Lima Couple Observe Golden Anniversary

(Picture on last page)

Mr. and Mrs. Charles F. Barth cele-
brated their golden wedding anniver-
sary Sunday, entertaining at a family
party at their home in Lima township.
The house was prettily decorated with
potted plants and cut flowers, gifts
from relatives and friends, and the
Ladies' Aid Society of Zion Lutheran
church, Rogers Corners. A color
scheme of green and gold was carried
out in the dining room, where the
table was centered with a three-tiered
wedding cake.

After a bountiful dinner, little
Betty Lou Cox, great granddaughter
of Mr. and Mrs. Barth, in behalf of
the guests, presented them with a
basket of Johanna roses and freesias,
in which was concealed a purse of
gold. The afternoon was spent in a
social way.

Mrs. Barth, formerly Louise Alber,
was born March 4, 1864, in Lyons,
France, coming to America with her

ship.

Mr. and Mrs. Barth were married
in Manchester, March 15, 1881, by
Rev. Mr. Werheim, and they began
housekeeping on the farm in Lima
township, where they have since re-
sided. Of seven children born to this
union, one daughter died in infancy.

Miner Denies Charges Of Cement Interests

An article in which John W. Miner,
chairman of the state prison com-
mittee, denies charges published in a De-
troit paper on Sunday, in which it was
stated that operation of the state ce-
ment plant here forced privately
owned cement plants to discontinue
operations, was published in the Jack-
son Tribune in its issue of March 17.
The statement issued by Miner, which
is authentic according to M. H. Mc-
Gaffigan, superintendent of the plant,
appeared as follows:

"We make less than 6 per cent of
the cement manufactured in Michigan
at the Chelsea plant," the commission
chairman declared. At the present
time production has been about 800
barrels a day, compared to 2,100 un-
der normal times, he said.

Seventy-five free laborers and 15
convicts are now employed at the
plant, Miner said, in answering critics
of the management of the institution,
who maintained that convict labor is
keeping outsiders from work.

Although there are a large number
of convicts housed at Chelsea, they
are not employed in the cement plant,
being there only because of over-
crowded conditions at the prisons in
Jackson.

John Deere-Syracuse Spring-Tooth Float Harrows

We Have Them for Use
With Tractor or Horses

With a strong, deep-penetrating John
Deere-Syracuse Spring Tooth Har-
row behind your horses or light
tractor, you are equipped to do a
thorough job of killing the weeds or putting a good
finish to your seed bed.

The special-process high-carbon steel spring
teeth—heat-treated, tempered and annealed—on the
John Deere-Syracuse penetrate to a greater depth
than any other type of harrow teeth. They tear out
the weeds and leave the field smooth and well-
mulched. The teeth are clipped to the frame—no
bolt holes to weaken them.

This harrow does not clog—trash and weeds work
to the center of the harrow and pass out through an
opening between the sections.

We can furnish any
number of sections you
desire; tractor or horse
hitch.

**All That Glisters
Pullman Bonus Plan
Cancer in Hens
Mexico's Wise Welcome**

"All that glisters is not gold." That is how Shakespeare has it. Not "all is not gold that glisters." Which ever way you put it, the late Nixon-Mendlinger would now arise with you. An amusement promoter, he was violently interested in a lovely little lady whose admirable exterior won the title of "Miss St. Louis" in a beauty contest. He married her, promising to make her famous all over the world. The little lady has just shot and killed him at Nice, in France, telling the police he accused her of "having an Italian lover" and showing cruel finger marks on her throat.

French justice will attend to all that. We remind young gentlemen, "all the beauty of the world, 'tis but skin deep," and you never can tell what you will find a little deeper. A plain, old-fashioned girl, with a white dress, a blue sash and a ribbon or a hair comb in her hair, is perhaps the wisest prospect even though she may not be "Miss Anybody."

The president of the Pullman company, D. A. Crawford, has arranged for pullman car-conductors to earn "extra money." They will get commissions on sales of upper berths, sales of a whole section to one traveler, on favorable terms, also an allowance for "conducting passengers" that they want better accommodations than those reserved.

This will start salesmanship among pullman-conductors, increase the incomes of many, and perhaps promote similar profit-sharing elsewhere. It pays to give men a cash interest in their work.

Encouraging news for those studying the world problem of cancer. Investigators at the Rockefeller Institute of Medical Research discover that a certain type of cancer in hens contains its own healing agent. Scientists hope for a similar discovery in the human form of the disease.

When this writer visited the Rockefeller Institute with John D. Rockefeller, Jr., some time ago to see the famous Doctor Cheadle perform an operation for removal of tubercular tissue in the lung, scientists had transplanted cancer in a hen to make it grow. At that time transplanting and growth had been successful only once. On the other hand, scores of white mice and rats had transplanted cancer that had grown bigger than the rest of the animal bodies.

The fight against cancer is slow, but sure, and will be victorious in time.

A young Mexican genius, Augusto Novaro, musician and mathematician, has discovered a new harmony, based on mathematics. This method is complicated, but simpler than Einstein.

More important to the world and to Mexico, is the Mexican government's welcome to a large colony of Slavs, presumably Russians, dissatisfied with the Soviet system of government. Lands will be provided and Mexico will make them prosperous, while they contribute to Mexican prosperity.

Washington officials say the soldiers' "bonus money" will soon be spent for new goods, little of it spent to pay old debts.

We believe that buying new goods to the extent of a billion dollars or thereabouts will do more than anything else could to stimulate prosperity. Paying off old debts would also help.

Good news from Europe tells of all increasing demand for automobiles, which will mean more employment for workers in the United States. Makers and buyers of automobiles are interested in other news, only rumor as yet, which says that one of the big manufacturers will deliver cars hereafter with no charge for freight anywhere.

This will make a difference to buyers and to manufacturers. The latter make a considerable profit on freight charges, running into millions a year, because automobiles are shipped knocked down, and freight charges are approximately what it would cost to ship a car sitting up on its four wheels.

The War department announced the allotment of \$75,000,000 for river and harbor work. The Missouri river gets the largest allotment, more than \$6,000,000. This will put a good many men to work.

In the last ten years, India's population has increased thirty millions, another serious responsibility at the door of Great Britain. Since the British took control of India, its population has more than doubled.

This increase is due to the British, preventing famines, checking plagues with sanitary measures, in spite of protests by natives, who thought the gods could be appeased by cutting the throats of goats, and spilling the blood on the ground.

Britain has also increased Hindu population by preventing marriage of little girls to full-grown men, which does not lead to healthy families, and by improving the water supply.

Nevertheless, no possible precaution is being overlooked and samples of the water have been sent to Lansing for analysis.—Argus.

What Other Farmers Say

91 BU. OATS PER ACRE! Mr. John R. Strathairn, Charlevoix, Charlevoix Co., Mich., writes: "I used commercial fertilizer for the first time last year to keep my oats from lodging. The results were remarkable, because year 'AA QUALITY' goods produced 91 bu. of oats per acre, or a half more than I ever produced. I expect to use your fertilizers as long as I farm, though I have about 400 loads of manure every year to apply on my land." (Sept. 27, 1930.)

\$300 PER ACRE EXTRA CASH! Mr. Allen Radnor & Son, of Essexville, Bay Co., Mich., used AGRICOO on tomatoes last season and his crop not only yielded 500 bu. per acre, 100 bu. above the local average, but it matured one week earlier and paid him \$50 a bu. premium. He sold his crop for \$1 per bu. AGRICOO increased his income \$300 per acre above the local average. Mr. Radnor writes: "We have used other makes of fertilizer, but did not get yields like we get with 'AA QUALITY' goods. Our tomatoes grow this year with AGRICOO brought in \$500 an acre." (Sept. 27, 1930.)

STATE NEWS

A year and a half after their arrest for selling wild ducks, four Algonquin and St. Clair men have been convicted and sentenced. The men are Valley Lehman, Algonquin; Cecil Martin, St. Clair; George Douglass, Algonquin; and Lawrence Moore, of St. Clair. The convictions followed investigations made in 1929 by E. C. McDonald, a conservation officer in St. Clair county, and Margaret A. Charlton, United States game protector. Lehman was charged with selling 30 wild ducks; Martin and Douglass with selling two, and Moore with selling three ducks.

Receding of the water level in Lake Michigan at the harbor in Charlevoix is providing a serious problem for cargo shippers and private boat owners. It was necessary to raise the wharves and boat houses situated along the shore in 1929 to prevent them from being submerged by the high water, but the present low water levels may necessitate work of lowering them, many shippers believe. Much dredging will be necessary to provide channels of sufficient depth.

It has been announced at Lansing that fishing will cease in Michigan's inland lakes April 1, when non-trout rivers and streams will be open for spearing for certain species. All fishing will cease April 1 in all inland lakes of the state until June 28, except on designated "pike" and "trout" lakes in which fishing will be permitted after May 1 for perch, walleyed pike, grass pike, muskellunge, and non-game fish, and all species of trout.
