held at the public school auditorium

ance of about two hundred seventy-
five.

of education, called the meeting to or-

the board that the amount to be raised
by direct tax be reduced from \$21,-
000 to \$17,000 was approved by the
voters.

John L. Fletcher, David Mohrloch
and Mahlon J. Dunkel, whose terms
expired this year, were re-elected as
trustees, there being no opposition.
George W. Walworth and L. P. Vogel
are the other members of the board.

Crooked Lake Fish Club Is Reorganized

At a meeting of the Crooked Lake
Fish and Game Club, held last Sat-
urday night at the home of Mr. and
Mrs. George Wood Hays, E. F. Stab-
ler of Ann Arbor was elected presi-
dent of the club. F. E. Bartell was
elected vice president; Chas. Maleit-
ske was elected treasurer; and Carl
Weeks was elected secretary. All of
the newly elected officers are residents
of Ann Arbor.

Originated last year by Mr. Hays
and Mr. Stabler, with the former ac-
ting as president, this fish and game
club carried on many and varied ac-
tivities. The shoreline of the lake
was mapped, showing all cottages.
Each cottage was given a number,
and this number will be posted in
front of each cottage. 86 cans of
bass, bluegills and perch were planted
in the lake, and additions will be made
as they can be secured from the state.

Large placards containing a con-
densed digest of state fishing laws
have been printed, placed in a metal
glass-covered frame, and distributed
to each member of the club, to be
posted in a conspicuous place.

The constitution of the club gives
as its purpose, "Primarily to protect
and propagate the fish and game at
Crooked Lake and vicinity and to pro-
mote the general welfare and inter-
ests of the property owners." It also
provides that no less than six
meetings be held each year.

Of the thirty-five property owners
on the lake, twenty-nine are members
of the club.

FLETCHER CAR OVERTURNS

While Mrs. John L. Fletcher and
children were motoring home Friday
from a visit with relatives in Little
Valley, N. Y., their car skidded on the
wet pavement about four miles east
of Port Colborne, Ont., the rear end
of the car striking a culvert, break-
ing a wheel and turning the car over
on its side. Betty received slight
bruises on the arm and face. Other-
wise the occupants escaped injury.
The car was badly damaged. Mrs.
Fletcher and children returned home
by train Saturday evening.

CARS COLLIDE

Cars driven by W. D. Huston and
Harold Fisk collided at the intersec-
tion of the Manchester road and US-
22 Sunday afternoon. Fisk was turn-
ing onto the Manchester road and
Huston was approaching the pave-
ment when the accident occurred.
Howard Osterle, who was a passen-
ger in the Huston car, suffered a pain-
ful scalp wound, the drivers of the
two cars escaping injury. Both cars
were badly damaged.

Final Camp Period Opens Next Sunday

The final two-week period of Camp
Newkirk will open Sunday afternoon,
July 18th, with cub and scout teams
from both Livingston and Washtenaw
counties in attendance. Chelsea
scouts in camp include Foster Beis-
sel and John Bruner, who are doing
fine work, according to Scout Execu-
tive Wallace F. Watt.

One of the strongest features of
Camp Newkirk this season has been
the swimming and life-saving instruc-
tion program, under the direction of
Russell H. Moore, who has developed
during the past four years a most ef-
ficient corps of instructors and life
guards. The "buddy" system is used
at all times; no boy being allowed to
enter or leave the water alone. The
boys are divided into five groups for
swimming, according to their profi-
ciency, each grade wearing a distinc-
tive bathing cap.

Summer camp offers a great oppor-
tunity for advancement in scoutcraft
by each individual boy. This season
has witnessed an unusually large
number of awards for scout advance-
ment, without undue urging on the
part of the staff.

Among the special features which
will be offered during the last two
weeks of camp will be work in ar-
chery under Lee Yen Ten, of Ypsi-
lanti, who is popular with the scouts
on account of his skill in archery, ath-
letic ability and story telling at camp-
fire. Map making, surveying and
electrical work are under the direc-
tion of Prof. Paul Kotachov, graduate
student in the department of electri-
cal engineering of the University of
Michigan. Prof. Kotachov was for-
merly in charge of all radio communi-
cation for the Siberian kossacks dur-
ing the world war. A drum and
bugle corps has been organized by
Powell Aubrey, and has enabled be-
ginners to give a creditable perfor-
mance at recent camp ceremonies. This
work will be offered during the last
period of camp.

Camp-fires prove a constant source
of enjoyment to every person in
camp. A most fascinating feature
has been the series of accounts given
by Bob Shaw of the senior staff, con-
cerning his vagabond trip around the
world, frequently in costume. Mr.
Shaw will continue these talks thru-
out the remainder of the season. An-
other feature has been the degree to
which the campers themselves have
participated in furnishing special fea-
tures, such as songs, clever stunts
and other specialties.

Cubs, boys under scout age, are in
camp under a separate staff, and hav-
ing their own program. The boys
are under the direction of Rev. John
Shilling, assisted by four junior offi-
cers who are experienced in work
with younger boys. Approximately
20 cubs are in camp at the present
time and others are expected for the
last two week period. Cub activities
have included overnight hikes, cook-
ing, boating, swimming and other
forms of campcraft.

During each two-week period scout
field meets are held with the Adrian
and Jackson scout camps. Events in-
clude water boiling, first aid, signa-
loring, archery, baseball and swim-
ming.

The fee is \$2.00 per week and cubs
and scouts may register either at
scout headquarters, 324 E. Huron St.,
or directly at camp. A number of
local boys are expected to enroll for
the last period of camp, according to
Scout Executive Wallace F. Watt, di-
rector of the camp.

Residents Protest Dumping Of Sewage

Village officials are in receipt of a
letter from residents in the vicinity
of Mill Creek, protesting against the
continued flowing of the village sew-
age into the creek. The letter bears
mostly on the offensive odors coming
from the creek, especially at this
time of year when there is insufficient
water in the creek to carry the sew-
age downstream, and calls attention
to the fact that conditions now exist-
ing are unhealthful and contrary to
requirements of the State Department
of Health.

President Paul C. Maroney, and A.
G. Hindelang and A. E. Winans, mem-
bers of the village council, were in
Lansing last Friday to interview
proper state authorities, and they
were advised to employ an engineer
to determine the cost and other de-
tails in regard to construction of a
sewage disposal plant, which has
been demanded by state health au-
thorities.

Cost of a disposal plant has been
estimated at \$15,000 to \$20,000.

tion of reports, discussion of finances

ed officer, and the others members of

District No. 10, Lima and Sylvan:

Lesser, director; George Krump, treas-
urer.

BE PATIENT!

During the present extremely dry
weather, when the streets are very
dusty, many residents are urging vil-
lage officials to have calcium chloride
applied to the streets. It would be
a waste of time and money to apply
the calcium chloride under existing
conditions, as the dust layer is effec-
tive only when there is moisture in
the streets. Therefore, when the
proper amount of rainfall comes, the
streets will be scraped and given a
dressing of the much needed dust
layer, according to officials.

One carload of the calcium chloride
was applied to the streets this spring,
and another carload has been received
for the second application. It is pur-
chased at a cost to the village of
about \$625.00 per car, and distribu-
tion costs are about \$100 per car, so
it should be applied only when it will
be effective. In Ann Arbor and many
other cities, dust layer is applied at
the expense of property owners who
petition for it, the city paying for dis-
tribution only.

NATIONALISM SWEEP AWAY
IN MAKING "ALL QUIET ON THE WESTERN FRONT"

"Remarque wrote that the finest thing coming out of the war was comradeship born in battle. I wonder what he would have said had he seen the strange comradeships made while his book 'All Quiet On The Western Front' was being made into a picture."

So muses William Bakewell, who at 22 is one of Hollywood's most popular and most promising players and who has the role of "Albert", the little comrade, in Universal's picturization of Erich Maria Remarque's sensational book of the war which is coming to the Princess Theatre on Sunday and Monday, July 19 and 20.

The comradeship that Remarque wrote of was that of German for German, Frenchman for Frenchman, Britisher for Britisher. In the making of 'All Quiet' as a picture, all bounds of nationalism were swept away. In the

rank of the soldiers used in the picture were German, French, British, Russian, Canadian, American and Italian.

"They camped for a month together, sharing tents, while the company was on location. They became the greatest of comrades and friends. I have seen a friendship develop between a Canadian who won a high decoration for cleaning out three German machine gun nests and who played a German soldier in the picture and a German who was a crack machine gunner during the war."

"I have seen a Frenchman, wounded in action over there, agreeing with a German veteran to share a room together after the picture was completed. There was no segregation. A German drilled Americans and an American handled a squad of Germans. Not once was there a quarrel or a fight, even in the heat of some of the terrific battle scenes."

"What happened during the making of the picture is only comparable to the remarkable effect of the book which has transcended the bounds of nationalism the world over and is as popular in America, England, and elsewhere as it is in Germany."

Raleigh's Visit to America

Walter Raleigh did not visit America. His first expedition was to Virginia in 1584, 1585, 1586, 1587, and 1589, but Queen Elizabeth would not permit him to accompany the expedition. Later, however, he did visit North America.

Grayhound Long Popular

Solomon refers to the graceful action of the grayhound, and relief carved in at least 4,000 years old have been found in Assyria, showing a slim, long-legged, smooth-coated dog, which is the image of the modern grayhound.

FIRE-PROOF?
No building is fire-proof—entirely proof against fire. True, there are fire-resistant buildings. But repeated proofs show the necessity of insuring even that type—the safest type—of building.

Don't resist the prudent thought of carrying adequate insurance on fire-resistant buildings and their contents. It's better to have insurance and not need it than to need it and not have it, isn't it?

Question And Answer Dept.

Ques.—Will you kindly answer in your question column on what day of the week the Fourth of July fell on in the year 1886?
Ans.—July 4, 1886, was on Sunday.

Ques.—I want to ask in your good question department if Garfield carried the state of California when he was elected president of the United States?
Ans.—Yes. Garfield carried California in the election of 1880 by the smallest plurality ever given to a presidential candidate, 78 votes.

Ques.—When did Hudson first launch the steamboat? Was he the first to conceive the idea of steam navigation?
Ans.—Hudson made his first trip by steamboat from New York to Albany in 1807. This was the first successful trip by steamboat made in the United States. The idea of steam navigation originated with Capt. Hull of England in 1736.

Ques.—May I ask you why a certain kind of tool is called a "monkey" wrench?
Ans.—"Monkey" as applied to the monkey wrench is a corruption of the name of the inventor, Charles Monkey, who sold his patent for \$2,000 and invested the money in a house at Williamsburg, N. Y.

Ques.—I wish to ask in your valuable paper when and where was the first daily newspaper published in the United States?

Ans.—The first daily newspaper in the United States, or for that matter, on this continent, was published by John Dunlap in Philadelphia, in the year 1771. The paper was named "The Pennsylvania Packet."

Ques.—Would you mind stating in your question department how long canaries and crows live, barring accidents or disease?

Ans.—The average natural life of a canary bird is about twelve years, although some have been known to live twenty-four years. Crows have been known to live 100 years.

Ques.—Where can I get or make indeleble ink to mark clothes and which will not wash out?

Ans.—Any well-appointed drug store may supply you, but if not, take good gall ink and add a strong solution of Prussian blue dissolved in distilled water. This will write a greenish blue, but will turn black.

Ques.—I wish to ask in your interesting question and answer column how many passengers were aboard the "Mayflower" when it landed in this country? Also, can you tell me if there was a "John Billings" that was among the passengers?

Ans.—The log of the Mayflower that landed at Plymouth shows there were 41 passengers and 16 servants. There was no "John Billings" aboard, but there was a John Billington among the passengers.

Ques.—If you answer all questions will you please tell me how wide is a hair?

Ans.—Presuming that you mean the hair of the human head, we will say that the color determines the coarseness or fineness. The average for these is one-thousandth of an inch in thickness.

Ques.—Did Columbus introduce tobacco into this country from Spain or Italy?

Ans.—No. Tobacco was not known in Spain or Italy at the time Columbus sailed for these shores. Tobacco was discovered in 1496 in San Domingo. In 1520 the Spaniards found it in Yucatan. In 1560 it was introduced into France, and in 1583 it was taken to England. Shortly after that it began to be cultivated extensively in Florida.

Ques.—Isn't it a fact the auto industry is ruining the railroad business?

Ans.—We don't know. However, the railroads shouldn't worry; the locomotive usually wins in the crash.

How One Man Lost 22 Pounds

Mr. Herman Runkis of Detroit, writes: "A few lines of thanks from a rheumatism sufferer—My first bottle of Kruschen Salts took all of the aches and swellings out of my joints—with my first bottle I went on a diet and lost 22 pounds and now feel like a new man."
To lose fat safely and quickly take one half teaspoonful of Kruschen Salts in a glass of hot water before breakfast every morning—an 85 cent bottle lasts 4 weeks—Get it at Penn's Drug Store or any drug store in America.

If not joyfully satisfied after the first bottle—money back. Adv.

SIX CYLINDER. SENTENCES

By DR. JOHN W. HOLLAND

No man is outdone until he un-
does himself from within.
The poorest poverty is riches in
comparison with the loss of
hope.
No live that you can review
your life with pleasure, so
shall you live twice.
Any argument that must be
fought with brilliant is not
worth the settling.
Life reminds me of a barn yard.
Those who do the least
crow the most.
Gossip is a natural born liar.
She can put two and two
together and make seven.

Michigan Happenings

A gold wedding ring, lost twice
since its purchase 28 years ago, is
back in the possession of Mrs. C. S.
Hughes, of Brady Township, Owasco,
after having been missing 27 years.
It was found by Mrs. Hughes' brother,
G. J. Current, in a field. The ring
first was lost by Mr. Hughes, while
plowing in North Dakota. He had
bought it as an engagement ring, but
lost it before he could give it to his
daughter. The couple were married soon
afterward, in Brady Township but
Mrs. Hughes lost the ring again four
days later.

A place named "Devil's Ice Box,"
near Quilicura, five miles from Iron
Mountain, is one of the coolest places
in the United States and sweetening
tourists arriving there are finding re-
fuge. The "ice box" is so cold one
cannot stay inside long before the
heat outside is welcome. It is a tun-
nel through a hill and contains several
holes and a test pit 35 feet deep, the
result of iron ore explorations many
years ago. The bottom of the pit is
covered with solid ice, 3 to 4 feet
thick, which never melts the whole
year round.

When Howard A. Fuller, Bay City
airplane pilot, made a forced landing
because of a diminished gasoline sup-
ply, he was fortunate in choosing a
field adjacent to a gasoline filling
station. After landing successfully he
did not even get out of the plane but
taxied over to the station, ordered
the attendant to "fill her up," and
then proceeded to take a James
Kavanaugh, attendant at a station on
Broadway, near Fifty-ninth street,
reported the first roadside airplane
refueling on record.

Joe Schmidt, 45, of Allen, is dead,
and Walter Kromenski, also of Allen,
was detained by authorities of St.
Charles for investigation after a fatal
automobile accident. Kromenski's car
overturned 10 miles east of St. Charles,
Kromenski, who can neither read nor
write, was unable to see the stop signs
and let his companion who was unable
to drive, take the wheel of the car.
The car later overturned, breaking
Schmidt's neck. Kromenski was not
injured. Investigators say both had
been drinking.

An increase of 3.4 per cent in the
spring pig crop and indications for
a material increase in the number of
sows to farrow this fall were reported
by the Michigan Co-operative Crop
Reporting Service, of Lansing. The
statements are based on a survey
covering 2,600 farms of the state.
Marketing next fall and winter
should reach about 15 per cent above
the supply for last fall and winter.

In receiving 10-year-old Bernice
Ludwig from a quicksand bog in the
Chippewa river, near Mt. Pleasant,
Vera Coffin, 19 years old, sophomore
at Central State Teachers' College,
saved her third person within 13
months. Miss Coffin, on June 15, 1930,
rescued Farol McCall and Alva
Michelson from drowning at Flint
park, Flint.

Here is a story in which a cat
proved truthful—the idea—that they
have nine lives. A blue racer and a
tomcat fought it out at a lake resort
near Sturgis. The fight lasted 15 min-
utes. The cat cuffed the racer at will
and parried each lunge with ease. The
final round found the snake dead
and the cat, untouched champion of
the day.

Crystal Worthington, 15 years old,
drew her life to the shortness of two
boys, who saved her from drowning
at a resort near Coldwater. Crystal,
seized with cramps went down in 15
feet of water. Neal Haggerly and
James Wirt, 18, dived repeatedly until
they found her. Artificial respiration
revived the girl.

UNITED STATES PURCHASES

1500 FORD MOTOR TRUCKS

The United States Post Office Department has placed an order with the Washington Branch of the Ford Motor Company for 1,500 motor truck chassis, of which 500 will be 3-ton carrying capacity and 1,000 of 1-1/2 tons carrying capacity. The purchase of the motor equipment was the largest made by a government department since the war. With this order Ford sales to the Post Office Department during recent years reached a total of 2,000 units. The purchase marked another step in the Department's program of building up its fleet of several thousand trucks and also to replace some of the surplus trucks turned over to the Post Office Department by the Army at the close of the war. The order was placed with the Ford Company after an exhaustive test conducted by the Department with the co-operation of the Bureau of Standards. The tests were under the supervision of W. A. Jacobs, automotive engineer of the Bureau of Standards, and William Wolna of Chicago and Morris Carrier of Brooklyn, motor vehicle engineers of the Post Office Department.

And Now Ann Has A United Electric Washer

—and Best of All, It Doesn't Tangle the Clothes

"You can't help but admire Ann Davis. She always has such nice things and Bob doesn't earn one bit more than the rest of our husbands. Why, I stopped in to see how today and she had a new electric washer. It was a darling, with a beautiful green one-piece seamless porcelain tub and large cushion winder rolls. 'Good Bye one hundred dollars,' I said laughingly. 'Not much more than half that,' she replied smilingly. 'What?' I exclaimed. 'It looks like a good washer.' 'And what's more, it is,' she broke in, 'and a very good one at that. Just thing! It has steel cut gears and Durox bronze bearings. The gear case is completely enclosed and filled with oil which makes oiling unnecessary. And it's powered by a General Electric motor.' 'However,' she continued, 'the best thing I like about it is the way it washes. You can wash the most delicate pieces with perfect safety or the most dirty absolutely clean!—and best of all it doesn't tangle the clothes like most agitator machines do. 'I wouldn't take the world for my UNITED WASHER!'"

Ann is a clever buyer. She always insists on the best although not always the most expensive. Why not try a United electric washer. We guarantee you more washer per dollar than ever offered to the American public before. Phone 413 and ask Mr. Heydlauff for a free demonstration or see this washer on display at Dutton & Tuttle barber shop. Ask about our liberal deferred payment plan.

The World Question His Heart Cut Out Paying for the War To Live 100 Years

The world question is: "What is Germany's condition?" The second question: "What would happen to the world if German industry and finance should collapse?" That probably will not happen, although German effort to borrow \$500,000,000 to bolster the Reichsbank shows how difficult the situation is, even after President Hoover's energetic action temporarily stopping payments under the Young plan.

Another racketeer killing in New York city emphasizes, horribly, the brutality and bitter hatred that inspire these killings. Carmello Leonetti, racketeer connected with the Brooklyn Barbers and Longshoremen's union, was the victim. His throat had been slashed, the head almost severed from the body, and his heart actually had been cut out.

Human nature develops hideously when contempt for law becomes universal, as it has done recently in the United States, when officials supposed to enforce the law share the profits of lawbreakers, and fear of punishment is removed.

This column has occasionally remarked during the recent "sky-the-limit" boom: "Sooner or later the world will begin to pay for the big war, and will not enjoy the process." The world, including this part of North America, is paying now, and not enjoying it.

The moratorium simply recognizes the fact that you can't get blood out of a stone, even a German stone, and that it would not pay to drive into bankruptcy one of the world's great industrial and financial national units.

John D. Rockefeller says he hopes to live 100 years, and his fellow citizens hope that he will. He has rendered one great service, proving the foolishness of unrestricted competition, the most wasteful thing in the world. And, having accumulated hundreds of millions, he spends them usefully for science and education. The people would like to see him live to one thousand years, except that it would not amuse him.

Japanese scientists at the Kyoto Astronomical observatory have added another to our family of planets circling around the sun and going with it through space, heaven knows where. The new planet is no dwarf, for its diameter is 3,000 miles greater than that of the earth. It was discovered to the south of the "Snake Charmer Constellations" about one hundred million miles from the earth.

This planet is another monument to the great Newton. It lies around the sun in its orbit, held in place by mysterious gravitation, in accordance with Newton's formula. And there is something, call it "imponderable ether" or what you like, between the sun and the planets. No force could act through a vacuum.

Miss Camilla Kelly of Memphis, Tenn., officially known as "Judge Camilla," in a sound speech says that in women misbehavior is just a little worse than in men. Judge Camilla says that holds women to a higher degree of responsibility, because they are mothers of the race. Men, she thinks, "have been a little deceived by their superiority complex."

Misbehavior in women is as shocking as the sight of a rose floating in a sewer. If it were a turnip or a potato it would not be so bad. Women are the roses, men the turnips, and women ought to remember it. But they don't when they drink cocktails, dress indecently, cultivate the use of profanity, drag jewels that foolish husbands give them through speakeasies, where gangsters are quietly taking notes.

A how kind of war flourishes among our friends in Asia. On Japanese soil, Koreans have taken to killing Chinese, in violent mob uprising. Eighty-two killed recently included three women. Chinese retaliating, destroy Korean irrigation works, ruining the rice fields. Those that expect peace to cover the earth very soon are too optimistic. While mere difference of race breeds hatred, there can be no safe peace.

A French cartoon shows a lion and a lamb in a circus cage. The circus owner says: "Sometimes they do not agree." Asked: "What do you do in that case?" He replies: "We get a new lamb."

Let us hope the United States will remember that, and not play the part of the peace lamb, since it must live among fighting nations.

Trotsky, exiled from Russia, says only 5 per cent of Russians live as "Socialists," and wants Russia to put Stalin out of power. That suggests a fable in which the mice decided that somebody should put a ball on the cat that all might know when the cat was coming. No mouse wanted the job of "belling the cat."

Marvelous are the changes in our highways, many the billions spent on them within a quarter of a century. And the country owes that to mass production of automobiles.

Wheeler's Centrifugal Force
The bureau of standards says that the centrifugal force of a revolving wheel is greater at any point on the rim than at any point nearer the center.

Hypocrisy Defined

Hypocrisy is the art or practice of feigning to be what one is not, or to feel what one does not feel, such as the false assumption of an appearance of virtue or religion, a false or insincere profession of goodness by one whose aims are selfish or whose life is corrupt.

Old Stage Favorite

The theatrical career of "East Lynne" dates back to March 23, 1863, when it was performed at a New York theater. Triptera's hall, Clifton W. Taylors, a Brooklyn playwright, prepared what was probably the first dramatic adaptation. Lucille Western was the first actress to play the role of Lady Isabel.
