**State Salaries Are Under Fire**

Lansing, Mich., April 6—Declaring that Governor Brucker's economy program submitted to the legislature is but scratching the surface, members of the legislature are preparing for an assault upon the state payroll that may return salaries of state officials and higher-ups to the same place they were ten or twelve years ago. Department heads who are now drawing \$6,000, \$7,000, \$8,000 and even higher amounts are in danger of having these sums cut almost in half.

It became known early in the present week that Representative Vern Brown of Mason has for weeks past been making a study of the payrolls of the various departments. He is now having his information prepared for dissemination among members of the legislature.

Not only has Representative Brown been active in seeking a worthwhile saving in state payrolls, but Senator Chester Howell of Saginaw, has already started a movement in the legislature to fix a maximum salary of \$5,000 per year for all state officials. Hundreds of thousands of dollars, it is pointed out, would be saved by the adoption of Senator Howell's suggestion.

Representative Dana Hinkley, another newspaper man from Pontiac, has introduced a bill to cut the pay of the members of the legislature \$500 a year.

There is now something like 11,308 paid employees of the state. This does not include the educational institutions and concerns only department workers. Last year the taxpayers raised \$17,500,000 to pay these employees. Representative Brown believes that this amount can be reduced considerably under \$10,000,000. Senator Howell has indicated that the greatest saving that the state can make will be in the general reduction of salaries.

Governor Brucker has already indicated his willingness to accept a cut in his own pay, which is fixed by the constitution. This follows the step taken several months ago by Secretary of State Frank Fitzgerald who announced a reduction of his own pay and that of all the higher paid employees in his department.

Next in importance to the proposal of the legislature to go way beyond the recommendations of the Governor for salary reductions, comes the diversion of highway funds.

Already the administration bill introduced into the legislature apportioning the weight tax monies among the counties, cities and villages, has been recalled.

It was discovered that it provided for little of the relief that rural sections and cities had anticipated, and that over \$10,000,000 was retained in the measure for new highway construction each year, an amount sufficient to build 400 miles of new roads.

Some members of the legislature believe that there should be a holiday declared on road construction and from sentiment expressed it is pretty sure that the law makers will not approve any measure providing for a considerable amount of road building during the present year.

Numerous other measures providing for tax relief have been introduced and by the end of another week it is probable, say legislative leaders, that some definite legislation will have been agreed upon.

### Minnow Licenses

#### Now In Demand

Lansing, April 6.—The first indication of the approach of another fishing season, May 1, is being felt at the Department of Conservation office where a rush for minnow licenses is now under way.

While only 81 minnow licenses have been sold since January 1, it is expected that between two and three hundred more will be issued by the time the trout streams and the "pike" and "trout" lakes are opened to fishing May 1. Last year the Department issued 480 licenses to commercial minnow dealers. The licenses are sold at a cost of \$10 each.

These licenses are now required of all persons taking minnows for commercial purposes, and the waters in which they may take minnows are listed on the licenses.

No license is required to re-sell minnows if they have been purchased from some person holding a license or if they have been shipped into Michigan from some other state provided proof is furnished of their origin.

No license is required to take minnows for personal use although minnows may not be taken or transported away from a trout stream where the use of seine, dipnets and traps are forbidden.

Michigan's general fish laws define minnows as being "chubs, shiners, dace, stone rollers, muddlers and mud-minnows". They may be taken, under license with seines not to exceed thirty feet in length and eight feet in width in the designated inland lakes and streams and in seines not to exceed eighty feet in length and eight feet in width in the Great Lakes and connecting waters. Dip nets not exceeding three feet square without sides or walls and minnow traps not exceeding twenty-four inches in length and hook and line, may also be used.

### Early Workers Get

#### Best Looking Lawns

East Lansing, April 6.—Good lawns depend on an early start in seeding new areas or in reseeding the places where the grass has failed in old lawns, according to the soils department at Michigan State College.

The lawn should be raked as soon as the ground dries sufficiently and uneven places should be leveled up by adding new soil. Seeding while the ground is freezing or while there is snow on the ground will not hasten the growth of the lawn.

The grass mixtures recommended by the College men are bluegrass, 50 percent; Cheving's New Zealand fescue, 20 percent; redtop, 20 percent; and Colonial bent grass, 10 percent; for all places except shaded spots where rough stalk meadow grass, 40 percent; Cheving's New Zealand fescue, 30 percent, redtop, 20 percent, and Colonial bent grass, 10 percent, should be used.

Use 20 to 25 pounds of a high grade fertilizer to each 1,000 sq. ft. of lawn. The recommended analyses are 10-8-6, 10-6-4, or one with similar proportions of plant food. The fertilizer should be mixed with dry sand or other soil to permit its even distribution by broadcasting or with a small hand drill. Always apply fertilizer when the grass is dry and water immediately after the application. Use ammonium sulphate, 5 pounds to 1,000 sq. ft., to stimulate grass growth later in the season. Do not fertilize during hot, dry weather. Shaded spots need more light applications of ammonium sulphate and lots of water.

Roll the lawn only once. When watering lawns, thoroughly drench the soil and do not water again until the soil is dry. Frequent, light waterings may injure the grass.

Set the cutterbar of the mower at two inches for the first two cuttings and then lower it to one and one-half inches. Cut the grass as often as it gets one-half inch above the cutterbar height.

### NOTTEN ROAD

"A job for me? Gee, that's great! I'll report in the morning, sure"

The man who can be reached quickly and easily by telephone usually is the first to be called back to work.

A telephone in the home is protection, too, making it possible to summon aid instantly in case of fire, sickness or accident.

Under Frozen Stars By George Marsh

CHAPTER I

"Smoke, old chum, there's some thing afloat out there to the south. Ears pricked, the massive black and white husky raised slant eyes to the speaker. Jim Stuart watched a distant object, which regularly disappeared, to lift again on the white crest of the running seas.

While Omar fought to hold his bow into the wind against the drag of the yawing canoe, Stuart worked desperately to get the limp body of the girl into the boat without rolling them under a lifting sea. At last, she was in the peterboro, and, as a ridge of water broke at the bow, they cleared the boat and headed for Sunset House.

"You're warm again—no chill!" he asked, poignantly aware of the picture she made in the frame of the door. "Yes, my heroic rescuer," she began archly, "and now Monsieur Sourface, that I'm warm and dry again and look less like a drowned fish, do you not like my bettering?"

"Dear me, but I'm hungry!" exclaimed the girl, as the outraged and inquisitive Ojibwa woman, made on hips, boldly scrutinized her from bobbed hair to whitecord knickers—to gain a better view of which the cook coolly stepped back and crested her chair.

"What you do wid her?" demanded the half-breed, as the two walked to the rear of the building. "What can we do, Omar? She's got to stay until the wind drops."

"In a frenzy of excitement, in all likelihood this vivid creature, who for a few hours had shared the hospitality of Sunset House, would never again cross his path. In the autumn she would return to the world outside, and in the meantime, in spite of LeBlond's gratitude, the rivalry between the trading posts and the open hostility between the company servants would prevent Stuart's seeing her."

"You mean you would paddle these some day alone?" Stuart asked, wondering what manner of girl this was who so lightly put her trust in a stranger. "Perhaps I should so far forget myself," she replied archly, "if I found an answer to my note."

Spending to save .. through ADVERTISING

Not many of us, these days, are troubled with so much money that we cannot spend it. But we ARE interested in spending the money we have, to get the most out of it.
One way--and not a new way, either--is to make a budget. Put down, week by week, the money that comes in. Put down beside it, week by week, the money that goes out. So much for food, so much for clothing, so much for rent. So much for giving, and for luxuries.
It won't always be easy, of course, to stay within the budget. That's where advertising helps you. Advertisements in this newspaper tell you how much butter, foods, meats, clothing, drugs will cost, BEFORE you go shopping! They point out ways to save money. They show you how to cut a little here, a little there. And they tell about new products, new ways of doing things, that help make this life of ours very much worth living!

Wholesale Blacksmith Shop
Local Headquarters for the Famous Red Top STEEL FENCE POSTS
RIGHT here is the place to get those Red Top Steel Fence Posts you see advertised in your farm papers.
This Red Top steel proved post tested by farmers in thousands of fence lines. It's got a mighty good record right around here. The studded Red Top is extra strong without a weak spot in it. It has a long life. You can drive over 200 posts in a day with the One-Man Drive. The Handy Fasteners that come free with the posts are made so as to hold the wire securely, thus doing away with retwisting and restretching.
The Red Top post is guaranteed by the maker. Their guarantee is worth one hundred cents on the dollar. We are authorized to make all adjustments. So we put our own personal endorsement and guarantee on every Red Top we sell.
It's just that kind of an article we like to handle in all lines. The leader in its field. One of the main points we look at in our buying is to get the makes of things that give our customers the most value for the money. We don't expect to prosper unless you get a good buy for your spend.
Drop in and see us when you're in town. Prices are mighty reasonable. Just now on fencing materials and many other special items.
