FIVE PER CENT PAYING COST ASSESSED TO TOWNSHIP

State Will Pay \$15,600 Toward South
Main Street Improvements Abat-
ting Property \$1040.

A representative from the state highway department was in Chelsea Tuesday afternoon and a review of the assessment of the South Main street pavement was held in the Sylvan town hall. The assessment covers the twenty-foot wide strip in the center of the street from the south line of the D. U. R. to the intersection of M-17.

Eight property owners were present. The assessment, which reaches a total of \$20,800, as made by the state road department, will be as follows: The township of Sylvan at large, 5 per cent; abutting property owners, 5 per cent; Washtenaw county, 15 per cent; and the state of Michigan, 75 per cent of the cost of the paved district.

At this meeting the state road department representative also settled the very much disputed south boundary line of the village of Chelsea.

According to the charter of Chelsea on file in the Auditor General's office at Lansing, it shows the south boundary line is the north fence between the farm of Misses Mary and Anna Pierce and the south line of the residence of Adam Alber.

The couple were attended by Mr. and Mrs. O. H. Fenn of Michigan Center and the ceremony was witnessed by the immediate relatives and friends of the young couple.

Following the church service a wedding breakfast was served at the home of the bride's parents to the near relatives of the newly married couple.

The couple will make their home in Grass Lake, where the bridegroom is employed in his father's store.

To this union was born 10 children, Bens, Michael, Henry, John, Samuel, Jacob, Mary, Martha, David, Adam. One son, John, passed away in 1918, one daughter, Martha, died in infancy. STARTS SUIT AGAINST COUNTY AS RESULT OF ACCIDENT

Suit has been started in circuit court at Ann Arbor by Rudolph Schuler of Sturgis against Washtenaw county for \$2,000 damage for injuries said to have been sustained by Schuler's wife in an automobile accident a year ago on M-17 about seven miles west of Ann Arbor.

Schuler sets up in his declaration, filed by J. Paul Watt of Sturgis, his attorney, that while he was driving west on M-17 about 9 o'clock—the evening of August 16, 1924, his car collided with a tar wagon standing on the traveled portion of the highway. He alleges that his wife was riding with him in the front seat of his car was injured and that his automobile was badly damaged.

"ZOWIE" IS PACKED WITH BIG THRILLS

Thrilling Stereoscopic Film Makes Big Hit.

Motion picture devotees will no doubt welcome the news that Pathe is to release four new third dimension films. The first, "Zowie", will be shown Wednesday and Thursday, May 10 and 11, in addition to the program of pictures at the Princess Theatre, and the others will follow at intervals of about eight weeks.

These novel and interesting films give the effect of depth and perspective to the characters and objects on the screen. The pictures made by the Ives-Leventhal process are unique in this respect. They are the result of many years of study and experiment. As everyone knows, an ordinary picture projected upon the screen gives perfect results in two dimensions, but the third dimension, that of depth, is lacking.

The old fashioned stereoscope solved the difficulty with a still picture, but this method was found to be impossible when applied to motion pictures. It remained for the Ives-Leventhal Company to successfully produce a film that, when viewed through a pair of red and blue spectacles, gives the effect of perspective to the characters and objects on a motion picture screen.

This series of four which is being released by Pathe shows this process developed to its highest form. Not only do the people on the screen seem to be real and life-like, but they seem to jump out of the screen into one's face. Needless to say, when this happens unexpectedly the effect is thrilling in the extreme. The illusions are so perfect that the various climaxes fairly hit you out of your seat.

These delightful pictures are to be recommended not only for their unique and puzzling novelty, but also for their thrilling entertainment.

NOTICE

Members of the Maple Grove cemetery association of Sylvan Center, are asked to respond to a "bee" to build a new fence along the north side of the cemetery, on Tuesday, June 9, all day.

Knows How to Fish

The kingfisher and great blue heron are both solitary fishers of the coastal waters, both knowing the art of fishing quietly, says Nature Magazine. The kingfisher has his regular watch towers above the marginal waters, and with his arrow-shaped body and strong wings he is equipped like a professional fisherman.

Shells

Lac is a resinous substance exuded from an East Indian scale insect. It consists of a granular substance forming cells for the shelter of the eggs of the insect and incrusting the twigs of various East Indian trees. The females are embedded in the mass and certain parts of their bodies contain a red fluid, furnishing crimson and arial dyes, which are dissolved out of the stick or "seedlac," leaving the shells of commerce.

Tune of Norse Origin

The tune of "London Bridge Is Falling Down" is said to be a translation of an old Norse song.

Disappearing Islands

There have been various instances of islands disappearing through volcanic action or through erosion. One of the principal examples of the former is Graham Island (Fordisland). In the Mediterranean, which was thrown up a height of 200 feet with a circumference of three miles in 1831. It soon disappeared, however.

Whalebone

The most valuable whalebone commercially is that of the right whale, especially that of the bowhead, which may have a length of from 10 to 12 feet, and is very flexible. A single bowhead yields 2,000 pounds of whalebone, valued at from \$5 to \$7 a pound.

Squirrel Changes Coat

On the Pacific coast the chickadee is a slight-of-hand artist in the matter of clothes. He changes with the climate, says Nature Magazine. In the humid heavily wooded region bordering the Pacific he wears a coat that is rich, dark brown, but underneath it changes to a beautiful orange-tone.

Editorial**BUSINESS MEN IN POLITICS**

As long as we continue to needlessly and unjustly criticize men in public office we cannot hope to attract to public service men of sufficient caliber and acumen to conduct the nation's business on a plane that will bring the greatest good to the greatest number. Unfair criticism and heckling of public officials should be made just as taboo in this country as muckraking has become. Every good business man hesitates to enter public life, knowing that his personal and private affairs will be held up to merciless ridicule and scorn, nor can we blame him. Public service means personal sacrifice. There are many men today who are giving their best efforts to the government who are sacrificing their income, their leisure and drawing heavily on themselves both physically and mentally. We have often advised business men to go into political life. We urge again the desirability of such action. They should become leaders not only in business but in the political life of the country. But they should realize first of all that in entering politics they will be met with criticism and ingratitude from a few, but gradually this will pass away and they will be given the praise and gratitude they are deserving. We must, ourselves, first learn the lesson that we cannot hope to have business men in office unless we are willing to treat them as we do in our business relations with them.

AIR FREIGHT LINES

A company headed by Howard E. Coffin, automobile manufacturer of Detroit, with authorized capital of one billion dollars was formed in Detroit to put an air freight line from New York to Chicago. This line will carry valuable parcels of express between New York and Chicago and expects to take over the mail air contracts on July first.

It is announced that no passengers will be carried in the beginning, but that passengers will be carried when they perfect safety of flying has been demonstrated in carrying freight and mail.

The promoters of the enterprise seem very interested in stating that neither Henry nor Edsel Ford are in the company, and for this reason it is believed the chief purpose of the company is to forestall the Fords in their endeavor to organize and promote air freight routes.

TO FIGHT EIGHT MILES UP

England is experimenting with an all-metal war plane in which they expect to send fighters 8 miles in the air to fight in her next war. Fighters will be encased in armor suits fitted with oxygen and will release death rays that will kill at a distance of thirty miles, or melt the metal of airplanes at great distances, if we are to believe stories that are being written about warplane development by Great Britain.

Enough is known to warrant the statement that all European countries are in the race to develop war planes of a wide flying range, which will carry heavy burdens of high explosives—planes which will make the frightfulness of the world war appear as a child's picnic by comparison.

HUNGARIANS WANT REPUBLIC

Recently Count Karolyi of Hungary came to this country, but before the State Department in Washington would permit him to land on American soil he was compelled to give a pledge that he would not discuss his country or its politics in any manner. This muzzling of Count Karolyi excited widespread comment on the part of American newspapers which argued that it was an executive order overruling the constitutional rights of free speech.

On Sunday the American party for a Republic in Hungary, held a meeting at 1891 Second Avenue, New York City. In the meeting more than 100 delegates representing 11 states of the American Union attended. They say there are 3,000,000 Hungarians in America, and the convention declared in favor of a campaign in this country to create sentiment which would destroy the Horthy government in Hungary and set up a Republic instead.

This appears infinitely worse as affecting the peace of a free country than anything Count Karolyi could have possibly said or done. It will be interesting to see what Washington will say or do in the premises.

MONKEY GLANDS ARE BUNK

Dr. J. B. Collip of Edmonton, Canada, discussing the use of monkey glands, at the meeting of the American medical association at Atlantic City, said that the rejuvenating properties credited to the monkey, goat and black oxen glands are all bunk. He declared that they had no such power, but that glands may be developed as a remedy for epilepsy, convulsions, and similar ailments.

This will be good news to the chimpanzees, and likewise may cheer the homely billy goat.

DEBTOR STATES ARE JOLTED

Washington has permitted the press to make known, that the tightening of American determination to have our war debts from European countries settled by some sort of agreement.

Jugoslavia is the only exception made. The charge is made that debtor countries have not kept their agreement to take care of obligations to the United States as early as any other of their obligations.

A direct charge is made that Belgium has paid England some \$40,000,000 on her indebtedness to that country and has made no effort to pay anything to this country. Again the note is sounded that France is not creating a good impression at Washington, and references are made to her failure to try to pay even the interest on her indebtedness.

TO BREED FOXES

A school for fox-breeding has been established at Northeast, Pa., to foster the breeding of foxes for their fur. This is the first school of its kind in the world, and with the price of fur runs as high as they are now and are likely to be, it ought to be a profitable line.

MONKEYS AND MEN

Professor John Thomas Scopes, high school teacher at Dayton, Tenn., who is charged with violating the Tennessee law in teaching the rudiments of evolution has been arrested and indicted charging that he, in violation of Tennessee law, taught the theory "that denies the history of the Divine origin of man as taught in the Bible, and taught instead that man is descended from a lower order of animals."

Clarence Darrow, eminent criminal attorney, of Chicago, and Dudley Field Malone, of New York, have volunteered to defend him, and the most sensational trial of the year is expected.

KING WOULD QUIT

King Boris of Bulgaria has sent an ultimatum to Premier T. Sankoff to the effect that he will abdicate, if the premier does not resign. Kings do not seem to have the power they once possessed anywhere in the world.

In the old days, King Boris would have assisted an undesirable premier from office on the top of the king's boot.

WORKING GIRLS' HOTEL

The Henry Phillips Estates are building a hotel for working girls at 66th street and First Ave., New York, to cost \$3,500,000. The hotel is planned to give working girls a room and seven dinners for from \$10 to \$14 a week. Sunday dinner is to be the only mid-day meal. The hotel promoters are obviously planning to entertain girls who receive more than five and ten cent store salaries.

SENATORS OPPOSE DISTINCTION

Senators in Washington are reported to be somewhat exercised over the intimation from the White House that there may be a distinction between the debts European countries owe America, whether such debts were contracted during the war, or after the war. Mr. Coolidge is reported to favor, in the case of Belgium at least, the policy of being more lenient in collecting interest and debts incurred during the World War than on those incurred after the end of the war.

BUSINESS PROSPECTS

Following a survey made of ten thousand of the leading industrial institutions of the country, the statement is made that business prospects for the summer are healthier and on a more stable basis than they have been since the close of the war. The survey, which covered practically every industry, revealed that production is at a healthy glow, wages are on the gain, with gradually reducing prices. Price variations are less severe than a year ago and the country is entering a period of purchasing, not of boom proportions, but of that steady persistence that gives basis for unusual confidence.

TO DESTROY RIFES

France is determined, it is reported, to destroy the power of Abd-El-Krim in Northern Morocco. The charge is made that Premier Poincare-financed the Rifis and helped them to make war against Spain. The Socialist making this charge opposed the use of French soldiers in battling the Rifis or the use of the French arms and war material in crushing the Moroccans.

BONUS AIDS WIDOWS

Every American ought to feel a thrill of pride in the knowledge that the bonus not only helped our veterans of the world war, but that it is now helping the widows of the veterans as well.

Veterans of the world war are reported by Washington authorities to be dying at the rate of fifty a day. The average value of insurance policies of veterans is \$1000 under the bonus.

AIR MAIL FOR SOUTH AMERICA
Postmaster-General New has approved the plan for the transportation of mail from points in South America to Key West, Fla., by air planes.

The Postmaster-General made it plain that no contracts for carrying air mail would be given to any foreign corporation; that mail contracts would be used to foster airplane development in America.

BREVITIES.

Stephensbridge—The dates for the chautauque to be held in this village this year have been set for July 9 to 13, inclusive.

Clinton—The graduating exercises of the Clinton high school will be held on Thursday evening, June 11, in the Congregational church. The class consists of sixteen members.

Fowlerville—The Livingston County Association of the O. E. S. will hold its annual meeting Tuesday, June 9, 1925, in the Masonic hall with afternoon and evening session.—Review.

Grass Lake—There are thirteen graduates from our public school this year, their names are as follows: Misses Laura Mallon, Marcella Capen, Mattie Cutler, Florence Walker, Lois Snyder, Gladys Treadwell, Eleanor McGee, Ruth Strahle, Harlan Shelly, Norman Wolfe, Irwin Kappler, Harold Campbell and Hobart Rowe.—News.

Clinton—The State Highway Department gang started pouring cement west of town Tuesday, and are now working between the two bridges. The bridge over the race is now completed and the work on the road is expected to progress rapidly. The two mixers in the vicinity of Wolf lake have laid about a mile and a half of paving.—Local.

Ann Arbor—Michigan's university at Ann Arbor stands second among state universities in value of its property and equipment, it having a valuation of \$2,339,160 in grounds, \$9,396,055 in buildings, and \$5,013,158 in apparatus and furniture, a total of \$16,748,373. California's university has an endowment of \$2,300,725.

Milan—As has been the custom for the past several years, the Milan Chamber of Commerce will again this year provide entertainment one evening a week for the general public. This was the action taken last Friday night at the regular meeting of the organization held at the M. E. church. The summer entertainments will begin early in June and will be scheduled each Thursday night.—Leader.

Brooklyn—C. H. Rothfuss reports that at intervals the past week he has seen a faun deer with his dairy herd which is pastured north of the lake. The faun usually sticks to the cover but has several times come up near the barn yard when the cows came at night. A full grown deer was once shot in that locality by Jas. Moore. That was a dozen years ago. Nobody seems to be able to figure out where the faun came from and all wonder if there are larger deer in the brush.—Exponent.

Manchester—The change in the road north of town reminds us of what was told the Enterprise some 50 years ago about the laying out of the road by the early settlers. It will be remembered that the road is on the line dividing the townships of Manchester and Sharon. Officers of the two townships had agreed to meet and lay out the road but when the day arrived Manchester was not represented and the Sharon folks put the road wholly inside the Sharon line.—Enterprise.

Ypellanti—The farm home of Horace Array southeast of Tuttle Hill, burned early last Thursday morning, starting from a defective chimney, it is thought. The furniture was saved and Mr. Array, who has been bedridden for three years, was taken to safety across to the home of Nelson Sweet. The man working on the farm had arisen and started a fire in the range before leaving the house and Mrs. Array was getting breakfast when the fire was discovered in the upper part of the house. The farm home was burned down once before and rebuilt on the same lines by Mrs. Array's father, Mr. Price. It was known as the Price farm.

Eaton Rapids—The Knights of Columbus have donated \$16,000 to the V. P. W. National Home, and will erect a cottage there. The Michigan cottage is now in the course of construction, but has not as yet been named. Corey Spencer was in Detroit recently and conferred with Adjutant General Sawson to arrange for a survey of the grounds, so as to add cottages as fast as possible, as there are several hundred orphan children of ex-service men who are waiting to be admitted to the Home. The latest gift to the home is a beautiful silk flag, valued at about four hundred dollars. A silver plate bearing an inscription, states the flag was presented by Mrs. Charles Augustine Robinson, National Flag Lady, V. F. W.—Review.

Statistics show that 90 per cent of the men, at the age of 60, are broke—because they did not save.

Here is what you can do by saving one-fifth of your pay.

In 20 years you can support yourself for 8 years without working—

In 25 years,—11 years without working—

In 30 years,—15 years without working,—and live as you are now living.

Is not that worth the effort?

The time to start is on your next pay-day.

You will never, never regret it.

Insects and Scientists

Scientists are making a special
study of animal and insect life as a
means of determining changes which
have taken place in the earth. The re-
lations insects of one region bear to
those of another indicate that certain
islands were once connected.

In Jamaica, recently, they explored a
very ancient section of that country
that has been above the sea for a long
time than its neighboring land, and
which shelters insect tribes of great
age. This discovery leads authorities
to believe that animal life of that isle
is more closely associated with those
of Haiti or Cuba, and that it origi-
nally found its way from the mainland
over a land bridge long since engulfed
by the ocean.—Family Herald.

Gas From Flower Gardens

The great development of natural
gas in the industries around Pitts-
burgh, Pa., is in a considerable mea-
sure due to George Westinghouse of
airbrake fame. He finally induced his
wife to let him sink a shaft in her
flower garden; his labor being reward-
ed by a geyser when he had gone
about 1,800 feet. From this came the
development of the Pittsburgh supply.
Westinghouse himself worked out the
system of piping that enabled it to be
distributed without leakage, at the
same time reducing the pressure by
the use of gradually larger pipes, until
it could be safely handled by the time
it reached a customer.

Church Authority Runs
Along National Lines

Authority in the eastern orthodox
churches is divided along national
lines. There is a Russian church,
a Rumanian church, a Greek church
and so on, with primates, metropolitans
and patriarchs of their own nationality
at the head of each.

Four offices to which a great in-
fluence extends throughout the east-
ern churches; though his authority
does not.

But the Russian church, for instance,
is a sister church to that of Constan-
tinople and not at all a subsidiary.
Nor is this a result of recent events
in Russia, the autonomy of the Rus-
sian orthodox faith dating to 1721.

Under the czar this was the es-
tablished church. Soviet Russia has
disestablished it and appropriated cer-
tain of its properties, and the govern-
ment policy includes a propaganda
against all religion. But any faith
whatever may be freely professed in
Russia, so far as Soviet law is con-
cerned.—Cleveland Plain Dealer.

Moravian Church Has
School in Far North

At Makovik, in the ice-bound pas-
sage of the North American continent
known as Labrador, a country where
one may travel hundreds of miles with-
out seeing a human habitation, and
where the temperature in winter is
often 60 degrees below zero, there is
a boarding school kept by two Eng-
lishwomen.

It is under the control of the Mor-
avian church; and is one of the most
remarkable as well as the least ac-
cessible schools in the world. A mis-
sion steamer goes out once a year with
goods for the Eskimos, and on her last
trip along the coast prior to her re-
turn, she takes both Eskimo children
and the few white children available to
the Makovik boarding school.

There they must remain until the
long winter is over, for in such ter-
rible cold, and with no conveyance
but dog-sledges, it is impossible for
children to travel. That they are
happy goes without saying, and with
a gramophone, a piano, and a fine se-
lection of lantern slides, as well as
an excellent library, the children get
not only a good education but also a
good time.

Service Has Many Duties

The United States coast guard
service was created by an act of con-
gress of January 23, 1915, by com-
bining therein the revenue cutter ser-
vice and the life-saving service. Its
duties are to render assistance to ves-
sels in distress, saving life and prop-
erty; destruction or removal of wrecks
and other floating dangers to naviga-
tion; extension of medical aid to Amer-
ican vessels engaged in deep-sea fish-
eries; protection of the customs rev-
enue; operation as a part of the navy
in time of war or when the President
shall so direct; enforcement of laws
and regulations governing anchorage
of vessels in navigable waters, and
quarantine and neutrality; suppress-
ing mutinies on merchant vessels; en-
forcement of navigation and other
laws governing merchant vessels, etc.;
protection of game and seal and other
fisheries in Alaska and work as an in-
ternational ice patrol off Newfoundland.

A close-up photograph of a document, likely a ledger or a form, featuring a grid of horizontal and vertical lines. On the left side, there is a dark, possibly black, rectangular area containing the letters 'Z' and 'or' in a white, sans-serif font. The grid lines are thin and light gray, creating a series of small squares across the page. The overall image has a high-contrast, somewhat grainy appearance, typical of a photocopy or a scan of a physical document.

SCHOOL NEWS

On June the 2nd we were very fortunate in having with us Capt. Holm of the United States army. He gave the school assembly a talk on the Citizen Military Training Camp.

The talk was interesting to both the boys and girls, but the camp is open to boys only, from the ages of 17 to 23. Capt. Holm pointed out the advantage of the camp, also the recreational side of it. The aims of the camp are not to produce soldiers, but to produce men who will be better citizens of this country. The boys are trained in army drills in the forenoon. In the afternoon coaches from the leading universities take charge of the boys and teach them the fundamentals of good athletics. That is good sportsmen.

The combining of the two, produces to the best advantage a make cleaner and better citizen.

Captain Holm was brought here through the influence of Dr. A. A. Palmer.

Wednesday morning the third of the series of programs given by the different grades was given before the high school. The grades represented this week were the ninth and tenth grades with Miss Voght and Miss Sturm directing them. The program was as follows:

Spring Song—High school.
Poem—Jane Jones—Geo. Myers.
Poem—Twenty Years Ago—Fannie.
Poem—Candle Lightin' Time—Gertrude Weinberg.
Vocal Duet—Our Darling Little Willie—Mae Hamp and Dean Rogers.
Declaration—The Rider of the Black Horse—Elwin Hulce.
Poem—Beyond Endurance—Ruth Vogel.
Poem—The Lady of Shallot—Lucy Webb and Louise Pielemeler.
Piano Solo—To a Wild Rose—Grace Brinson.
Poem—Finnigan to Flannigan—Marion Crafts.
Poem—Little Boy Blue—Olivia Seitz.
Poem—Encouragement—Mae Hamp

The program was fine and thoroughly enjoyed by all. It showed hard work on the part of those who participated in it.

CONGREGATIONAL

Hours of worship: Preaching at 10 o'clock. Our church school at 11:15 a. m. No evening service.
The theme, "God's Love for a Sinning World" Let us stop and think for one moment. Does that mean our blessed U. S. A., or has it reference to Europe or some foreign land?
Dear Friends: Is it a square deal for you to neglect the church when you would not live in a community without the church? If the church is the backbone of any community, the center of all our best life, thought and development; the greatest bulwark of private and public conscience; the soul's school for a character; and the giver through its membership of more than 80 per cent, of all charity—is it a square deal for you to let others do all this for you—and carry your dead weight besides?

METHODIST EPISCOPAL
