FORMER RESIDENT HONORED WITH SKETCH OF LIFE HISTORY

An article appearing in the March 29 issue of a Wheeling, W. Va. newspaper, tells of the life of A. J. Fallon of Martins Ferry, Ohio. As will be seen in the item, Mr. Fallon was born in Chelsea where he resided for several years, and will be remembered by many local residents. Under the heading "Know Your Neighbor," the article is as follows:

Arthur J. Fallon, Martins Ferry sales promotion manager for the Consumers Brewing Co., of Newark, Ohio, was born in Chelsea, Mich., on Sept. 22, 1879, the son of Timothy and Rose Fallon. He was educated in the local schools of Chelsea and later attended Sandwich Academy at Windsor, Can.

Shortly after the turn of the century Mr. Fallon came to Wheeling. In 1901 he became connected with the corrugating plant of the Whitaker company. Some years later he went into the men's clothing business in Martins Ferry to which city he moved in 1907. During the World war he served as a member of the draft board. At one time he was employed by the Telling Belle-Vernon Co., from which he resigned to become secretary-treasurer of Belmont Products Co., and then served in the same capacity for the Belmont Brewing Co. At present Mr. Fallon is sales promotion manager for Martins Ferry and surrounding territory for a nationally known brewing company.

In 1907 he was married to the former Miss Rena E. Masters in Wheeling. They are the parents of three children—Arthur J. Fallon, Jr., attorney-at-law; Mary Catherine Fallon, registered nurse, and Thomas W. Fallon, assistant city clerk of Martins Ferry.

In his younger days Mr. Fallon was a close prisoner of the piscatorial pastime, especially on the lakes of Michigan, and still enjoys the splash of a lure into the face of a bass. But of late his favorite pastime is defending his euchre championship at the Martins Ferry lodge of B. P. O. Elks. He maintains that he is a bowler of great ability, but his friends are still demanding proof. He is well-known throughout the Ohio Valley as a speaker both before and after dinner and can always oblige with an appropriate talk at any notice.

Mr. Fallon is interested in church affairs and is a very active member of St. Mary's Roman Catholic church. A past exalted ruler of Lodge 895, B. P. O. E., he has for many years served as a trustee for that order. In addition he is a member of the Knights of Columbus.

Ravens Larger Than Crow

Larger than a crow, not as large as a vulture, ravens measure nearly two feet from beak to tip of tail. Their glossy black plumage, inky beaks and jetlike eyes give them a funereal appearance which is heightened by the hoarse croaks they emit. Ravens have been tenants of the London Tower for so long that no one knows when they first came. One may conjecture that not long after William the Conqueror founded this great fortress, ravens flew in from the then-surrounding forests to nest on its high turrets.

The Waterloo Project

(Continued from page one)
ture and the problem is increased in importance.

To offset this change in land utilization we have established "food-patches" or plots on the better agricultural land ranging from one-half to five acres in size. Each plot will be planted with a food supplying grain that is capable of standing up through the winter's snow and of retaining its food value until spring. Corn is one of the best grains for this purpose and is generally used. These patches are kept under observation to determine those most used to indicate the best locations and the species of wildlife benefited.

The lack of sufficient vegetative ground cover to form protection and nesting sites is also an important limiting factor for the presence of wildlife. Much of the land included in the area is farm land from which has been removed practically all of the timber, shrubs, brush, vines, etc. In certain areas only a very sparse growth of grasses and weeds is present.

During the spring and fall seasons when weather conditions permit planting, the above described cover is being replaced as rapidly as possible. These new plantings are small and will require several years to reach a sufficient size to be of much value to wildlife. During this period, however, temporary plantings of annuals and biennials will provide any needed cover. This work is carried on simultaneously with the reforestation planting.

For the last several months surveys and census have been conducted to determine the species of wildlife present in the area and their relative numbers, small areas of wildlife concentration, location and numbers of nests, the amount of dead game and any other facts that will tend to tell the complete story of the habits and needs and desires of the individuals that make up old wildlife populations.

During the spring and fall migratory seasons waterfowl have been live-trapped, banded, and released. A description of the individuals is recorded and filed with the State Conservation Department and the United States Biological Survey as well as in our own office in an effort to determine where our waterfowl go when they leave our lakes and as an educational feature. During the hunting season last fall ducks banded here were shot in Northern Ontario and all the way south to Texas.

Since all the lakes in the area are open to public fishing, considerable work is being done to improve this recreational feature. A creel census has been running almost continuously for more than a year and has provided a vast amount of valuable information. This data is used as a basis and a guide for lake improvement and has been obtained only through the fine help and cooperation of the 9000 fishermen who have used the lakes during this period.

This has been but a brief resume of this phase of the development work of the Waterloo Project. More detailed discussions will appear in later issues.

Next week the article will deal with the geology of the area.

• If you think that "all low-price cars cost about the same" — for get it! They don't.

You can prove these figures — on the open road — in a car provided by the nearest Ford dealer.

• When you've finished your personal check-up, ask yourself:

"Do I want to save money the day I buy my car and every mile I drive it?"

"Do I want a safe, roomy, comfortable car of advanced design — created from the finest materials — to the highest precision standards?"

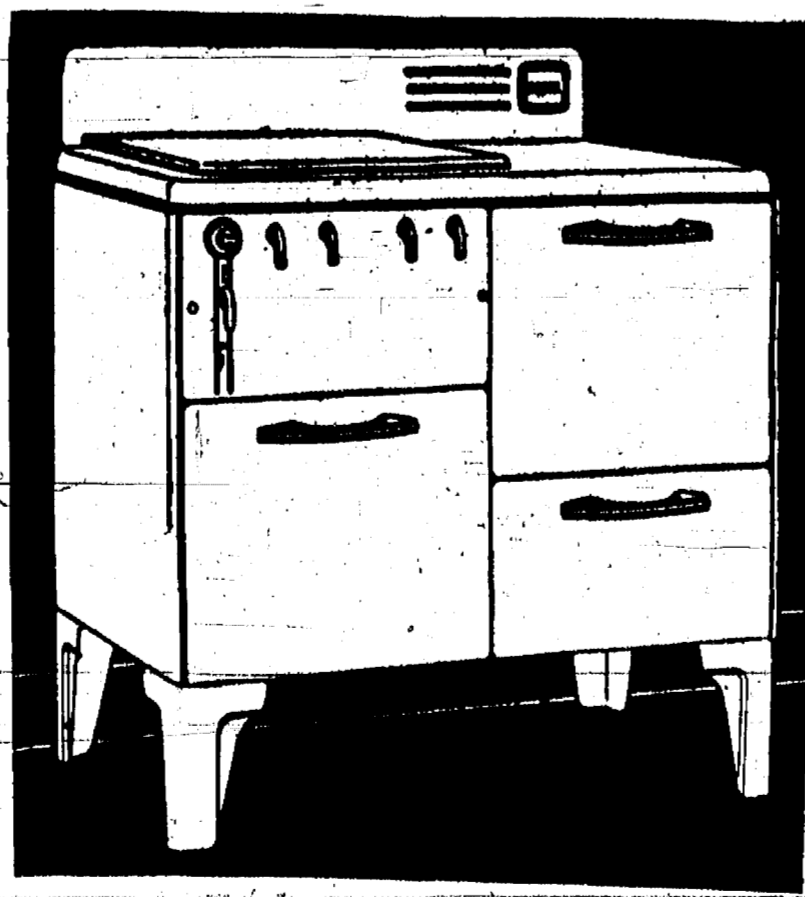

There's only one answer, of course — the 1937 Ford V-8.

Ford V-8 \$529 at Dealership. Prices begin at \$529. This is the 60-horsepower V-8. This price is for the 60-horsepower V-8 equipped with front and rear bumpers, spare tire, hood, windshield wipers, run valves, glove compartment, and ash tray.

Graduation

"Anticipation is greater than reality." It was with great expectation that as underclassmen we looked forward to being Seniors. Our idea of that great honor was to have the admiration of lower classmen, have the sun of the school, and work towards our goal—graduation. Then our ambitions would be reached.

However, with June on the horizon things look a bit different. All our hopes have been reached, we must again set another goal in life to work for. Soon each of us will be choosing individual paths to follow, and we will no longer have the guidance of our teachers.

So as Seniors begin now making our farewells.

Take Pictures

Were you wondering what was the cause of all that hurrying and scurrying out and in classes last week too? I was also until a little private investigation and question-asking proved it to be time for the various clubs, classes and teams to have their pictures taken for the Senior Annual. When the pupils were called they met out in front of school and looked pretty while Mr. McManus "shot" them.

The same old questions were asked in the same old way—"Doesn't my hair look a sight?" and "I wish I had on a different dress, don't you?"

Lose to Belleville

Chelsea lost to Belleville in the season baseball opener, 1-0, as the local nine succumbed to the Belleville squad as Timoski scores. Timoski was walked in the first of the third with one man out, was forced to second on another walk and came home on put-out. Timoski pitched five innings and was relieved by Kennedy. In Chelsea's half of the second inning Bahnmiller doubled, Prudden walked, and Brueckner walked, filling the bases. Halley flied out to Belleville's left fielder and Bahnmiller was caught out third and tagged out. "Onie" stepped to the plate and fanned to end the inning. This dimmed Chelsea's hopes, but in the final inning Halley reached third. Niehaus was hit by a pitched ball. Then Marsh fanned and Heaman flied out to the Belleville catcher to end the inning and the game.

Many Drivers' Licenses Will Expire This Year

On the heels of his recent announcement of a drive-by-police of Michigan against unlicensed operators of motor vehicles, Leon D. Case, Secretary of State, points out that nearly 700,000 such licenses will expire during the next nine months. The exact figure is 688,434.
Licenses cost \$1 and are good for three years. They are issued as provided in the Uniform Operators' and Chauffeurs' act of 1931, the result being that every third year following that date, the bulk of operators' licenses expire.
Secretary Case points out that a driver whose license has expired, is no different, in the eyes of the law, than one who never had a license at all; and that the only way to make certain of an operator's license, is for everyone to check his own expiration date at once. It is printed on every license.
All applications for operators' licenses must be approved by the chief of police if the applicant lives in a city or village having a chief of police, or by the sheriff, if the applicant lives elsewhere.

SAVAGE SCHOOL NEWS
We have our room prettily arranged with spring decorations. On our windows are colored flowers, and bordering the black board are black, brown and yellow chickens. On our curtains are various types of paper butterflies.
Winners in our April health race are Frederick Weber, and Phyllis Weber. Frederick received a color book, and Phyllis received a play wrist watch as prizes.

Thomas Franklin is leading on the spelling chart for the lower grades.

Mary Kathryn Weber will receive a dictionary and a medal from the Detroit News since she was our school's spelling champion. We are sorry she was unable to attend the district contest April 16, in which she would have competed with the school champions from other schools. This contest was held at Dexter.

Paul Bollinger's seventh birthday was celebrated by a marshmallow roast on Friday.

Raymond Radcliff has moved east of Chelsea, but will continue attending our school the remainder of the year.

Those children having a perfect attendance record for April are Paul Bollinger, Thomas Franklin, Raymond Radcliff, Frederick, Mary Kathryn, and Phyllis Weber.
Mrs. Robinson visited our school on Wednesday, April 14. She gave reading, achievement tests to the children. We all made at least one year's growth on this test. Our beginners, Frederick Weber and Alta Young, both passed their test with a score of 100 per cent.

Wore Prince Alberts
In the "nifty nineties," most United States senators wore Prince Alberts. The frock coat was a symbol of statesmanship and a beard was the mark of a man of maturity and substance.

HOW BLEST THE THOUGHT

How blest the thought
That Jesus knows
Each tide of grief
That o'er me flows;
My hopes, my fears,
"My hopes, my fears",
My bitter woes,
He knows, my Jesus knows.
The daily cross that I must bear,
The deep anxiety and care,
The crown of Thorns, I too must wear,
He knows, my Jesus knows.

Who's out front for steady restful going? It's Buick again—with its close-to-the-pavement balance, its built-in "road sense" and stability, its swayless even-keeled sailing even on the sharp turns.

Who's out front for thrift with thrilling

pace? It's Buick again—here's a car-buretor patterned after airplane practice that thrifflily gets the most out of gas from valve-port to tail-pipe, this car's engineered to give you more power from each unit of fuel!

Who's out front for style? Your own excited eye tells you—its Buick again. And when it comes to stand-out value, you've only got to match this great eight with the others to see why Buick's handsome nose is the place to put your money!

Who's out front? You will be this summer if you step in to see us now and get a first-hand eyeful of this great car. It's smart to get your order in early—then you'll surely be out front behind a Buick wheel when the first warm day comes.

Her Sunday guests were Mr. and Mrs. Arthur Johnson and son Buddy and the Misses Barbara Fay and Ellen Nickerson, also from Pontiac. Miss Nickerson also called on an old family friend, Mr. Carley.

Saturday forenoon we were glad to welcome home Mr. and Mrs. Brown from spending nearly two weeks in Washington, D. C., where they were the guests of their nephew and enjoyed the cherry blossom festival. Evidently the whirl of social activities in the capital was rather more strenuous than is customary in the Home, but they are now beginning to get rested.

On Sunday afternoon the Home family had a very unusual treat. The choir from the Trinity M. E. church in Flint came and gave us a truly musical afternoon. The visiting group were thirty-four in number, including their pastor, Rev. Harry A. Brower, and his wife and children and other interested friends. They brought a pot-luck luncheon with them and Mrs. Bennett provided a highly acceptable dessert. Mrs. Bennett's husband was pastor of the Trinity church at the time of his death, and Dr. Leeson had been pastor there for four years when he was appointed superintendent of the Home, and his son Louis is still a member of the choir. Naturally the Trinity church feels a great interest in the Home and its present management.

GRASS LAKE—Grass Lake voters will have an opportunity on Wednesday, May 12, to approve or disapprove the question of issuing a bond in the sum of \$55,500 for the construction of a water works system in this village, the council, at a meeting Tuesday evening having passed the necessary resolutions authorizing the step.

GRASS LAKE—Two diamond rings supposed to have been lost in the fire which destroyed the John McLean home north of Leoni Saturday evening, were later found in the ruins encased in melted glass. They belonged to the daughter, Mrs. Wm. Boyer, Grosse Pointe, who was visiting her parents and had been placed beside a bottle on the dresser. The melting glass over the rings formed a protection and a cleaning will restore them to perfect condition.

PLYMOUTH—In line with other Michigan cities, Plymouth business places, except drug stores, ice cream parlors and gasoline stations, will close promptly at 9 p. m. Saturday nights, starting on April 24. A committee of business men have already obtained the signatures of almost every commercial establishment, and expect, before next week-end when the plan will be inaugurated, to have 100 per cent support.

DEXTER—Many citizens of Dexter and vicinity are unaware of a hustling industry in our midst. Murray Brothers have built a new saw mill on the banks of the mill pond near the cemetery that employs eight men. A new 75 horse power motor has been installed and this has speeded up production so that the mill has a capacity of 10,000 board feet per day. Much of the best lumber produced goes to ship-building. The new building is 56 ft. by 68 ft. and will ultimately house the rest of the wood working machinery that is now in the crating mill on Fifth Street. This Dexter industry is not well advertised as the Murrys have a faculty of saying little and "sawing wood."

MASON—Spring, which came Wednesday with gentle showers, was ended with a severe electrical storm Wednesday night. The downpour of rain changed to snow and King Winter took charge as April 15 arrived. Ingham highways were choked with eight inches of the wettest and heaviest snow in years. Snow plows had been taken off the highway trucks April 1. It was after seven o'clock Thursday morning before trucks hurriedly equipped with plows took to the roads. The snow was so heavy with water that it could hardly be moved. Fifteen trucks and cars were marooned at the golf course hill when the first plows arrived. Big limbs were broken off trees by the heavy snow. Junipers, cedars and smaller shrubs were flattened by the weight of the snow. Traffic was paralyzed until late afternoon. Consumers Power service was interrupted when the wet snow bore wires down. Western Union telegraph service was interrupted for several hours. Many radio aerials wilted under the weight of the snow.

Million Lambs May Need Extra Pasture

Michigan's 1937 crop of more than a million lambs, in addition to their million parents, may face the need of extra pasture this summer, according to the inquiries coming to the office of George A. Brown, head of the animal husbandry department at Michigan State College.

Temporary pasture for June can best be obtained by sowing Canadian field peas and oats at the rate of one bushel of each per acre as soon as the ground can be worked. For July and August pasture sow dwarf Essex rape broadcast at the rate of 6 to 7 pounds on fertile soils or on lighter soils drill in rows 28 inches apart, using 2 or 3 pounds of seed per acre and cultivate. As a rule rape should not be sown before the tenth of May. Late in June the rape will be ready to pasture and the area from which the peas and oats were pastured may be broken up and seeded to rape for September and October pasture. One acre is considered enough pasture for 15 to 20 sheep for a period of two months, depending upon the season.

A third temporary pasture crop that is suitable for July and August cropping is sudan grass, but this is not seeded before June 1. Twenty-five pounds drilled to an acre is recommended. The first fall frost will kill off this growth. For more permanent pasture programs, Brown suggests efficient use of alfalfa. Many farmers on recommendation of the college are building alfalfa acreage to the point where first cuttings are sufficient for hay supplies and potential second cuttings are utilized for pasture.

GET UP NIGHTS DUE TO BLADDER IRRITATION?

It's not normal. It's nature's "Danger Signal." Make this 25c test. Use buchu leaves, juniper oil, and 6 other drugs, made into little green tablets called Bukets. Flush out excess acids and impurities. Excess acids can cause irritation resulting in getting up nights, scanty flow, frequent desire, burning, backache, and leg pains. Just say Bukets to your druggist. In four days if not pleased your 25c will be refunded. J. V. Burg, Druggist. Adv.

Many times in this column I have brought out the fact that courtesy is a very important item in the prevention of automobile accidents. Personally, I believe that through the practice of courtesy on the part of pedestrians and the automobile driver, 90 per cent of our accidents could be avoided.

The other day I saw an unbelievable thing! A truck driver stopped his truck at a busy downtown crossing to help an old lady across the street to safety. One reads about these things occasionally, but this was the first time I had personally had an opportunity to see it. The action of this driver not only built up good will towards the firm he represented, but he impressed me with the fact that courtesy will prevent accidents. Had he been reckless, careless, or had he taken seriously the fact that the "Go"

sign was with him, this old lady might have been involved in an accident.

Courtesy builds good will—courtesy prevents accidents. Try it!

MAY REDUCE OBNOXIOUS FISH
Lansing—The spring months offer a good opportunity for sportsmen to reduce the supply of obnoxious fish in their favorite lakes by organizing night parties and spearing them with artificial light, conservation authorities say.

Carp, dogfish and garpike spawn on a rising water temperature and may be speared in large numbers at certain times from as early as the latter part of April until in June.

Night spearing parties by artificial light for the purpose of taking obnoxious fish are legal so long as the event and those participating are approved by the local conservation officer by permit or he is personally present to assist in the work.

First Plows of Tree Branches
The first farm plows were made of crooked tree branches and worked by man power.

Always on the Job

STREETS are deserted. Homes are dark. Night has wrapped the community in slumber.

In one building, however, a light is still shining. It shines on steadily through the hours of darkness until, at last, the dawn heralds the stir of another day. . . .

That light sums up the eternal vigilance of the telephone. It is truly a beacon of public

service, one that stands ready to serve any one, anywhere, any time. And always with the same promptness and skill and courtesy.

All that modern telephone service can mean—all its protection and convenience and comfort—is yours to command twenty-four hours a day.

It takes no holidays. It is, in an old familiar phrase, "always on the job."

Red Coral Always Prized
It is red coral that is and always
has been prized, not solely for jew-
elry and buttons, but as a charm to
bring safety, health and secrets not
revealed to the ordinary person. As
ancient Gauls rushed headlong in-
to battle, they trusted their safety to
their swords, strength and the
"magic" coral imbedded in their
shields or helmets. Many Italians
and Indians regard coral as protec-
tion against the "evil eye." The
world's red coral comes from the
reefs off the Mediterranean coast of
Africa, says the Washington Post,
and is obtained chiefly by Italians.
