Twilight Series Leaders North American Split Double Header

The "Little World Series" double-header played Sunday between the Trojans and Mayer Electric terminated in a victory and a defeat for each team. The Trojans won the first game 5 to 3 after being behind for four of the seven innings. Mayer Electric were victorious in the second game, the score being 11 to 1. Seven innings were ample.

But the outcome of the games was not the important thing of the encounters. The outstanding feature was the fact that Twilight League baseball history was created Sunday. Elwin Hulce, League president and high-scorer of the season, and highlight of the Mayer team, pitched both games. Undaunted by his first narstronger than ever to win the second game very decisively.

Will of 1573 Must Be Read Once Every Year

There are doubtless older testaments in the vaults of the register's office Henry Cloker probated in 1573, which must be read at the Wren, church of St. Magnus the Martyr Lower Thamesstreet, whenever a descendant of one of the original beneficiarles, wishes to

dispose of the property inherited. In the very nature of things, notes petitions for rereading have become that one reading a year takes place, and at every reading, according to the terms of the will, the executors, the Worshipful Company of Coopers, and the Master and Wardens must put in an attendance.

A booklet for distribution among those interested includes a copy of the will. It shows that the equivalent of \$30 was left to be spent every three years for the provision of "a fair drinking pott of silver and gilt" until there were twelve. The company must "provide some learned man to make a sermon' in the presence of the Master and Wardens, and pay him \$1.50, also 24 cents for reading the will. Stated amounts were also to be paid to the Master and Wardens. But they are not in pocket by these bequests. Their shares are earmarked for the poor.

Old Rocker Distinctly an American Invention

There is one style of chair that is thoroughly American—the rocker, asserts a writer in the Cleveland Plain Dealer. For a long time furniture men credited Benjamin Franklin with having invented it, until some one dug up a bill for "rebottoming a rocking chair" thirteen years prior to the exintence of the Franklin chair.

The rocker was introduced into Europe from the United States in 1840. Ourlously enough rockers were quite the thing in theater boxes 75 years the night he was assassinated at Ford's theater. The style of rocker was thereafter copied and known as the Lincoln rocker.

While the rocker has gone out of style more or less, the Colonial rocker is atill being manufactured.
