## Seniors to Present Play Thursday and Friday

Chelsea high school seniors will present "Captain Applejack," a romantic comedy by Walter Hackett, at the school auditorium on Thursday and Friday evenings of this week. The story opens with Ambrose Applejohn, an Englishman, growing restless knowing he is in a rut. He offers his ancestral home for sale, thus beginning a series of adventures with which the rest of the play deals. The group of jewel thieves attempt to steal a treasure from his home, providing a good deal of excitement in so doing.

The second act of the play portrays the dream of Ambrose Applejohn, in which he imagines himself to be a notorious pirate, and his associates to be the pirate crew. The dream influences his later actions and in the third act he triumphs over the plots against him.

This play has often been presented throughout Michigan in high schools and presents a colorful as well as amusing and interesting evening's entertainment.

The cast is under the able direction of Miss Leah Hazard, and the cast is as follows:

Lush, the butler—Vincent Ives.  
 Poppy Fair, Ambrose's ward—Jane Belsor.  
 Mrs. Agatha Whatcombe, the aunt—Wilhelmina Gottschling.

## Dog Quarantine Is Being Enforced In Washtenaw County

As the result of a dog quarantine which has been spread over Washtenaw county, at least four dogs have been shot in Chelsea and it is the plan of authorities to continue the war on dogs which are on the streets unaccompanied by their owners or some other person. The county dog warden made the raid on local dogs one day last week and will be here again this week or in the near future to continue his work.

Considerable complaint has been heard locally because of the haste in enforcing the quarantine and the lack of publicity given the matter before the raid was started. Several signs were posted about the village last week but there was no material furnished The Standard which could be published as a warning to dog owners, and many people were unaware of the fate facing unaccompanied dogs until the news spread that the animals were being killed.

The complete text of the quarantine order issued by the State Department of Agriculture is as follows:

"The fact has been established that dogs affected with an infectious and communicable disease known as 'rabies' have recently been at large in Ann Arbor and Ypsilanti townships, and in the vicinity of Ann Arbor in Washtenaw County, Michigan, and are known to have bitten persons and animals and may have come in contact with dogs as yet unknown.

"Notice is hereby given that all dogs owned or kept in Washtenaw County shall be kept securely under control or properly confined to prevent the aforesaid dogs from biting any other animals or persons. No person owning a dog and/or having the custody of any dog within the County shall allow the same to run at large, except upon a written permit from the Commissioner of Agriculture, or his authorized representative. To secure such a permit, the dog shall be tagged for identification and the owner shall produce a certificate signed by a graduate, licensed veterinarian, showing that the dog has been properly vaccinated against rabies within six months prior to the issuance of such permit.

"The attention of all owners or keepers of dogs in the above named territory is hereby called to the following sections of the Michigan State Laws relating to the Bureau of Animal Industry which provide a penalty for violations of this quarantine order and read as follows:

"Sec. 6. Said commissioner shall also have power to declare and enforce a quarantine on dogs in any district of this state in which there is an outbreak of rabies, hog cholera, hoof and mouth disease, or any other contagious or infectious disease among the livestock; and may order that all dogs in said district shall be securely chained or otherwise confined. Any dog found at large in contravention of terms of such a quarantine or order may be killed. It shall be the duty of the sheriff of each county in the district affected and of his deputies, constables and other municipal police officers to see to it that such quarantine and orders are enforced. Any officer killing a dog pursuant to the provisions of this act shall not be subject to any liability therefor.

"Sec. 23. Any person violating, disregarding or evading any of the provisions of this act, or any of the rules, regulations, orders or directions of the Commissioner of Animal Industry (Commissioner of Agriculture) made pursuant hereto, shall be deemed to be guilty of a misdemeanor and by conviction thereof shall be punished by fine of not less than ten dollars nor more than five hundred dollars, or shall be imprisoned in the county jail for not more than six months, or both such fine and imprisonment in the discretion of the court. The doing of any act herein declared to be unlawful, or herein forbidden, shall be deemed to constitute a violation hereof.

"This quarantine order shall be in full force and effect from and during the period between Feb. 17, 1936 and June 30, 1936, inclusive.

James F. Thomson, Commissioner of Agriculture.

## Milan Prison Warden Addresses Kiwanians

Warden John Ryan of the Federal Detention Farm at Milan, addressed the Kiwanis club at their Monday evening meeting, discussing the problems confronting the management of a Federal prison, and the methods employed in the operation of such an institution.

Mr. Ryan, who has been warden at the Milan prison since it was opened in 1932, has had 35 years' experience in this line of work and is well qualified to talk on the subject of prison regulations and routine. He is a firm believer in the probation system for violators of the law in a great many cases, rather than compelling the man or woman who has committed some minor misdemeanor to face the stigma of a prison sentence. This procedure is followed very satisfactorily in many states having adequate probation systems, according to the speaker.

The matter of paroles was also defended by Mr. Ryan, who stated that a very small percentage of those so released are returned to prison because of violation of their paroles.

There are now more than 400 Federal prisoners at the Milan institution, most of this number being short termers or those who are awaiting trial in Federal court. There are about 20 women there, some serving life sentences. Mr. Ryan gave some interesting life histories of inmates showing how association with criminals had caused their downfall.

In defending his belief in the humane treatment of prisoners, Mr. Ryan invited anyone in his audience who believes that there are some who would rather spend their time inside prison walls, to spend a few days as his guest, going through the regular prison routine as now carried out, and in his opinion they would be thankful to return to the freedom which they now enjoy.

### RAISE FLOOD RELIEF FUND

Officials of the local Red Cross chapter wish to thank the people who responded so generously and quickly to the call for flood relief money to be raised here. Word was received Saturday that the local quota was \$20.00 and the appeal for funds was announced from the pulpits of local churches on Sunday. On Wednesday the total donations had reached \$47.00 and it was believed that more money would be received by today. The \$20.00 asked for was sent as soon as it was raised and the remainder of the money will be sent today or tomorrow for the relief of those who are suffering as the result of the flood. The money has been collected at Chelsea State Bank and the entire amount will be sent to Red Cross headquarters.

**Health Items**

**Conclusion**  
 Until some future time these Osteopathic Health Items will be discontinued. They have appeared in this newspaper for the last four months and the interest taken in them has been gratifying.  
 The purpose of these Health Items have been to acquaint the people of this community with Osteopathy. In the past many people with little or no idea of what Osteopathy is have made many ridiculous statements. At times we all make the mistake of receiving information at the wrong source. If you want information on Osteopathy get it from an Osteopathic Physician. Information on drugs from a Medical Doctor, information on a religion from a clergyman of that denomination. This life is too short and too complicated for one man or a group of men to have all the knowledge on all subjects. The healing arts have many branches and it is impossible for one doctor to have complete information on all forms of treatment. This being so it is not ridiculous to ask a man on the street what Osteopathy is? It is equally as bad to ask a Medical Doctor what Osteopathy is. Keep in mind that an Osteopathic Physician is not limited to the treatment of a few conditions. Even though this statement has been made many times some misguided soul will make the assinine remark: "Osteopathy cannot cure appendicitis." The answer is, if it is an acute case of appendicitis there is only one treatment—surgical removal by either an Osteopathic or Medical surgeon. Remember that Osteopathy is effective in Pneumonia, Influenza, Bronchitis, Rheumatism, Colds, Whooping Cough, Neuritis, Lumbago, Asthma, Nervous, Heart, Stomach and Kidney troubles, Mumps, Measles and many, many other conditions. Osteopathy is not a cure-all but if you are being bothered with some ailment why not at least ask an Osteopathic Physician if he can do something for you. If you have a question write to Osteopathic Items, P. O. Box 331, Chelsea, Mich.

**LAUNCHES SAFETY DRIVE**

On April 1, Oldsmobile launches its third "Points of Safety Inspection Drive" to further enlist the interest of Oldsmobile owners in driving cars that are mechanically safe. The safety drive will continue all through April and May, and safety inspection service will be carried out in the service departments of more than 3,500 Oldsmobile dealers. Safety inspections will not be limited to Oldsmobile owners, but will also be accorded owners of all other makes of cars who are sincerely interested in the cause of safer driving.  
 "It is our hope," states J. J. Dobbs, general service manager for Oldsmobile, "that at least 300,000 car owners will avail themselves of our dealers' safety inspection during the two months. And we have good reason to believe that we will attain this total. Last fall, more than 60,000 Oldsmobile owners alone participated in Oldsmobile's second Safety Drive.  
 "A moment's reflection on the part of all car owners," continued Mr. Dobbs, "will show that unusually good reasons exist for safety car inspection this spring. We are only now emerging from one of the most severe winters in all history. Motor cars, everywhere throughout the country, have been put to unusually severe usage. Extremely cold weather, deep snows and icy roads made winter car operation very difficult and subjected cars to severe strains. No doubt there are thousands of cars that require immediate attention, not only to put them in economical operating condition, but in safe operating condition as well.  
 "To that end, our dealers will make safety inspections of six points that ordinarily are subjected to the most wear and tear: brakes, lights, horn, steering, tires and windshield wiper. Perfect condition of these elements is vital to safer driving in safer cars. The past winter has been hard on all six points, especially brakes and tires. It is equally necessary that lights, steering and windshield wiper be put in good operating condition.  
 "All Oldsmobile owners will receive written invitations, as well as personal and telephone requests, to avail themselves of our spring safety inspection on these six points. All other motorists are likewise invited to take advantage of this privilege. We are just as much interested in having them drive safe cars as we are in the

welfare of our own owners. The inspection will reveal anything wrong and the car owner will be informed as to what should be done to put his car in safe operating condition."

**Wax Coating on Fruit**  
 Nature protects all ripe fruit by a surface of wax. This wax or cutin is not only a protection against shriveling through loss of moisture but is also a protection against parasitic fungi. In the case of apples this wax layer serves as a protection against "bitter pit" and other breakdowns that apples are subject to after storage periods of considerable length.

My spirit is a part of His. O mystery of mysteries.  
 He speaks to me, I understand, And yet I wonder how I can; He comforts me—how do I know? Why, just because He tells me so; A thrill of rapture so divine to know I'm His, that He is mine; Once I embraced a stubborn heart, My life was bitter—all was dark; I followed on to know the Lord, I heard His voice, I saw His cross; I sensed His love, beloved His word, He speaks to me, I understand, And yet, I wonder how I can.

I cannot tell, I do not know The glory of you heavenly choir, The glory songs I'm singing here; So often set my soul on fire, I'll sing and praise, I'll sing and pray In Jesus name, for well I may; Perhaps the song I sing this hour I'll sing up there with greater power.

—Arthur Carlton.

The churches in Chelsea and vicinity have made extensive plans for their Easter services on next Sunday, March 30.

Mrs. M. J. Dunbar of Waterloo township died on Saturday, March 22, 1902.

**PARMA**—Plans for a \$50,000 roadside park development program in 1936 were announced by the state highway department. A Jackson county park costing \$4,100 will be located two miles southwest of Jackson on M-60. The plans call for the construction of twelve roadside parks along tourist highways in eleven counties of the state. All of the parks will be developed at sites where roadside springs are located.—News.

**PLYMOUTH**—Editor Elton R. Eaton and Mrs. Eaton, on their way home to Plymouth from a trip to Florida and Washington, D. C., are marooned in the floods which are sweeping the eastern states. They telephoned the Mail office yesterday from Hagerstown, Md., where they are "stranded" in the hotel, unable to leave because all the surrounding roads are under water. They hope to be home this week-end, if the water recedes.—Mail.

**Question And Answer Dept.**

**Ques.**—I see you answer most anything in your question column so I wonder if you can answer me these questions: Where can I buy "Uncle Tom's Cabin", printed in Boston, in 1852, and "Science and Health", printed in Boston in 1875; "Black Beauty", by Anna Sewell, printed in London in 1877.  
**Ans.**—"Uncle Tom's Cabin" and "Black Beauty" may be purchased in any well-appointed book store, particularly in any city. For us to name any particular establishment would be considered as free advertising. For "Science and Health" write to the Christian Science Monitor, Boston, Mass., which publication will gladly supply your wants.

**Ques.**—I would like to know why chickens, birds, etc., don't fall off their perches when they are asleep?  
**Ans.**—The muscles of all fowls legs are so arranged that when they are on a perch in a squatting position the toes are bent and holds them firmly and cannot open until the birds begin to rise to a standing position which occurs automatically as they rise. A bird cannot fly from its perch while still in a squatting position. It must start to rise before those muscles relax.

**Ques.**—Please answer if bananas grow on trees. If not, how do they grow?  
**Ans.**—Bananas do not grow on trees. They grow upon herbs which require about three years' cultivation before they are productive of the fruit.

**Ques.**—Can you answer why it is that tea is the universal drink of the Chinese?  
**Ans.**—Tea is universally drunk in China because there is an age-old law of the Chinese government that all drinking water must be boiled for sanitary reasons. Tea renders boiled water palatable. Hence all their boiled drinking water has a "tea" flavor.

**Ques.**—What three countries in Europe have the greatest Jewish population? Also how does the United States compare with them?  
**Ans.**—In Jewish population Poland and Ukrania lead the world with 3,300,000 each; the United States is third with 2,100,000, and Russia is fourth with 900,000.

**Ques.**—Is Hollywood, Calif., and Beverly Hills, Calif., in the same county as Los Angeles? What is the name of the county or counties?  
**Ans.**—Yes. They are in the same county—Los Angeles county. Hollywood is about ten miles northwest of the city of Los Angeles and Beverly Hills about 20 miles northwest of the city.

**Ques.**—Is Belgium the most densely populated region in Europe? If it is not, will you kindly answer which is?  
**Ans.**—The most densely populated region of Europe is the island of Malta, with nearly 2,000 persons to the square mile. Belgium has about 700 square miles.

**Ques.**—To whom and how was the British flag surrendered to the Americans at Yorktown?  
**Ans.**—The respective captains of twenty-eighth British regiments surrendered cased British flags to a squad of twenty-eight Colonial sergeants detailed for that purpose. In order that the British officers might be spared the indignity of surrendering their flag to a non-commissioned officer, Col. Hamilton ordered the ensign in charge of the American squad to receive the colors and in turn deliver them to the sergeants.

**Ques.**—Why is "lb." the abbreviation for "pound" and "oz." the abbreviation for "ounce"?  
**Ans.**—"Lb." is the Latin abbreviation for "libra", which means pound. In making it plural the "s" was added by the English. During the fifteenth century the abbreviation for "ounce" was oz. This abbreviation was for "onza", which is Italian, meaning ounce. This abbreviation was retained by the English because it had become a symbol rather than an abbreviation.

**Ques.**—Is it true that there was once a President's wife who did the family wash in the East room of the White House? If it is, can you tell me who it was?  
**Ans.**—John Adams' wife once dried the family wash in the East Room of the White House, but did not do the washing there. She did this because of the inclemency of the weather for drying clothes.

**Ques.**—Why is some hair straight while other hair is curly?  
**Ans.**—This is because straight hair is cylindrical and will not curl. Curly hair is flat and has a tendency to curl. The difference is not seen by the naked eye, but if you use a microscope you will see the difference.

**Ques.**—I would like to ask you why kings wear purple white on the throne?  
**Ans.**—In ancient times purple dye was so expensive that only the wealthiest people could afford it. This color was adopted by the royalty. Therefore the use of that color is a survival of ancient times.

**Ques.**—I would like to know why Jud Tunkins says he'd like to run for office, but it looks too much like deliberately putting yourself on the spot for a gang to shoot at.

**DEXTER**—Mr. and Mrs. H. A. Steinbach have received word from the office of Harold Ickes, Secretary of the Interior, that their home has been selected as one qualifying for the Historical American Building Survey. Buildings selected will be measured in detail and photographed for record as a contribution to the study of historic architecture. A large oil painting of the Steinbach home is on display at the Ford Museum at Greenfield Village.—Leader.

**DEXTER**—The engineers in charge of the Dexter school project, built under the supervision of the PWA, started moving their equipment the last of last week, and this week work on the actual building operations has started. It is expected that the addition will be ready to use when school opens for the next fall term.—Leader.

**A Kitchen as Cool as Any  
 Room in the House - -  
 Flowers Will Bloom  
 on the Oven!**

Another beauty of an Electric Range is its coolness. Heavy insulation of the oven seals the heat inside where it is needed. Even with a temperature of 450 degrees inside, you may lay your hand on the outside of the oven. Actually, you may place blooming flowers on the oven during the cooking operation without wilting them! This is because there are no fumes or escaping heat either through vents in the oven or through its insulated walls.

Formerly, the kitchen was always the hottest place in the house and one to be dreaded in summer as a "sweat-box." Today, with electric cookery, it may be the coolest. You may carry on baking or roasting operations in a cool, fresh kitchen without being "done to a turn" yourself!

**COME SEE A CAR  
 THAT'S BIGGER  
 THAN ITS INCHES!**

A SIXTEEN-FOOT tape won't measure the bumper-to-bumper stretch of a Buick Special and a yardstick gets lost in its back-seat head-room space.

But what yardstick have you for power so smooth, so quiet, so effortless that only the song of the wind in your ears tells you how swiftly you are flying?

How can you measure steadiness, and that down-to-earth sort of road-hugging travel that makes you feel so much more secure in a Buick, no matter what your pace?

What gauge have you for pride of ownership, or your wife's delight in a car that is more manageable than her knitting needles?

The Buick Special is what the trade calls "a big package." It offers much in measurable things, more than holds its own in side-by-side comparison.

But it has an extra edge in the eloquent fact that it's a Buick—and we'd like to show you how that makes it bigger than its inches.

JERUSALEM SCHOOL NEWS

The school month of March closed for the Jerusalem school March 20. The percentage of attendance was 95.7. Those neither absent nor tardy for the month of March were: Joyce Hahsley, Donald Koch, Arlene and Wilma Koengeter, Dan McLean, Billy Stierle, Robert and Clara Trinkle and Jane Schlosser. We have two new pupils, Jane and Lois Schlosser, who came from the McLaren school. The visitors during the month were Miss Roberta Fowlkes of the Chelsea public school, and Miss Bernadine Wheeler. The 7th and 8th graders took their county tests during March. The eighth grade did well in the tests. The beginners are now first graders. They have all read four books so far, and are very busy reading more. They are keeping all their 100 per cent seat work papers and have a good collection pasted in their book which they are making. The beginners, first, second, third and fourth grades have been working on a Netherlands project. They have many things of interest in the sand box pertaining to it. They have made several posters and added stories and drawings to their Holland booklet to which they add every year. Another picture was added to the "Picture Study Book," "The Fog Warning." The president of our Civic Health club now is Clara Trinkle and the secretary is Arthur Schiller. In music work we have our scrap book complete to as far as we can do it for the time being. Marian Schiller has cut the letters for the cover and assembled the book. We have learned the instruments of the symphony orchestra and can identify them. We have the records for our music appreciation work and are working on that and are studying the lives of the composers. Several of the children went to Chelsea Friday afternoon for the first rehearsal for the Music Festival. We are trying to do some work in nature study when we can. We have colored and studied some birds and have found and studied a bird's nest. We will be doing more work about nature study now. We have a good collection of books to study from. We have been combining our Art with Geography, Language and Nature Study quite a lot. Some pupils have illustrated rooms in very attractive color combinations. We are all working to get a reading certificate before May. The seventh grade has completed the health notebook and has made an attractive cover for it. The seventh grade also has the cover made for the Michigan Geography note book which we will start working on this week. The third grade has completed reading their Safety First book and has all the questions, answers and pictures put in a booklet. The fourth grade have finished the Rhine River unit and have their notebook up to date. The sixth and seventh grades have enjoyed looking at the pictures from our picture collection in correlation with the countries they are studying in Geography. We have appropriate pictures for March about the room. We have bowls of tulips decorating the windows.

## WHO ARE YOU?

The Romance of Your Name  
By RUBY HASKINS ELLIS

### An Alexander?

THE surname Alexander is derived from two Greek words meaning "to aid or help, a powerful auxiliary."

The Alexander family, according to antiquaries, was originally a branch of the Macdonalds, for Alexander Mac-

Donald, younger son of the Lord of the Isles, obtained a grant of lands in the county of Clackmannan where he made his residence and his descendants took the name of Alexander as a surname.

In the reign of James V, Andrew Alexander married Catherine Graham, his son Alexander married Elizabeth, the daughter of Sir Robert Douglas. After two generations we find William Alexander tutor to the Earl of Argyre.

### Alexander

who appeared at the court of James I of England, and by him was knighted in 1614. It was he who personally conducted the colonization of Nova Scotia in America, for which service the king made him a grant of the province. In 1625 he was made governor-in-chief of Nova Scotia, and Charles I, to encourage colonization there, created an order of Baronets, and made William Alexander viscount and earl.

Scottish Alexander of the same line came to America and settled on large tracts of land on the Potomac river. The city of Alexandria near Washington takes its name from this distinguished family.

A great general of the Revolutionary war was William Alexander, whose patriotic services in the war and especially in the Battle of Long Island, 1776, are records of remarkable bravery. He was also known as Lord Stirling, having inherited this title from Scottish forebears, dating back for many generations.

The Virginia Alexanders in this country began with John, who came from Scotland in 1659 and settled in Stafford county. He married Tabitha Smart. The Colonial and Revolutionary roster records many by the name of Alexander who were loyal to their country in time of war.

Robert Alexander (1730-83) was a founder of the first classical school west of the Blue Ridge, later named Washington and Lee university.

Alexanders in the New England states were represented by George, who settled in Windsor, Conn., and Robert, a native of Scotland, who was living in Boston in 1634.

### Earliest Glass Valued

The earliest known American glass is rarer than any jewel to a collector. It was made in the Jamestown colony in 1608 by Dutch and Polish glass blowers imported to make glass beads and rum bottles to trade with the Indians.

### Baseball Interest Grows

Two months before the opening of the baseball season this year 84 clubs and 2,000 players were enrolled in leagues in London, Liverpool, Birmingham, Manchester and Oxford, England.

### Several Ores of Nickel

There are several ores of nickel, which are found in different parts of the world, including Germany, Austria, Cornwall, and Scotland. For many years the greatest source of supply was in New Caledonia, a French island in the South sea. But more recently the greatest producing district has been Sudbury, Ontario, Canada.

### Salt Pits Are 130 Feet Deep

Salt pits bordering the Great Salt Lake, are 130 feet deep and of solid salt.

## The "Other Side" of the St. Lawrence Waterway

THE ST. LAWRENCE Seaway rejected by the U. S. Senate in 1934 on its imagined navigation merits is being stirred into life again with its electric power phases blithely offered as a co-equally important argument. But in neither respect is the seaway needed.

VIEWED as a transportation agency, we already have a lakes-to-the-sea route. On it can be, is being, economically borne all the products for which America can find world markets. (Our railroads with their 50% surplus of equipment can handle all traffic given them, now and through the coming generations.)

IT WILL create no new markets, nor new traffic. It is simply a new shipping route, diverting traffic from existing transit agencies. It will function only in summer when railroad efficiency is greatest and need of it would be the least. It will be idle five months each winter when need of it would be greatest.

IT WILL not benefit the auto industry; or the wheat farmer; or bring farm relief; or aid employment; or "cure the depression." It will shorten no trade routes. It has no military value.

VIEWED for its power (half of which belongs to Canada) again the seaway is not needed. The region cannot absorb the vast surplus of harnessed hydro power it now has. The seaway is so remote from consuming (but disinterested) markets that transmission costs would make the new power—as it does present power—so costly as to be unsaleable.

TO ABSORB the contemplated power an industrial district twice as large as Detroit's must be built adjoining the seaway. Without such a nearby market the power and the immense cost of its development would be wasted.

LASTLY, we must furnish the bulk of the new money needed for a project benefiting another nation more than our own and lying more largely in another's territory than in the United States.

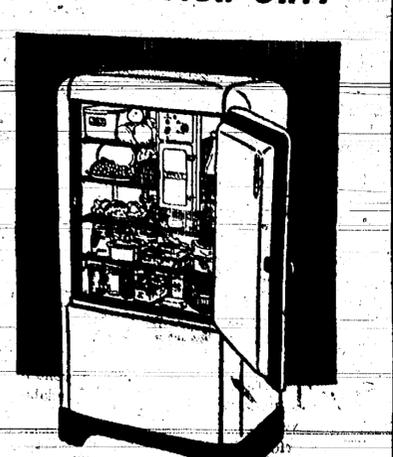

FACT, not fancy and emotionalism, should influence our consideration of the seaway. And the fact is America has come to know it as a project that is economically unsound.

Scout Camp Being Made Ready for Use

The Newkirk Reservation for Boy Scout troops, on the Huron river at Dexter, is being made ready for the organized camp which will open there on June 14. Many troops have already chosen the date when they expect to attend and patrols and individual Scouts are saving their money to participate in the summer camp.

Boats are being repaired and repainted—tables and benches painted, additional tree planting and other improvements being made. Practically every week-end one or more troops go to the camp for a troop encampment and to make what improvements they can at their Scout Reservation.

"The next time you say to yourself, 'perhaps it can be used at the Scout camp,'" reads a bulletin from the Council office, "phone or write us suggesting what you have which you no longer need which might be used at the Scout camp. Here are a few things we need: Small stove, kerosene stove, boats, cots, chairs, dishes, tents, cooking utensils, lumber—used lumber O. K., paint, tools of all kinds, chests, tool box. There are very few things which could not be used at Scout Camp, where not only during the summer but practically every week-end through the year, groups of Scouts come with their leaders, for scout stays."
