Annual Meeting Held Monday Night By Local District

At the annual meeting of School District No. 8 fr., Sylvan and Lima, held Monday evening at the public school auditorium, Geo. W. Walworth and Julius N. Strieter were elected trustees, each for three years. They were elected to fill the vacancies caused by expiration of the terms of David Mohrlock and L. P. Vogel.

Preceding the balloting for trustees, the meeting adopted the budget of \$23,585.00 as recommended by the Board of Education for the 1933-34 period. The meeting also voted to levy an assessment of 6 mills for operation of the school and 2 mills for debt service, contrary to the recommendation by the county tax commission, the Board and superintendent, for a levy of 8 mills and 2 mills respectively.

The summarized budget as recommended and adopted is as follows:

Expected Receipts
From Primary School Fund \$ 4,500.00
From Tuition 4,000.00
From Voted Tax 15,000.00
From Miscellaneous Sources 80.00

Total \$23,580.00

Expenditures
1932-33 1933-34

General Control \$ 3,398.28 \$ 3,330.00

Instruction 17,150.70 11,500.00

Operation of School Plant 3,394.65 3,200.00

Fixed Charges 696.16 650.00

Maintenance 1,023.62 950.00

Auxiliary Agencies 1,002.56 925.00

Debt Service 3,170.00 3,080.00

Capital Outlay 773.37

Total \$30,701.28 \$23,535.00

Bonded-Indebtedness Outstanding \$24,000.00

The item of expected receipts from the primary fund compares with \$7,706.26 which was received this year. This estimate came from the State Department of Education. The expected amount in the tuition item compares with the sum of \$4,848.70 which was the net amount received during the past year after refunds were paid to three districts. The item was placed in the budget at \$4,000.00 with the expectancy for this amount of reduction, which may be caused by lowered tuition fees. This is possible if other nearby schools reduce their fees to \$50.00 instead of the \$60.00 now charged. On the other hand, some of the outlying districts may not be financially able to pay their tuition. Furthermore, there may be fewer foreign students attending the local school next year. The number last year was ten per cent higher than any previous year and it is to be expected this number may decrease.

Had the total of 10 mills been voted, the estimated receipts would total approximately \$16,000.00 in revenue if all taxes were paid. Last year there was about \$2,100.00 in delinquent taxes. Planning for the delinquency of next year and for the receipt of a portion of last year's tax money the amount of expected receipts was placed in the budget at \$15,000.00. However, with the voted mill tax of 8 mills this amount is expected to be about \$3,000.00 less than the budget estimate.

As a result of the action taken in this matter at the annual meeting the only hope the district has of meeting the budget as adopted is state aid which is expected to be forthcoming. The sales tax measure as enacted by the last session of the legislature provides \$15,000,000.00 for school aid. However, the act states specifically that \$31,700,000.00 of the sales tax money must go for other purposes before the schools get a cut, and this is about the total amount of estimated receipts from the tax unless business takes a sharp turn for the better. In event there is enough money collected for school aid the schools will receive their portion until the end of the tax year, which would be next July 1.

A special session of the legislature may be called, however, to deal with the school aid problem and in this event no doubt funds will be provided so that schools of the state will be able to function for the full school year.

M. J. Dunkel Elected President
At the organization meeting of the new Board of Education, held Tuesday night, M. J. Dunkel was elected president, and Geo. W. Walworth secretary. The ballot for treasurer resulted in a tie vote, J. N. Strieter and J. I. Fletcher being the nominees. Mr. Fletcher was not present at the meeting, as he is vacationing in the North, and this matter will be settled at the next meeting of the Board, after Mr. Fletcher's return.

Bouquets of garden flowers decorated the rooms and the dining table was centered with a beautifully decorated cake topped with a miniature bride and groom. Dainty refreshments were served.

Guests were present from Battle Creek, Lansing, Leslie, Williamston, Ann Arbor, Dearborn and Chelsea. Mr. and Mrs. Hathaway received many lovely gifts.

This amount the boy is honor bound to pay at some future time, so that some other boy can take advantage of the trip.

WHEAT YIELD IS LIGHT
H. A. Prudden and Elba Gage were the first farmers in this vicinity to have their wheat threshing done. Mr. Prudden states that while the grain had a wonderful setting, it was not filled out as well as in former years, on account of the dry weather. One field of 25 acres yielded 683 bushels of wheat. Elba Gage threshed 411 bushels from a field of 15 acres. The straw is very heavy.

Legislative Revolt May Upset Governor's Veto

GOV. COMSTOCK'S FRIENDS ARE ALARMED OVER REACTION TO VETOES OF SMALL LOAN AND CHAIN STORE BILLS

Members of Governor's Own Party Urging Colleagues to Attend Final Session July 17 to Override Vetoes on Two or Three Bills

By Vernon J. Brown

Contrary to the usual custom of just a few of the faithful gathering for the final and formal adjournment, present indications are for a real session of the legislature on July 17. In fact right now there is a well developed plan under way to secure the presence of every member possible, in an effort to override some of the vetoes which the governor has exercised. The demand for the return of the members is coming from several sources and is gathering strength with every passing day. Already Governor William A. Comstock has one distinction, namely that of having a vetoed measure passed over his objections by a unanimous roll call in the house, something never accom-

V. J. BROWN

plished before. This was a bill that took away the authority of the superintendent of public instruction over school buildings. The governor vetoed it and the house promptly passed it over his head.

The governor picked out two hot ones for executive disapproval when he decided to veto the small loan bill and the bill providing a graduated license tax on retail stores and designed to place a handicap against the chain stores. It was backed by 50,000 independent merchants of Michigan who in turn were supported by 10,000 employees of 2000 jobbers and wholesalers. In the background also are found some 50,000 clerks of retail establishments each of whom has relatives and friends. It is a formidable group whose members can fight hard and they are doing it.

Small Loan Veto

Another group which is putting in some road-blocks is composed of those who feel the sting of insinuation which followed the legislative investigation into lobby practices at Lansing during the past winter. Among the most active lobbies and certainly the lobby which operated in a most vicious manner was that of the small loan interests. When the lobby investigation broke, it faded out of the picture and a strange quiet pervaded but

along with that came also strange undercurrents of rumor that no matter what happened to the bill in the chambers it would not become a law. Now that the governor has vetoed the bill there are a number of the leaders of his own party who are out to secure a sufficient number of votes on July 17 to enact the measure into law.

One of the letters which have gone out from a democratic member of the house to his colleagues is a fair sample of the others which are going about between members. This member was among those who stuck pretty close to the administration ship during the winter session and his letter is especially interesting for this reason. He writes in part: "In the 'New Deal' at Lansing both parties cooperated in carrying out the pledges made to the people in their respective platforms. Are we now going to repudiate those solemn pledges we made or are we going to act to carry out the mandates of the voters? It is a question of principle. Shall we legislate for the classes or the masses?"

Last fall during the campaign a great many democratic members took decided stands on the small loan act. They promised the voters of their respective districts that they would either outlaw the small loan and household finance concerns or reduce the legal interest rate to not more than one per cent per month. At the conclusion of one of the hottest fights seen in a Michigan legislature in years, the interest rate was finally reduced to one and three-fourths per cent per month. The present rate is three and one-half per cent per month or 42 per cent per year. The bill as passed calls for a legal rate of 21 per cent per year. It was opposed by one of the most active and pernicious lobbies ever operating in Lansing. The governor has vetoed the bill with the explanation that he has become convinced that the small loan concerns cannot operate at 21 per cent a year. His critics and the opponents of the present act which must stand if the veto stands, assert that they are not concerned with the continued existence of the small loan companies. They point out that no working man can afford to pay so high a price for borrowed money and that the small loan shark and salary check grabber was forced to work in secrecy while the present law provides a cloak of respectability which the three ball artist never enjoyed. They point to high powered salesmanship as typified in newspaper and radio advertising as proof that thousands are lured into signing away their household effects without warning as to the high interest rates charged. The small loan act is a hot member and the governor is getting a lot of panning for his veto. It is possible that two-thirds of both houses may upset his plans to save the iniquitous concerns which prey upon the poor and the imprudent of the state.

There are two other bills, somewhat companionlike in their character which the governor has vetoed and for which vetoes it is difficult to discover a logical reason. In 1929 a clever ruse resulted in the passage of a bill which permits extended season and increased bag limits for members of private hunting clubs. In other words, a farmer may rake several flocks of pheasants upon his lands but if he is caught shooting one out of season, even if the birds are destroying his crops, he is subject to arrest and severe punishment. But if a so-called sportsman has money enough to own a membership in a licensed club, he is permitted to shoot both before the opening of the regular hunting season and after and may legally shoot a larger number of birds. It is the European system brought to Michigan and it has been the subject of more acrimonious discussion among hunters and sportsmen than any other measure. It was the center of a heated battle during the session of 1931 when its repeal passed the senate and was then tied up in a committee of the house which had been hand selected by the millionaire club members who had the ear of the speaker. Its repeal was easily accomplished during the 1933 session; not much opposition to its passage being in evidence.

Again it is charged that the interests behind this un-American law knew that the repeal of the law was nothing to be feared as long as the governor kept his veto power. The companion bill to the foregoing is the Morley trespass bill which was designed to put more teeth in the Hor-

ton trespass law. It was asked for by southwestern Michigan fruit growers but evidently because it interferes with the privileges of the hunters there is holding out in good shape. Governor has seen fit to veto it.

Journalism Running Wild

A year ago when the commission of inquiry into state governmental expense set about its work one of the early discoveries made by that group of legislators was the extent to which the propagandist had gone in state affairs. It was found that several department heads had editors on the state payrolls and that huge gobs of pure bunk was being sent out to the newspapers and periodicals of Michigan. All of the so-called "publicity" was and is designed to build up the political prestige of some state official or to promote the interests of some department in order to make certain of more generous appropriations. Most of it is designed to create in the public mind the idea that the Honorable Mr. Whosis is a wonderful guy, a great public official, and a friend of the dear "peepul" who by all means should be re-elected to his office or elected to some higher and more remunerative office. The commission of inquiry called attention to this growing evil and called upon the board of state auditors to clamp the lid on the practice. The statutes put this responsibility squarely at the door of this board.

Not only is the demand for retrenchment of this expensive practice going unheeded, but quite to the contrary it appears the lid is now off entirely. The democratic state central committee has provided a skilled news writer, according to announcements made by the secretary to the governor, who will take the stuff prepared by department heads and whip it into real press agent stuff in strict Hollywood manner. The governor has also explained that this new service is intended in no way to cramp the writing style of any state official who wants to do his own press agenting.

Meanwhile the printing and mimeographing bills are piling up and the postage stamps are being consumed in mile-long strips. The taxpayer not only gets his pockets picked—he actually pays for having them picked—and for the privilege of having it done in an artistic and accomplished fashion.

Merely Propaganda

In this connection it must be mentioned that the legitimate news regarding state affairs is covered by a staff of trained reporters maintained at the state capital by the important newspapers of Detroit and Grand Rapids, this staff being augmented by one of the best news writers in Michigan supported by a string of smaller city dailies. Added to this pretentious list are correspondents constantly on the job and looking for news in the interests of the Associated Press and the United Press agencies. What goes out from the departments is not legitimate news. It is colored propaganda and there is no excuse for it. It costs the taxpayers money to send it out but it costs the same taxpayers indirectly a whole lot more because it is sent out.

The latest to succumb to the lust for propaganda is no less a personage than the director of agriculture, the Honorable Samuel T. Metzger. This week he is out with four pages of bunk in which is discussed a lot of things including the value of his department inspectors in teaching the farmer how to pack and grade his crops and how to find the highest prices for his commodities. At least Sam cannot be charged with modesty. He writes in the first person and talks of "our" and "we" as if writing to a dear friend. Incidentally it might be added that Michigan taxpayers are already digging up a lot of money for extension work at Michigan State college, most of which is along educational lines connected with agriculture. The latest venture appears like an inexcusable duplication. Nearly 40 pages of manuscript a week, devoted to the interests of the American Medical Society and disseminated at the expense of University of Michigan funds, is another newcomer to the publicity field for which the taxpayer pays. Such old offenders as the secretary of state and the department of conservation are not here mentioned except to say that they are still operating on a high production basis. The federal government started this expensive business but Michigan keeps at it she will outpace the government publicists.

A large crowd witnessed the laying of the corner stone of the Methodist church on Wednesday, July 12. Among the things in the box which was placed beneath the cornerstone were: Minutes of the Detroit Conference of 1898, The Chelsea Standard of the 6, 1899, The Chelsea Herald of the same date, The Detroit Free Press of July 12th, The Detroit Journal of July 11, The Michigan Christian Advocate of July 8, the Methodist Hymnal, the directory of the Methodist church, names of bldg. comm. of the new church, the date of the burning of the old church, the date of laying the cornerstone, and the key to the old church. Loren Haddock, one of the oldest and most active members of the church, placed the cornerstone in position.

AN OLD SUGAR BUCKET

I was looking today at an old sugar bucket.

That has been in the family for years.

I looked at the outside—I looked at the inside.

And hardly could keep back the tears.

For back in the life of pioneer days,

When crabs and bugs were found hard to meet;

Through suppline or shadow, through heat or through cold,

The bucket never failed to keep sweet.

As we stated before in the pioneer days,

When grandma was young and strong,

With uncle and mama, with butter and eggs,

The bucket was taken along.

Though wagon was loaded, the bucket must go!

Though scarcely were room for their feet,

The bucket was crowded well up to the front,

Which mama would use for her seat.

My grandma passed on many long years ago,

And the bucket an heirloom became;

To our own dear mother who down through the years,

Endeavored its use to maintain.

And sometimes, when I was a wee little girl,

On the bucket I sat, at her knee,

While she combed out the hair of my tangled curls,

And away I would run in full glee.

Many loved ones have gone—my dear mother too,

And scenes I have cherished most dear;

Yet memories, sweet memories abide with me still,

Often coming my spirit to cheer.

Not least of them all as I sit and recall,

Always making me happy to greet,

Is the bucket all marred by time hand—

—aff scared,

Yet never once failed to keep sweet.

—Dedicated to my daughter, Mrs. M. Burdella Trad, by her father, Arthur Carlton, M. E. Home.

DUNDEE—Lulu, a village south of here, and well known to Dundeeites is at present the central part of a new oil boom. A well known company from Mount Pleasant has installed a drilling rig just east of the village and is prepared to sink a well. Some 3000 acres are at present under lease in that vicinity. It is the belief of many oil experts that Monroe county is the center of a rich petroleum field and numerous efforts have been made to tap the supply.—Reporter.

BRIGHTON

A group of boys found an Indian in Brighton's mill pond about a week or more ago. Well, yes, he was dead when found, but he had not been drowned. He never was alive in any real human sense of the word. But it is surmised by some that he used to stand in front of a cigar shop or factory somewhere in the neighborhood of the city hall, holding a bunch of cigars in his hands. When found he was like a famous piece of Grecian sculpture, without arms. In what particular battle he lost these appendages there is nothing to indicate. He seems to have been a cigar store Indian of unusual character and had apparently been hand carved from a log. His discoverers took him over to Don Leith's office across from the mill pond dam, where he was given shelter for a time. Gus Schreier, who delivers ice for Mr. Leith, took him home with him. We understand a photograph of this now rare specimen of red man is to be taken and forwarded to Liberty Magazine, which is offering \$10 for a picture accepted and published.—Argus.

Michigan Department of State

WEEKLY NEWS BULLETIN

Frank D. Fitzgerald Secretary of State

Lansing, Mich.—By virtue of a resolution adopted by the State Administrative Board, all interest, penalties and collection fees on 1932 taxes will be waived if the taxes are paid before November 1, 1933. The deadline for 1932 taxes originally was March 1, but this was extended by the legislature to July 1. The second extension was ordered by the administrative board after adjournment of the legislature.

The alphabetical system of distributing automobile license plates to the various counties will be continued in 1934, it was announced by Secretary of State Frank D. Fitzgerald. The same letters will be assigned in 1934 as in 1933.

More than 1,000 applications for positions with the Department of State or with the Sales Tax Commission, of which he is a member, have been received by Secretary of State Frank D. Fitzgerald within the last week. Mr. Fitzgerald is the only elective Republican state official now in office and a large majority of the applicants were state employees who had been discharged from other departments on July 1.

During the last two year period the Department of State operated at a cost approximately \$200,000 below the amount allowed by the legislature. Still further economies are being planned and instead of increasing the number of employees in the department, the personnel is to be reduced and still greater use made of the staggered system of part-time employment.

While \$30 a month pensions for most Michigan residents over 70 years of age, will become part of Michigan's laws within a short time, the method of providing funds for payment of the pensions is still doubtful. The Governor has announced that he will sign the bill as passed by the legislature but efforts will be made to provide some new method of raising funds. The act now calls for a \$2 head tax upon every Michigan resident over 21.

Cow Birds Are Laziest
of the Feathered Tribe

The cowbird ranks among the laziest birds of the field. It derives its name from the fact that it follows along behind or just in front of grazing cattle, feeding upon insects which are disturbed by the cows and leave their cover in the grass. When the cows decide to seek better grazing elsewhere and start off at a fairly rapid pace, it is not unusual for these birds to hop on the cows' backs and ride along with them, observes a correspondent in the Washington Star.

Even when it comes to perpetuating their species, the cow birds still are lazy. They build no nests of their own but lay their eggs in the nests of other birds, preferably smaller birds. The foster mother, when she hatches the cow bird's young along with her own, appears not to notice that the larger cow birds are not her own and feeds them and raises them at the same time as she raises and trains her own.

ELECTRICITY

buys many services

It used to be called a "light bill." Today, with all the electric conveniences, and helps about the home, lighting is only one service of many.

Where one formerly paid for a few lights and a few hours of illumination—now a few cents a day may buy anything from cooking to cleaning, radio to refrigeration, washing, ironing, cooling, heating, time, temperature—or even sunlight's helpful elements. Behind the mere enumeration of "kilowatt hours" there are many useful and varied services of increasing benefit and savings to the public.

If the monthly electric service bill of a typical customer using an ordinary variety of household appliances were rendered, it would be about like this—

Lighting	Six cents a day
Radio	One and three-fourths cents a day
Cleaning	One-third cent a day
Washing	One-third cent a day
Ironing	Three-fourths cent a day
Coffee	One-half cent a day
Toast	One-third cent a day
Sunlight	One-fourth cent a day
Refrigerator	Four cents a day
Cooking	One cent per meal per person

House Shape of Elephant

The world's strangest house is built in the shape of a huge elephant, the body 28 feet long and 80 feet in circumference, the legs 22 feet long, and the glass eyes 18 inches wide. To the top of the howdah, which forms an open-air sunbathing room on the elephant's back, is 65 feet, and the house can be seen eight miles away. There are 22 windows giving light and air to its six rooms and to the spiral staircase which occupies the two hind legs.

This peculiar residence is at Margate City, N. J., U. S. A., and is a memorial to an elephant the owner loved. —Tit-Bits Magazine.

Graduated from Williams college, he had taught there, studied law, been admitted to the bar, served in congress, been a general in the Union army, and been President about four months when a disappointed office seeker mortally wounded him in the waiting room of a Washington railroad station. He lingered 80 days before death relieved his sufferings September 10, 1881.

Question And Answer Dept.

Ques.—I would like to ask you why some newly married couples indulge in constant mushy cooing in public when they ought to be trying to better their station in life?

Ans.—There are several reasons for this, the most common one being the lack of etiquette and social training. They usually grow out of this when they begin to face the stern realities of life.

Ques.—I was born on July 29, 1923. Will you kindly answer in your question column the day of the week I was born on?

Ans.—You were born on Sunday.

Ques.—Can you tell me why a person can touch a red-hot iron with a wet finger and not get burned?

Ans.—Because the dampness on the finger when touched to a red-hot iron is instantly turned to steam, and this little layer of steam keeps the finger from coming actually against the hot iron. However, the protection is only for a moment. If you hold your finger on the hot iron for more than a very small fraction of a second, it will be burned.

Ques.—I am told that a drowning person always comes up three times. Why is that?

Ans.—There is a common belief that a drowning person will come to the surface three times. This is false. The number of times he comes up, if at all, depends on the circumstances—his strength, the weight of the body, and whether the water is salty or fresh, or in the currents. Usually when a person has risen the third time, his strength is gone and he cannot come up again.

Ques.—Can you answer in your good paper where wheat originated?

Ans.—It is not known where wheat originated. It has been known since long before the beginning of history. According to one authority wheat was a wild plant on the mountains north of the Holy Land and was gathered wild by primitive man and then gradually brought into cultivation.

Ques.—Will you please tell me in your question column, how hail is formed?

Ans.—It is not known for a certainty just how hail is formed. It is believed that hail is rain drops frozen by falling through a layer of very cold air.

Ques.—Which is the largest snake—the Boa Constrictor or the Python. Also how large are they?

Ans.—The Boa Constrictor, Python and Anaconda snakes are the same species. They differ a little scientifically only. The largest one captured, on record, was in South America in 1923, which was 22 feet long and measured 21 inches in circumference.

Ques.—Why does so-called "static" interfere with radios?

Ans.—Any kind of electric disturbance in the earth or air will set up ether waves. A flash of lightning, telegraph instruments, electric motors, etc. will do so. The ether is full of mixed up waves like those started by thunderstorms. It is not known what causes the disturbances.

Ques.—When and where did the human race originate, if we don't accept the Bible version of the origin of man?

Ans.—According to scientists unmistakable traces of man—bones and flint tools—have been found in England in rocks which were formed before the period of the "Great Ice Age." That was about a million years ago. Geologists think that man originated in Central or Southern Asia, and that he migrated from there into England and other parts of the world. But this is only theory. Asia has not been dug over as the rest of the world has, and if any remains of early man are buried there, they have not yet been found.
