### Local Men Figure In Auto-Accident Monday

Wm. Kolb and Norbert Merkel narrowly escaped serious injury or possible death Monday morning when Kolb's car, in which they were riding, collided with a car driven by George Volker at the intersection of West Liberty street and the US-12 cut-off west of Ann Arbor.

The Chelsea men, who were enroute to Detroit, noticed the car driven by Volker approaching from the east as they neared the intersection. Having the right-of-way, Kolb, who was driving his car, expected the approaching driver to stop before attempting to cross US-12. However, Volker did not stop, and his car struck the Kolb car broadside. The impact caused the latter car to turn over twice before coming to a standstill, resting on the wheels.

Occupants of both cars miraculously escaped injury, although the cars were badly damaged. The car driven by Volker is the property of his employer, D. E. Kimes, who resides on a farm west of Ann Arbor.

A home made cradle which was made for John Augustus Boyden, the first child to be born in Webster township in 1827, consisted of a hollow button-wood tree, three and a half feet in length with a piece of board fitted to the ends. ## Let Us Be Thankful..

The Pilgrim Fathers endured hardships which we would shudder to face. They lacked nearly all of the conveniences that we now regard as necessities.

Of necessity, they were frugal and thrifty. Yet they set aside a day of Thanksgiving and gave thanks for blessings that we would consider hardships.

How much more should we be thankful! How much easier it should be for us to practice thrift without suffering from inconvenience and want!

Let us truly be thankful!

### Dairy Cow Should Set Her Own Value

Whether a dairy cow is worth more for beef or butter fat is a problem which should be solved by the cow, according to M. S. C. dairy specialists who suggest a method of determining actual value.  
 According to Michigan Dairy Herd Improvement Association records, feed cost amounts to from 50 to 65 per cent of the total cost of keeping a dairy cow for a year. The remaining 35 to 50 per cent of the cost is overhead and includes such items as labor, taxes, depreciation and interest on investment, amounting approximately \$45 per year for a grade cow.  
 The method which has been suggested for determining value is to add the net profit for three years to the value of the cow as a beef animal.  
 Using \$75 as the beef value of the average dairy cow, two examples taken from Dairy Herd Improvement Association records will illustrate the method. A cow which produces 208 pounds of butterfat in a year returned \$59 over the cost of feed. Subtract the overhead from this amount and it would leave \$14 net profit per year, or \$42 net profit for three years. Adding the beef value of \$75 to the three-year net-butterfat profit makes this cow worth \$117.  
 A cow which produced 446 pounds of butterfat per year with a three-year net profit of \$351 would be worth \$426.

Ques.—I wish you would tell me if you can what caused the estrangement between the Pope and Mussolini, the dictator of Italy, and whether or not Mussolini is a Catholic? If he is why has he been so unfriendly to the Vatican?

Ans.—Mussolini has never been unfriendly to the Vatican. He is a Catholic, and while he embraces that faith, he considers his first interests to Italy. The only point at which there was a clash between the Vatican and Mussolini was over Fascistism in the education and training of youth. Control of the child is one of the prime principles of the church, and when the Fascists began the organization of all boys and proceeded to train them to be good Fascists, there was a

Ques.—I would like to ask you this simple question: "Can a cat fish?"

Ans.—No; but a tomato can. Ques.—To settle an argument will you please answer if there was ever a queen of England who never was in that country?

Ans.—The wife of Richard the Lion-Hearted, Queen Berengaria, was never in England. While Richard was taking part of the third crusade in 1190 and while wintering in southern Italy, Berengaria was brought to him and their marriage took place. While Richard was imprisoned off the coast of France, Berengaria lived in Italy, and she died in 1250 without ever having seen England.

KONJOLA FREED THIS MAN OF STOMACH PAINS. Could Not Eat A Meal Without Distress—New Medicine Wins Another Fine Triumph. MR. HENRY GEDDES. "For some time I suffered intense distress from a very disordered stomach," said Mr. Henry Geddes, 1231 Cass Avenue, Grand Rapids, Mich. "Every meal caused suffering and I could not eat a bite of food without having indigestion pains and gas bloating. The food formed a heavy mass in the pit of my stomach and always brought on smothering spells. I found it impossible to get sound refreshing sleep. "Konjola marked a turning point of my health. Day by day the different ailments became less severe and then, like magic, they disappeared. Today I eat what I please, enjoy the food and digest it as nature intends. Sound, refreshing sleep is mine. I owe this all to Konjola and I praise it with all my heart and soul." plled interchangeably with the word "plant," but applied in a more restricted sense to any plant that is used as an article of food, such as corn, peas, onions, cabbage, carrots, potatoes, beets, beans, lettuce, etc., etc. Fruit is a mature ovary of a plant which contains seeds, especially those plants eaten by man and animals. Hence, tomatoes, watermelons, apples, peaches, plums, cherries, etc., etc., are classified as fruit. (2) Many scientists of Europe claim that in pre-historic times man's usual mode of locomotion was on all fours, and that in the series of evolutions that have taken place in the past millions of years he is now quadruped. However, this opinion is not shared by a vast majority of Adam and Eve who maintain that people to inhabit the earth, and that they were created in the image and likeness of God, and further that their carriage was the same at that time as it is in our own state of civilization. Hence your question is unanswerable only from a given viewpoint. Ques.—Why doesn't the United States recognize Russia as a nation and be represented in that country?

Ans.—There are three reasons given for non recognition. First is that during the war the United States loaned Russia (then a monarchy) more than \$300,000,000. When Russia overthrew the monarchal form of government and established their present form of soviet regime, they repudiated that debt which was contracted by the monarchists. It is a matter of opinion between soviet Russia and the United States as to who is liable for this debt. Second, the present government of the United States looks with disfavor upon their dissemination of Communist propaganda. Mining and The Telephone. A bell clangs, gates crash shut, and the "skip" sinks rapidly into the earth! Tightly packed with stalwart miners, the car drops down the shaft, the hat lamps fade and the bantering voices recede into the darkness. Down, down, down, a mile or more they go, to blast and pick for copper-bearing rock. Linking these subterranean workers and their companions on the surface is a telephone system, keeping the miners in constant communication with "the top". On each underground "level", a telephone enables the "shift bosses" to receive directions from the superintendent above, or to report particular developments. As a safety device, the telephone is indispensable. The far-reaching telephone wireways are partners of mining, not only underground but in the surface plant, in the offices, and between all points in the nation. The copper, iron, salt, oil, and other mining industries of our state utilize the telephone to sell their products, to buy materials and to direct shipping. Michigan is proud of her mining industry, proud of her position in the production of these minerals. The Michigan Bell Telephone Company is proud to be a partner of this industry and to do its part in aiding its development. Our policy—"To continue to furnish the best possible telephone service at the lowest cost consistent with financial safety". MICHIGAN BELL TELEPHONE CO.
