of Furrows

Absolutely uniform depth of planting, which results in all the grain coming up evenly and ready for harvest at one time—also even distribution of fertilizer—that is what you get when you use the

JOHN DEERE VAN BRUNT FERTILIZER GRAIN DRILL

You are assured of uniform depth of planting by the Van Brunt closed-delivery type of single-disc furrow opener. Metal seed tubes and closed-delivery disc boots conduct seed to the bottom of furrows of uniform depth and there cover it. You have accurate control of both grain and fertilizer—the patented Van Brunt adjustable gate force-feed handles any size seed, from alfalfa to beans, without crushing or damaging the seed, and without clogging up in the grain box. An even, continuous stream of seed is forced out of the grain box at all times, and when you regulate one feed opening, you adjust them all equally. Finger-type plates insure positive handling of fertilizer.

Save extra labor and seed and increase your crop yield by buying a Van Brunt Fertilizer Drill from us.
