Gift plants were presented to W. R. Daniels, village president, to M. W. Saturday, March 14, marks the opening of the North American Flower Show which will be held in the new Naval Armory, 10 Jefferson avenue, Detroit. The show is being held in the new building this year to accommodate larger displays. It is hoped that the people of Chelsea and vicinity will attend this show as it will be well worth the time, according to Elvira Clark-Visel of the Chelsea Greenhouses. The show will be in full swing on Sunday, making a good opportunity for those who cannot go at any other time.

Many View Replica Of First Reaper

The excellent attendance at the McCormick reaper centennial celebration held Saturday by Merkel Brothers, McCormick-Deering dealers, may be taken as an indication of the interest in the development of power farming equipment by farmers in this community. About two hundred people were at the store that day. G. H. Miller and C. M. Pepper, representatives of the International Harvester Company, were here with the reaper. Mr. Miller gave a very interesting talk on the tractor at the store in the morning. Free lunch was served at noon. The crowd then went to the Princess Theatre where C. M. Pepper spoke briefly on the reaper.

The motion picture, "Romance of the Reaper," shown for the first time in this community, was of special interest. The pictured story of the building and development of the reaper placed a new importance on the value of this machine as the starting point for the long line of power farming equipment which has followed in its wake.

With farmers more interested than ever in lower crop production costs, the subject of power farming equipment is deserving of much consideration. Just as the reaper cut as much grain in a day as 4 or 5 men with cradles or 12 to 16 men with reaping hooks 100 years ago, so tractors and tractor equipment are today enabling one man to double and triple his daily capacity for work. He has additional time available for planning and carrying out diversified farm operations, building up the soil, improving the quality of livestock, and many other activities that result in better and more productive farming.

RUPTURE

Don't submit to avoidable operations or the use of antiquated trusses, as they all set where the lump is and not where the opening is. The opening is seldom larger than a dime (no matter the size of the rupture), and all cases can be retained with the end of a lead pencil.

"The Spermatic Shield-Complex in combination with the Retainer-Simplex (Patent No. 747247, and other patents pending)—a scientific achievement in a highly specialized art. It will not only retain any case of rupture perfectly, but contracts the opening in 10 days on the average case. Infinitely superior to any instrument method or operation and producing results in no other way obtainable. All cases are secure a lifetime as against further trouble or expense. Large or difficult cases or incisional rupture (following operations) especially solicited. This instrument received the only award in England and in Spain, producing results without surgery, injections, medical treatments or prescriptions, with distinguished personal patrons of all nations."

More than 73,000 miles in a New Ford

THE substantial worth of the new Ford is reflected in its good performance, economy and reliability. Its stamina and endurance are particularly apparent in sections where bad roads and severe weather put a heavy extra burden on the automobile.

In less than a year a new Ford Tudor Sedan was driven more than seventy-three thousand miles over a difficult route. The operating cost per mile was very low and practically the only expense for repairs was for new piston rings and a new bearing for the generator.

The car carried an average load of 1200 pounds of mail and was driven 250 miles daily. "The Ford has never failed to go when I was ready," writes one of the three mail carriers operating the car. "The starter did the trick last winter even at 34 degrees below zero. The gas runs about 20 miles per gallon. At times I pull a trailer whenever I have a bulky load."

Many other Ford owners report the same satisfactory performance. Every part has been made to endure — to serve you faithfully and well for many thousands of miles.

LOW PRICES OF FORD CARS

\$430 to \$630

At a small cost, you can purchase a Ford on economical terms through the Authorized Ford Finance Plans of the Universal Credit Company.

FEATURES OF THE NEW FORD

Attractive lines and colors, rich, long-wearing upholstery, sturdy steel body construction, Triplex shatter-proof glass windshield, silent, fully enclosed four-wheel brakes, four Houdaille double-acting hydraulic shock absorbers, aluminum pistons, chrome silicon alloy valves, torque-tube drive, three-quarter floating rear axle, more than twenty ball and roller bearings, and bright, enduring Rustless Steel for many exterior metal parts. In addition, you save many dollars because of the low first cost of the Ford, low cost of operation and up-keep and low yearly depreciation.

ABSOLUTELY wasting money will impoverish just as positively as saving money will enrich.

Make It A Habit To Meet Your Business Friends Here

His rox Movietone production, "The Big Trail," which will be shown Tuesday and Wednesday, March 17 and 18 at the Princess Theatre, has been acclaimed by previewers as the most important contribution to the screen-to-date.

The story of "The Big Trail" is by Hal G. Evarts, famous novelist and authority on the old and new West. It embodies a delightful romance between the leads, John Wayne, a youthful discoverer of Walsh's who plays the role of "Breck Coleman," a boy who has lived with the Indians and eked out a living as a fur trapper and scout, and the girl, Marguerite Churchill, a daughter of the old South who goes over the trail with her brother and sister, the trail which Wayne scouts.

The picture abounds in thrills as would be expected of a faithful narrative of the brave pioneers of a century ago.

We see the start of the wagon train, with a prayer from the banks of the Missouri River. We see the first night's encampment, the foraging of the river, the pioneer wagons bogged in a mud hole, the Indian attack on the wagon train, the truly thrilling cliff scene, the buffalo hunt and the end of the trail in the pioneers' Valley of Dreams.

It is a picture for fathers, for mothers, for the kiddies; in fact, it holds a strong appeal for every American with a drop of red blood in his veins. The company in its entirety includes 20,000 players.

AGRICO "AA QUALITY" Fertilizer

FOR SALE BY

ALBERT HINDERER

Phone 147-F22 Chelsea, Mich.

PROFIT ON ONE CROP PAYS FOR LAND.—Mr. Alvin La Pointe, right, and his son, of Erie, R. F. D. No. 2, Monroe Co., Mich., made a profit of \$246 per acre on potatoes grown with "AA QUALITY" Fertilizer. (This was more than the original cost of the land. Read the facts in his letter below.)

\$246 per Acre CLEAR PROFIT

LAST year Mr. Alvin La Pointe, of Erie, Monroe Co., Mich., planted 19 acres of potatoes; he harvested and sold 3800 bushels so his yield averaged 200 bu. per acre. Mr. La Pointe gave us a detailed statement of every item of cost in growing his crop. Including 1000 lbs of "AA QUALITY" Fertilizer, his cost was \$104 per acre, or just 52 cents a bushel. He sold his crop for \$1.75 a bushel, or \$350 per acre, so his net profit was \$246 from each acre.

Compare Mr. La Pointe's profit with the profit from an average potato yield of 100 bushels per acre, grown at the average cost of 64 cents a bushel. At \$1.75 a bushel, the profit per acre would be only \$111, as compared to Mr. La Pointe's profit of \$246. In authorizing us to publish these facts, Mr. La Pointe wrote as follows:

"The land on which my potatoes were grown cost \$200 per acre in 1918, and my cost of production figures for last year show that my potato crop made a net profit of \$246 per acre, which is more than the original cost of the land. I am satisfied that farmers in this State do not use enough fertilizer. More fertilizer means bigger yields, lower production costs and more profit." (Sept. 30, 1930.)

Thousands of other farmers in this and adjacent states use AGRICO and the other "AA QUALITY" Fertilizers to give them larger yields, lower costs and bigger net profits. Read typical letters at the right.

How Profits are Increased

By increasing your yields from each acre, AGRICO reduces the cost of growing each bushel and this in turn increases the margin of profit. A farmer cannot increase the market price, but he can reduce his costs—and that amounts to the same thing. Know your costs, don't guess. We have made it easy by providing a new crop-cost method, so simple anybody can use it. Ask your dealer for a copy.

Don't skimp on fertilizer; for when all is said and done, it's the crop-producing power of the fertilizer you use that measures the size of your profit. Use the best fertilizer you can obtain and use enough of it. Don't expect so-called "cheap" goods to give you the profits your hard work entitles you to.

AGRICO contains extra plant foods. That's the big reason for its superior crop-producing power. There is a brand of AGRICO for every crop. Try AGRICO on at least a part of your crops. Any "AA QUALITY" Fertilizer Dealer can supply you. The AMERICAN AGRICULTURAL CHEMICAL CO., P. O. Box 814, Detroit, Mich.

"AA QUALITY" FERTILIZER DOUBLES BEAN YIELD. White Brothers, of Berville, St. Clair Co., Mich., used 125 lbs. per acre of "AA QUALITY" Fertilizer on their bean last year and got 20 bu. per acre, just double the average local yield. They write: "In the past five years we have used several different kinds of fertilizers and have always come back to 'AA QUALITY' because they give us the best crops. Our beans this year averaged 20 bu. per acre in an unusually dry and hot season and only picked 1 lb. per cut. The average yield in this section was from 8 to 10 bu. per acre. We had an outstanding crop and know that 'AA QUALITY' Fertilizer helped make this possible." (Oct. 7, 1930.)

GETS 29 1/2 BU. MORE OATS PER ACRE. Mr. C. W. Benjamin, Fowlerville, Livingston Co., Mich., last year used "AA QUALITY" Fertilizer and produced a 79 1/2 bu. per-acre crop which weighed 37 lbs. per bu. and matured 8 days earlier than other oats in his section. He writes: "This year I used your 'AA QUALITY' Fertilizer on my oats at the rate of 150 lbs. per acre and got 79 1/2 bu. per acre. This was 29 1/2 bu. per acre above the average in this section. It is not profitable to try to farm without using good fertilizers. When 'AA QUALITY' Fertilizer is used you are always sure of having the best that your money can buy." (Aug. 16, 1930.)

SUPERVISORS BEWARE!
Two men, near Baldwin, were acquitted for shooting at Supervisors with shotguns. The Legislature ought to make a closed season on Supervisors or else make persons hunting them purchase a "Supervisor" hunting license. Perhaps the Conservation Department could get enough revenue out of this, so it would be unnecessary for every resident of the State to procure a rod license. -Charlotte-News.

Question And Answer Dept.

Ques.—My mother wants to know on what day of the week she was born. She thinks it was Friday or Saturday. The date was Dec. 3, 1875. Can you tell?
Ans.—Dec. 3, 1875, was on Friday.

Ques.—When was Cleopatra queen of Egypt, and when did it become a province of the Roman empire?
Ans.—Cleopatra was queen of Egypt when in 33 B. C. When Antony fell in love with Cleopatra a rupture was caused between Octavian, the Roman emperor. Anthony and Cleopatra were defeated at Actium Sept. 2, B. C. 31. Both Cleopatra and Antony killed themselves and Alexandria was taken by Octavian. Then in 30 B. C. Egypt was made a Roman province.

Ques.—I want to ask in your paper, if you know so much, what is best for cleaning old ivory?
Ans.—Use any shampoo soap.

Ques.—I wish to ask you what was the Alamo?
Ans.—The Alamo was a mission church at San Antonio in which 150 revolutionists in the Texas War of Independence were occupied. Though attacked by 4,000 Mexicans, the Texans held it from February 23 to March 6, when the Mexicans took it by storm. All but seven of the garrison perished, and six of them were murdered after they surrendered, one man escaping to report the affair. After that "Remember the Alamo!" was the war cry of the Texans in their struggle for independence.

Ques.—What was Robert G. Ingersoll's middle name? This is to settle an argument.
Ans.—The well-known agnostic's full name was "Robert Green Ingersoll."

Ques.—I wish to ask you if white gold is as valuable as yellow gold?
Ans.—Yes. The white gold contains the same percentage of fine or pure gold as any other 10, 14, 18 or 20 carat gold. The only difference is that the alloys give the metal a white appearance instead of the yellow appearance of the regulation gold.

Ques.—Who owns the best radio set in existence—one that is the clearest and has the least static?
Ans.—Anyone that says the word "I" may claim this distinction.

Ques.—I want to ask in your question department if you think farm mules is getting the breaks it ought to have?
Ans.—No. But we are confident the prohibition law is getting the "breaks" all right.

Ques.—To settle an argument will you please tell in your question column how to pronounce the word "coupon"?
Ans.—Coupon is pronounced like if it was spelled "koo-pon," with accent on the first syllable.

Ques.—I want to ask you if Dorothy Dix, the writer, is any relation to John Dix, the artist?
Ans.—We never heard of Julia Dix, the artist. "Dorothy Dix" is not the real name of the writer. Her right name is Elizabeth M. Gilmer.

Ques.—Who was Rip Van Winkle?
Ans.—Rip Van Winkle was a character in Irving's "Sketch Book." He was an indolent, good-natured fellow living in a village on the Hudson. While shooting among the Catskill mountains he meets with a stranger whom he helps carry a keg over rocks and cliffs; with him he joins a party who are silently rolling ninpins. Rip Van Winkle drinks deeply of the liquor they furnish, and falls into a sleep which lasts twenty years, during which the Revolutionary War takes place. After awakening Rip returns to the village, finds himself almost forgotten and makes friends with a new generation. The name of Joseph Jefferson became so identified with this character that he was known among the English-speaking people as "Rip Van Winkle."

Ques.—Is there such a thing as a mermaid—half woman and half fish?
Ans.—No. This is only a myth.

Ques.—What is a Polyglot Bible?
Ans.—A Bible containing versions in the same text in several languages.

Ques.—Who are the three most important humanitarians that are now living?
Ans.—This is a moot question which resolves itself into a matter of personal opinion. Henry Ford, John D. Rockefeller and Alfred E. Smith are deeply interested in humanitarianism.

Ques.—What company builds the Austin car?
Ans.—To answer this question would be free advertising. Consult a dealer.

SCHOOL NOTES

Students of Chelsea high school participated in an oratorical and declamatory contest Monday evening. The orators were all members of Miss Cornman's public speaking class. With her aid these orators wrote and learned their orations. The first place in oratory went to Howard S. Holmes, who spoke on "Forest Preservation in Michigan." Second place went to Mary Hinehey, whose oration was "Immigration Restriction." Third place went to Arthur Wink who spoke for "Capital Punishment." Matthew McGuffigan brought honors to the Freshman class by winning first place in the declamations. His declamation was "Liberty Man, Woman and Child," by Robert Ingersoll. Second place was given Edward Steiner, who gave Albert Hubbard's "Message to Garcia." The other orators appearing were Ruth Rhinehart, Margaret Green and Margaret Heschelwerdt. Anna Geddis was the third declaimer. Rev. Felton, Miss Martha Moon and Miss Katharine Fitzpatrick served as judges. The winners of first place will go to the sub-district contest. Friday night Chelsea high school's basketball team trounced Sandy Creek at Tecumseh, beating them 9-43. Coach Biedonweg sent in his subs during the second and third quarters, saving the first team for Saturday night. Despite heavy and drifting snow, the boys, accompanied by a few townspeople, went again to Tecumseh, to play Tecumseh high school team. In spite of the advantage Tecumseh had playing on its own floor, our boys put up a winning battle that was a treat to see. Winning that game allows them to go on to the Regional at Ypsilanti, starting Thursday of this week. Their first battle will be with U. High, old and strong opponents. Several of the team are Seniors and this tournament will afford the last chance to see them play. These boys are Bob Foster, captain, Kenneth Beach, Budley and Howard Holmes. The team needs wholehearted support. Let's have a crowd of townspeople and schoolmates to cheer them on to victory. The high school students are planning an All High dance for Friday, March 20. Plans are also underway for the Junior Carnival which will be under the supervision of Miss Martha Moon.

PINCKNEY—The county road gang under Rex Smith were forced to work all day Sunday repairing the Hi-land Lake road. The private dam on the land of the Putnam Land Co. backed up the water until it overflowed the banks of the small reservoir above it and washed out the county road where it runs through what is known as Sleepy Hollow, just this side of the Hi-land Lake dance hall. Lights were placed there Saturday night and the work of repairing it was completed Sunday.—Dispatch.

Drive a Twin-Ignition NASH

—It's a new experience!

ONE of the chief reasons for the flashing acceleration and smooth speed and power of Nash Eight-80 and Eight-90 models is aircraft-type Twin-Ignition. In each cylinder, two spark plugs placed opposite each other, fire at precisely the same instant. The highly compressed gas ignites at two points. It is burned more quickly, efficiently. The result:—A more powerful explosion—instant responsiveness— notable gasoline economy.—The moment you step on the accelerator, you will realize the important difference Twin-Ignition makes. Let's go for a ride together—soon.
