We Amuse Costs
Sir Frederick Pollock
Miss Hurst's Marmoset
To Help Business, Spend

Coste, peerless French flyer, "hop-
ping" from New York to Dallas, Tex.,
in 1700 miles, for a special prize of
\$25,000, says on arrival: "Pouf, pouf!
That was nothing."

He made it in less than 12 hours.
He says also, writing to Mr. Adolph
S. Ochs, that the next time he flies he
will take an American with him, be-
cause "we find you very amusing, you
Americans."

Some Americans that go to Paris
and the French "very amusing," which
makes the account even.

Sir Frederick Pollock, a great au-
thority on international law, accepted
an honorary degree from Columbia
university. The presence of Sir Fred-
erick honored the university, and all
connected with it, for Sir Frederick
Pollock is in the best sense of the
word a learned man, possessing knowl-
edge and able to impart it.

His brief analysis of the Monroe
Doctrine, which the late Senator
Lodge caused to be printed as a
United States document, is the best
exposition of that doctrine ever
written.

And his book on the life and phi-
losophy of Spinoza is one that should
be read by every man interested in
philosophical thought and in Spinoza,
greatest intellectual genius produced
by the Jewish race.

The literary and intelligent Fannie
Hurst returns from Europe with a
pet marmoset, so small it sits in a
large pocketbook. She should write
about husbands of the future who
will probably dwindle to about that
size, in the course of evolution.

The giant sea crab, when you catch
one, is always a female, of great size.
She carries the male crab, about as
big as a ten-cent piece, under one of
her flippers, except on rare occasions.
Human husbands may dwindle down
to that, when men have no harder
work to do than pushing a button.
Size and muscle will no longer count.

But woman will remain of full size
because of her maternal duties, and
for other reasons. The female spider
is ten times as big as her husband,
and eats him after marriage. Human
husbands should not complain.

T. F. Wallace, head of the National
Association of Savings Banks, sees
the end of the slump, because savings
deposits increased \$225,000,000. Sav-
ings shows strength of mind, but the
end of the slump might be still near-
er if those that put the \$225,000,000
extra into savings banks had put it
into circulation, buying merchandise.
What people spend makes prosper-
ity. What they save makes them safe.

One thousand are dead in Santo
Domingo, 20,000 hurt, 30,000 homeless.
In latest reports, of 10,000 buildings,
only 400 are left standing.
It will take a great deal more than
the \$20,000 sent by the American Red
Cross to provide for that situation.

After a great war important changes
occur in government and "social sys-
tems."

One hundred and sixteen British
bankers and manufacturers implored
Great Britain to stick to and maintain
trade and not be stampeded into pro-
tection and retaliation.

Another group of bankers had urged
free trade within the empire, protec-
tion against outside competition.

German statisticians apply grim and
correct figures about the great war.
It has taken years to prepare them.
Ten million soldiers were killed, 20,
000 unknown French soldiers lie in one
grave.

The horses killed numbered 9,580,
000—they didn't start the war.
Eighteen million human beings were
wounded, and \$247,000,000 were
spent, wasted.

And that is what the world is pay-
ing for now in its slump, undoubtedly.

Australians and others are im-
pressed by old Solomon, an old ab-
original Australian witch doctor, who
predicted "drenching rains to end the
drought in the first quarter of the
moon."

The drenching rains came, crops
were saved, Solomon is a hero, and
the weather bureau which saw no rain
coming is made ridiculous.

The public, eager to be deceived,

hears and cares nothing about the 10,
000 witch doctors and other prophets
that in the same week predicted things
that did not and will not happen.

Gold and treasure, the words that
excite nearly all men.

Italian divers clad in iron, going
down 400 feet to the bottom of the
Atlantic and up again as rapidly as
swift elevators in our skyscrapers,
have discovered the British treasure
ship Egypt with \$5,000,000 of gold and
silver in her hull, lying on the gray
sand on the ocean's floor.

Eighteen so-called "terrorists," all
Jugoslavian, are on trial at Trieste,
and one confesses a plot to murder
Mussolini.

Italy doesn't pamper prisoners. Each
defendant is kept in a steel cage, tak-
en out only for examination.

"KONJOLA SAVED MY LIFE," SAYS HAPPY LADY

Constipation And Extreme Nervousness Soon Banished By Power Of New Medicine.

MRS. MARGARET HAYNES

"Konjola saved my life for I was a nervous wreck," said Mrs. Margaret Haynes, 2724 Fourth street, Detroit. "I could not bear to talk to people and often at meal time, I left the table rather than hear people talking. I did not sleep well and lost weight rapidly. No medicine I tried appeared to help me until I began taking Konjola."

"This great medicine helped me from the beginning. My nerves became calmer and my appetite is good. Constipation which had bothered me so long, is now a thing of the past. It required but four bottles to bring about this amazing change in my health. I cannot say enough in praise of it and I have all my friends taking it."

Konjola is a compound of 32 ingredients, 22 of which are the juices of roots and herbs of known medicinal value. It attacks the source of ailments of the stomach, liver, kidneys and bowels, and rheumatism, neuritis and nervousness.

Konjola is sold in Chelsea, Michigan at Burg's drug store, and by all the best druggists in all towns throughout this entire section.

Plant Breeders Aid Winners In Contest

The value of the work done by plant breeders on College experimental plots for the improvement of old varieties of grains or the creation of new ones is shown by the number of such varieties grown by prize winners in the Ira Butterfield contest at the State Fair in which prizes were offered for the best fields of grain harvested in Michigan this year.

Ernest Knivverlin, Blissfield, won first place in the wheat class with a yield of 59.34 bushels per acre; John Kaye, Custer, with a yield of 58.60 bushels; was second; and William Finkbeiner, Clinton, was third with 57.31 bushels per acre. Wheat varieties created at Michigan State College won nine out of the first 15 places.

Exceptionally good yields of oats were entered in this year's contest, and, out of the first 15 places, varieties developed at the College took 12. First place was won by George Aldrich and Son, Fairgrove, with 125.57 bushels per acre; second was D. A. Geddes, Saginaw, with 113 bushels; and third by Reid J. Kirk, Fairgrove, with 110.20 bushels.

Spartan, the last barley variety developed at Michigan State College, took 13 out of the 15 first places. Ferdinand Foss, New Haven, was first with a yield of 66.06 bushels; Adolf Nitz, Pigeon, with 63.41 bushels per acre took second; and third place was won by O. B. Merriman, Deckerville, with a yield of 62.05 bushels.

LANSING—A light green button bearing the picture of a pheasant will be the badge of the small game hunter this year. The Department of Conservation is now sending out 425,000 of these buttons to all of its license agents. The non-resident small game license buttons this year are salmon colored.

YPSILANTI—Aided by ideal construction weather the six building units of Ypsilanti State Hospital in York township are now standing out on the 1,200 acre site with practically all the rough first floor work completed. A flying start on the second floors has put the building program two weeks ahead of schedule.

MANCHESTER—The road south-west from town to Wampers lake, that has recently been improved and graveled comes in for a lot of praise, but wait a few months until the gravel is thoroughly packed. We say wait, we mean to caution you to drive slowly and carefully. This exceedingly dry weather is not good for road making. Avoid accidents by careful driving.—Enterprise.

RIVETS MAKE THE SUBMARINE AIR-TIGHT

The TORRID ZONE STEEL FURNACE

is gas-tight
and dust-tight
because it is
riveted

Furnace can never drift up from a Torrid Zone Warm Air Furnace to annoy the family in the dining-room, living-room or in any other part of the house. It is made of steel-plate, rolled in the same mills that make armor plate for battleships. It is really an air-tight steel drum.

For just as the submarine is made air-tight by being hot-riveted and cold-calked, so the steel Torrid Zone Furnace is made gas, smoke and dust-tight.

Made gas, smoke and dust-tight to shield your family from fumes that poison; to protect your home from smudgy smoke and dust. No more dingy ceilings. No more discolored wallpaper or sooty draperies and upholstery.

With a Torrid Zone you also get proper humidity and air circulation. The humidifier has twice the evaporating area inside the casing of ordinary water pans. Rapid evaporation is also necessary, so it is placed right over the firing doors where it gets the most heat possible. Proper air circulation is guaranteed, when

an authorized Lennox Furnace man installs according to the Standard Code. Indeed, with this furnace in your home you have the satisfaction of knowing you own the finest heating plant science has ever devised.

Your Torrid Zone Steel Furnace will produce 10% to 20% more heat from the fuel than other furnaces, hence will heat your home with less fuel than any other furnace would consume. It will burn soft-coal, coke, hard coal, lignite, wood, gas or oil.

Come in and see a Lennox Torrid Zone... its sturdy locomotive grates... its "lazy" shaker.

Get the book that explains fully about other outstanding features. Plans and estimates furnished for new or old homes and other buildings of all types and sizes. Factory blueprints for special problems. Made by the LENNOX FURNACE COMPANY, Syracuse, New York — Marshalltown, Iowa — Toronto, Canada.

Sunday on the Farm

by A. J. Dunlap

The rule of the Good Book was law on the farm:
That Sunday be kept as a day made for rest:
And after six days full of labor and toil,
We knew that the rule of the Good Book was best.
No screaming alarm clock aroused us at dawn;
We woke when the sun was well up in the sky;
Awoke to the clucking of hens in the yard,
And clamorous squealing of pigs in the sty;
Awoke to the laughter of leaves in the trees
That rippled along on the still Sabbath air;
Awoke to the odor of bacon and eggs
That, like sweet incense, ascended the stair.

When breakfast was over we salted the cattle
And turned the teams out in the dusty corral;
Inspected the hog lots, the orchard and pasture
And doctored the gill-nets on Dolly or Nell.
Then went to the house where the women were working,
And out in the shade of the cottonwood tree
Reclined on the bed of the deep tangled bluegrass,
And dozed to the buzz of the brown honey bee.
No mountain resort of the millionaire make
Can ever hold half of the comfort and charm,
We felt when the six days of labor were ended,
And Sunday arrived on the peaceful old farm.

SIX CYLINDER SENTENCES
By DR. JOHN W. HOLLAND

Good luck has always been an early riser.

Educate yourself! The mind foggy at forty will soon be an old fog.

The center of life for thousands of Americans seems to be the amusement center.

Each trifle learns to his sorrow that life is not trivial.

Each soul sits like a weaver at a loom, weaving the pattern of his own fate.

Do not despair if the world seems hard. Even the softest flowers have to push up through the hard earth.

Question And Answer Dept.

Ques.—I know a shoemaker who has
three wives living. Is he classed as
a bigamist?

Ans.—Not if he sticks to his "last."

Ques.—I would like to know if the
United States and Canada respectively
keep up their half of the expense in
beautifying Niagara Falls?

Ans.—There is a pact between Can-
ada and the United States in which
the expense of upkeep of Niagara
Falls is divided equally.

Ques.—I am told that salmon die
immediately after they get through
spawning. Is that the truth?

Ans.—Yes. As the spawning season
approaches these fish work their way
as far as possible up streams. Some
species work their way up brooks so
shallow that their backs stick out of
the water. They get very thin, their
eyes become sunken, their appetites
grow less and less, their throats be-
gin to narrow, and their stomachs
shrink until they become entirely in-
capacitated for receiving food. After
they have spawned they turn over and
die, leaving great quantities of rotting
carcasses on the banks of the creeks
and rivers.

Ques.—To settle an argument, will
you please be kind enough to tell what
the religious faith of Abraham Lin-
coln was?

Ans.—Volumes have been written to
prove that Abraham Lincoln was a
devout Christian, and about as much
has been written to prove that he was
a skeptic, if not an atheist. There is
a tradition unsupported by substantial
evidence, that in his early days as a
lawyer, that Lincoln wrote something
against religion or the Bible, and that
a friend destroyed it because he be-
lieved it would endanger Lincoln's po-
litical future. Lincoln's speeches and
letters indicate that he had reverence
for sacred things, but they do not re-
veal any definite theological beliefs.
He never affiliated with any church in
the technical sense, although while he
was president he frequently attended a
Presbyterian church in Washington.

Ques.—Is it true that there are no
two things exactly alike?

Ans.—It is true. So far as science
has been able to learn, there are no
two objects in the world just alike no
matter whether they are natural or
artificial. No two leaves or snow-
flakes, no objects manufactured in a
factory, are exactly alike. Scientists
believe that even each infinitesimal
atom composing the elements differ
from all the rest.

Ques.—Is it a fact, as reported, that
Herbert Hoover, president of the
United States, is a millionaire? If so,
how did he get it?

Ans.—Yes. It is estimated that the
wealth of Herbert Hoover, president
of the United States, will exceed \$10-
000,000. He accumulated the bulk of
it as a mining engineer.

Ques.—When a bullet is fired from

a gun how far will it travel before it
strikes the ground?

Ans.—That depends upon the speed
of the bullet. A bullet begins to drop
the instant it leaves the muzzle of the
gun. The action of gravitation is the
same on all bullets if all other condi-
tions are equal. If a bullet is fired
from a gun elevated ten feet from the
ground, and another bullet the same
size and weight is dropped from the
hand at the same height and exactly
at the same time the gun is fired both
bullets will strike the ground at the
same instant. One will be at your feet,
while the other (the one fired) may be
two or three hundred yards away. In
other words, gravitation is the same,
no matter how slow or how speedy the
bullet may be.

Ques.—Will you answer in your
good question department how long
the Yukon River is?

Ans.—The Yukon River in Alaska
and Canada is a little over 2,300 miles
long. In North America it is only
surpassed in length by the Mackenzie
and Mississippi rivers.

Ques.—Can you tell me in your
question department why "red" makes
a bull mad more than any other color?

Ans.—It is a general belief, but an
erroneous one, that bulls become in-
furiated at the sight of red. This is
a myth. All cattle are color blind.
They cannot distinguish one color from
another. It is the brightness that at-
tracts the bull. For that reason bull-
fighters wave a piece of bright colored
cloth at the animals in the arena. Red
is a favorite color for this purpose be-
cause it is bright. Hence it is the
brightness and not the color that mad-
dens the bull.

Plan Great Tribute To Disease Warfare

Arrangements have been completed to make the Achievement Day banquet which will be held at Michigan State College, Friday evening, September 19, a memorable tribute to those who have had a part in the bovine tuberculosis eradication campaign in this state.

H. B. Smith, Chicago, national livestock commissioner, will act as toastmaster for the banquet which will be held in the Union Building on the campus at 6:30 P. M. R. S. Shaw, president of Michigan State College, will give the address of welcome. Speakers during the evening will be Dr. John R. Mohler, chief of the bureau of animal husbandry, Washington, D. C.; Charles L. Hill, president of the national dairy show, Madison, Wis.; Herbert E. Powell, Lansing, state commissioner of agriculture; Dr. D. C. Lochead, health officer, Rochester, Minn.; H. R. Davison, vice president of American institute of meat packers, Chicago; and M. L. Noon, Jackson, vice president Michigan milk producers association.

The banquet will mark the conclusion of a nine-year campaign whose success is attested by the federal accreditation given to Michigan as being the first great dairy state to reduce the percentage of cattle infected with tuberculosis to less than one-half of one per cent of the total number within the state.

"Burning Up" Witches

Even 16 this day and age there are some people who believe in witches. "Burning the Clavie," an ancient custom of which the object is to free the inhabitants of the city from witches for another year, is annually celebrated at Burghhead. Blazing embers are carried through the town and hung through open doors of houses to burn up the witches. —London Tit-Bits.
